In Universam Philosophiam
Proemium.

Philosophiam, navi magnam aggredimur. Et quidem prima facie adeo terret exilitatem ingenij, ut mens magna rerum mole perculsa, [illegible] facultatibus [illegible] desperet [illegible]. Fateor plane, si meis tantum nixus viribus, et studio nimium talentorum meorum rationi confisus, [illegible] darem huic operi manum, [illegible] [illegible] [illegible] [illegible] [illegible]. Sed quantum in virtute mea paucitate non invenio tantum de divinae sapientiae largitate mihi promitto. Eius erit opus benigno numine patrocinari, quae inspiravit et aggredi. Maiorem [illegible] gloriam quaerere ille dedit, ut ad maiorem sui gloriam perveniat, ille faciet. Et spero quidem facturum. Etenim non ipsi displicet in operibus manuum suarum versari mens hominum, et rerum creatarum investigationem non vetat, suadet. Et homini sublime dedit, et in sublimitate originis suae illius amorem cognitionis non tantum inferiorum, verum superiorum, imo ipsius divinitatis, praesignavit. Tradidit mundum hominum disputationi, et quamvis in rerum veritate [illegible] perquideat varo imperfectior, non dedignatur tamen, ut in studio veritatis immorentur, et si non omnia inveniant, ipsi tamen hoc rationabile donum perficiant, ut ipsum perquirant. Invisibilia Dei per ea quae facta sunt intellecta conspiciuntur, et scalam ascensionis mentis ad divina disposuit inter gradus creaturarum. Adeo ut homo per tot rerum mirabilem harmoniam in cognitionem supremi numinis nisi lumini sit [illegible], facile deveniat. Philosophiam igitur, quae amorem studiumve sapientiae significat, tali intentione tractemus, ut non in otiosa intelligentia naturarum contemplatione sistamus, sed maiorem Dei nostri cognitionem, et hac mediante ad maiorem amorem ascendamus. Amor sapientiae pariet amorem illius sapientiae, quae de suis amantibus dicit: Ego diligentes me diligo.

Universalis Philosophiae Censura Praeambula

Antequam [illegible] ad aliquid peculiare descendamus, non frustra[illegible] circa quaedam praemittere ad animi eruditionem, quae de Philosophia

habentes,

habentur, et quia brevitati studemus, ad maioris momenti quæstiones con-
tentendimenta, historicè potius quam Logicè hæc à probatis scriptoribus hausta
medullatim proponimus.

Quam nos nunc dicimus Philosophiam, varia olim nomina sor-
tita fuit, magis tamen eius proprietatem, et dignitatem explicantia quàm
eius naturam. Mors corporis vita animi à Platonicis, ab alijs animi medici-
na, similitudo hominis ad Deo, appellata fuit. Quare autem hoc nomen
addidicit, Philosophia obtinuerit liquet in Pithagoræ responsione. Is cum
interrogaret à Leontio Rege num sapiens esset, respondit se non esse sa-
pientem, sed Philosophum. idest. Sapientiæ studiosum. Quod nomen alijs superbius ita posteris
placuit, ut quantumlibet de rebus ad sapientiam pertinentibus quis-
que vel sibi, vel alijs videretur excellere, non nisi Philosophus vocaretur.

Hæc igitur philosophia à veteribus definita rerum humanarum et
divinarum causarumque quibus hæ res continentur scientia, infusa fuit Ada-
mo à Deo, quæ processu temporis ingravescente corruptione generis hu-
mani innumeris obnubilata erroribus, sicuti primo ætas iuventutis, nunc
ætas senectutis iure appellantur. Quis autem inventionis se iactant au-
thores Græci, qui de facto multum illi priori honoris suo studio, et la-
bore contulerunt. Thales, Pithagoras, Aristoteles, et innumeri alij Philo-
sophiæ decus, et ornamentum perverso nomine in orbem usque in posteros ora pervenerunt.
Ægyptij eundem sibi vendicant honorem, et non immerito: nam Thales
et Pithagoras Græcorum primi Philosophi ætate Regum sequuntur, de
quo habemus quod in omni sua Ægyptiorum instructus fuerit. Et quia
liquet Ægyptios praeivisse Græcos studio sapientiæ. Hos pro varietate re-
gionum varia nomina habuisse comperimus. Persæ, et Assyrij Magos, Ægy-
ptij Sacerdotes, Indi Gimnosophistas, Galli Druidas, Græci Sapientes, quos
Latini Philosophos, idest amantes sapientiæ appellaverunt. Et quia Philo-
sophi de veritate inquirenda profitentur, ad diversarum sententiarum

numerum

numerum, sunt circa ipsius veritatis indagatione, varia itidem nomina praecipue in Graecia, ubi maxime culta fuit sapientia, sortiti sunt. Qui invenisse veritatem iactitant Dogmatici, qui non invenisse, sed posse inveniri existimant, Sceptici (iidem sunt cum Academicis a Platone, aut potius ut alijs placet, a Socrate illius sectae inventore, postea Pyrrhonei a Pyrrhone Scepticorum sententiae autore) qui veritatem tandem inveniri desperant Acataleptici, sive novi Academici dicti sunt. Academici nomen [illegible] Academi loco a Gymnasio Athenis ad mille passus distante duxerunt. Academi locus erat, a Platonis ortu, a discipulorum frequentia insignitus. Hi [illegible] se numquam posse scire, nihil oportere affirmare, vel negare dicebant. Quae sententia ad haec usque tempora non sine suis ~~[illegible]~~ sectatoribus est [illegible] superstes. Sceptici cum Acatalepticis conveniebant, fatentes se nescire discriminare verum a falso; Nihilo tamen minus dicebant in veritatis indagatione esse sistendum. Dogmatici multa comprehendere, et plura ex ipsis pene omnia scire arbitrati sunt. Ne quid nimis. Hinc Dogmatici in sectas varias partiti sunt. Peripatetici Aristotile Principe sic dicti sunt quod deambulando philosopharentur. Stoici authore Zenone sic appellabantur a Poecile Portico celeberrima Athenarum ex eo quia ibi disputarent. Tandem Epicurei ab Epicuro, et aliae philosophorum sectae e schola Platonis sunt emanatae.

Quomodo autem exorta philosophia iam quasi adultae facta fuerit, paucis verbis innuit Aristoteles cum ait: Propter mirari coeperunt homines philosophari. Ignorantia n. eorum, quae mira in natura videbantur, peperit curiositatem, curiositas ~~[illegible]~~ studium sciendi, et causas effectuum investigandi; studium vero mediorum sive per mentis illationes, sive per experientias, usus tandem mediorum cognitionem eorum, quae quaerebantur, quaerentibus peperit.

Hijs circa corticem Philosophiae pigendum ad medullam saltem leviter attingendam transeamus. Supponamus magis quam contentiose probemus quae dicturi sumus. Non enim hic est locus pugnae cum vel nullus, vel tantum dici qui sit hostis, et cum nondum per Logicam instrumenta parata.

Philosophiam, quam juxta definitionem veterum supra traditam definimus rerum humanarum, et divinarum cognitio per causas, existere contra veteres Acataleptikos, et recentiores Academicos duce omnium pene doctorum asserimus. Quo circa rem sectari in dubium cum probationibus non audeo, satis per se probatam censens esse sapientiam.

Est igitur philosophia, cuius causas antequam aperiamus notandum est quatuor esse causas, nimirum finalem, efficientem, materialem, et formalem. Causa finalis consideratur dupliciter, in fine operantis, et in fine operis. Item finis alius est finis cui, id est in cuius commodum id ipsa cedit, et alius est finis cuius gratia, id est quod intenditur procurandum alicui. Sic finis cui in medicina est homo, in cuius commodum venit medicina, finis cuius gratia est sanitas, quae à medicina intelligitur introducenda in homine. Hinc patet finis philosophi tanquam operantis esse posse diversus pro varietate suarum intentionum. Finis autem cui est ipse homo philosophus, in cuius commodum est Philosophia. Finis operis vel est proximus qui proxime, vel remotus, qui non sic intenditur. Sic finis proximus philosophiae est rerum cognitio, virtutisque operatio, finis remotus est animi naturalis beatitudo, qui etiam est finis cuius gratia, nempe id quod intelligitur à philosophia in homine introducere.

Causam efficientem Philosophiae dicimus esse ipsum Deum, qui Adamo eam infudit, cum in statu illius nobilissimae excellentiae illum creaverit. Adam enim fuit philosophus philosophia infusa, et colligitur ex eo quia rebus creatis nomen imposuit, quod sapientiae, et rerum naturas cognoscentis. Talem cognitionem non à creato magistro accepit cum primus omnium ipse fuerit, non ex se comparavit, quia experientia multum temporis importat, ergo remanet dicendum, quod

à Deo

ipse infusa fuerit. Ergo Deus est causa efficiens philosophiae.

Causa materialis pro nunc est duplex, id est materia in qua, et materia circa quam, illa subiectum, haec obiectum importat. Subiectum aliud est quod, et aliud quo. Subiectum quod est quod immediate recipit aliquid et ab illo quod recipit denominatur. Sic paries est subiectum quod albedinis, et ab ipsa denominatur albus. Subiectum quo est illud quo mediante forma superveniens in subiecto mediato recipitur. Sic superficies parietis est subiectum quo albedinis, per quod paries albus dicitur. In casu nostro subiectum quod est ipse homo, qui recipit mediante intelle-tum ~~recipit~~ philosophiam, et denominatur Philosophus, et sapiens. Subiectum quo est intellectus, sive mens humana, quia est id, quo homo recipit sapientiam, et disciplinas. Quoad obiectum spectat duplex item reperitur. Aliud est obiectum materiale, aliud formale. Materiale est illud quod consideratur, vel circa quod versatur scientia. Formale est ratio, sive modus talis considerationis. Obiectum igitur materiale Philosophiae sunt res omnes, prout patet ex ipsius superius allata definitione, formale est quatenus res ipsae sunt scibiles per causas.

Causam formalem Philosophiae non invenimus, cum ipsa sit forma quaedam, seu qualitas homini, ut sit philosophus, superveniens. Possumus dicere habendum esse pro forma eius decentem ordinemque dogmatum rationumque dispositionem.

Methodum antiquorum Platonicorum et Stoicorum sequentes dividunt Philosophiam tamquam in tres classes Philosophiam. Primam quae disserendi in cognitionem veri, et falsi inducit Dialecticam, quae ad mores componendos ethicam seu moralem, tertiam vero quae de rebus in natura occultis agit Physicam appellant. Per Metaphysicam nihil aliud intelligunt nisi eandem eam naturalis philosophiae physicae dictae, ideo a sensibus longe remotiorem eas-[illegible] ~~[illegible]~~ Deum, primas entis affectiones, quantitatesque considerantem. Haec de Philosophia in communi sint satis.

In Dialecticam

In Dialecticam Summulae

Superatis difficultatibus quibus ad Philosophiam in universum aggredimur illam partem tractandam quam Dialecticam Graeci Latini disputatoriam appellant. Quia vero juvenibus solet brevis impedimento esse, quae fusius in Logica traduntur exemplo maiorum viri prius communi ore quas vocant Summulas in tres partes iuxta tres operationes mentis quas Logica informare intendit dividas. Brevitati studebimus ut et tenus tedium quod res adeo sicca parere solet, et ut rationi nominis consulamus; non enim summulae dicerentur nisi breves essent.

Tres igitur mentis operationes sunt. Prima dicitur apprehensio et contingit quando intellectus concipit aliquid nihil de illo affirmando vel negando. Concipiens e.g. rosam nec dicit Rosa est pulchra nec Rosa non est pulchra. Haec apud Philosophos vocatur simplex apprehensio non quia per ipsam res simpliciter tantum attingamus sed quia eam ipsam adeo simpliciter et nude attingamus ut de ipsa nihil [illegible].

Secunda dicitur judicium et evenit quando apprehensa re simpliciter circa eam intellectus judicat et dicit Rosa est pulchra vel Rosa non est pulchra. Dicitur etiam compositio ex eo quia componit rosam cum pulchritudine et judico quod sit pulchra, judicium [illegible] per modum affirmationis et [illegible] ut in allato exemplo de Rosa seu per particulam est ut aiunt verbum copula [illegible] pulchritudinem per modum negationis et dicitur divisio et [illegible] Rosa non est pulchra dividendo et separando pulchritudinem a Rosa, ut ex se patet.

Tertia dicitur discursus et contingit quando ab aliquo noto transimus ad inferendum aliquid ignotum. In allata Rosa prius apprehensa [illegible] per apprehensionem mentis judicata pulchra ac mens discurrit: Quidquid est pulchrum delectat, Rosa est pulchra, ergo delectat. Ubi [illegible] quod a pulchritudine Rosae per judicium nota infert intellectus delectationem Rosae prius ignotam. Igitur veniamus ad singula.

De Signo, Voce, Nomine, et Verbo.

Solent multi de hac re tractantes exordium ducere a terminis in quibus vere apparet apprehensio. Nos non inutile ducimus aliqua praenotare in praesenti articulo de Verbo, de Nomine, de Voce, de Signo. Terminus n. vel est Verbum aut nomen. Nomen et verbum sunt Vox, Vox est signum. Igitur non male exordimur, si exordimur a signo tanquam a principio.

Signum est id quod facultati cognoscitivae aliud a se repraesentat. Vel ut alii placet, est id quod in alterius rei cognitionem nos ducit. Sic v. g. fumus est signum, quia in notitiam ignis nos ducit. Sic pulsatio campanae est signum, quia non se ipsum, sed v. g. concionem, sacrum, et quid simile repraesentat.

Duplex pro nunc est signum, aliud naturale, aliud ad placitum hominum. Sic risus est naturale signum laetitiae, lacrymae, et suspiria moeroris naturale signum sunt. Ad placitum autem hominum est v. g. pulsatio campanae quae modo aliquid, alio modo aliud juxta institutionem hominum significat. Sic detractio capitis, et inclinatio est signum ad placitum, quia pro placito hominum haec instituta ~~fuerunt~~ sunt ut significent, aliud atque venerationem et submissionem, aliud vero odium et obiter.

Vox est sonus ab ore animali naturalibus instrumentis formatus quae sunt instrumenta vocis habere ex Aristotele lib. 4 de Historia Animalium, videlicet pulmo, arteria, guttur, lingua, palatum, dentes et labia quae [illegible] ad aliquid significandum. Sed forte pro locutione quae multiplex ad [illegible] confundit, omnia haec instrumenta erant necessaria. Mugitus n. Boum, ululatus Luporum, suspiria dolentium sunt quidem voces, attamen ad has instrumentis naturalibus formationem non est opus. Unde merito haec voces dicuntur inarticulatae, aut quae tantum animalibus proveniunt. Quae autem articulatae dicuntur habent quidem omnia ad sui conformationem naturalia, [illegible] instrumenta et haec sunt ~~[illegible]~~ pro locutione de qua ait [illegible] ubi supra. tiō, is obid est ac quibus esse non is omnibus et locutio est. Ubi
vides animalis rationalis idest homines esse voces articulatas emittere et
nec loqui cætera nec animalia non nisi vociferari.

Dices Psittacus voces articulat ergo non est solius hominis voces articulatas emittere. 2do Angelus Gabriel locutus est Mariæ ergo non
est tantum animalis loqui. Ad contra ad 1um dico quod Psittacus mittat voces articulatas et si imitetur humanas voces emittere [continentes aliquid significandi]. Praeterea
apud homines sunt voces quæ quidem habent significationem
quia talis fuit hominum acceptio, et placitum ideo nec ullius articulatio.
Sed tales sunt voces abundantes vocalibus, nemus habentes de consonantibus
et talis sunt quæ dicuntur a Psittaco. Quæ voces ab Aure audita et
eorum sono fruentes quasi imitant et movent ad similem desinentiam
suæ voces quod ob facilitatem tantum non verum suum si vocem naturalem aliquis Psittacus audiret. [continentem aliquid significatum intendit.] Ad 2um dico Angelos dici improprie quod
loquantur, et non invenies a scripturis Angelos eum locutos fuisse
hominibus intellige metaphorice et non per sonum vocis, ab instrumentis
naturalibus prodeuntis.

Voces igitur articulatæ sunt signa non naturalia sicut voces inarticulatæ gaudii, vel tristitiæ sed ad voluntatem hominum. Homines enim ad
manifestandos animi conceptus convenerunt in nominandis rebus
dependenter ad institutionem verbi quod parvum significat quod
verbum est vocem quia lapis significat quod vox est lapis. Circa
hoc auctoritas evertitur hodie, vel etiam agam in signum vim sensibilis stat a hominum arbitrio quod illa lauris significat vim vinum sensibile
quam nanam quum hodie igitur indicia sunt vocis [illegible] homines
dare [illegible] quale illas significationem neque bene dixeris signa ad placitum.

Notum ex Philosopho Lib. 1o de interpretatione c. 2 quod vox significativa ad placitum sine tempore, cuius nulla pars significativa est separata.
Ad hanc etiam rationes quæ a vocis capite collocantur: Tinita, et vita. Dicis
sine tempore ad exclusionem verbi quod tempus importat. Nec obstat quod

aliqua.

aliqua nomina connotent tempus v.g. annus, dies &c, nam aliud est significare tempus, aliud significare cum tempore; significare vero cum tempore est praeter propriam significationem importare aliquam differentiam temporis sicuti importat Verbum v.g. amo non solum importat amorem sed etiam tempus praesens, quo exerceo hunc amorem. Nec etiam obstant nomina alia videlicet hesternum, crastinum, quae videntur significare differentiam aliquam temporis idest mediani, vespertini nam meridianum, et vespertinum non sunt differentiae temporis quae sunt praeteritum, praesens, et futurum. dices quod saltem haec nomina praeteritum, praesens, futurum significant differentiam temporis. contra: aliud est significare differentiam temporis aliud importare differentiam temporis cum aliqua actione: primum in his nominibus admittimus quia nomen quod significat differentiam temporis est sicut aliud nomen quod aliud a tempore significat. 2dum autem dicimus esse solius verbi quod tempus importat et cum tempore significat. Quod si dicatur iterum saltem admittenda esse haec nomina amaturus, lecturus tamquam importantia differentiam temporis, et cum tempore significantia contra Grammaticos, et dicunt haec non esse nomina sed modi verbi vel qui per relativum qui, quae, quod resolvuntur et dicis Petrus amaturus Petrus qui amabit.

Dicitur finita ad exclusionem nominum infinitorum, quae improprie loquendo ut dicit ibidem Philosophus non sunt nomina. Non homo, non equus non sunt nomen. Dicitur recta ad exclusionem casuum obliquorum qui non nomen sed casus nominis dici possunt. Hinc patet evidenter etiam adverbia non vi ipsa sunt nomen.

Dicitur tandem cuius nulla pars significativa est separata, ad distinctionem orationis, cuius partes sunt significativae etiam separatae et pertinet. Advertas quod si aliquando occurrunt nomina cuius partes videntur significare ut habetur apud Aristotelem l.c. Equiferus, hic ferus et sic in oratione habeat suam significationem non sumunt nisi per partem componentem.

Verbum est

Verbum est ex Aristotele lib. 1. cap. 3 quod consignificat tempus, cuius pars nihil significat separatum, et est semper earum quae de altero praedicantur nota. Ultima particula definitionis, quae non adeo clara est innuit quod verbum semper se tenet ex parte praedicati (Quid sit praedicatum et subiectum dicto sequenti videbimus) sicuti in hac propositione Petrus amat, verbum amat se habet ut terminus praedicati, praedicatur enim amare de Petro, et patet si resolvitur cum copula est dicendo: Petrus est amans. Propositio sic resoluta dicitur de tertio adiacente in qua particula est efficit praedicatum tantummodo. Propositio vero Petrus amat dicitur de 2do adiacente, et in ipsa verbum habet, ut dixi, rationem ipsius praedicati.

Adde etiam huic definitioni quae colliguntur ex eodem capite Philosophi, videlicet, quod sit vox finita, et recta. Non amo non est verbum sed verbum infinitum sicuti dictum fuit de nomine. Sic pariter amavit, amabit non sunt verba sed casus verborum. Ex quo colligo rationem propriissimam verbi non convenire nisi praesenti indicativi. Non facit enim veram propositionem tempus futurum v.g. Petrus amabit vel praeteritum: Petrus amavit, nisi quia aliquando erit, vel fuit verum dicere Petrus amat.

Articulus 2us
Quid, et quotuplex sit Terminus

Philosophus lib. 1o cap. 1o Priorum sic ait definiendo terminum: Terminum voco in quem dissolvitur propositio ut praedicatum et de quo praedicatur aut apposito aut diviso esse, aut non esse.

Antequam explicemus definitionem notandum est tria requiri ad faciendam propositionem videlicet subiectum praedicatum et copulam. Subiectum est id de quo aliquid dicitur et praedicatur. Praedicatum est id quod dicitur et praedicatur de alio. Copula est verbum nectens praedicatum cum subiecto

In hac pro-

In hac propositione patet quod datur. V.G. Petrus est homo. Ly Petrus est subiectum de quo humanitas praedicatur. Praedicatur n. quod sit homo. Ly homo est praedicatum quod praedicatur et dicitur de Petro. [illegible] Ly est est copula nectens et uniens ~~ly~~ hominem cum Petro. igitur in hac propositione. Petrus est homo, sunt tria, nimirum subiectum praedicatum, et copula. Subiectum, et praedicatum vocantur termini propositionis.

Ecce quomodo patet definitio Aristotelis. Termini sunt [illegible] praedicatum et id de quo praedicatur idest subiectum. Quibus si apponas est vel non est habes propositionem, a quibus autem si separes est, vel non est propositio dissolvitur. Sic in allata propositione: Petrus est homo, et in hac alia: Petrus non est homo, si tollas in 1a est, in 2da non est remanent nudi termini, sicque est dissoluta propositio

Dividitur 1o terminus in mentalem, vocalem, et scriptum. Mentalis est quando mente concipio hunc terminum Petrus vocalis cum ore profero: scriptus, cum calamo ipsum exaro in papyro.

Dividitur 2do in significativum et non significativum. Significativus est qui aliquid ex hominum placito significat ut hic terminus: Lapis qui demonstrat id, quod homines vulgo solent appellare lapidem, Non significativus est illa vox vana et vulgata in scholis Blictri vel similis barbara vox non fuit instituta ad aliquid significandum. Nec dices quod etiam haec vox nihil est insignificativa non n. aliquid significat sed nihil significat, contra n. vox Blictri nullam habet ab hominum placito significationem, sed nihil habet significare ea ratione omnium verum.

q. Dividitur 3o in concretum et abstractum. Concretus est qui formam et subiectum informatum una simul significat. V.G. Sanctus; qui terminus et formam et subiectum sanctum et ipsam sanctitatem significat, Abstractus est qui tantum formae est significativus ut hic terminus. Sanctitas, albedo, &c.

Dividitur 4o

Dividitur 4to in Categorematicum, et Syncategorematicum. Categorematicus est qui per se aliquid significat ut Leo. Syncategorematicus est, qui nihil per se sed cum alio significat, ut sunt hi termini: Omnis, aliquis, nullus. Nam si dicas, omnis homo, aliquis Canis, nullus Leo, in nullius rei cognitionem venitur. Vocatur etiam terminus syncategorematicus sinus, quia quodammodo signat, et afficit propositionem in qua est, eam determinando universalem cum termino omnis, nullus, particularem cum termino aliquis, singularem cum termino hic.

Dividitur 5to in simplicem, et complexum. Simplex est cui nulla pars separata est significativa ut Dominus, a quo si separes aliquam syllabam syllaba separata nihil significat. Recolite quae de nomine adto praecedenti vocavimus. Complexus est, cuius partes separatae significant per modum substantivi, et adiectivi ut hic terminus: Alexander magnus.

Dividitur 6to in finitum et in infinitum. Finitus est, qui aliquid determinat ad id, quod est. Ut terminus homo praedicatus de Petro determinat et affirmat quid sit Petrus, nempe quod sit homo. Infinitus est qui determinat aliquid ad id quod non est. V.g. hic terminus, non lapis si praedicatur de Petro indicat id quod Petrus non est. Petrus n. est non lapis. Dicitur infinitus, quia potest dici de rebus infinitis. De omni n. eo quod non est Petrus valet dicere quod Petrus non sit. Sic Petrus est non lapis, Petrus est non Leo, Petrus est non Canis &c. Adverte autem ad hoc ut fiat propositio infinita particulam non praeponendam esse copulae, et debere negare praedicatum. Si n. anteponas negat copulam, et fit propositio negativa ut est ista Petrus non est lapis.

Dividitur 7mo in communem et singularem. Communis est qui de pluribus dicitur ut homo, singularis qui de uno tantum ut Petrus dici potest.

Dividitur 8vo in transcendentalem, et categoricum, vel non transcendentalem. Transcendentalis est id quod de omni re tam possibili quam existente potest dici. et continetur in hac voce. Reubau idest Res Ens unum,

bonum

~~aliquid~~ omnem aliquid verum. et dicitur transcendentalis, quia transcendit, et vagatur super omnia praedicamenta. Non transcendentalis sive categoricus est qui de spectantibus ad unam categoriam seu praedicamentum dicitur ut homo arbor, qui veniunt in praedicamento substantiae. quae sint praedicamenta et categoriae infra videbimus.

Dividitur 9° in terminum collectivum, et divisivum. Collectivus est qui de pluribus praedicari potest simul sumptis non autem de individuis, ut hic terminus Congregatio, quae de omnibus congregatis simul sumptis dici potest, non autem de singulis. Non enim valet dicere: Franciscus est congregatio, Joseph est congregatio. Divisivus est, qui plura significat et de pluribus dici potest. Ut homo qui tam de Petro, quam de Paulo praedicari potest.

Dividitur 10.mo in absolutum et connotativum. Absolutus qui rem perfecte et complete significat. Ut hic terminus homo. si enim dicis homo est in cubiculo, habes perfectam cognitionem quid sit in cubiculo. Connotativus est qui a re solo non habet perfectam significationem sed respicit, et connotat aliud; ut hic terminus. niveus. si enim dicas niveus est in cubiculo, nescis an homo an canis niveus sit. Hinc dicitur nomina substantiva esse absoluta et per se significare; adiectiva vero non nisi connotando aliquid aliud esse significantia.

Dividitur xi.mo in pertinentem et impertinentem. impertinens est qui nullam ad alium dicit connexionem, ut hi termini Mons, et Aula undequaque impertinentes. Quae enim connexio inter montem et aulam? Pertinens est qui ad aliud dicit respectum, ut nox et dies. Hic ne multiplicentur divisiones loco recensent termini oppositi. Oppositio enim, etsi dicat repugnantiam, ostendit tamen inter opposita aliquem ad invicem respectum. Oppositio est quadruplex contraria contradictoria privativa, et relativa. Termini contrarie oppositi se invicem destruunt. ut calor et frigus. Contradictorie oppositi versantur inter esse et non esse, inter rem, et negationem rei ut sapiens, et non sapiens. Privative op-

positi

posti sunt quando unus dicit formam alius carentiam formae, ut nullo capi: ut visio, et caecitas. Relativa sunt cum unus dicit ordinem ad alium a se distinctum. Ut Pater et filius. Filius enim et Pater distinguuntur, et tam Pater ad filium, quam filius ad Patrem dicit respectum.

Dividitur XII.mo in Univocum, Analogum et Equivocum. Univocus est qui secundum nomen et secundum significationem communis est dicitur de pluribus ut animal, quod tam de Leone, quam de cane, quam de homine valet dici, et idem significat, nempe quod tam leo, quam canis, quam homo sit animal. Analogus est qui de dissimilibus dicitur, habentibus tamen aliquam rationem convenientiae ut hic terminus: Caput qui dicitur tam de capite hominis quam de capite libri, quam de capite exercitus. Disconveniunt enim in ratione capitis, quatenus non sunt capita ut caput hominis, conveniunt tamen in ratione principii quatenus caput consideratur tanquam principium. Equivocus est qui ne omnino diversa significat. Ut hic terminus Piscis qui dicitur et de Pisce natante in aquis, et de sydere caelesti.

Dividitur XIII.o in terminum primae intentionis et in terminum 2.ae intentionis vel ut alii vocant in primo intentionalem et 2.o intentionalem. Terminus primae intentionis est, qui dicit rem prout est a parte rei sine mentis reflexione. Ut cum dicitur hic terminus homo prout nihil aliud significat nisi naturam humanam a parte rei existentem. Terminus 2.ae intentionis est qui habet illam significationem quam ipsi dat intellectus reflectens. V.g. in hoc termino animal invenit intellectus rationem generis respectu hominis, Leonis et canis et cum sumit hunc terminum animal quatenus est genus talium inferiorum dicitur quod sit terminus 2.ae intentionis. Iste terminus 2.o intentionalis fit ab intellectu. Quod animal sit genus non pendet nisi ab intellectu reflectente hominem leonem, canem convenire in ratione animalis, atque dicit animal esse genus ad haec inferiora. Termini 2.ae intentionis vocantur communes et universales, quatenus intellectus de pluribus eos praedicat colligit et praedicat. Quinque enumerantur, videlicet. Genus, species, differentia, proprium, et accidens. in quorum gratiam quandam instituimus quaestionem totus tamen in Logica dos dante de ipsis acturi

De terminis universalibus.

Termini, de quibus nunc agimus, ac re universales appellantur tetigimus in actu praecedenti, quia multis semper conveniant, et a Logicis vocantur etiam praedicabilia universalia, quia de pluribus dicuntur. Diximus etiam quod sint quinque, videlicet Genus, Species, Differentia, Proprium, et Accidens. Haec omnia conveniunt v.g. in Petro. Petrus enim est animal, ecce Genus, est homo, ecce species, est rationalis ecce differentia, est visibilis, ecce proprium, est sapiens, ecce accidens. Jam de singulis.

Genus est universale praedicabile de pluribus in quid incomplete. Haec definitio est per se clara praeter illa verba in quid incomplete; quae innuunt quod per genus praedicatur essentia rei, sed non omnimode. Patebit in exemplo. Si dico: Petrus est animal. Hoc animal ut patet venit in ratione generis, et explicat essentiam Petri. Si quis enim interroget quid est Petrus, respondetur est animal. Sed quia per animal tota essentia Petri non exprimitur. Non enim Petrus est tantum animal, bene dicitur quod incomplete in quid sit praedicabile.

Duplex est Genus supremum, et subalternum. Supremum quod et generalissimum dicitur, est quod nullum aliud genus habet supra se nec aliquando potest esse species. Sunt talia genera substantia quantitas, qualitas relatio, actio, passio, ubi quando, situs et habitus. Genus subalternum est quod non est adeo genus ut non possit esse species. Sic animal est genus respectu specierum, quibus praeest. Est autem species si generi superiori comparetur v.g. substantiae.

Species est universale praedicabile de pluribus ~~in quid magis~~ differentibus numero in quid complete. Homo est species respectu Petri et Pauli individuorum numero tantum inter se distinctorum. Dicitur quod praedicatur in quid, quia dicit essentiam et complete, quia totam essentiam praedicat. Si enim interrogantur quid est Petrus respondetur quod sit homo totam essentiam exprimendo.

Duplex

Duplex autem est species alia nempe infima alia subalterna. 1a est quae nunquam potest habere rationem generis quia respicit tantum individua sibi subiecta ut homo est species infima, non n. valet praedicari nisi de individuis humanis quod sint homines. 2a est, quae quandoquidem est genus si comparetur speciebus inferioribus, ut animal quod respectu v.g. ~~[illegible]~~ hominis brutis, etc. est genus. Species vero subalterna respectu superioris generis, nempe substantiae.

Differentia essentialis (dico essentialis, quandoquidem sunt ~~[illegible]~~ aliae differentiae quae confunduntur cum proprio et accidente) est universale praedicabile de pluribus in quale quid; vel ut alii aiunt et quidem sanius in quale post quid. Si interrogante n. quid sit homo cum responsum fuerit esse animal, si interroget quale animal, ostendes ipsi differentias ab aliis animalibus si dicas animal rationale. Rationale n. est differentia hominis. ~~[illegible]~~. Differentia essentialis est duplex generica et specifica. Illa discriminat genus ab alio genere ut corporeum ab incorporeo. Haec speciem a specie, ut homo qui ~~[illegible]~~ differentia rationali distat a bru- ~~[illegible]~~

Proprium quadrupliciter sumitur. 1o convenit soli speciei sed non omni individuo ut homini esse philosophum. Convenit n. soli speciei humanae, sed non omnibus individuis. 2o convenit omni individuo, sed non soli speciei ut homini esse bipedem convenit n. omni homini non autem soli speciei, quia etiam convenit avibus. 3o convenit omni soli sed non semper. Ut homini in senectute barbam emittere. Convenit n. hoc soli speciei humanae, omnibus tamen suis individuis. Non autem semper quia non semper homo barbam emittit. Quandoquidem moritur intempestive. et tamen est homo. 4to convenit omni, soli et semper, ut esse risibile. Soli n. speciei humanae et omnibus suis individuis et omni tempore convenit esse risibile. Et hoc habet pro proprio universali, quod definitur universale praedicabile de pluribus in quale inseparabiliter. Dicitur n. quod risibile sit qualitas hominis sed inseparabilis quia esse risibile fluit ab esse rationali; et de se invicem reciproce praedicantur, nam dicimus omne rationale est risibile, et omne risibile est rationale.

Accidens est

~~Accidentis~~ universale praedicabile de pluribus in quale contingenter. Vt patet in doctrina v.g. Petri, per quam contingenter praedicatur de Petro quid sit doctus. Quod sit doctus Petrus equidem ut patet est contingens. Definitur etiam accidens, illud, quod potest adesse, et abesse sine subiecti corruptione ut doctrina in Petro albedo in cane quae possunt adesse, et abesse quin Petrus desinat esse Petrus, et canis desinat esse canis. Non dic de albedine nivis quae est non viribus humanis, per divinam tamen potentiam potest a nive separari sine nivis corruptione.

Collige ex dictis differentiam praedicabilium. Nam genus praedicatur de in quid incomplete, species in quid complete, differentia in quale quid, seu in quale quidditativum, et essentiale, proprium in quale inseparabiliter, accidens in quale contingenter. Et sic in summa habes notitiam universalium, quae in Logica maius negotium facessunt.

Articulus 4.tus
De Terminis Categoricis.

Categoriae sunt quaedam classes rerum, quae terminis exprimi solent. Vocantur etiam praedicamenta et suprema genera, ad quae omnia reducuntur. Et sicut termini universales ita dicuntur universalia quatenus de inferioribus praedicantur, ita etiam categorici dici solent prout in classibus categoriarum reponuntur. Cum aliquibus Philosophis dici possint duae tantum esse Categoriae substantia videlicet, et accidens, quia quidquid est vel per se subsistit et est substantia, vel alio indiget tamquam subiecto, et est accidens. Sed quia claritati studiosorum requiritur plurium exemplorum, hanc secundam categoriam accidentis in novem classes partiendo sic omnia praedicamenta dicimus esse decem. Tot enim dicimus praedicamenta quot interrogationes de aliquo individuo v.g. Petro fieri possunt. Si interroges enim quid sit Petrus respondes esse homo ecce substantia, si quantus, magnus, vel parvus, ecce quantitas si qualis, sapiens, ecce qualitas. dicitur alterius quid sit Princeps ecce relatio, quod sit in cathedra ecce locus, quando quod sit nuper ecce quando seu tempus, quod sit armatus, ecce habitus, quod sit sedens, ecce situs quod pugnet ecce actio quod feriatur ecce passio.

Ad memo-

Ad memoriæ mandanda iuvabunt sequentes versus in quibus omnia decem prædicamenta continentur.

Vir grandis, fortis, Princeps armatus ad urbem,

Vesperi veniatur dimicat excubitur.

Substantia est ens per se subsistens ad differentiam accidentis, quod inhæret alio nempe substantiæ. Substantia est duplex universalis, et singularis. Illa hæc, quæ dicitur prima, est quæ non est in subiecto nec de subiecto prædicatur ut Petrus substantia singularis Petrus non est in alio subiecto, sed est ipse Petrus nec de subiecto prædicatur, quia non habet alia subiecta de quibus prædicari possit, cum sit singularis. Illa, quæ dicitur etiam 2.a est quæ de subiectis prædicatur, ut homo substantia humana de omni homine dicitur. Accidens autem dicimus cum philosopho quod est in aliquo non ut pars, nec separatim potest existere intellige naturaliter sic candor nivis non est pars nivis, sed tamen inest alicui, nempe nivis substantiæ. Quæ sequuntur sunt categoriæ, et prædicamenta accidentis.

Quantitas est accidens quo aliquid dicitur quantum. Si interrogas quantum sit v. g. lignum dicendo, quod sit palmare vel bipalmare exprimis eius quantitatem. Quotiescumque vero audies has voces quantum vel quam, vel quot v. g. quot homines, quam diuturnus quantum latitudinis intellige semper quæri de quantitate.

Quantitas est duplex discreta, et continua. Discreta est cuius partes sunt separatæ, nec inter se copulantur ut quantitas orationis ut numerus quantitas numerica. Continua est cuius partes mutuo nexu copulantur. estque hæc iterum duplex permanens, et successiva. Illa est, cuius partes ~~simul existunt~~ ut fluunt ut motus et tempus, illa, quæ semper, et simul existit, ut iterum est triplex, Linea quæ tantum dicit longitudinem. superficies quæ longitudinem, et latitudinem dicit. Corpus tandem quod trina dimensione constituitur quantum nimirum longitudine, latitudine, et profunditate. Quantitas vero præcipue a Mathematico consideratur.

Qualitas categorica, ad discrimen qualitatis differentiæ et propriæ prædicabilium, est accidens quo aliquid dicitur tale. Interroganti v. g. qualis sit v. g. homo, respondeo

erit talis

esse talis vel a qualitate ~~[illegible]~~ doctrinae dignoscitur vel ... Quadruplex est qualitas; 1o enimvero habitus et dispositio. Habitus est prima facilitas ad agendum exercitio comparata, dispositio est quae facile amitti potest, potest etiam dici aptitudo ad habitum comparandum. 2o naturalis potentia et impotentia, ut ~~naturalis potentia~~ facultas videndi indita a natura quae si suum munus implet dicitur potentia, si autem est infirmior dicitur impotentia. 3io ~~dici~~ patibilis qualitas, et passio. Illa est vel in gradus vel radicata qua qualibet sensus potest affici v. g. color, calor, sonus. Passio dicitur illa qualitas quae cito transit, nec immoratur ut rubor faciei a pudore, vel pallor a timore excitatus. 4a Forma, et figura. Forma, quae etiam species dicitur est quae afficit oculos. Figura est spatium undique clausum, ut circulus vel quadrangulum etc.

Relatio est accidens, quo unum ad aliud refertur. In relatione ~~[illegible]~~ sex considerantur: Relatio ipsa, ipsius correlatio, ~~relatum, correlatum~~, extrema relationis, subjectum relationis, fundamentum, et terminus relationis. Patent omnia in relatione Patris ad filium. Paternitas est relatio quae refert Patrem ad filium. Filiatio est correlatio, quae filium refert ad Patrem. Extrema relationis sunt ipse Pater et filius qui etiam relatum et correlatum vocantur. Subjectum relationis est Pater, terminus est filius, qui complet relationem paternitatis. Ideo namque est Pater, quia filium genuit, atque fundamentum relationis est generatio.

Actio est accidens quo aliquid dicitur agere formaliter ut quando sol calefacit, equus currit, homo pingit. Actio est duplex immanens et transiens. Immanens est cujus terminus remanet in agente, ut visio, auditio, intellectio, quia non transeunt ad id quod videtur, auditur, intelligitur, sed remanent in ipso agente. Transiens est cujus terminus fertur in passum ut calefactio quae transit in subjectum quod calefacit.

Passio est accidens, quo aliquid dicitur pati formaliter. Ut cum tabula est patiens cum colores recipit, manus est patiens cum recipit calorem. Pati namque est aliquid ab aliquo recipere.

Ubi non

Ubi est accidens, quo aliquid dicitur esse in loco. v. g. in cubiculo, vel in aula. Duplex est ubi definitivum circumscriptivum, ~~et sacramentale~~. Circumscriptivum est quando ubi est in loco et correspondet partibus loci. et hoc ubi convenit tantum corporibus. Definitivum est quo ubi est tota in toto, et tota in qualibet parte loci. et hoc ubi est tantum substantiarum spiritualium ut patet in anima quae est tota in digito, et tota in toto corpore, non ci correspondet partibus loci. Additur etiam tertium ubi, quod sacramentale vocant respectu corporis Christi. et est illud quo Christus est totus in toto, et totus in qualibet hostiae parte, cum hoc tamen ad discrimen animae quod eodem instanti sit etiam in alijs locis, in alio tempore, in alijs altaribus etc. De hoc tertio ubi magis Theologus, quam Philosophus consulendus est.

Quando est accidens, quo aliquid dicitur esse in tempore. Ut esse nunc, fuisse heri, futurum esse cras. Differentiae temporis sunt praesens, praeteritum, et futurum. Quando dividitur in tempus, et aevum. Tempus est mensura rerum corruptibilium, quae habito initio expectant finem. Aevum est mensura rerum permanentium, quae scilicet habuerunt initium, sed non expectant interitum, ut anima, angeli.

Situs est accidens, quo aliquid in loco existens habet talem vel talem dispositionem suarum partium ad partes loci. Ut esse incedere, vel rectus stare sedere iacere et similia, quae ut patet non sunt contra naturam; contra dicuntur situs naturalis esse v. g. in nostro capite et pedibus [illegible] nullo modo contra naturam dicitur situs [illegible].

Habitus est accidens, quo a circumadiacentia externorum habituum vel armorum etc. denominatur aliquid esse ab eo v. g. armatus togatus etc.

Haec igitur sunt praedicamenta, seu decem classes in quibus omnia quae sermone exprimi possunt locantur. De his Categorijs in Logica suo loco methodo agetur. interim habes saltem brevem eorum notitiam, quae non inutilis erit cum accuratius tractabuntur. et haec de terminis Categoricis sint satis. De suppositione aliisque terminorum affectionibus

Suppositio est acceptio, et usus termini loco rei quam terminus significat. Cum loquimur et disputamus non possumus res de quibus loquimur in medium afferre, utimur terminis rerum significantibus, ut qui ludunt utuntur calculis et signis loco denariorum. Ait Arist. 1o Lib. Elenchorum c. 1o: Cum non licet, ut res ipsas ferentes disputemus sed nominibus pro rebus, utimur signis. et quod accidit in nominibus, in rebus quoque arbitramur accidere, quemadmodum ij, qui calculis supputant. Haec Philosophus.

Dividitur 1o suppositio in materialem et formalem. Materialis est acceptio termini pro se ipso, ut cum apprehendo hunc terminum homo, pro voce conflata ex duabus syllabis. Formalis est acceptio termini pro re significata ut cum apprehenditur homo pro natura humana a parte rei existente.

Dividitur 2o in simplicem et personalem. Simplex [illegible] apprehenditur terminus prout subest 2ae intentioni. cum sumitur v.g. genus tanquam aliquid universale, ut animal tanquam genus abstractum a suis inferioribus. Personalis est acceptio termini pro re, et non pro ut subest 2ae intentioni, ut cum accipio animal pro principio sentiendi, et si dico homo est animal possum etiam de suis inferioribus personaliter praedicare quod v.g. Petrus, et Paulus et Joannes sit animal.

Dividitur 3o in propriam, et metaphoricam. Suppositio propria est usus termini pro re quam ex instituto hominum sine translatione habet significatam, ut cum utimur hoc termino, risus, ad exprimendam cordis laetitiam. Metaphorica est usus termini translati ad impropriam significationem, ut cum dicitur. Risus pratorum, flores [illegible].

Dividitur 4to in distributivam, collectivam, disjunctivam et confusam. Distributiva est cum accipitur terminus tanquam praedicabilis de suis inferioribus singulatim et distributive sumptis ut hic terminus, animal, qui de Petro, de Paulo suis inferioribus valet praedicari. Collectiva est usus termini praedicabilis de suis inferioribus simul acceptis non vero singillatim

ut hic

terminus. Duodecim Apostoli. Petrus et Andreas Joannes et reliqui enumerati sunt duodecim. De omnibus ergo igitur valet dicere quod sunt duodecim; non autem valet dicere Petrus est duodecim Apostoli, Andreas est duodecim Apostoli etc. Disiunctiva est usus termini pro aliquo non pro omnibus ex inferioribus. V. g. aliquis Leo rugit ly aliquis innuit quod descendendo per omnes Leones deveniamus ad Leonem c. qui rugiat, et non quod et Leo a, et Leo b rugiant. Confusa est usus termini pro inferioribus confuse sumptis ut cum dicitur omnis Leo est animal non dicitur quod sit omne animal, sed vel hoc vel illud animal. Ubi videtur differentia suppositionis disiunctivae et confusae, quod in disiunctiva distinctio per particulam vel importata cadit supra subiectum, ut aliquis Leo est rugiens idest quod vel Leo a, vel Leo b rugit; in confusa vero distinctio cadit supra praedicatum, ut omnis Leo est animal idest quod sit vel hoc vel illud animal, non autem omne animal.

Dividitur 5to in suppositionem pro singulis generum et in suppositionem pro generibus singulorum. Suppositio pro singulis generum est usus termini applicabilis inferioribus tam proximis quam remotis omnibus contentis sub genere, ut animal qui terminus tam Leoni, quam homini est applicabilis. Suppositio pro generibus singulorum est usus termini applicabilis alicui, non tamen omnibus ex inferioribus, ut si dicerem omne animal fuit in Arca Noe. ly omne animal supponit tantum pro aliquibus animalibus ex omnibus et singulis speciebus, non tamen pro omnibus.

Veniamus ad reliquas terminorum affectiones, sive proprietates et quatuor praecipue notamus quae sunt Ampliatio, restrictio, alienatio, appellatio

Ampliatio est usus termini extensi ad maiorem significationem non tantum respectu ad praesens sed etiam ad praeteritum futurum et etiam possibile. V. g. in hac propositione Omne animal est creatum a Deo. Ubi videtur quod ly omne animal est terminus extensus ad significandum non solum omne animal quod nunc est, sed etiam quod fuit erit et est possibile. Nota tamen quod ad hoc ut dicatur ampliatio, sufficit ut ad quamlibet maiorem sui significationem terminus extendatur.

Restrictio

Restrictio est usus termini contracti à maiori ad minorem sui significationem per aliquam contrahentem particulam, ut patet in hac propositione: Aethiops est albus secundum dentes, et in hac alia: Nox est lucida in aliquibus stellis. Videtur in prima fronte quod Aethiops sit albus, quod nox sit lucida, sed per terminos contrahentes restringitur ad minorem significationem, quod videlicet Aethiops sit albus tantum 2dum dentes, Nox sit lucida tantum in stellis.

Alienatio est usus termini secundum impropriam seu metaphoricam significationem. Sic terminum vitis alienat à propria significatione Ecclesia et Christo Domino cum [illegible], quod accidit solum [illegible].

Appellatio est applicatio unius termini supra alium, ut si dicas: Petrus est doctus homo, ly doctus applicatur ad ly homo non ad ly Petrus. Animadverte tamen quod applicationem termini appellantis posse ut plurimum dependere ab antepositione, vel postpositione ipsius ad copulam. Ut vides in his duabus propositionibus: Alexander magnus est dux, Alexander est magnus dux. In prima magnus non applicatur ut in 2da praedicato.

Adde his terminorum proprietatibus quam vocant statum termini, qui facit ut terminus induat rationem temporis, quod verbum cui unitur significat, ut v.g. Petrus est sanctus, ly est importat tempus praesens, et valet ergo nunc Petrus est sanctus, et sic sanctus est ~~[illegible]~~ ipse in praesenti. Si autem ad aliud differentiam temporis quam non importat verbum, praedicatum tunc distractio dicitur, ut si dicas: caeci vident, claudi ambulant. Hi caeci et hi claudi non conveniunt in differentia temporis praesentis importatam à verbo, sed respiciunt differentiam praeteriti ac si diceretur: caeci qui caeci fuerunt nunc vident, qui claudi fuerunt nunc ambulant.
Et haec de prima mentis operatione, dicta de simplici apprehensione, tanquam de prima parte Summularum Logicae dicta sufficiant.

De C[illegible]ione

Consideratis terminis, eorumque affectionibus transitum facimus ad considerationem eorum quae ad 2dam mentis operationem pertinent et primo agimus de definitione, divisione et facilius [illegible] [illegible] [illegible] in qua vere [illegible] ratio indicans affirmantis vel negantis. Sed quia [illegible] est oratio ut videbitur, pauca de oratione dicamus.

Oratio igitur est vox significativa composita ex nomine et verbo non per modum affirmationis, et negationis, sed per modum dictionis. Dicitur vox composita et exclusionem simplicium terminorum. dicitur ex nomine et verbo ut etiam complexos terminos excludat et innuat orationem componi ex nomine, et verbo ut patet in hac oratione: Tandem [illegible] finem pace [illegible] tata [illegible]. Dicitur non per modum affirmationis &c. ut innuat quod oratio [illegible] nihil intendit aliud quam dicere non vero affirmare aut negare, [illegible] quod oratio non spectare potest ad iudicium, sed potius ad apprehensionem [illegible] [illegible] [illegible] orationem affirmare, aut negare [illegible] [illegible] in definitione non dicimus non posse importare affirmationem, [illegible] sed quod de [illegible] [illegible] non importat necessitatem affirmandi aut negandi. Quod quidem est dicendum.

Definitio est oratio explicans quid sit esse rei [illegible] ex [illegible] [illegible] est oratio explicans essentiam rei. Dicitur oratio quia [illegible] [illegible] quae [illegible] oratio est. Dicitur explicans essentiam rei [illegible] [illegible] [illegible] non explicantibus. Explicare autem [illegible] est essentiale praedicatum definitionis adeoque debet necessario includi in definitione. Essentia rei definitur a P. [illegible] anno 1o [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] verum [illegible], quibus [illegible] [illegible] esse nihil aliud [illegible], datur [illegible]; et patet in homine. Sunt in [illegible] animal [illegible] rationale quam aliud [illegible] [illegible] non [illegible].

[illegible] in definitionem nominis, et definitionem rei.

Definitio nominis est [illegible] quam nomen [illegible] [illegible] [illegible] Etimologia, vel ut plures [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] interpretantur.

Definitio rei

in corpore in fieri pro principio, quia in corpore in fieri intervenit generatio per mutationem indivisibilem, quae mutatio nihil est transitus eiusdem singularis materiae a non esse istud sub privatione ad esse istud sub forma, quia importat essentialiter, nempe terminum a quo terminum ad quem, et ipsum subiectum, quod transit. In corpore autem in facto esse nullus transitus nulla mutatio intervenit, et ideo duo sunt tantum constitutiva, adeoque non nisi duo principia, et unio, ut diximus est ad summum principium ut quo.

Obiicies 2do contra eandem. Ex Aristotele adductis superius est omnibus principiis commune esse primum, sed forma non est prior generatione, ergo forma non est principium generationis. Probatur minor: forma habetur per ipsam generationem, ergo non est prior.

Respondeo concedo maiorem, et distinguo minorem: sed forma non est prior generatione sui concedo, non est prior generatione compositi nego minorem. Generatio non sumitur hic pro productione formae, sed pro productione compositi. Quamquam forma non sit prior quam generatur, est tamen prius quam generatur compositum. Quandoquidem est pro constitutione compositi et sic salvatur dictum Aristotelis, et prioritas formae respectu compositi.

Instabis: Forma est terminus generationis, sed terminus generationis non est principium generationis, ergo forma non est principium generationis. Sed contra distinguo maiorem: forma est terminus minus principalis generationis concedo maiorem. Est terminus simpliciter principalis nego maiorem et sic distincta minori nego consequentiam. Forma est terminus minus principalis generationis qua generatio respicit compositum tamquam suum terminum principalem. Vel sic etiam respondeo: forma est terminus generationis sui concedo maiorem; terminus generationis compositi nego maiorem. Et distinguo minorem: sed terminus generationis compositi non est principium generationis compositi concedo minorem; sed terminus generationis formae non est principium generationis compositi nego minorem et consequentiam. Terminus generationis formae est ipsa forma, quae praesupponitur generationi compositi seu in signo ante generationem compositi est genita, adeoque est esse principium generationis compositi.

Obiicies 3tio contra aliud membrum. Tot sunt ponenda principia in fieri quot sunt necessaria ad mutationem, sed praeter materiam, formam, et privationem est necessarium agens generans ad mutationem, ergo etiam agens erit principium. Confirmatur: non minus est necessarium agens ad mutationem quam privatio, sed privatio est principium et quidem intrinsecum, ergo etiam agens.

Respondeo concedo maiorem et distinguo minorem: est necessarium etiam agens quod ad mutationem concurrat concedo; quod concurrat ad mutationem terminative nego minorem et consequentiam. Non consideratur mutatio prout actio agentis est, sed prout est actio in termino nempe in forma quae 13

At confecto dispositionum non minus est necessarium agens ad mutationem constituendam quam privatio cons. ma. ad mutationem terminandam, ut non ma. et contra mi. in eodem, ante dispositiones conseqtur [illegible] priuato

Obi. 4to. Privatio est principium extrinsecum, ergo non constituit corpus in fieri tanquam principium intrinsecum. Prob. ant. privatio principiat per modum termini exclusi, ergo est principium extrinsecum. 2do. In generatione ignis interveniunt dispositiones ligni, ergo eam dispositionem erunt principium in fieri 3um materia quae est sub forma ligni non potest acquirere formam, nisi aliter [illegible] formam [illegible], ergo etiam forma quae deperditur erit principium. 4to. Non potest fieri mutatio sine quantitate ergo etiam quantitas intervenit tanquam principium in mutatione, sive generatione.

R. dist. ant. privatio est principium extrinsecum generationis cons. ant. generationi non ant. est extrinseca quidem corpori, cuius privatio, quia nec tenetur in ipsum nec stat in ipsa sed ad ipsam dicendo in generationem et sic dicitur per terminum exclusum, qualis est terminus a quo, non tamen est extrinseca generationi quia generatio cum sit mutatio non potest esse sine termino a quo recedendo in terminum ad quem. Ad 2um conc. ant. et dist. conseq. principium dispositivum et extrinsecum conc. conseq. essentiale constitutivum et intrinsecum nego cons. In contrarium tamen est. Non quaerimus principia corporis mathematici sed physici.

Obi. 5to. Eiusdem eadem sunt principia, sed corpus in facto esse est idem ac in fieri, ergo principia in facto esse erunt tantum materia et forma erunt etiam in fieri. 2do. [illegible] non est esse non est esse principium entis, sed privatio non est ens, ergo non est principium generationis, quae est ens. 3um privatio per Aristotelem est principium per accidens, ergo non est intrinsecum.

R. conc. ma. et dist. mi. quae potest negari, corpus in fieri non est corpus in facto, sed corpus in facto esse est idem ac in fieri radicaliter conc. mi. actualiter non ^et [illegible]^

Ad 3um dicendum autem privatio est principium per accidens generationis in facto esse conditio autem, generationis in fieri non autem, et conquiad. Non est constitutivum corporis in facto esse privatio in sua materia, et forma quae ipsum constituentes a mutatione habuerant quod ipsum constituant, dicitur mutatio [illegible] ipsum ex accidens corporis in facto esse generationes autem est principium essentialiter est per se privatio, quia generationis, sive corporis in fieri mutatio necessario, et essentialiter importat terminum a quo, qui est ipsa privatio.

Sed contra

sed contra dicitur nam ad primum dico talis mutatio est miraculosa, non tamen sequitur tamen quod omnis mutatio sit miraculosa. Itaque mutatio panis in corpus Christi est miraculosa, quia quia est in ultimum nulla prævia dispositione. Cæterum nonne potuit Deus ordinare actionem transubstantiativam ad solum effectum producendum. Immo etiam productionem creationis quia quamvis verum sit creationem non supponere dispositionem, et inducationis ignem non [illegible] in ligno nisi ligno disposito, hoc tamen [illegible] dici quod naturalis sit in creatione extraordinaria in qua nullæ erant attendendæ dispositiones in creatione autem ordinaria dispositiones attendendæ forent; Nonne Deus non creat animam rationalem nisi disposito et organizato corpore. Ad 2um conceditur indignum esse philosopho recurrere ad Deum dum hoc unum est, omnibus aliis principiis philosophicis, quibus potest omnino esse ad Deum confugiamus. In hoc autem non causa recurrent, unde ideo ponantur ut statim ad Deum confugiamus. Ex hoc autem non nullo esse probabile, et consequenter dicimus dari materiam [illegible] non autem esse demonstratum.

Ad 2dum datur evidentia, quod dantur multæ accidentiæ, sed hoc est materiam quæ materia [illegible] 2dum forma mutantur et destruuntur, sed non destruuntur [illegible] quod 2dum tamen, [illegible] est materia, ergo quod datur materia [illegible]

Quoad formam

Quaestio 2da
De materia [illegible] in particulari.

[illegible] duo statuit principia intrinseca corporis naturalis (Corpus naturale illud [illegible] quod est [illegible] motus, et quietis, natura [illegible] est principium motus et quietis, ut patet [illegible] loco) materiam scilicet et formam. [illegible] autem est principium generationis et corporis in [illegible] non [illegible] in [illegible] [illegible], et tanquam constitutivum. Haec materia [illegible] eadem [illegible] de formam non est tota substantia composita sed est tantum pars substantialis incompleta [illegible] cum forma constituens corpus, [illegible] naturale [illegible]. Ipsa [illegible] de se indifferens ad quamlibet formam, sicut [illegible] ad quamlibet figuram. Quia vero a quolibet forma potest determinari dicitur pura potentia [illegible] actus [illegible] forma [illegible]. [illegible] quia [illegible] ad hanc formam [illegible] se habet materia, [illegible] principium [illegible] [illegible] [illegible] [illegible] quia [illegible] formae [illegible] [illegible]

Nonnulla ad materiam spectantia

Ex nihilo nihil fit, et in nihilum nihil revertitur est communissimum axioma apud omnes philosophos. Qui perspicientes mutationes quae in generationibus fiunt in natura, puta ex ligno ignem, videntes ignem ex nihilo non fieri, et lignum non abire per combustionem in nihilum, pro certo habuerunt ex nihilo nihil fieri, et in nihilum nihil redire. Quid autem esset hoc, ex quo omnia facta sunt, et in quod omnia abeunt, varius fuit eorum sensus, ut [illegible] in disputatione praeambula notavimus. Antiqui hoc dixere materiam de qua

Quaeres 1o Quid sit?

R. 1o Aristotelem ipsam in metaphysicis definivisse dicendo: Non est quid neque quantum nec quale nec aliud quidquam dicitur eorum, a quibus ens determinatur neque negationes eorum, id est quid de quo singula haec praedicantur. Hanc definitionem potius quam essentialem descriptivam dicemus procedit a negativis; et per hoc non est quid innuit philosophus non esse substantiam intellige completam quandoquidem [illegible] est pars substantiali compositi si non directe, saltem indirecte pertinet ad categoriam substantiae ut diximus in Logica. Per hoc neque quantum, neque quale [illegible] innuit, materiam per se nullum habere accidens nec quantitatem nec qualitatem nec relationem, nec aliquid eorum, a quibus ratio generica entis contrahitur, et determinatur sed neque negationes eorum, quia [illegible] de se non importet talia accidentia, [illegible] etiam ipsa non excludit per hoc, id est id quod de quo singula haec praedicantur, nam et quia [illegible] in [illegible] ea omnia [illegible] et subiectum praedicationes eorum, ideo habitudo formae substantialis est in praedicamento substantiae, habitudo qualitatis est in praedicamento qualitatis [illegible] hoc 2dum vero quid innuit non substantiam sed partem substantiae completae.

R. 2do Aristotelem 1o Physic. [illegible] ipsam definivisse dicendo: Dico materiam primum subiectum uniuscuiusque ex quo fit aliquid, cum insit, non per accidens, et [illegible] haec definitio est ab omnibus acceptata tanquam essentialis et positiva. Per hoc [illegible] innuit philosophus materiam convenire cum substantia completa, quae et ipsa est subiectum accidentium, dicitur autem primum quia differt in hoc a substantia completa quia ipsa subiicitur formae substantiali, quae [illegible] substantia completa subiicitur accidentibus. Et haec est ratio cur materia dicatur primum, quia prior est recipienda formam, quam substantia completa sit accidentium, et haec [illegible] substantia completa, quia est recipiens accidentium [illegible] [illegible] 16

[illegible]

Lignum vero quod est substantia completa dicitur materia, in qua innuit aliquid tanquam accidentia, et materia, ex qua fit scamnum vel cathedra, vel in qua introducuntur forma artificialis scamni vel cathedrae. Per hoc universim quod innuit quod ~~[illegible]~~ subiectum utriusque formae, non qua constituit unum totum constitutum per se, et subiectum etiam accidentibus, ad quibus constituit unum per accidens. Per hoc ex quo fit aliquid, ad insit, innuit esse id, ex quo fit ipsi, vel compositum, tanquam ex principio intrinseco, et constitutivo componente. Per hoc non secundum accidens innuit fieri compositum substantiale quod per se subsistat. Per id et si corrumpitur aliquid in hoc abibit ultimum innuit materia esse id ipsum quo omnia corporea resolvuntur, ipsa autem non resolvitur, et est subiectum cuilibet generationi, et corruptioni.

Quaeres 2do Quotuplex sit materia?

R. materiam generatim sumptam esse multiplicem. Dividitur 1o in materiam primam, et secundam. Materia prima est de qua sermo est in praesenti prout praecise, et nude in se sumitur. 2da est ipsa eadem sed sumpta prout affecta aliquibus dispositionibus ad formam talem introducendam praerequisitis. Materia 2da etiam dicitur [illegible] substantia ipsa completa constans materia prima, et forma substantiali, ut innuimus supra. Dividitur 2do in materiam physicam, metaphysicam, insuper in naturalem, et artificialem. Physica est ipsa materia prima, sicut et naturalis. Metaphysica est in definitione, vel in essentia vel genus, nam forma est differentia. Artificialis est materia aliquorum artefactorum puta lignum est materia statuarum, scamnorum etc. Lutum est materia figmentorum. Dividitur 3o in materiam transeuntem et immanentem. Transiens est illa, ex qua, ipsa desinente, aliquid fit, puta desinente ligno fit cinis. Immanens est ex qua manente fit aliquid, puta ex ferro manente in ferro fit ensis clavis etc. Si autem materia ex immediate fiat aliquid vocatur proxima, si mediate remota. Dividitur 4to in materiam in qua, ex qua, et circa quam. Materia in qua est in qua recipitur forma ~~[illegible]~~ [illegible] ut cera. Materia in qua subiectatur forma seu figura Alexandri, ex qua est ex qua fit aliquid ut marmor ex quo fit statua Caesaris. Circa quam est circa quam agens operatur, puta hostem circa quem figulus occupatur. Haec dici possunt de illa materia prima sub variis respectibus. Est enim materia in qua respectu formae substantialis [illegible] in ipsa recipitur. Est materia ex qua, ex eo quod ex ipsa tanquam ex parte constitutiva et intrinsecè componente fiat compositum. Est etiam materia circa quam si respectum habeatur ad agens naturale, quod circa ipsam occupatur.

Quaeres 3o

Quaeres 3.tio a quo sit materia.

R. ipsam esse a Deo, qui virtute creativa ipsam ex nihilo produxit, et statuit ipsam esse subiectum generationum et mutationum substantialium virtute agentium naturalium. Agentia n. naturalia non faciunt aliquid ex nihilo, nec aliquid annihilant dum corrumpunt, sed ex hac materia semper eadem remanente per varias formas induendo, et auferendo tot mutationes substantiales perficiunt. Sicut ex eodem [illegible] quae in fictilibus modo fit vas ad honorem modo vas ad contumeliam. Quia autem ipsa materia est subiectum harum generationum, et corruptionum ipsa est ingenerabilis et incorruptibilis, quod intelligendum est virtute agentis naturalis et naturaliter se operantis. Quandoquidem Deus ex nihilo ipsam produxit, et in nihilum eam potest redigere. Nec quicumque [causa naturalis] quod circa hoc potest agens naturale elevatum ab eo qui omnia potest. Ideo dicitur ingenerabilis, quia generari supponit aliquod subiectum ex quo fiat aliquid generatum, sed materia non supponit aliquod subiectum, quandoquidem si aliquod subiectum supponeret ipsa non esset prima, ideo non est generabilis. Dicitur etiam incorruptibilis quia corrumpi dicit aliquod subiectum remanere post mutationem cum per corruptionem, atqui corrumpendo materia nullo modo remaneret quod non potest corrumpi. Si autem diceres [illegible] remanere, hoc non esset nisi ipsa materia quae ut saepe diximus est subiectum ultimum in quo ipsa resolvuntur, ipsum vero in aliud non resolvitur.

Articulus 2.dus

Utrum materia sit ita pura potentia, ut excludat omnem actum entitativum.

Nil frequentius in scholis physicorum auditur quam hoc prolegomenon [?] materia est pura potentia, quod ideo a[illegible] Thomistae invexerunt, ut materiae negarent etiam actum entitativum.

Nota 1. multipliciter sumi potentiam. Alia est potentia activa, ut cum in igne dicimus esse potentiam ad calefaciendum, alia passiva, ut cum dicitur aqua habere potentiam ut calefiat. Insuper alia est potentia obiectiva sive logica et est ipsa non repugnantia [entis ad existendum], quae continetur est in potentia obiectiva [illegible] non existat. Alia est potentia subiectiva quae saepe confunditur cum passiva. Quandoquidem apte potest dici habere potentiam subiectivam quod potest recipere modo calorem modo frigus. Status autem quaestionis non est an materia sit pura potentia activa, an possit agere, nec an sit potentia obiectiva, idest an sit possibilis, sed an sit pura potentia subiectiva, ita ut eidem ita conveniat potentia ut omnem omnino actum excludat.

Nota 2do Duplicem esse actum, alium physicum alium metaphysicum. Actus physicus est aliquid determinans a se et determinatione sua [illegible] est actus in aliquo genere entis. Sic [illegible] forma dicitur actus physicus quia materiam determinat in 17

specie

substantiæ completæ, ut albedo est actus physicus parietis quia vel est forma acci-
dentalis ipsum determinans in speciem qualitatis. Actus metaphysicus est ipsa diffe-
rentia (quæ etiam forma metaphysica vocatur) sive prædicatum essentiale per quod
habetur ipsa essentia, et [illegible] accipitur et prop-
[illegible] essentialis, seu quo essentia rei constituitur, et tunc duo actus entitati-
vus et suo positione rei extra causas, quod est ipsa existentia, et tunc dicitur ac-
tus substantialis, et suo [illegible] subsistentia, quæ est ultimum naturæ complementum,

sicum entitativum, vel potius num sit ita pura potentia ut etiam hunc actum essen-
tialem excludat.

An materia existat sua existentia propria

Rem tunc dicimus existere quando est posita extra suas causas. Haec autem existentia non est actus rei [illegible] quia semper est [illegible] et tamen semper [illegible] non existit. Quandoque enim Petrus nunc est qui olim non erat [illegible] dicitur actus substantialis qua ad convenientiam [illegible] retinet substantia [illegible] [illegible] extra causas. Quaeritur autem in [illegible] num materia habeat de se hunc actum [illegible] [illegible] extra causas vel habeat ab [illegible] forma, quae [illegible]

Est autem [quod hoc] sua ratio de existentia ut [illegible], quia [illegible] sunt [illegible] naturae [illegible]. [illegible] autem dividitur existentia in completam et incompletam [illegible] dividitur in completam et in incompletam. Non est autem [illegible] absurdum dicere compositum existere duabus [illegible] ex [illegible] constituentibus unam completam existentiam compositi, quia non est aliud [illegible] dicere existentiam compositi [illegible] suas existentias partiales materiae et formae, [illegible] ut dicimus [illegible] [illegible] et [illegible] suis [illegible] entitatibus, idem [illegible] de forma) Ratio huius est, quia eadem ratio [illegible] de existentia [illegible] [illegible] [illegible] et existentia [illegible] non [illegible] ut [illegible] [illegible] [illegible].

[illegible] 2.do Thomistae existentiam non [illegible] actualitatem [illegible] perficientem [illegible] in ratione entis. [illegible] [illegible] dicimus [illegible] per [illegible] [illegible] extra causas (dico in ratione entis, quia in ratione [illegible] [illegible] in ratione [illegible] est [illegible] a [illegible] [illegible] [illegible] [illegible] actualitas [illegible] a qua [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] forma [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] in materia quia materia est [illegible] [illegible] [illegible] independenter a forma [illegible] [illegible] forma [illegible] [illegible] [illegible] affirmant.

[illegible] materia habet [illegible] realem, ergo habet propriam existentiam. [illegible] est in [illegible] [illegible] [illegible] [illegible] [illegible] essentia [illegible] distinctam ab existentia, vel non. ter a forma. maior patet ex terminis, minor probatur primo materia est per actionem crea-
tivam (materia non est generabilis nec corruptibilis), unde extra causas, sed actio crea-
tiva est independens a forma, ergo est extra causas independenter a forma. Pro-
pter non movetur a Thomistis, quia est contra consequentiam. Si materia existeret ex existentia formae
[illegible] haberet existentias quot sunt formae substantiales in rerum natura, insuper
[illegible] totius existentia mutaretur quoties fieret nova generatio. Autem si variatur
existentia diverso [illegible] nunc ac ante, nec ita existens hic ac ibi. Quod non est dicen-
dum. Confirmatur ulterius. Si materia dependeret in existendo a forma, cessante existere for-
ma deberet etiam existere materia sed materia non cessat existere cessante existentia for-
mae [illegible] non dependet in existendo a forma. [illegible] causa [illegible] effectus ab eius

[illegible] non includit implicantiam, potest fieri a Deo; sed materiam esse sine forma non includit implicantiam; ergo potest a Deo fieri sine forma. Probatur minor [illegible] [illegible] et [illegible] non magis dicit implicantiam materiam existere sine forma quam accidens existere sine subiecto; sed accidentia per divinam potentiam existunt in Eucharistia sine subiecto; ergo etiam materia potest existere sine forma. [illegible] quando duo effectus sunt quorum unus pendet a Deo immediate, [illegible] alter a natura [illegible], potest [illegible] fieri a Deo non [illegible] [illegible] [illegible] [illegible] materia et forma; ergo potest materia existere [illegible] sine forma [illegible] potest Deus [illegible] effectum [illegible] [illegible] natura [illegible] [illegible] [illegible] quia Deus de [illegible] [illegible] potest facere et [illegible], et contra [illegible] naturae, [illegible] [illegible] [illegible] naturae, sicut [illegible] [illegible] ad [illegible] [illegible] [illegible], et [illegible] combustionem ignis in fornace Babylonica [illegible] [illegible] [illegible].

Dices 2do materia non pendet in existendo a forma; ergo potest existere sine forma. [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] non potest existere sine forma, manifeste pendet a forma.

Obiicies auctoritatem Angelici qui [illegible] [illegible] [illegible] [illegible] in corpore [illegible] materia [illegible] creationis terminus est ens actu; ipsum autem quod est actus est forma. Dicere igitur materiam [illegible] sine forma, est dicere ens actu sine actu, quod implicat contradictionem. Haec [illegible] Thomas, sed [illegible] [illegible] contradictionem [illegible] non possunt fieri a Deo; ergo materiam existere sine forma non potest fieri a Deo.

[illegible] [illegible] Thomam loqui non de forma physica [illegible] [illegible] de omni forma; [illegible] manifestum est legenti quae praecedunt [illegible] in hoc loco mentem Augustini Angelicus, dicentis [illegible] informitatem materiae non [illegible] tempore formationem [illegible] [illegible] [illegible] [illegible] ordine naturae. Augustinus [illegible], ait, accipit informitatem [illegible] [illegible] omnis formae, et [illegible] impossibile est dicere [illegible] informem [illegible] [illegible] [illegible] formationem [illegible], [illegible] [illegible] de formatione [illegible] [illegible] [illegible] est. Si [illegible] materia informis praecedit duratione, haec erat iam in actu (Nota quod [illegible] [illegible]) hoc [illegible] duratio importat creationis [illegible] terminus est ens actu; ipsum autem quod est actus est forma etc. Igitur loquitur hic sanctus doctor de actu durationis [illegible], qui [illegible] [illegible] sit forma [illegible] [illegible]. [illegible] tamen physica, a qua [illegible] [illegible] materiae in specie substantiae completae. Manifestum est autem esse contradictionem [illegible] dicere materiam durare sine omni forma, quia ipsa duratio est forma. Dicere autem materiam durare sine omni forma est dicere materiam durare etiam sine [illegible] actu durationis, quod est dicere materiam durare et non durare. Hoc autem est contradictionem quod non potest fieri a Deo. Et haec [illegible] videtur Angelici Doctoris [illegible] [illegible].

An potentia sit essentia materiae.

Materiam esse potentiam physicam ex dictis satis compertum esse potest. Hec autem potentia [illegible] an sit [illegible] essentialis, vel tantum accidentalis [illegible], [illegible] superaddita, sicuti rationalitatem visibilitas superinvenit.

[illegible] non esse multiplicanda entia sine necessitate, [illegible] autem materia [illegible] [illegible] recipere formam [illegible] ad [illegible] aliquid superadditum [illegible] recipiendo formam, et [illegible].

Ad illud [illegible] [illegible] dico [illegible] intelligendum est [illegible] extra se scilicet in [illegible], et ideo agit non quia ignis, sed quia [illegible] [illegible] [illegible] [illegible] est. [illegible] agere intra se non [illegible] per formam [illegible], ergo [illegible] intra se [illegible] [illegible] non [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] agit intra se per formam [illegible] [illegible] [illegible] [illegible] [illegible] autem [illegible] extra se indiget [illegible] [illegible]. Ad 2um [illegible] [illegible] [illegible] [illegible] [illegible] indicat non esse [illegible] [illegible] est forma [illegible] physice loquendo [illegible] [illegible] [illegible]. [illegible] [illegible] quodlibet [illegible] de se ipso. [illegible] praedicata essentialia [illegible] [illegible] [illegible] tamen praedicata essentialia [illegible] [illegible] [illegible] praedicata [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] non [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] materiae, non [illegible] [illegible] [illegible] [illegible] [illegible] materiae [illegible] [illegible] a essentia materiae [illegible] [illegible] [illegible] logicam [illegible] est, [illegible] [illegible] [illegible] [illegible]. Ad 3um [illegible] [illegible] [illegible] forma [illegible] [illegible] [illegible] [illegible] et complectitur, et [illegible] hoc [illegible] responsio ad [illegible] [illegible].

[illegible] 2do argumentatur [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]. Forma est accidens, ergo forma non est essentialis materiae. [illegible] forma est, [illegible] [illegible] quantitas est accidens [illegible] forma est accidens 2do, [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] forma et [illegible] [illegible] consequens, [illegible] [illegible] [illegible] [illegible].

Respondeo [illegible] [illegible] [illegible] [illegible] materia et forma [illegible] in [illegible] [illegible] [illegible] [illegible] materia [illegible] [illegible], idem [illegible] de qualitate. Ad 2um [illegible] [illegible] [illegible] [illegible] et [illegible] consequens non est forma et [illegible] metaphysica [illegible] [illegible] [illegible] non est forma physica [illegible] [illegible], [illegible] homo non est anima et in abstracto [illegible], non est forma physica [illegible] [illegible] [illegible] [illegible] [illegible] et rationalitas in abstracto, [illegible] autem est [illegible] [illegible] [illegible] materia non est [illegible] et [illegible] in abstracto, [illegible] est [illegible] [illegible] essentialiter [illegible] formam, quid [illegible] esse [illegible] [illegible].

[illegible] [illegible] [illegible] [illegible] in quantitate, ergo materia non est [illegible] [illegible] [illegible] [illegible]

Respondeo [illegible] [illegible] [illegible] [illegible] quantitatem esse accidens et [illegible] [illegible] formam et quantitatem, ergo [illegible] accidentia. 92

De appetitu materiae

[C]um vidimus potentiam materiae ad formas, in hoc vero articulo videndus est appetitus materiae ad formas. Aliud enim est non repugnare receptioni alicuius, aliud est habere inclinationem ad aliquid. Sicut aliud est in famelico non repugnare receptioni cibi, aliud est appetere cibum. Primum est potentia passiva, quam etiam tribuimus materiae. 2um est appetitus quem an tribuendus ipsi sit in praesenti videndum est.

Sciendum vero est multiplicem esse appetitum. Dividitur enim in appetitum innatum et appetitum elicitum. Elicitus ille est qui sequitur apprehensionem vel appetitus, sive quia apprehensio, seu cognitio est duplex, una scilicet alia sensitiva, ut quando cognoscimus ista sensibilia medio sensu, alia intellectiva, ut quando intellectu nostro attingimus, ideo duplex est appetitus elicitus, alius sensitivus, sive animalis, alius intellectivus, sive rationalis. Primus appetit res sensibiles estque in homine et bruto; 2us appetit bona intelligibilia estque tantum in anima rationali. Appetitus vero innatus est ordinatio rei appetentis ad rem appetitam tanquam ad bonum sibi conveniens. Ex qua definitione videtur appetitum hunc non sequi cognitionem alicuius [illegible] sed [illegible] a natura [illegible] innatus dicitur. Sicut appetitus innatus dividitur in [illegible] in appetitum totalem sive completum et in incompletum. Completus est quem habet natura completa, ut [illegible] [illegible] appetitus [illegible] accidentalis [illegible] appetitus [illegible] [illegible]. [illegible] accidentalis est quem habet natura [illegible] et substantia [illegible] [illegible] et [illegible] accidentalis [illegible] appetitum [illegible] ad [illegible] substantialis est quem habet natura [illegible] completa (quae in linea [illegible] [illegible]) et non [illegible] [illegible], [illegible] in linea [illegible] [illegible]) in hoc [illegible] complementum substantiale [illegible]. Appetitus innatus incompletus est quem habet natura incompleta, [illegible] [illegible] complementum in linea substantiae completae. Et hic est appetitus materiae ad formas [illegible] [illegible] [illegible]. Quem vero hunc appetitum materiae philosophantes non [illegible] [illegible] [illegible] appetitum [illegible] in [illegible] [illegible] [illegible] ut ait [illegible] Thomas. Et sicut [illegible] [illegible] [illegible] bonum [illegible] [illegible] [illegible] praesenti, ita [illegible] materia habere [illegible] ad formas [illegible] [illegible] [illegible] [illegible] in formas [illegible]. Videamus igitur quid [illegible] et [illegible] [illegible] [illegible] de ipso [illegible] [illegible] materiae.

Quaestio 1a

De existentia, et essentia Dei

Nos, sicut [illegible] cum Diagora, et Atheis [illegible] quaerentes de Nomine, nomine Dei intelligo ens perfectissimum quo nihil [illegible] dari potest nec excogitari [illegible]

[illegible]

An Deum esse sit per se notum

Nomine propositionis per se notae intelligo illam, quae ita [illegible] ex terminis, per se innotescit, ut probatione ulteriori non egeat, qualis est ista. Omne totum est maius sua parte. Quaerimus utrum haec propositio. Datur Deus. sit huiusmodi, circa quod triplex sententia [illegible]

1a est Aegidio, Anselmo et Cicerone [illegible] simpliciter affirmantium

2da est [illegible] Ocam, et Aureoli docentium esse per se notam Deo, et Beatis, non tamen nobis

3a quae est Divi Thomae, Durandi, Suarez, et aliorum [illegible] asserunt esse per se notam quoad se, non tamen esse per se notam quoad nos [illegible] ordinamus distinctionem [illegible] certa ab incertis

Certum est 1o inditam esse homini a natura aliquam cognitionem Dei non quidem [illegible] conceptu proprio, aut quidditativo, sed sub conceptu confuso, et obscuro, sic enim homo naturaliter appetit suam felicitatem in bono adeoque habet cognitionem veritatis et omnis [illegible] [illegible] sic intelligendus est Damascenus [illegible] 26 [illegible] videre Deum unusquisque [illegible]

Certum est 2do quod si nomine propositionis per se notae quoad se intelligatur illa [illegible] praedicatum est de conceptu quidditativo subiecti sententia Divi Thomae [illegible] quoad [illegible] [illegible] certissima est, quia hoc praedicatum [illegible] quidditative includitur in hoc subiecto Deus

ut patebit infra

Certum est 3.º quod si per [illegible] intelligatio actualis passiva notitia seu relatio ad intellectum cognoscentem, verum etiam est 2.da sententia quoad 1.am partem, quia nihil est [illegible] et Beatis [illegible] existentia Dei. Si vero per [illegible] non intelligatur actualis notitia passiva, sed tantummodo potentialis scilicet non intelligatur esse actu cognita sed tantum esse [illegible] cognoscibilis [illegible] [illegible] existens esse etiam notam quoad nos; quod sic probo. Intellectis quidditative terminis illius propositionis, [illegible] cognito quid sit Deus et quid sit existentia absque alia probatione statim intelligimus Deum existere. Sed possunt cognosci quidditative, et proprie quid sit Deus, et quid sit existentia et de facto utrumque [illegible] etiam [illegible] sine errore cognoscitur, ergo potest per se cognosci Deus existere. Sicque haec propositio: datur Deus est [illegible] cognoscibilis, et nota generaliter etiam quoad nos [illegible] cognito quid sit Deus, [illegible] ens perfectissimum statim intelligitur includere omnem perfectionem possibilem, ergo [illegible] includere existentiam in re [illegible] per se cognoscitur Deus existere. Confirmatur [illegible] Thomas [illegible] sic habet [illegible] de ratione hominis; si igitur [illegible] de [illegible] dicente et de [illegible] quid sit propositio illa (homo est animal) erit [illegible] Anselmi [illegible] argumentum sic [illegible]. Ita se habet [illegible] ad hominem [illegible] existentia [illegible] Deus est [illegible] cognitis terminis [illegible] [illegible] talis propositio [illegible] [illegible] etiam [illegible] per se [illegible] [illegible] Dei [illegible] etiam [illegible] [illegible] [illegible] [illegible] [illegible] erit etiam per se nota quoad nos quia tamen [illegible] [illegible] [illegible] idea ut tandem [illegible] [illegible] et [illegible] [illegible]

[illegible] [illegible] dicentibus quod [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] quoad nos [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] cum [illegible]

Concludo [illegible] [illegible] [illegible] est [illegible] [illegible] [illegible] quoad se [illegible] quoad nos [illegible] [illegible] [illegible] notitia Dei sub conceptu quidditativo et [illegible]

Deus supponit pro ente perfectissimo [illegible] ut dixi et infra

Pr. 1a. ratio. Illa propositio est per se nota quoad se, quae quantum est de se est immediate cognoscibilis sed haec est praedicta propositio quoniam [illegible] per se nota quoad se. Utraque praemissa supra [illegible] manet probata

Pr. 2da. ratio. Illa propositio non est per se nota quoad nos, quae a nobis non immediate [illegible] cognoscitur, sed talis praedicta propositio, ergo non est per se nota quoad nos. Tum statuta est supra propositio. Illa propositio non est a nobis immediate cognoscibilis, cuius terminum non [illegible] a nobis attingunt immediate; sed sic terminus: Deus, non est a nobis quidditative attingitur (in quo tamen tantum procedit conclusio) ergo.

Obijcies 1o contra 1am propositio Deus est existens habet aliquod medium per quod potest probari, ergo non est per se immediate cognoscibilis, nec per consequens per se nota quoad se. Haec obiectio nimis probat. Probat enim fortasse nullam esse propositionem per se notam. Quidquid sit

Respondeo concedo antecedens, sed nego consequentiam, quia non est de ratione propositionis per se notae ut non possit per aliquod medium probari sed tantum ut non indigeat probatione. Breviter quamvis propositio per se nota non sit necessario probanda, potest tamen probari.

Obijcies 2do contra 2dam Haec propositio qui est est, esse est propositio per se nota etiam quoad nos, Deus autem est qui est loquens enim de se ipso Exod. 3o dixit Ego sum qui sum, ergo haec propositio Deus est est per se nobis nota. Confirmatur Haec propositio Deus [illegible] est per se nobis nota, sed Deus est verum, et quidem summum, ergo [illegible] per se notum nobis. [illegible] et similes obiectiones optime probant 1am partem nostrae conclusionis, sequendo dicitur 2da.

Respondeo concedo maiorem distinguo minorem et hoc nobis innotescat nego minorem, et hoc non omnibus innotescat concedo minorem, et nego consequentiam. Verum quidem est Deum esse, qui est, sed quia hoc non [illegible] elucet in hoc nobis [illegible] ideo [illegible] propositio cadens supra talem [illegible] debet esse nobis nota. Eandem responsionem applico confirmationi et [illegible] similibus obiectionibus in quibus [illegible] ab adversariis exponitur [illegible], et quidditativa notitia huius termini Deus

Colliga [illegible] manifestationis quidditativae conceptus Dei tunc haec propositio Deus est esset per se nota etiam quoad nos

Articulus 2dus

An sit demonstrabilis existentia Dei

Quandoquidem existentia Dei [illegible] conceptu [illegible] et explicito non est per se nota quoad nos, ut probavimus supra, videndum superest num saltem ope discursus [illegible] possit, dico, an intellectus noster media ratione attingere [illegible] tamen conceptus huius [illegible] dei

[illegible] existentia Dei non esse demonstrabilem a priori [illegible] physica [illegible] et necessaria [illegible] quia ad Deum est [illegible] introductus, et inde [illegible] causas [illegible] non [illegible] neque [illegible] demonstrationem [illegible] Quapropter [illegible]

Conclusio. Existentia Dei est demonstrabilis, non tamen a priori [illegible] physica et [illegible]. 2da pars modo probata est.

[illegible] quam est [illegible] de fide [illegible] apud [illegible] Existentia Dei [illegible] demonstratur, [illegible] demonstrabilis [illegible] non aliter [illegible] actualis demonstrationis. Et [illegible] simpliciter, quae [illegible] non contra [illegible] sint ne [illegible] an non

[illegible] ex [illegible] motus [illegible] mutationes [illegible] mobilia et hoc supposito sic procedit. Datur aliquis motor immobilis [illegible] Deus; [illegible] immobilis [illegible] immutabilis [illegible] Dei [illegible]. Non omne motum movetur ergo datur movens immobile [illegible]. Omne motum movetur ab alio movente [illegible] omne movens ab alio movente [illegible] non est motor [illegible] in [illegible] ad eundem [illegible] si [illegible] movens [illegible] simul [illegible] et in [illegible] movens [illegible] non [illegible] movet, neque [illegible] omne motum movetur ab alio movente [illegible] motum movetur ab alio [illegible] motoribus [illegible] existentibus [illegible] in infinitum [illegible] mobile movetur a motore motu ab alio motore et sic in infinitum) [illegible] necessarium [illegible] devenire ad aliquem motorem immotum, et [illegible] dicimus Deum

2da [illegible] supponit in dominio [illegible] producentes [illegible] et sic procedit: [illegible]

producentur ab alio producente, debet [illegible] ratione [illegible] actione se [illegible] producere. Vel igitur id a quo producitur est improductum vel productum; si improductum, erit Deus; si productum ab alio, de hoc iterum quaero sit ne improductum an non, et sic in infinitum procedemus, nisi deveniamus ad aliquid producens improductum, quod Deus est. Breviter: datur aliquid productivum improductum, ergo datur Deus. Dico [illegible] in 3° [illegible] methodum procedendi haud [illegible] et 3um [illegible] in forma quoque ipsa similiter sunt.

3° Tertio supponit evidenter dari ens contingens, seu illud esse, quod non necessario est, sed indifferenter modo est, modo non est, et sic procedit. Quod est indifferens ad esse debet ab alio determinari, ut sit (non enim potest a se ipso determinari cum a se ipso indifferens sit) vel ergo hoc aliud determinans est ens necessarium, vel contingens; si necessarium est Deus, si contingens hoc iterum debet ab alio determinari, et de isto iterum quaero et sic vel est [illegible] procedendum in infinitum, vel sistendum in aliquo ente determinante alia, et a nemine determinato, quod erit ens necessarium, et Deus. Breviter, datur ens contingens, ergo debet dari ens necessarium adeoque Deus

[illegible] 3° hoc [illegible] [illegible] et [illegible], [illegible] non [illegible] [illegible] nos [illegible] quidem [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] infinita [illegible] vel mundi [illegible] a [illegible] [illegible] [illegible]

4um ductum contemplatione totius mundi mirabilem armoniam et adeo constantem ordinem rerum licet inter se dissidentium perpetuo tamen ad [illegible] consonantium, legesque in ipsa productione sapientiae providentiae gubernationis clarissimos [illegible] [illegible] [illegible] tanta tali machina, ergo datur excellentissimus faber, et regulator, nisi [illegible] cum Democrito dicere et casu improvidentiae tam mirabilem providentiae ordinem adscribere

5tum ductum supponit dari evidenter causam efficientem in creaturis quarum una est alia efficientior, ex quo colligit existentiam entis efficientissimi hoc pacto. Tota mensura excessus in perfectione est maior propinquitas entis efficientissimi ergo datur [illegible] [illegible] in creaturis [illegible]

Sic sanctus Doctor a posteriori et effectis [illegible] [illegible] [illegible] existentiam demonstrat sic catholicam veritatem a creaturis ad Deum ab effectis ad causam [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] triumphat

Placet hic afferre nonnullas alias divinae existentiae [illegible] demonstrationes quas non ab effectis [illegible], sed a praedicatis ipsis essentialibus Dei deducimus quorum [illegible] ordine ad probandam eius existentiam.

Prima igitur [illegible] sic procedit. Ens optimum necessario existit sed Deus est ens optimum, ergo necessario existit. Probatur maior. Ens optimum necessario includit quamlibet perfectionem, sed actualis existentia est aliqua perfectio, ergo necessario includit existentiam actualem.

2da. Ens optimum [illegible] existere nullam [illegible] insufficientiam includit [illegible] sed non esset optimum sed non posset existere [illegible] (includeret enim [illegible] imperfectio[illegible] ratione entis optimi) ergo tantum posset existere necessario [illegible] sed [illegible] potest tantum necessario existere necessario actu existit, ergo ens optimum necessario actu existit. Probatur assumptum [illegible] quia [illegible] existere tantum necessario non potest existere indifferenter sed quod non potest existere indifferenter necessario existit, ergo quod potest tantum necessario existere actu necessario existit [illegible] quia si aliquando non existeret [illegible] posset existere indifferenter [illegible] existere, et non existere, ergo [illegible] potest existere, et non potest existere indifferenter [illegible] necessario existit [illegible] si ens optimum non existeret esset impossibile sed non est impossibile [illegible] [illegible] existere [illegible] si non existeret non posset existere nisi indifferenter sed non [illegible] existere indifferenter [illegible] si non existeret esset impossibile.

1a igitur demonstratio sic procedit. Ens summe perfectum necessario existit, id Deus est ens optimum, ergo necessario existit. Probatur minor. Ens optimum necessario includit quamlibet perfectionem, sed actualis existentia est aliqua perfectio, ergo necessario includit existentiam actualem.

2da Ens optimum debet existere nullam [illegible] insufficientiam includit [illegible] alicuius [illegible] sed non est ens optimum sed non potest existere contingenter (existentia enim contingens non [illegible] [illegible] existentiae necessariae subiacens, sed [illegible]

Articulus 3ius

In quo consistat essentia metaphysica Dei.

Nomine essentiae hic intelligimus primum illud praedicatum constitutivum rei ac distinctivum, a quo cetera intelliguntur metaphysice oriri. Talis est rationalitas in homine (saltem quoad nos) [illegible] quod primo concipitur in homine [illegible] et a quo [illegible] proprietates [illegible] mirabiles [illegible] metaphysice emanant. Quapropter essentia et [illegible] excludere [illegible] physicam [illegible] naturam prout [illegible] radicale principium operationum [illegible].

Dico 1o essentiam Dei non consistere in [illegible] intellectu et [illegible] intellectione [illegible] infinita, et [illegible] constituit creaturis. Bene [illegible] intellectui [illegible] aliquid, nempe infinitatem, et in [illegible] constituunt divinam essentiam de qua infinitate [illegible].

Dico 2o non posse consistere (ut [illegible] docuit Thomistae) in actuali intellectione [illegible] essentia metaphysica Dei [illegible] concipiendo intelligi [illegible] operationem [illegible] illud animo operatio [illegible] intellectus [illegible] auctoritatem Divi Thomae, dicentis in [illegible] operatio divina [illegible] operatio [illegible] Divi Thomae non [illegible] applicantur [illegible].

Dico 3o non posse consistere in infinitate. Ratio est quia infinitas a nobis concipitur [illegible] quantitas [illegible] infinitas a nobis [illegible] quantitas [illegible] quantitas [illegible] quoad essentiam [illegible].

Probatur [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] [illegible], quod aequivalet habitui, negat [illegible] in Deo [illegible] per modum habitus [illegible] [illegible], [illegible]

Sectio 2da

Quodnam sit obiectum motivum divinae scientiae

[illegible] quemadmodum [illegible] illud quod movet intellectum ad cognitionem, et [illegible] in cognitionem, adeoque debet esse aliquo modo prius ipsa cognitione [illegible] obiectum terminativum, quod [illegible] terminat cognitionem, sed in ipsam non [illegible] quandoque [illegible] cognito de [illegible] quem [illegible] [illegible] obiectum terminativum [illegible] non motivum. [illegible]

[illegible] essentia, attributa, et relationes sunt obiectum motivum divinae scientiae [illegible]

[illegible] ex una parte habent [illegible] intelligibilitatem, [illegible] alia habent quandam [illegible] cognitionem, quod ad ipsam [illegible]

[illegible] relationes non sunt [illegible] cognitionis divinae, quod [illegible] ideo [illegible] absolutum [illegible] relationes, [illegible] anima intelligendo [illegible] cognitio [illegible] habebat [illegible] quo intelligunt [illegible] attributa, [illegible] non [illegible] obiectum [illegible] obiectum motivum. Sed contra [illegible] attributa [illegible] in actu [illegible] attributa [illegible] non se habent ad modum proprietatis, [illegible] obiectum creaturas [illegible] quaestionis [illegible] in actu [illegible] habere pro obiecto motivo [illegible] in actu [illegible]

[illegible] terminativum divinae scientiae [illegible] possibile

[illegible] terminare ad [illegible] possibile [illegible] non terminaretur ad [illegible] possibile [illegible] cognitioni sua perfectio

[illegible] divina attingit [illegible] attingunt etiam se ipsas, sed [illegible] attingunt [illegible] attingunt [illegible] infinitum. Sed contra [illegible] attingunt etiam [illegible] se ipsas [illegible] attingunt se ipsas [illegible] cognitionem [illegible] Divina igitur cognitio ad se ipsam [illegible] propter reflexionem [illegible] in infinitum [illegible] ipsa actu infinita [illegible]

Sectio 3a

[illegible] Deus se ipsum cognoscat

Certum [illegible] Deum cognoscere se ipsum in se ipso [illegible] cognitionem [illegible] [illegible] cognoscat etiam se ipsum [illegible] pro quo [illegible] Deus cognoscat se ipsum in [illegible] terminativum [illegible]

medium tunc se cognoscit in creaturis terminatis

ad creaturas terminans etiam ac ipsum Deum projectas ab [illegible] est [illegible] non [illegible] ipso Deo. Tunc se cognoscit in creaturis medium quia [illegible] Dei pendens [illegible] Deum se ipsum cognoscat, ut medium, ac quo se ipsum cognoscit [illegible] non esset [illegible] se ipsum in creaturis, 2do modo cognoscit se ipsum [illegible], 2dum et 3um [illegible]

Conclusio. Deus non cognoscit se ipsum ex creaturis. Eadem [illegible]

Creatura nequit esse medium [illegible] quo Deus cognoscit, quia [illegible] ipsum ex creaturis cognitio [illegible] nulla [illegible] divinae cognitionis [illegible] nullo [illegible] esse medium [illegible] [illegible] quia nulla [illegible] divina [illegible] actualiter pendere a creatura.

[illegible] Deus cognoscendo creaturas videt dependentiam [illegible] Deum videre [illegible] creaturis, videt saltem indirecte se ipsum, sed contra non [illegible] Deus non videat [illegible] creaturis, et hoc tantum probat obiectio [illegible] Deum [illegible] se ipsum [illegible] creaturis influant in cognitionem quam Deus habet de se [illegible]

Articulus 4us

Quomodo Deus cognoscat possibilia

Creatura pure possibilis nullum habet esse actuale et [illegible] [illegible] impossibile [illegible] nullam [illegible] repugnantiam [illegible] in Deo [illegible] [illegible]

Suppono 1o idem [illegible] [illegible] multiplici [illegible] speculum [illegible] in speculo [illegible]

Suppono 2o [illegible] necessariam connexionem inter causam et effectum [illegible] cognitio [illegible] effectus [illegible] existentia causae, adhuc tamen [illegible] cognoscere effectum ex causa, non quidem [illegible] ut possibile [illegible] et quidditative [illegible], Quatenus qui videt causam videt ipsam quantum [illegible] producere talem effectum, [illegible]: Ergo talis effectus possibilis [illegible] non Deus videat possibilia in se ipsis [illegible] tamquam in causa.

Suppono 3io [illegible] non [illegible] cognoscat possibilia, ut ipsa sint causa motiva divinae cognitionis. Tum quia nulla creatura potest actualiter influere in actum divinum. Tum [illegible] quia [illegible] nullam [illegible] habeant esse actuale [illegible] influxum [illegible] gratia [illegible]

Conclusio 1a. Deus attingit possibilia in se ipsis

Pr. Deus cognoscendo se ipsum attingit [illegible] transcendentaliter [illegible] [illegible] possibilis [illegible] possibilia [illegible] [illegible] divina [illegible] Deus attingit [illegible] creaturas attingit.

Conclusio 2da. Deus cognoscit possibilia etiam directe in se ipsis.

[illegible] determinata ad directe cognoscenda [illegible] cognoscibilia [illegible] possibilia [illegible] directe cognoscibilia [illegible] [illegible] Deus [illegible] repraesentativam

Quaer[itur] 2° [illegible] Deo [illegible] [illegible] sint visibilia immediate cognoscenda in se ipso, et non in Deo habeamus [illegible] cognito

[illegible] possibilia esse [illegible] cognoscibilia a nobis, sed non a Deo, et probationem [illegible] [illegible] possibilia a nobis [illegible] cognosci sunt [illegible] effectus [illegible] Deo.

[illegible] difficultate

[illegible] habet [illegible] auctoritate quae videntur [illegible] Deum non cognoscere creaturas in [illegible] [illegible] in se ipso [illegible] in se ipso [illegible] cognoscat [illegible] [illegible] cognitionem [illegible] terminati [illegible]

[illegible] quod non cognoscat creaturas [illegible]

[illegible] contra [illegible] Deus cognoscit creaturas in se ipso [illegible] cognoscit abstractive [illegible]

[illegible] contra [illegible] Deus attingit creaturas in se ipso immediate non attingit [illegible] Deo cognito [illegible] contra [illegible]

[illegible] admonendo [illegible] ut [illegible] concessum, in qua [illegible] forma [illegible] Deus attingendo [illegible] in se [illegible] in se ipso [illegible] attingit creaturas in se ipso [illegible]

[illegible] medium cognitum [illegible] immediate attingit [illegible] sed contra [illegible] est medium [illegible] ipsa [illegible] immediate attingat creaturas [illegible] non debet cognosci [illegible] cognitum [illegible] immediate attingere [illegible] [illegible] profunditatem, ad contra [illegible] creato [illegible] quia [illegible] Deus [illegible] perfectionem [illegible] debet in se ipso attingere creaturas [illegible] non debet [illegible] adaequate debet [illegible] attingit, [illegible]

Quaeritur quomodo Deus videat negationes impossibilia, entia rationis [illegible] quae non sunt entia adaequata nec intersecus [illegible] transcendentali.

Quomodo Deus cognoscat futura contingentia absoluta [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]

1 In duplici differentia pro praesenti instituto considerari possunt, [illegible] [illegible] [illegible]

2 Porro Deum cognoscere futura contingentia [illegible] generis tum in se ipsis, tum in [illegible] [illegible]

Quaest. 2

[illegible] sententia quae est [illegible] l. 1 q. 7, et aliorum [illegible] docet Deum cognoscere absolute futura propter [illegible] eorum praesentiam, seu coexistentiam [illegible] aeternitati. Supponit haec sententia quodlibet futurum [illegible] [illegible] naturae [illegible] divina aeternitas indivisibilis [illegible] (definitur [illegible] a Boetio: interminabilis [illegible] simul, et [illegible] possessio) non solum futurum atque praesentiam [illegible] dici coexistere [illegible] aeternitati, et [illegible] Aliorum [illegible] praesens [illegible] [illegible] divina aeternitas indivisibilis [illegible] se [illegible] liber [illegible] non est [illegible] non [illegible] [illegible] Deus videt intuitive amorem [illegible] nunc, [illegible] videt amorem [illegible] [illegible]

[illegible] sententia licet fundamentum [illegible] auctoritatis [illegible] Divi Thomae 1. p. q. 14 [illegible] careat gravem tamen [illegible] difficultatem, [illegible] coexistentia [illegible] [illegible] terminis [illegible], [illegible] argumentum: Quod non existit non coexistit [illegible] [illegible], et [illegible] non existit, [illegible] non coexistit divinae aeternitati. Aliud [illegible] [illegible] coexistere aeternitati, aliud [illegible] coexistere aeternitati, sicut aliud [illegible] coexistere [illegible] immensitati, aliud [illegible] coexistere immensitati, ut bene [illegible] [illegible] [illegible] difficultatem [illegible]. Quomodo [illegible] futura [illegible] [illegible] Deo, et non [illegible] inter se. [illegible] tamen [illegible], et [illegible] [illegible] non coexistant.

2a sententia [illegible] [illegible] [illegible] cognosci a Deo, [illegible] [illegible] debet attingere quidquid est verum, [illegible] verum [illegible] futurum [illegible] Deus debet cognoscere, et quidem in [illegible] futura

8 Hanc sententiam, [illegible] loco citato n. 4, et [illegible] et [illegible] [illegible] quidem parte, sed nondum satisfacit difficultati. [illegible] libertatem [illegible] Deus [illegible] [illegible] sit ab [illegible] sua determinatus ad videndum quidquid est verum, [illegible] adhuc [illegible] [illegible] an amor [illegible] Petri independenter a decreto Dei ad [illegible] specialiter [illegible] [illegible] futurus. Articulus 6us

Quomodo Deus cognoscat futura contingentia conditionata

1 [illegible] futurum conditionatum est futurum sub aliqua conditione, ut si dicas Petrus amabit haec propositio est de futuro contingenti absoluto; si vero dicas [illegible] amabit propositio est de futuro contingenti conditionato, [illegible] absque eo quod amet. Si vero dicas si Petrus [illegible] propositio est de futuro [illegible] hypothetico, idest ex suppositione, quae [illegible] suppositione [illegible] absque eo quod amet.

2 Quod Deus videat futura contingentia conditionata quamvis [illegible] absoluta futura [illegible] Tyri et Sidonis [illegible] miracula [illegible] futura contingentia [illegible] conditionatum quam absolutum. Nam si [illegible] Petrus [illegible] si [illegible] auditurus [illegible] amaturus [illegible] futura contingentia conditionata [illegible] principalis sententia.

ut 1. dependeret eadem ipsa in basi [illegible] et se teneret ex parte Dei. Non vero ita ut eo [illegible] ipsa [illegible] ex [illegible] actus [illegible] posito ad instantiam respondent electio-
nem ad gloriam [illegible] ad. [illegible] ut coronam [illegible] gratuitam. Quamvis electio [illegible]

inducit [illegible] intentionis [illegible], [illegible] gratuita, intentio [illegible] gratuita
et sic suppositionum 3. et 4. simul [illegible]

13 [illegible] suppositionum ad hanc sententiam non pugnant, ut considerant [illegible] et quam [illegible] difficultatem [illegible] in reprobatione quae [illegible] post praevisa [illegible] demerita [illegible] ad praedestinationem pariter [illegible] non sunt [illegible] inter utramque, in ipsa [illegible] suppositione [illegible], [illegible] bene, atque [illegible] candide.

14 3a denique sententia docet Deum sicut reprobat post praevisa absolute demerita sic eligere ad gloriam post merita pariformiter praevisa. Quare in praedestinationis [illegible] ordine [illegible] in Deo. In [illegible] Deus ante [illegible] omnes voluntate antecedente explicata [illegible] praedestinationis [illegible] ad [illegible] adeoque auxilia [illegible] in 2do signo disponit creaturas [illegible] generationum, temporum [illegible] creaturas, [illegible] in ordine ad finem [illegible] in 3o signo [illegible] singularia personis singularia [illegible] auxilium [illegible], ut gratias ex meritis Christi, quae decretum, et praevisa [illegible] in 4to signo [illegible] auxilia singularia decernit, [illegible] suam [illegible] bonis [illegible] conversionem, adeoque [illegible] nova auxilia [illegible] et sic [illegible] Quo supposito, in 5to demum [illegible] eligit ad gloriam ex meritis [illegible]

15 Haec pariter sententia [illegible] suppositionibus adducens in [illegible], et [illegible] ut [illegible] in hac sententia [illegible] electio ad gloriam non [illegible] ut [illegible] merita [illegible] in [illegible] libertatem [illegible] non [illegible] in 2a sententia [illegible] bene intelligi [illegible] electio [illegible] non ita bene intelligi [illegible] electionem [illegible] in 2a sententia [illegible] meritis [illegible] electio [illegible] ad gloriam [illegible] [illegible] meritis [illegible]

16 [illegible] in hac 3a sententia [illegible] quod [illegible] suppositionibus [illegible] Semi-Pelagianorum [illegible] praedestinatus in hac sententia [illegible] non [illegible] electionem ad gloriam [illegible] 2a [illegible] ex meritis praevisis [illegible] gratuito [illegible] auxilia [illegible] in eadem suppositione 3a.

17 Ex contra in hac 3.a sententia non ita commode intelligi videtur eo rationes 1.a 2.a 4.; Quoad 1.am nam supponitur independenter, immo et praedeterminantur futuri salvari definitionem praedestinationis, ut patet n.o 7, quoad 2.am similiter ex eo quod non deberet liber manet saltem liber esse, sicut explicatum manet n.o 8, quoad 4. gloriae opere et praedestinatione tantum est manifestum Dei bonitatem; ex se major bonitas quo [illegible], ex [illegible] independenter et Deus ipsum ad quam dicunt; si praedestinatio ad gloriam est ex merito vel etiam merita ipsa ad eandem [illegible], concurrunt [illegible] merita ad discernendum ipsos.

19 Nulla ex hisce sententiis [illegible] patitur, nulla ratione, nulla auctoritatis caret. 1.a de divinae voluntatis dignitate, 2.a de humanae [illegible] rationis indemnitate magis illustrata gratia, 2.a utrique simul complectens, loquor. Nos eligimus.

Solet hic quaeri quaenam sint praedestinationis effectus, sed quia absolute dependet tum a doctrina praedestinationis complexae, vel incomplexae, [illegible], tum a dicendo supra, in quo, iuxta [illegible] [illegible], [illegible] ad finem ideo nobis [illegible] praedestinationis statuere, quae consonent sententiae, quam ex [illegible] propositis elegimus.

Haec sunt [illegible] de Deo uno ad intentionem magis quam ad contentionem [illegible] nobis proposita considerando elegi. Ita [illegible] [illegible] sancto [illegible] et [illegible] magistro [illegible], [illegible] et [illegible] [illegible] quod boni, [illegible] quod autem quicquid [illegible] in [illegible] ad maiorem Dei gloriam ad laudem [illegible], nec non [illegible] Thomae, Philippi [illegible], [illegible] omnis [illegible] intendo [illegible] quod contra dictum inductum volo

Queste [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] nel [illegible]

Esauditi una volta già furono i seguenti voti, e gl' ardentissimi desiderj de' Padri santi, de' Patriarchi, nostri santissimi s' aprirono i Cieli, e distillarono la rugiada i nuvoli piovvero il Giusto, la terra germinò il Salvatore. Ecco, o Santo Davidde, la verità, che voi prediceste nata è dalla terra, la giustizia, e la pace si sono abbracciate: Gloria uscito fu annunciata dagl' Ps: 84
Angeli gloria, dissi, ne' Cieli a Dio e in terra la pace agl' uomini di buon volere: Gloria in altissimis Deo, Luc: 2:
et in terra pax hominibus bonæ voluntatis. Incominciò da quel tempo a piantare la Cattolica Religione della misteriosa Vigna del Salvatore, per la quale tanto egli oprò, tanto s' affaticò, che non potè di più fare. Quid ultra debui facere vineæ meæ et non feci? Si Isaj: 5:
sottopose all' incostanza de tempi, che Lui creò, s' assoggettò a' tormenti, e vestita umana carne per lo spazio di trentatre anni colla predicazione, cogl' esempli, e co' miracoli inaffiò di questa sua vigna le mistiche piante, per le quali finalmente nelle mani dell' eterno suo Padre Eccl: 1
spirò l'anima su d'una croce, su quella Croce, nella quale sta riposta l'unica nostra gloriosa speranza l'unica nostra beatissima interminabile pace. Che più? Tanto fu l'amore, che all' uomo bassissima Creatura portò che sotto specie di pane, e vino lasciò a lui velato il sacratissimo corpo, e sangue suo anzi obbligollo a riceverlo colla minaccia d'un' eterna dannazione a coloro, che ne stanno da gran tempo lontani. Chiesa santa vedova aspettatrice della dottrina del Salvatore e fedelissima interprete delle di lui parole alza la voce sua al popolo maledetto, e [illegible] o non curanza d'alcuni quasi Madre santa, amorosa piena d'amor per noi tutti, vostra Madre, desidera sommamente d'addottrinare coloro, che da gran tempo s' accostano a questa mensa, e con licenza maggiore mi fo dire le parole del reale

profeta: Filij tui sicut novellae olivarum: sint in circuitu mensae Domini: chiama ad uno ad uno i figli suoi, e insegna loro doversi animamente aquistare la purità di figli di Dio Filii tui, e poi in questa luminosa interna purezza stare intorno alla sacrosanta divina mensa sint in circuitu mensae Domini. Ecco quello, che a me ha dato il coraggio di esortarvi al ben vostro, non disperando, che Iddio colla grazia sua vi assista per operarlo. Mostrerò adunque quale debba essere la purità di coscienza in ricevere nell'anima sotto le specie di pane Gesù Salvatore; indi procederò a mostrarvi quante siano le benedizioni, che sparge Iddio sovra quegli, che con pura coscienza un tal sacramento ricevono, acciò ne restiate animati ad aquistare una purità tanto desiderabile in ognuno, ripeterò quelle parole di Davidde che ho in prima proposte: Filij tui

Psal 127 sicut novellae olivarum in circuitu mensae tuae. Ecce sic benedicetur homo. Spirito Santo, voi, che dalla sfolgorante sede, in cui glorioso ne state pronto e umiliate a soccorrere chiunque a voi con viva fede ricorre, donate a me che con tutto il cuor mio ve ne supplico donate, ecco, tanto d'ardore alla mia voce, tanto di forza alle mie parole che penetrando nell' anime di chi m'ascolta s'infiammi ad ardere le sante virtù, e con ansia ardua di desiderio di aquistare e conservare in ogni incontro quella purità di coscienza che dovrebbe essere in colui, che riceve entro dell'anima l'eterno Verbo, che velato sotto le specie di pane e vino sugl'Altari adoriamo, d'onde risplenda a gloria vostra il vantaggio de' prossimi quell'innocenza che tanto a voi si unisce quel santo divino amore che voi tanto accendete.

Convenevole anzi necessaria cosa, sarebbe l'esporvi prima che io
proceda a mostrarvi quale purità ricerchi in noi questo
sacramento, l'esporvi, dico l'essere, e la maestà del sogetto, che
sta nell'eucaristico pane nascosto acciò conoscendo voi la
sovrana dignità di questo cibo riceverlo con più studio,
e più diligenza in ricevelo di mente. Ma certo già
chi mi previene, e m'interroga, chi questo ne sia, che velato
sotto specie di pane a noi si presenta. Dura da scioglersi
è questa interrogazione che ~~tanto~~ ascolto farmi: Imperciocchè come
potrò io ridursi con chiarezza nel dimostrare quello, per cui
capire non è bastevole l'immensità de Cieli, per cui conoscere 4. Reg
sono imperfette le creature? Come abbracciar con parole quegli.
Jb 38 che pose le fondamenta alla terra, e questa nutrì, e stabilì Job 38 io
sovra l'acque? Come, dissi, potrò l'eterno, e onnipotente signore
mostrar io che spoglio di meriti ed immeritevole sono di
alcun dono dello spirito santo? Interrogate voi piuttosto
li Santi, quelli che per il buon uso che fecero delle eccelse
grazie che Iddio gli donò, e per la loro innocenza che
conservarono furono meritevoli d'essere dalla divina grazia
fortemente illustrati; interrogate un Agostino, ed ei vi
risponderà di poter dire ciò che Iddio non è mai

agitato da un continuo ordinatissimo movimento per
cui comprendere non vi è capace umano acuto intelletto;
e lo vedrete d'intorno alla terra come in piccol vaso rin-
chiuso ne suoi ~~confini~~ confini, senza che sommerger la possa coll'
onde sue ~~...~~ questo ancora non è Iddio; Mirate questo
bel cielo come egli è vago, e di quante stelle vada egli
ricamato, ed adorno: ma neppur questo è Iddio. scendete

col pensiero a considerare gli augelli che volan per l'aere,
gli animali, che caminan la terra, li pesci, che guizzan
nel mare, quanta moltitudine, e quanta varietà vi sia tra
loro, ma tutto questo ancora non è Iddio; più facilmente
dice Agostino ho potuto dire quello che non è che quello
che egli è. Se dunque, o Signore non potete essere pienamente

in un eterno Verbo, che pronunciaste a sè, incognito

[Margin note:] e tutte queste creature / di tutte queste cose / [illegible] / originate, e create / [illegible]

Figliuol vostro eguale a voi per natura e per essenza, il quale per oggetto d'una infinita misericordia vostra mandaste in questo mondo perchè riconciliasse l'uomo con voi giustamente irritato allora quando il nostro primo Padre peccò, mercè la di cui inobbedienza ci fu aperta la strada all'Inferno, e chiuso l'adito al Paradiso. Disceso egli dal Cielo nel ventre purissimo di Maria sempre Vergine, nacque in forma di servo, predicò la santa divina Legge, e nell'ultima cena co' suoi discepoli sotto le specie del pane, e del vino instituì il corpo, e sangue suo vivo, e vero, e dopo aver pregato l'eterno Padre nell'Orto, or gemendo tra flagelli, or soffrendo sotto le spine, or sospirando sotto il pesante legno della croce sopra la quale con ... morì, risuscitando il terzo giorno siccome aveva egli predetto, e dopo avere per il corso di 40 giorni contratti con i miracoli, e colla parola voce sua confermata la cattolica religione, ascese alla destra dell'eterno suo Padre lasciando a noi in memoria delle virtù sue operate, li immensi frutti della di lui passione, ed in contrassegno dell'amore certo non il di lui corpo vivo, e vero, che qui realmente sugl'Altari si adora. Eccovi ora palesata, Ascoltatori miei divoti, la bontà dell'eterno onnipotente Iddio, che viene a voi sotto queste specie di pane: Converrà adunque nell'anima vostra altamente impresso quest conoscimento d'onde a me riesca più agevole il dimostrarvi quale debba essere la purità di coscienza in accostandosi a lui. Questo Dio di tanta potenza da quel luogo sacrosanto vi chiama dicendo venite ad me omnes qui laboratis, et onerati estis, et ego reficiam vos. Quà ricchi, quà poveri, quà tutti voi, che sotto il grave peso de' peccati vene languite, quà avvicinatevi per ristorare l'anima vostra.

Ma come compardon' loro] mio Dio ? Voi puro, e santo, noi immondi, e delinquenti; voi forte, e onnipotente, noi deboli, e infermi; voi Creatore dell'Universo, noi vilissima creatura vostra, e potremo ancora avere il coraggio di portarci alla vostra presenza! Deh non per questo vi perdiate di speranza, che tali sono le viscere della misericordia di Lui che non isdegna il peccatore, anzi lo chiama, lo ricerca perchè ad esso rivolgasi Venite ad me, ego reficiam vos. Ma poichè la conoscenza delle offese a lui fatte non può non produrre in noi un giusto motivo di poco coraggio ad accostarsi al Altare; ascoltiamo Davidde, che quasi preveduto ciò avesse in ispirito ci fa coraggio col dire. accedite ad eum et illuminamini, et facies vestrae

Psal. 33 non confundentur. Accedite ad eum. quasi dicesse expurgate vetus fermentum ut sitis nova conspersio sicut

1 Cor. 5 estis azimi: togliete in prima da mezzo del cuor vostro ogni cosa d'immondo, estirpate ogni radice d'immondezza, di superbia, di vana gloria, e fate, che la purità ed sincerità nelle vostre compagnie, che l'integrità, la giustizia la verità faccia agl'occhi di tutti la sua comparsa; allora poi, che sarete senza fermento di peccato, azimi e mondi, stere a lui, che sarà effetto della sua impromessa il vederci illuminati. Avvicinarci a Cristo ma non già in quella maniera, nella quale s'avvicinarono a Lui i perfidi, e maledicenti Giudei d'onde ne restarono oscurati, imperocchè s'accostarono essi per crocifiggerlo. Restarono loro accecati dal Crocefisso, ma noi

margiando il Crocefisso (parla Agostino) resteremo illuminati. Aug. de Cruc. 33

Accostatevi dunque a Dio con un cuore spinto da viva fede, arricchito di buone opere, acceso dall' amor santo di Dio, e del Prossimo; ecco, ecco che allora rimirerav: :vi il Salvatore con lieto volto, e vi cumulerà di santa allegrezza, e perchè vi ha egli esortati a venire a te, egli stesso vi apparirà col lume suo talmente che rassiate con magnificenza, cioè adorni di belle virtù, e con santa pompa seguirlo. Allora, che sarete illuminati, conoscerete in questa purità si ricerche in accostarsi a Dio, e non potrete non dir tra voi stessi eterno Signore che chiamate a voi tutti, ut illuminet novus lumine purificando la coscienza de fedeli loro, e perchè degni di ricevervi solo son quelli, che nella vostra presenza assenti sono, deh, mio Dio fateli degni di ricevervi col renderli giusti vostri.

Con il sito del suo profetico Spirito Psal. dicea Davidde Domine quis habitabit in tabernaculo tuo 14 aut quis requiescet in monte sancto tuo: Tanta era la venerazione tanta la nostra le concepiva quel Profeta del tempio di Dio, che da lui ricercava, chi potesse esser degno di abitarvi, ovvi vi disse Dio qui ingreditur sine ibid macula, et operatur iustitiam qui loquitur veritatem in corde suo qui non egit dolum in lingua sua, nec fecit proximo suo mal: Per ciò sapere conviene sapere che tutto il merito nostro consiste nell' oprar la giustizia, e per conseguenza nell' operare secondo quella virtù che ci guida Iddio, ed il prossimo, voglio dire secondo la carità. Ora questa giustizia presuppone la mondezza e la santità la quale consiste solo in questo di declinare

Aug. ... Sal. 13 da ogni cosa, che sia peccato. Onde chi mai potrà oprar
la giustizia, se prima non è senza macchia,
imperocchè la perfetta giustizia del Cristiano consiste
nell'allontanarsi dal male, e far bene, perchè l'oprar il
bene suppone lo scostarsi dal male; perciò il primo
merito della beatitudine consiste nel conservarsi mondo
coll'astenersi dal peccato, indi seguita l'oprare il bene.
Per questo S. Gregorio avvisa; che non sufficit mala
Gregor. non agere, nisi etiam quisque studeat bonis operibus
insudare: et ideo queritur, quod enus sex manibus in conte
possent lumen veritatis in operatione. Vedete ora quali
virtù, e qual purità si ricerca per stare nel luogo
dove abita Iddio? è dovere conservarsi senza macchia,
oprar con giustizia, la quale consiste nel parlare con
verità, non ingannare il nostro prossimo, non offen-
derlo col cuore pensando male di lui, non colla lingua
Psal. 14 ingiuriandolo, non colle operazioni, ne col sentire con
orecchie di piacimento a parlar male di lui. Se dunque tanta mondezza
si ricerca in noi per abitare nel tempio di Dio, l'
abbracciamento di tante virtù, tanto maggiore dovrà
essere il fervore nel coltivarle nell'abbracciarle e
nel perfezionarsi in esse, quanto è grande la diffe-
renza tra lo stare nel luogo dove abita Iddio
et il riceverlo in noi stessi. Ed ecco quella, di
cui io parlo purità di coscienza quanta cura merita
mai! Probet autem se ipsum homo, et sic de pane illo edat
1. Cor. 11 et de calice bibat. Consideri, dice S. Paolo, chiunque
s'accosta alla sacra mensa se degno ne sia. Dunque ogni

studio a servirsi de' lumi, e delle grazie che dona Iddio
per riacquistare la perduta innocenza, e per soddisfare
alla giustizia di Dio. Non s'accosti mai al sacro Altare, se
prima colla salutar penitenza non abbia mondata la
coscienza sua: Conosca infine ciò che è in possesso, ed eserciti le
sante virtù, perchè con queste solo rendesi ciascuno
figlio di Dio, e per conseguenza degno d'accostarsi all'Al.
D'onde sia che consista l'esser figlio di Dio: Stà scritto
in S. Giovanni: quotquot autem receperunt eum dedit eis
potestatem filios Dei fieri, his, qui credunt in nomine ejus
qui non ex sanguinibus neque ex voluntate carnis, neque
ex voluntate viri, sed ex Deo nati sunt. Ecco la fede.
Paolo omnis qui diligit ex Deo natus est; ecco la S. Paolo
carità. La fede adunque, e la carità sono quelle virtù
che alla figliolanza di Dio ci ascrivono, le quali chi
mai sarà che non voglia abbracciare? Oh santa, e
potentissima carità quanto di maraviglioso operi in noi!
Di te solo per breve tempo sono [illegible] parole a quelli
che ora m'ascoltano, perchè restino infiammati dal
desiderio di possederti. Ricevendo l'anima nostra la
carità e la grazia riceve insieme la stessa persona
dello Spirito Santo, il quale graziosamente si unisce alla
carità, e alla grazia, e per mezzo di essa abita in noi
ci vivifica, ci addotta, ci fa quasi Dei, e ci rende operosi
ad ogni bene. Volete di più? Udite. La stessa terza
Persona della SS. Triade sacrosanta. Lo stesso Spirito Santo
essendo in Persona sopra l'anima giusta, adducendo seco
l'eterno Padre, e il Figliolo non si potendo separare
da lui, si ha di nuovo tutta la Trinità Santissima
il Padre, il Figliolo, e lo Spirito Santo in Persona, ed in

sostanza viene nell' anima giustificata, ed essa ridiede, ed abita quasi in suo tempio finché perdura ella nella carità giustizia secondo quello di S. Giovanni: Qui

J. c. 4 manet in caritate in Deo manet et Deus in eo. Questa carità s'impetrò dal eterno suo Padre Christo Gesù prima di morire in quella divinissima orazione, dicendo: ut omnes unum sint sicut tu Pater in me, et ego

in Jo. c. 26 partecipando di un'istesso Spirito Santo de carità siamo in Dio una cosa sola. Oh somma degnazione di Dio

il prossimo, anzi sovvenirlo, soccorerlo, amarlo. Di sarà ...i alcuno, chiunque per avere cada in mente di non voler ricevere nell'anima sua la SS. Trinità, di non volersi rendere forte nell' operare il bene, ma essere animato dallo Spirito Santo, di non voler portare scolpita in viva fede nel cuore la santa divina legge, non operare secondo la grazia, non mostrarsi fedele alle soavissime di lui inspirazioni, in somma di non ... esser figli di Dio, essendo que' soli veri figli di lui, che operano in ... maniera? Quicumque

starsi alla sacrosanta presenza di Christo Gesù che
tutti li Christiani adorano sugl'Altari, se nega di
ricevere nell'anima sua lo Spirito Santo, il quale
rende interna testimonianza d'essere adottivi figli
di Dio? Ora io ben conosco qual è sia il motivo
per cui longi stanno dalla vostra presenza, o Signore,

per ricevervi nel quor loro. Vedo essi in questo
mezzo di darsi in braccio a piaceri, di seguire le

che intendete già queste parole, pavete ad sanctuarium meum:
che avete concepito il raccapriccio, e il tremore, che
merita questo santuario in ogn'uno, che s'accosta: Mora

Matth: 6 uni, che assai rare volte si cibano di questa manna, e Iddio lo sa con qual'odio al peccato, con quali ornamenti di sante virtù; e che sa ancora, se che Iddio non permetta mai, che non s'accostino solo spinti da umani rispetti, e da ostentazione desiderando di comparire un'anima buona, un'anima santa agl'occhi degl'uomini. Io non tocco già ora quell'anime, che in se spesse volte ricevono Gesù Christo, non sapendo qual sia l'avvanzamento loro nelle sante virtù, qual sia la santa rassegnazione nelle avversità, e tribolazioni, qual sia la loro umiltà nel ricevere affronti, e disgusti senza adirarsi, qual sia l'ardente loro carità nell'indigenze del prossimo volendo io credere, che abbino a cuore più d'ogn'altra cosa queste virtù; perchè ho raggione di credere, che loro più di molt'altre conoschino e intendano il gran male, che sia l'accostarsi a Gesù, e riceverlo senza la dovuta giustificazione.

Vennero un tempo contro Israello i Filistei a battaglia, combatterono, vinsero; e ritornando

1 Reg: 4 indietro l'esercito israelita con la perdita di uomini quasi quattromila, giunsero ne' propij loro confini. Ju. non molto dopo presero inaspettato consiglio di ritornare al campo, trasportando seco loro

S: l'Arca del testamento, acciocchè la presenza di Dio in mezzo a loro, gli liberasse dalle mani de suoi nemici. Ma così non successe, imperciocchè attaccata

di nuovo la zuffa morirono trentamila Israeliti, ed oltre
essendo li due Sacerdoti Ofni, e Finees figli del Sommo Sacer-
dote ancora, l'Arca già presa da Filistei; questa traspor-
tarono essi vittoriosi, e trionfanti in Azoto, e la posero
alla presenza dell'Idolo Dagon nel di lui Tempio, cre-
dendo così di rendersi gloriosi, e memorabili a tutte le
genti. Ma Iddio, che non lascia immune la temerità i. Reg: 5
dei delinquenti fece che la prima, e la seconda mattina
trovassero in terra l'Idolo caduto, ed infranto, e percosse
con gran piaga gli Azoti fin tanto, che dissero non
maneat Arca Dei Israel apud nos, quoniam dura est i. Reg. 5
manus eius super nos, et super Dagon Deum nostrum.
Congregati dopo questo a Consiglio i Satrapi de Filistei
stabilirono di condur quest'Arca d'intorno a suoi con-
fini. Ed ecco nel giro che facevano ogni Città sentiva il
castigo colla morte de uomini dal piccolo sino al
maggiore. Finalmente la condussero in Accaron. Ma i
di lei cittadini alla prima veduta dell'Arca gridò ad
alta voce lasciate lasciate che l'Arca ritorni nel
luogo suo, affinchè non uccida noi ancora col popolo
tanto era il timor della morte, che tutta la gente di
quel Paese concepito ne avea. Finalmente ne sette mesi
che l'Arca stette nella regione de Filistei provarono i. Reg. 6
continuo il castigo ovvero la morte del popolo ora
con greggia della plebe perchè rimisero l'Arca nel
luogo suo, rendendo ciò che dovevano per il loro
peccato. La rimisero adunque e passando essa per il
Paese de Bethsamiti, alcuni gli occhi questi popoli
et ardirono di mirarla rallegrandosi di tal vista; ed

oh nuova piaga a' que' popoli! Imperciocchè furono
percossi con morte settanta uomini del popolo, e
cinquantamila della plebe. Vedendo li Betsamiti
questa gran perdita dissero più colle lagrime,

Che voglio mai io dire con questo devoti

avidi di toccarla, di rapirla. Ma cos'altro rappresen-
tava quell'Arca, se non la figura di Gesù Cristo?
Di quello Unigenito figliolo di Dio, che sotto le specie
del pane, e vino adoriamo noi sugli Altari. Se dunque
di tante piaghe fu cagione, tanto danno apportò
a' Filistei il rapimento dell'Arca, la quale era
solamente figura di Gesù Cristo: quanto maggiore dovrò
io dire, che sia il danno all'anima di coloro,
che senza porre freno studio in togliere dalla
coscienza loro le colpe s'accostano a' sacrosanti

Se doveva arrivare in Casa vostra qualche gran personaggio da cui poteste sperare qualche gran beneficio, e verso cui aveste tutto il rispetto e tutto il amore, come non v'affatichereste in pulire, in adornare l'abitazione! Ora vi vedreste a togliere ogni cosa che aver potesse disaggradevole agl'occhi suoi, ora a preparare, a disporre adobbi per ogni parte, in somma tutta v'affatichereste per rendere ~~pura, monda~~ l'abitacolo degno della persona ~~l'abitazione~~: Ma quando si tratta di ricevere nel cuor vostro il Dio Signore de Re, padrone di tutto il mondo, perchè creato da lui, che dona l'essere, la vita e le sostanze agl'uomini tutti, sarete forsi negligentosa, e tarda, nel rendere pura e monda l'abitazione?

Restituita che fu l'Arca del testamento da Filistei ai nemici d'Israele parlò Samuele a tutta quella gente così: Si in toto corde vestro revertimini ad Dominum auferte Deos alienos de medio vestri Baalim et Astaroth, et praeparate corda Domino, et servite ei soli, et eruet vos de manu Filistym. Come bene mi vanno per la memoria queste parole adesso, che a me pare, che il vostro volto m'accusi l'orrore, che concepite al peccato, ed il suo odiamento, che provate nel vostro cuore. ~~Si dunque~~ in toto corde vestro revertimini ad Dominum se dunque con tutto lo spirito vostro ritornate al Signore, auferte Deos alienos de medio vestri Baalim et Astaroth, togliete dal vostro cuore l'idolo di quella superbia, di quella vanità, di quell'amor proprio, che non

vi lascierò conoscere la bella virtù dell'umiltà, togliete
l'Idolo di quell'interesse che vi fà esercitar ingiustizie,
togliete l'Idolo di quell'odio, di quell'invidia di quelle
spinte al danno del prossimo che non dan luogo a

la strada della vostra legge perche non si scosti da voi,
sicchè conosca l'enormità del peccato perche nol commetta
sicchè conosca voi stesso infinita bontà perche non v'

nell'umiltà più di spirito nell'orazione, di quella vera

Che dirò io mai delle grazie, e benedizioni, che com-

grazie non acquisterete voi che ricevete non in casa

ma un Eterno Iddio incarnato per liberar voi dalla
schiavitù del peccato. Quanti non saranno i lumi per
conoscere la sua santa divina legge ed i certamente
per abbracciarla quanta non soavità nel esercitare le
sante virtù. Vedrete voi l'anima vostra vestita, e
ricoperta d'una luce vera, che discioglie le tenebre
dell'ignoranza di questo secolo, e fa abbracciare il timor
santo di Dio, che è il principio della sapienza della
Job:1 sapienza. Dico che, non in altro consiste, secondo il parlare
di S. Ambrogio che nel rinunciare alla vanità, ed alle pompe

in questo secolo perchè il sapere le cose secolari è una pazzia. Quid est autem [illegible] sapientia [illegible] [illegible] venustate? [illegible] sapere [illegible] stultitia est. Vedrete voi insomma infiammati d'un amor santo di Dio, e del prossimo infiammati dico di un'ardente carità nell'esercizio di cui consiste l'adempimento di tutta la legge. Io tutte quelle grazie che ricevete [illegible] [illegible] [illegible] della vostra [illegible] [illegible] merito [illegible] [illegible] di lui [illegible] Ma ascendiamo un poco più alto col pensier nostro, e [illegible] che a noi donerà la sua santa pace [illegible] quando questa [illegible] gl' [illegible] [illegible] [illegible] di tutte le vere benedizioni non dico la pace di [illegible] terrena [illegible] [illegible] [illegible] [illegible] pace metere, sed gladium: e perchè sia [illegible] [illegible] pace [illegible] per questo [illegible] [illegible] Martiri per ottenere l'eterna pace [illegible] sopportare e persecuzioni e martirio. natamente, o disordinatamente amare, e desiderare la cosa buona.

…nstas. …l. 114. così da questo ordinato, o disordinato appetito la nostra volontà buona, o cattiva s'appella: perciocchè secondo S. Agostino il peccato, e la colpa non son altro, che una privazione di modo, e d'ordine circa il bene da amarsi

Aug: contra Faustum peccatum, et culpa nil aliud est, nisi privatio modi, et ordinis circa bonum diligendum così la nostra volontà allora è buona, quando con moderazione, e con ordine ama il bene, quando poi fuor di modo, e d'ordine è trasportata ad amarlo allora il voler nostro si chiama cattivo. questo modo non in altro consiste, che nell' amare Iddio sopra ogni cosa. in fatti chi altro merita un amore supremo, se non Iddio? Egli solo è un essere d'immensa d'eterna d'infinita bontà egli solo per essenza buono

…ac 12 senza relazione ad alcun altro bene, e perciò merita ogni grado della nostra volontà in amarlo in desiderarlo sopra ogni cosa. il modo di amare il prossimo è di amarlo perchè è imagine di Dio e partecipa della di lui bontà sopra tutte le altre creature inferiori. L'ordine poi consiste nell' amare Iddio per se, ed il prossimo per Iddio avendo l'Eterno Padre Iddio creato l'uomo perchè lo conoscesse, lo amasse, et amando il godesse. Dunque allora solo la volontà si chiama buona quando conserva questo modo, e quest' ordine nell amare Iddio, ed il prossimo quando si rende conforme in ogni cosa al volere di Dio, quando soddisfa alla di lui santa divina Legge; e quando ordina e riferisce tutte le sue operazioni in Dio ed a conseguire

eterna felicità da Cristo a noi promessa come ultimo fine. A questa bontà, e perfezione non può arrivare la nostra volontà se non per mezzo delle teologali virtù, Fede, speranza, e carità. Doveva la Fede l'intelletto umano nostro a credere gli articoli di nostra Fede ad aderire appoggiarsi a quelle cose, che sono sopra la naturale nostra capacità del sacrosanto mistero dell'incarnazione della nostra redenzione della futura gloria che sarà in noi rivelata: la carità accende la volontà ad amare Iddio più che il Padre, la Madre, i figli, più in somma che tutte le cose temporali, ad amare il prossimo come se stesso questa ci fa tenermente accostare alla divina legge, ai precetti del santo Vangelo, che fa disprezzare tutte queste terrene cose per unico, e solo amore di Dio: la speranza per fine di quella celeste beatitudine nostro eterna... a non far conto alcuno delle ... di quaggiù anzi a chiamare persecuzioni e tormenti in questo ... a desiderare la morte siccome ... gli Apostoli, Martiri, Santi, Giusti. Da questo o devota udienza arrivate a comprendere, come la sola Fede speranza e carità rende buona la volontà dell'uomo in questa vita, e meritevole dell'eterna pace. Questi questi, e non altri sono gl'uomini di buon volere, a questi fù fatto quell'annunzio di pace dagl'Angeli in terra, pax hominibus bonae voluntatis. Per nome di pace io intendo un'ordinata congiunzione di cose; così pace si chiama quella unione che è ... in questa terra, perciocchè fin tanto, che le sane radici conservano in essa crescono germogliano, fruttificano così le piante godono pace

e quiete quando unite sono alla terra in quale si chiama
lor centro. Ora chi altro è centro dell'anima nostra, se non
Iddio? essa da Iddio è creata, da lui è conservata
e non può non aspirare a lui perciocché esso solo
può donarli la pace non essendo le cose di quaggiù
atte a render quieto l'uomo, conciossiacosaché tutte siano
vanità. Da Iddio adunque dobbiamo sperar questa pace,
la quale consiste in non altro, che nell'unione con esso lui.
Quindi siccome venendo Cristo in questo Mondo gli annun-
ciata agli uomini di buon volere la pace; così venendo in noi
Cristo in sacramento sacramentato apporterà in dono di questa pace,
di cui vi parlo, ma non a tutti a quei soli, che
abbracciano esercitano le sante virtù, a quelli in somma
che sono di buon volere. Coraggio adunque ciascuno
in mondare la coscienza da peccati, che abbiamo appresso
lo n. l'eterno Padre Avvocato nostro Gesù Cristo, esso è propi-
ziatore per i nostri peccati, e di tutto il Mondo; da in
questa guisa da lui chiunque riceverà questa pace:
[illegible] .47 Allora potrò dir col Salmista: posuit fines tuos pacem
Allora per fine alle vostre passioni sarà la pace
per [illegible] le tentazioni del Demonio sarà la pace
per [illegible] sofferire a nostri travagli con pazienza infinita
[illegible] sarà la pace; di questa pace io parlo, che ci unisce
solo da Dio solo a Dio, che si trova solo in Dio, che si ottiene solo
da Dio. Per ottenere da Iddio questa pace è dovere
adornarsi delle sante virtù, esercitare in tanti incontri
quella santa umiltà, poiché il Signore dona la grazia sua

agl'umili, e fa resistenza ai superbi Deus superbis resistit, 1 Pet. 5
humilibus autem dat gratiam. Vedremo già col dono di
questa grazia esser restata una volta vittoriosa l'
umiltà di Davidde contro la superbia e l'ambizione di 2 Reg. 15
Assalonne. Questa grazia da Iddio mai starche ricer:
chiamo perocchè senza questa non possiamo ottenere
il bene di questa pace: Non per altro motivo S. Paolo
nelle sue Epistole premette la grazia alla pace dicendo Rom. 1
Gratia vobis, et pax, se non che per darci ad intendere, che
senza la grazia non vi può esser la pace, poichè
dice il Signore, che non godono di alcuna pace gl' Is. 57
empj: Non est pax impijs. Avete finalmente veduto
quanti beni racchiuda in se questa pace; ora sarà
vostra premura il procurare la purità della vostra
coscienza per ricevere entro l'anima vostra Gesù
Cristo, e ricevere con esso Lui il dono di questa grazia,
ed il bene di questa pace, la quale è qui in terra
con Dio per fede, ed in eterno sarà con voi per
visione. Credete con viva fede alla legge santa
di lui, esercitate con pien coraggio le sante virtù
dell'umiltà e carità che egli coll'esempio, e colle
parole c'insegnò, e così abbandonato questo Mondo ser.
virete a lui solo. Troveranno in tanto coloro, che
servono a Dio il godimento quaggiù di una pace,
e tranquillità inalterabile e perpetua: non avranno
tentazioni che gli opprimino, non avranno vizj, che
gli contrastino, ma in esse ubbidirà il senso alla raggione
e la raggione a Dio e così imperarà Iddio all'uomo, Aug. de Civit.
e l'animo al corpo e tanta sarà in lui l'agevolezza, e

soavità d'obbidire, quanta la felicità di vivere, e di regnare.

Ed ecco finalmente che avete da me ascoltato, quanta si ricerchi in noi purità di coscienza, e come figlio di Dio colle sante virtù si renda ciascuno. Deh solevate adunque la vostra volontà a determinarsi a quello, che vi conduce a maggior grado di con=fortezza. Vedete già cogl'occhi della fede velato sotto spezie di pane sugl'Altari quel Dio, che nell'anime nostre imprime le verità dell'eterna salute che a noi inspira l'amore di esse, e per inspira=zione d'un'ardentissima, e luminosissima carità, operò di maniera che le esercitiamo: quel Dio degl'eserciti delle vendette, così chiamato dalla sante scritture. Quel Dio che dalla cima de'monti assiso in trono di formidabile maestà tonava fulminava, ed il tutto abbatteva coll'orrore di sua velata presenza, e tra il fuoco, e la caligine involto e di nuvole cinto, e di terrore armato facea la sommità de' Cieli al suo avvenimento inclinarsi, e scuotersi, e crollare la terra tutta. Egli è quel d'esso che con quelle così dolci parole vi chiama dicendo venite ad me ... ego reficiam vos. Ma voi che ricordevoli siete della di lui maestà e onnipotenza del Dio che esso porta al peccato, udite dirvi dalla vostra coscienza Lungi lungi da questo sacramento ne sia colui, che è da colpa contaminato e s'accosti ad esso con pien coraggio quel solo che reso è figlio di Lui. Purità adunque di figli di Dio ricercasi, e non s'avvicini a

a lui, se non quegli, che d'una viva fede è informato, acceso d'un ardente carità, animato da una ferma speranza, nelle quali virtù consiste il nascere alla figliuolanza di Dio. Il Padre de' lumi, l'eterno Dio, ci generò alla fede per mezzo della parola di verità, che volle a noi predicare, e per la quale aprì il cuore, e la mente nostra. Voluntarie enim nos genuit. Imperciocchè eravamo noi meschini privi d'ogni merito, ed egli per elezione del suo volere libera e di nessun vantaggio a lui stesso ci ha [illegible] di altre creature, e prescelti per chiamare alla vita. Videte qualem charitatem dedit nobis Pater ut filii Dei nominemur, et simus. Vedete in Gesù Cristo l'amore eterno di cui ci ha degnati l'eterno Padre l'adozione che per mezzo di Gesù Cristo ci ha conferito col carattere di figli di lui. Figli per virtù della carità omnis qui diligit ex Deo natus est. Figli per mezzo della speranza. omnis qui habet hanc spem in eo sanctificat se, sicut et ille sanctus est; figli per virtù della fede: dedit eis potestatem filios Dei fieri his qui credunt in nomine ejus: hanno potestà d'essere chiamati figli di Dio, non quelli che per ragione di sangue, ma nati sono da Dio: qui non ex sanguinibus sed ex Deo nati sunt; beati ma coloro, che sono informati da una viva fede di quella fede io parlo al di cui lume se camminassero tutti, quanti non sarebbero i possessori delle sante virtù che [illegible] ci ha insegnate! Quanti non s'arricchirebbono di buone opere! Quanti non sarebbono infiammati di Carità, la quale l'anima nostra si fa sede dello Spirito Santo,

adorazione di tutta la SS. Trinità. Se questa fede
in somma possedesse il cuor nostro: conosceressimo sì
più vivamente Iddio e conoscendolo l'ameressimo
più davvero, imperciocchè non possiamo noi
conoscere un sommo bene, e non amarlo, nel che
manchiamo mai quando non osserviamo quello, che con
tanto desio ci ha egli raccomandato; cioè la carità
verso il prossimo. Chiunque ha la carità porta
il carattere di figlio di Dio e quel Cristiano che

Percutiebat pectus suum, dicens: Deus propitius esto mihi peccatori. Dico vobis descendit hic justificatus in domum suam ab illo. Evang. Luc. 18

[illegible] Iddio la sua grazia? e nulla di meno si spaventano tanto gli uomini al solo nome di penitenza. E che mai credono che sia questa penitenza? [illegible] una [illegible], una [illegible], un patibolo della giustizia divina, è un tribunale [illegible] ove i peccatori sempre [illegible] [illegible] [illegible]. [illegible] [illegible] [illegible] un tal tribunale tutti i rei [illegible] ~~[illegible]~~ [illegible] che [illegible] penitenza. [illegible] [illegible] Iddio [illegible] [illegible] il [illegible] di Dio [illegible] si pente. L'altro ~~[illegible]~~

E [illegible] qual [illegible] che [illegible] [illegible] [illegible] [illegible] [illegible] un gran desiderio [illegible] anima mia. Quemadmodum desiderat cervus ad fontes aquarum [illegible] [illegible] Davide. [illegible] [illegible] Bethlehem. 2. Reg. 23. 15. [illegible] Davide [illegible] [illegible] libri dai [illegible] [illegible] ~~[illegible]~~ [illegible] anime, [illegible] della penitenza [illegible]

E pure qual [illegible] la provare. La provava [illegible] il primo a [illegible] la mano in segno di pace [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] in persona e picchia [illegible] [illegible] [illegible] [illegible] [illegible] figliuolo della [illegible] di [illegible] [illegible] [illegible] [illegible] anima [illegible] [illegible] [illegible] una [illegible] [illegible] [illegible]

Che vendette, che s'accoglitore con amore? E appunto si fa con amore il Padre. La sposa ne' cantici avea lo sposo, e dice surgat et [illegible] [illegible] et [illegible] [illegible]. il figlio prodigo. surgat et [illegible] ad [illegible]. Qui [illegible] [illegible] che lo porta [illegible] al Padre la sposa [illegible], perche il figlio, [illegible] alle anime [illegible] e [illegible] le delizie [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] Padre e [illegible] [illegible] consideriamo le finezze di questo Padre del figliol prodigo [illegible] [illegible] [illegible] [illegible] vidit illum Pater ipsius et misericordia motus est et accurrens cecidit super collum ejus et osculatus est eum. Dixit ad servos suos: cito proferte stolam primam et induite illum et date annulum in manum ejus et calceamenta in pedes ejus et adducite vitulum [illegible] et occidite et manducemus, et epulemur. E pure questa [illegible] [illegible] nulla di più di quello può fare un Padre [illegible] per [illegible] [illegible] di natura [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]. Si vede bene che non siamo pratici nel dar il suo giusto peso alle cose, quando noi mostriamo aver tanta paura del nemico infernale. Ecco con che autorità il Signore lo scaccia e per mostrarne la facilità non dice che non vi adoprò più che un dito. In digito Dei eiicio Dæmonia. E questa medesima potestà ci ha lasciata in retaggio a noi credenti In nomine meo Dæmonia eiicient. Quanto maggior impaccio ci danno gli uomini e quanto è più molesta la tentazione, che da essi loro promana.

Eccolo nel Vangelo Erat Jesus eiiciens Dæmonium et illud erat mutum. Et cum eiecisset Dæmonium locutus est mutus. Ecco eseguito. Ma egli uomini ... [illegible] che lo ... certe funeste co' [illegible] egli mostra quale sono nelle condizioni di quelle ci' ne noi sfoghiamo un'animo risentito mentre che ci ingegniamo d'intendere per vedersene. Al cap. 3 si dice, che Giobbe maledisse al giorno del suo natale. Maledixit diei suo, e lamentossi perchè Dio lo fece nascere [illegible] Dio, che vi [illegible]. Ma può egli mai meritar con tali funeste? Forse il Demonio l'avrà unito con esso lui? Forse che il vedersi senza sostanza etc. Forse senza prole, senza amici, sotto una piaga etc. no; poichè di tanto in tanto, e secondo che si [illegible] gli dice ne' disgrazie, si [illegible] Dal sacro testo si [illegible] hi [illegible] Job [illegible] Perchè dice [illegible] vanzo tre suoi amici, e oggi non dà fondamento da credere, che da' essi loro nascesse l'origine della strana opinione di Giobbe. Così scrivon i critici, perchè dopo descritto il loro arrivo soggiunge il testo Post haec aperuit Job os suum, et maledixit diei suo. Il Demonio non [illegible] già una tale opinione.

E credete voi che egli non sappia che gli uomini [illegible], e mano più di sovvertire, che egli medesimo? Lo sa, e per questo usa un'astuzia. Si narra nel libro de' Giudici cap. 20 d'una battaglia fatta tra la tribù di Beniamino, ed il resto delle altre tribù di Israele. Erano queste [illegible] quella a' [illegible] ~~[illegible]~~ [illegible] onde [illegible] dosi non dal [illegible] fuggire [illegible], e dall'altro, la [illegible] altro [illegible] se con arte Posero non lungi la città in agguato [illegible] di questi soldati quali [illegible] che fossero gli altri [illegible] simular la fuga, e tirati [illegible] i nemici persecutori entrassero [illegible] nella [illegible] città di Gabaa [illegible] dessero fuoco, la [illegible] fermando la fuga [illegible] che fossero essere presa la città, [illegible] così [illegible] in mezzo i nemici, e [illegible] Si attacca la battaglia [illegible] fuggir. Beniamino perseguita. [illegible] accortisi dal fuoco [illegible] che la città era presa, [illegible] addietro con tal empito che quei di Gabaa ebbero per bene raccomandarsi alla fuga per [illegible] li lasciavano fuggire acciò corressero [illegible] città [illegible] [illegible] non sospettavano. E con tal arte ottennero la vittoria [illegible] rimanendo superata [illegible] mila uomini di guerra [illegible], che [illegible] in quella giornata 25000 [illegible]. Filii autem Beniamin cum se inferiores esse vidissent coeperunt fugere, quod cernentes filii Israel dederunt eis ad fugiendum locum ut ad praeparatas insidias devenirent quas iuxta urbem posuerant. Così fa il Demonio [illegible] gran [illegible], e la coltiva [illegible] nella [illegible], [illegible] arte che fuggendo dà

Accessit ad eum Centurio rogans eum, et dicens.
Dñe puer meus iacet in domo paralyticus, et
male torquetur. Evang. Math. 8. 5.

[illegible] ammirar la carità del Centurione, ed io ammiro l'industria della providenza di [illegible] [illegible] la [illegible] d'[illegible] [illegible]. Amava assai questo [illegible] [illegible]. Questo è un bell' ingegno del Signore di chiamarsi a se per via delle tribolazioni, ed il nostro vantaggio, che così faccia.

Ove il Signore ci lasci vivere i [illegible] [illegible] e [illegible]. [illegible] [illegible] [illegible] [illegible]. [illegible] che [illegible] [illegible] nel mondo [illegible] [illegible] [illegible] di [illegible]. Ove poi [illegible] [illegible] la [illegible], [illegible] [illegible], più [illegible] [illegible] [illegible] si [illegible] [illegible] [illegible] con Dio. E così [illegible] [illegible] [illegible] dal proprio [illegible] siamo [illegible] obbligati allo spirito santo, che di ciò ci ha dato [illegible] [illegible] nelle sacre carte.

Urgebant Aegyptij populum exire de terra velociter Exod. 12. 33. Questo Egitto è il mondo in cui abitano angustie, e afflizioni. queste sono che urgent exire per [illegible] [illegible] alla terra di promissione del Cielo. [illegible] di questo Egitto che [illegible] [illegible] [illegible] [illegible] [illegible] per questo [illegible] questa [illegible] [illegible].

E perchè [illegible] dell'Egitto [illegible] meglio le sue tenebre, io chiedo se sono tenebre nel mondo! Davide il suo [illegible] lo [illegible] nel giorno. In die tribulationis meae. Psal. 76 3. ma se è giorno, perchè soggiunge Deum exquisivi manibus meis nocte? [illegible] [illegible] dire, che quando [illegible] il di [illegible] [illegible] era sempre in tenebre di notte. [illegible] altrove Contexerunt me tenebrae, parlando di tribulationes [illegible] [illegible] [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] [illegible] [illegible] di notte il suo [illegible]. [illegible] nell'[illegible] della [illegible] [illegible], [illegible] [illegible], [illegible] [illegible] [illegible] del suo [illegible] se n'era andato a [illegible] [illegible] [illegible] non [illegible] [illegible] [illegible] notte [illegible] [illegible], ma non [illegible] [illegible] [illegible] d'oro che non può star [illegible] di notte, e tanto s'infiamma che [illegible] [illegible] la [illegible] [illegible], che la [illegible], che la [illegible] non [illegible], anzi più [illegible] [illegible] [illegible]

Nel giorno della prosperità soggiamo star senza il Signore e sebbene ci avvenga la notte della tribolazione non s'accorgiamo, e ci accorghiamo [illegible] che è la notte del Signore, che [illegible] da noi [illegible] notte [illegible] tribolazione [illegible] &c.

Era una di queste anime quella d'Isaia che diceva Anima mea desideravit te in nocte. Isai. 26. 9. Deus in tribulatione, et [illegible]. E perchè questa era il [illegible] Evangelico che [illegible] alla maggior delle tribolazioni, [illegible] quella della croce. E perchè allora era pur mezzodì, acciò si vedesse che tanta luce non [illegible] a sexta autem hora tenebrae factae sunt super universam terram usque in horam nonam.

Ma forse che meglio intenderemo il [illegible] di queste tenebre, e conosceremo quanto [illegible] senza di questo, che fè accendere Assalonne nell'orzo di Ioab 2 Reg. 14. 2[illegible] ad Ioab, qui noluit venire ad eum. Cumque secundo misisset, et ille noluisset venire ad eum, dixit servis suis: [illegible] succendite eam igni [illegible] Surrexit Joab, et venit ad Absalom. Manda il Signore queste [illegible] &c. [illegible] nell'[illegible] di un [illegible] &c. E poi nella [illegible] Dice [illegible] ignis, grando, nix, glacies, spiritus procellarum, qui faciunt verbum eius [illegible] &c. perchè [illegible] compagni &c.

Sono due le maniere, che tiene il Signore per [illegible]. Duo funiculi Adam habet [illegible] Funiculi Adae sunt flagella, quia et ipse primus, et plus omnium nos flagellatus [illegible]. Vincula vero charitatis sunt Dei beneficia. S. Bonaventura. [illegible] i benefizj, [illegible] i flagelli [illegible] flagellare de funiculo, [illegible] che sono quelle, che [illegible], e forse [illegible] più [illegible], o di quelle [illegible], o di quelle [illegible].

O quanto egli è mai giusto in così [illegible] il nostro Dio [illegible] abbiamo [illegible] della tribolazione, [illegible] &c.

così &c.

Dice un bell'esempio (cfr. [illegible] il Bacci [illegible]) Racconta un [illegible] della vita di S. Teodoro che essendo giovane di forze e di statura quasi gigantesca inclinò nella gioventù alla milizia, a cui si diede; ma si diede anco ad ogni sorta di vizio. [illegible]

ex alio [illegible] XI. [illegible]

Era l'Imperatore l'occasione Tedalco, [illegible] di tal nome Questo per un sì spettacoloso [illegible], chi ne' castello salace e fanciulle [illegible] Comparve il fiore della nobiltà, e Tedlaco [illegible] o [illegible] Ornato [illegible], [illegible] Cesare, e [illegible] al suo posto aspetta il segno [illegible] quando in quel punto trattosi uno gli presentò un foglio. Legge [illegible] poi interroga [illegible] Era la nuova, che sua moglie [illegible] era subitamente morta. Con questa [illegible] gli [illegible] il Signore nell'interno le vanità della gloria mondana &c. onde Tedlaco gettata la lancia a' piedi dell'Imperatore e deposto il bastone di comando, [illegible] il [illegible] dalla morte, [illegible], [illegible] di mia moglie, che or qui mi [illegible], [illegible] a [illegible] le mie [illegible], e [illegible] che ~~[illegible]~~ lui di fare con un Dio, che poi [illegible] anco a me [illegible] e con più ragione [illegible] io tanto più [illegible]. Nisi videro in manibus ejus fixuram clavorum, et mittam digitum meum in locum clavorum, et mittam manum meam in latus ejus, non credam. Vang. Joan. 20

Maraviglia! prima se non vede, e poi se non per [illegible] e per la man tutta. Così si comincia dal poco nella via del peccato, e poi si giunge, ove non si credeva.

[illegible] increato come un gran torrentaccio, che &c. alle vene par poco, ed è anche basso [illegible] chi vi si vede [illegible] a valicarlo avviene a lui quello che avvenne ad Ezechiello c. 47. dice egli che guidato [illegible], che guidavalo, mensus est mille cubitos, et traduxit me per aquam usque ad talos, rursumque mensus est mille, et traduxit me per aquam usque ad genua, et mensus est mille, et traduxit me per aquam usque ad renes, et mensus est mille torrentem, quem non potui pertransire. E fu di [illegible], che ebbe un Angiolo per guida, che lo ricondusse alla riva, [illegible] [illegible], che per altro era perduto. Così [illegible] quest'affetto troppo libero un poco d'acqua a' piedi dell'anima &c. poi giunge alle reni &c.

Questa è l'arte del maligno: sa anche egli che molte persone [illegible] peccati grandi in anime [illegible] troppo d'[illegible], procura introdurvi il [illegible] li affezionarsi a qualche diletto amore [illegible], e procurare di [illegible] [illegible] e deliberato. Come un [illegible] libero per [illegible], è un [illegible] troppo; ~~[illegible]~~. Ormai tanto abbia in mano e [illegible] il [illegible]. Andiamo a vederla

in David e Saul. Entra Saul nella spelonca d'Engaddi &c. gli taglia
David un po' della sua clamide che non se n'accorge, e ecco ei. Uscito
col pezzo tagliato in mano, gridagli dietro: Vide, et cognosce oram clamidis
tuae in manu mea ed allora Saul. Nunc scio quod certissime regnaturus sis,
et habiturus in manu tua regnum Israel. 1 Reg. 24. Ma come? Si dà tutto
perchè non regni; ed a giovinezza, chi regnerà? Lo perseguita, lo insidia
fino a dar alla vita. e poi dice: Nunc scio &c. Vidit manum [illegible]
[illegible] coronatus, et in aliquod [illegible] ius id haberi [illegible]. Dice un
moderno. Davvero. Che agia nella la carità! Ma si giunge a togliersi
uno spazio [illegible] nella un qualche [illegible] della [illegible], e [illegible] &c.
e svelato, tutto ciò in quello spezzone. Come, quando, perchè, che
per la distanza, per la [illegible] &c. è vero, non avendo il nemico
in mano un lembo della veste, nella della morte, perchè non della
a Dio [illegible] &c.

Se anche un tanto male abbiamo a crescere ancora dalle [illegible]
missioni, Si dedero somnum oculis meis et palpebris meis dormitationem,
et requiem temporibus meis donec inveniam locum Domino diceva David. Sal. 131.
Voleva dire non darò sonno agli occhi miei. Ma se non vuol dar
sonno agli occhi, perchè non dice solo questo, ed aggiunger di non voler
dar non che alle palpebre una [illegible] alla sfuggita, alle [illegible] un
poi di riposo?, Come sta ora negare somnum oculis, ne vigilet! Come ora da-
tur requiem temporibus? Si requies temporibus datur per [illegible] in
oculos somnus [illegible] dice il [illegible]. e S. Agostino in questo luogo. Somnum;
somnum oculis: Dormitationem [illegible] Vedete [illegible] che non [illegible]

nella stessa maniera onde si trovi entrare una certa stupidità, e fino
[illegible] ammissioni &c. lasciar [illegible] lasciar la lezzione, l'
orazione &c. ad una [illegible]; e andando in, e giù [illegible]. ed alla
fine o si cade in qualche enorme peccato, o non [illegible]
[illegible] in una [illegible] insensibilità delle cose di Dio &c.

Quello [illegible] vergini nel [illegible] Vangelo. Moram autem faciente
sponso dormitaverunt omnes, et dormierunt. De nimium [illegible] parti-
[illegible] dormierunt doctores exponunt, et dormitaverunt de venialibus.
[illegible] dormitatio praevia est ad dormitionem [illegible], dice l'[illegible],
ed un altro [illegible] dice (Cartillo) si non dormitassent non dor-
mivissent. Ma meglio di tutti, e più a mio proposito S. Gregorio
Dormire mori est, (perdita della morte dell'anima), ante somnum
dormitare, est ante mortem a salute languescere.

E che indicar mai, che quel che si legge de' gran peccatori sia
avvenuto in un subito? Da che cominciò il gran male di Caino? Da una
piccola invidia. Quel di Giuda? Da un affetto non raffrenato di roba. Quel
di Lucifero &c. da un disgusto nella corte di Roma &c. Si comincia a perdere
79 [illegible] si comincia una ~~[illegible]~~ certa, che [illegible] tutto il male dell'anima.

Bisogna dunque di schivare i piccoli difetti, massime quando possono cagionare di [illegible] maggiori. Chi per troppo [illegible] quando son [illegible] [illegible]. ~~[illegible]~~. Si dice [illegible] per [illegible] per un chiodo si perde un ferro, per un ferro un cavallo per un cavallo un Capitano, per un Capitano un'esercito, per un un esercito un regno. Allora se ad infiammar, ardore e amor ricevuti in chi ora, può ben presumersi chi prega in pubblica adunanza, poichè se i discepoli d'Emmaus sentirono scaldarsi il cuore [illegible] con esso, che fin quando con noi ovunque unito e ci scalda e si scalda con noi e [illegible] noi pregando [illegible]

VI. Come che è unito con chi intervengono ad orazioni comuni, vi è anche il suo divino Spirito. Quello non sapendo noi che, e come si chieda, che a Dio piaccia di concedere, egli ci insegna a chiedere ciò che sa Dio volerci concedere, nel modo che a chi vuol esser pregato perchè conceda. Nam et quid oremus, dice S. Paolo, sicut oportet nescimus, sed ipse Spiritus postulat pro nobis, o come interpreta dopo altri SS. PP. S. Agostino [illegible], postulare nos facit gemitibus inenarrabilibus. E se noi chiediamo animati del suo spirito, vi è dubbio che Dio non conceda quello che il suo spirito chiede, o [illegible] che il suo spirito, già che non sarà col Padre concesso? Spiritus [illegible], [illegible] etiam postulando [illegible].

VII. [illegible] bello vedere agli occhi del Signore un [illegible] numero di [illegible] animati dello stesso amico suo spirito d'una voce [illegible], che Abramo [illegible], che se [illegible] giusti in Sodoma, poi 45. poi 40. poi 30. e 20. poi 10 [illegible] di essi [illegible]; or che bello spettacolo [illegible] non 10, non 20 [illegible] ma le centinaia di sue anime [illegible] agli occhi del Signore la voce di tante giuste e tante innocenti.

VIII. [illegible] che vengono alla Chiesa [illegible] l'adunanza, [illegible] non siano buone [illegible].

IX. Ma che dirò [illegible] il suo vantaggio [illegible] Non credo [illegible] Angeli [illegible] Salvatorem [illegible]. Or quanto più [illegible] il numero de' concorrenti, gli Angeli sono in quelle adunanze a pregare e portare [illegible]. [illegible] quel vantaggio!

X. [illegible] poi ove vi adunate a far orazioni comuni [illegible], che voi, è vero, pregate per tutti, ma tutti però pregan per voi. [illegible] il cuore di Dio [illegible] la grazia chiesta. Non par che egli abbia a [illegible], quando tanti l'importunano.

Erunt signa in sole, et luna et stellis;
et in terris pressura gentium.
Luc. 21.

Non bisogna cominciar male, che si và del male in peggio. Sono segni nel sole, e poi nella luna, nelle stelle, e passa la confusione su la terra. Et in terris. Questo sole, dice l'evangelista, si tratta in altra forma. Sol obscurabitur, et Luna non dabit lumen suum, et stellae cadent de caelo. Se il sole si oscura, la luna niega tutto il lume, e le stelle non [illegible], cadono. Argomento di non cominciar male &c.

E perchè cominciammo col sole, e questo il simbolo de' buoni, la cui vita crescit usque ad perfectam diem. Ma la notte de' peccatori, onde si chiamano le loro opere opera di tenebre. Opera tenebrarum. Dice un santo penitente di se e di peccatori, [illegible] 101. [illegible] delinquerunt, ~~et ego [illegible]~~ Passato il mezzodì cominciano l'ombre a farsi maggiori, e sempre più, sino a notte buia. Così &c.

Così è, non si comincia dal mal peggiore, si va a gradi. Eccone nella [illegible] evangelica. Matth. 21. Agricolae apprehensis servis eius alium ceciderunt, alium occiderunt, alium vero lapidaverunt. Et aliis fecerunt similiter. Ultimamente mandò il figliuolo proprio, et apprehendentes eiecerunt extra vineam et occiderunt.

Se vi sgomenta tanto sangue di quella vigna, venite alla vista del fiume, che [illegible] Ezechiello cap. 47. Traduxit me per aquam usque ad talos [illegible] mensus est mille cubitos et traduxit me per aquam usque ad genua, [illegible] traduxit me per aquam usque ad renes; e poi giunse a non poter più; quoniam intumuerant aquae [illegible] torrentis qui non poterat transvadari. Vedete quanto importi il mal cominciare &c.

[illegible] aver mal cominciato e deve mettere in grande apprensione di seguitar male [illegible] [illegible] in terra [illegible] [illegible] Psal. 104 [illegible] non mangia che [illegible] [illegible]

[illegible]

mal.

[illegible] serva il vitto. La tua ira, o cristiano, è un bruco da principio di [illegible] di fiore, che non [illegible] frequenti a questo giardino da me fatti [illegible]; per chi non ha [illegible] del [illegible] &c., mangiatissimi di questi piccoli arboscelli, ogni frutto di [illegible] ancora vorrai mangiare, e di le [illegible] nascenti, e di [illegible], e dal non foglie buone passavan a foglie e [illegible] gli del male. [illegible] di questa [illegible] d'ogni altra passione.

[illegible]mbolo di questa insolita generazione può esser quella piccola nuvoletta di Elia 3. Reg. 18. Ecce nubecula parva quasi vestigium hominis ascendebat de mari. E tosto [illegible] contenebrati sunt, et nubes, et ventus, et facta est pluvia grandis. Sorge dal cuor d'uno che è agitato attorno le creature di questo mondo qualche mai una nuvoletta o vestigio [illegible] ne. Oh se io potessi far comparsa, oh se mi esponessi [illegible] &c. [illegible] ad offuscarmi tutto il cielo della ragione, e le altre passioni di timore, di speranza, di odio, d'amore, nubi e venti combattono l'anima, e non si finisce che con un [illegible] d'amore, che s'affoga ogni virtù &c.

No, se Dio ci salvi, non conviene cominciare né pur col poco. [illegible] di quei, che giunsero dove non credevano, come dice [illegible]: cadesse [illegible] di primo slancio. No, per quell'incontro, per quell'occhiata, quella amicizia &c. &c. si muove dal poco, e si giunge al sommo. Il peccato, o fedeli, è di questa maligna qualità, che tende al primo periodo del vostro morire. Se ci credessi [illegible] &c. come [illegible]. Ah! non cominciare, non dare una buona alla passione, altrimenti &c. e ricordatevi con quegli i fatti di David, non di [illegible] Saule. 1. Reg. 24 [illegible] cruentemente [illegible] e perché? perché gli vide in mano un pezzo della sua clamide con &c.

Non vogliate [illegible] disgrazie di voi la nimicizia è ben radicata [illegible] da risposta ne' anco d'Assalonne, che &c. pure cominciò ad odiar [illegible] il [illegible], e machinar la morte del Padre. Non una da risposta di [illegible], pure cominciò dal [illegible] e giunse ad [illegible] [illegible] Non dagli [illegible] al [illegible], pure cominciarono a [illegible] con [illegible] allegramente, e passarono all'intemperanze ed ubbriachezze ed alle [illegible] Non di Giuda [illegible] Non di S. Pietro &c. Stiamo vigilanti adunque. [illegible] . [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] eius, et mandata ejus servo. [illegible]

Joan. 17.3.

Così diceva il Signore, e così potremmo dir noi di osservare i suoi comandamenti, se potremmo dire di attendere alla cognizione di lui.

Se io penso alla grande ignoranza di Dio negli uomini, non mi maraviglio se si poco si ami e tanto si offenda. Nihil est volitum quin praecognitum, come dunque sarà voluto per l'amore se non è conosciuto per l'intelletto?

Vediamo le occupazioni degli uomini, chi attende ad imparare il computo chi la musica chi la tal professione ecc. e con tanta applicazione che tiene tutto l'uomo occupato quasi quello fosse il suo fine. E per conoscere più Dio che Dio si vede taluno porsi studio a far il meno ecc. e pure dice Clemente Alessandrino: Facti sumus non ut comedamus et bibamus, sed facti sumus ut perveniamus ad Dei cognitionem. Altri, è vero, pongono nelle loro notizie più [illegible] nobili ma dice di loro a Dio S. Agostino. Infelix homo qui scit omnia te autem nescit. Beatus autem qui te scit, etiam si illa nesciat.

Beato sì beato. Che cos'è la beatitudine? Vedere ed amare Dio. L'amore anche in patria nasce dal vedere Dio. Ed anzi la proporzione della beatitudine rispetto ai meriti de' beati si ottiene dalla parte del lume della gloria, che è il mezzo onde colà si vede Dio. Chi ha più di meriti ha più di lume di gloria, chi ha più di lume più d'amore. Or così con proporzione parlando anco in via ecc. Dunque è beato chi conosce Dio, e più chi più s'interna in questa cognizione. Così ancora parlano i Santi Padri.

Anzo quello che dice S. Jeronimo [illegible] [illegible]; [illegible] homo [illegible] [illegible] [illegible] [illegible] summum in rebus humanis bonum est Deum nosse. S. Isidoro: Beata vita cognitio divinitatis est. S. Greg. Nazian. Perfectissima quaedam [illegible] cognitio Dei.

e pure vorrebbono mutato il suo fine

Ma per meglio invogliarvi ad applicarvi a questa cognizione di Dio udiamo [illegible] (cognizione, utile &c. Agnosca me, [illegible])
vienci i vantaggi. Partorisce questa la cognizione di se stesso. Volete vederlo? Avremo, a mio [illegible]
[illegible] [illegible] [illegible] ad Deum ad [illegible] pulvis et cinis. Quia. Vidi Deum [illegible]
[illegible] [illegible] [illegible] [illegible] [illegible] [illegible] ~~[illegible]~~ [illegible] al [illegible] [illegible] [illegible]

volete. Che viltezza è la mia a fronte alla vostra [illegible] [illegible]. [illegible] [illegible] [illegible] [illegible]

Partorisce da quindi l'umiltà; si paragona la [illegible] al fumo; sicut singulae [illegible]
fumi [illegible] [illegible] [illegible], quia fumus quanto magis ascendit, tanto magis attenuatur.
[illegible] quanto magis quis ascendit in cognitione Dei tanto magis humiliatur in se. Hugo Card.

Partorisce il timore di Dio. Requiescet super eum [illegible] [illegible] [illegible] et intellectus
cum spiritu timoris Domini. La divina Sapienza [illegible] di [illegible]: Ego mater pulchrae dilectionis,
et timoris, et agnitionis, et [illegible].

Partorisce la detestazion delle proprie colpe. [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] Domine. [illegible] Nunc autem oculus meus videt te, idcirco me reprehendo et ago poenitentiam
in favilla et cinere.

Partorisce la mutazion de' costumi. I magi conosciuto Dio per aliam viam
reversi sunt. Il cuore illuminato e [illegible] [illegible].
Partorisce il ~~maggior~~ [illegible] [sempre maggior cognizione, ed incominciano] i riverenza di lui. Osservate la [illegible]. [illegible]
[illegible], ~~[illegible]~~ [illegible] ~~[illegible]~~ [illegible] questa cognizione [illegible] [illegible] [illegible]
chiamandolo Signore e Padrone [illegible] de' mali, e finalmente [illegible] a [illegible]
chiamandolo Signore e Padrone [illegible], [illegible] alla maggiore, ed il
Dio [illegible] [illegible] luogo ad una minore, [illegible] alla maggiore, ed il
conseguenza [illegible] [della sua cognizione]
[illegible] Da tutto questo che voglio io inferire! Se non si può continova, almeno
di tanto in tanto qualche riflessione a Dio ed alle [illegible], [illegible] [illegible] per la
meditazione, [illegible] [illegible] ad ascendere dalle creature al creatore. Vedi un oggetto [illegible]
[illegible], di, quanto più bello è quello [illegible] [illegible] [illegible] Questa cognizione [illegible] di Dio
[illegible] il perché Maria SSma non perdé mai [illegible] [illegible] [illegible] [illegible]. A proporzione [illegible]

Benedictus Dominus Deus Israel, qui facit mirabilia solus; e nell'estremo della sacra canzone fa uno sforzo di voce e sommamente conclude: et benedictum nomen maiestatis eius in aeternum, et replebitur maiestate eius omnis terra. Quivi si ferma, ed io leggo in uno [illegible] rovite: Defecerunt laudes David filii Iesse. Non mi meraviglio io, non se ora gli manca la voce. Stupisco ben anzi come habbia tanto potuto cantare gli encomj di sì ineffabile sacramento. Dono che non ha maggiore né Dio ha cosa da noi ci [illegible] pretendere. [illegible] Uno verbo [complectitur] omnia Ecclesiastes [illegible]. Deum time et mandata ejus observa, hoc est omnis homo. Quid enim [et quid prodest] prodest, si negligant studia pietatis, et [illegible] christianae charitatis? [illegible] in studiis [illegible], [illegible] n[on] intelligit quando [illegible] senectus. Ita [illegible] [illegible] aetas [illegible], nec subito frangitur, sed diuturnitate extinguitur. [illegible] quidem studia doctrinae prudentiae, et bene instituti pariter cum aetate crescunt ut recte dici possit, [illegible] [illegible] multa in dies de lege Domini* [illegible], [illegible], juxta quod ait Propheta,

Psal. [illegible] super senes intellexi, quia mandata tua exquisivi. Nonnequidem senilis aetas ea est, quae metitur diuturnitate dierum, sed ea, quae puritate vitae certa quadam veneratione colitur, ut senes sint, qui [illegible] aetate, [illegible] sed innocentem vitam traducant; senectus [enim] venerabilis est non diuturna, neque annorum numero computata,

Sap. 4 cani autem sunt sensus hominis et aetas senectutis vita immaculata. Quam vitae rationem [homines laude digni sunt, cum] omnium quorumcunque aut exemplo, aut [illegible], [illegible] afferre videant, quamobrem contemnunt eos, qui nec sibi, nec alteri prosunt, [illegible], in quibus nullus labor nulla industria, nulla cura est; admiratione quadam vero afficiunt eos qui [illegible] ceteros virtute putant: [illegible] voluntates [illegible] hominis, quae majores partes animi a virtute detorquent, et

[illegible] dolorum cum admovent faces, praeter modum plerique exterrentur. Vita, mors, divitiae, paupertas omnes homines vehementissime permovent. Quae qui in utramque partem excelso animo, magnoque despiciunt, cumque aliqua his ampla, et honesta res objecta est, totos ad se convertit, et rapit: tum quis non admiretur splendorem pulchritudinemque virtutis? Ergo et haec [illegible] perspicientia admirabilitatem magnam facit, et maxime justitia, ex qua una virtute viri boni appellantur; nemo enim justus esse potest, qui mortem, qui dolorem, qui exilium, qui egestatem timet, aut qui ea, quae his sunt contraria aequitati anteponit: maximeque admirantur eum, qui pecunia non movetur, quod in quo viro perspectum sit, hunc dignum spectatu arbitrantur. Itaque, nemo non miser erit, qui sine virtute vivit; quibus enim nihil est opis in ipsis ad bene beateque vivendum, iis omnis aetas gravis est, qui autem bona a se ipsis petunt, iis nihil potest malum

Quid autem est, quod cum nobis solidissimo fidei fundamento firmatis certaque spe munitis in vitæ innocentia decederimus, animaque nostris cognominibus, immortalis gloria promissa sit, certo novimus veram [illegible] doctrinam, sectamur autem caducitatem [illegible], quæ non nisi afflictionem animi habent?

Quarum nulla aut quidnam valeat aut ista ~~[illegible]~~ est.

An primum neque [illegible] avocet a rebus gerendis? ab iis, quæ juventute geruntur, [illegible], majores [illegible] vel infirmis corporibus animo tamen administrentur? In senectute licet vis non adsit corporis, consilio tamen et auctoritate servantur. An quis gubernatorem in navigando nihil agere dicet, cum alii malos scandant, alii per foros cursent, alii sentinam exhauriant, ille autem clavum tenens quietus sedeat in puppi? Non facit ea, quæ juvenes, ~~[illegible]~~ vero multo majora, et meliora facit. Respublicas ab adolescentibus labefactatas, a senibus sustentatas legimus;
temeritas enim est florentis aetatis, prudentia senectutis. Sed nec
memoriam minuit, si quilibet eam exerceat, aut natura tardior non
sit: Nemo enim unquam senum audivit oblitus quo loco thesaurum

sibi, quibus, ipsi debeant. Manent ingenia senibus, modo permanent
studium et industria. Videtis quam infirma sit prima causa nunc
alteram videamus. Desiderat ne senex vires adolescentis? Sed non minus
quam adolescens elephantis aut tauri desiderat. Ea est humana conditio
ut nunquam sorte sua contenta sit. Quod homini naturaliter insitum est,
eo uti decet; et quidquid agat agere pro viribus. Cursus est certus aetatis
et via una naturae, eaque simplex, suaque cuique parti aetatis tempesti-
vitas data est. Ut enim infirmitas puerorum, ferocitas juvenum, gravitas
iam constantis aetatis, sic senectutis maturitas naturale quiddam habet
quod suo tempore percipi debeat. Sunt autem in senectute vires;
nec postulantur quidem vires a senectute. Ideo et legibus, et institutis
vacat senilis aetas muneribus iis quae non possunt sine viribus sustineri.
Itaque non modo quod non potest, sed ne quantum potest quidem cogitur. At
ita multi sunt imbecilles senes, ut nullum officii, aut omnino vitae
munus exequi possint: Sed id quidem non proprium senectutis est vitium,
sed commune valetudinis. Quid mirum in senibus, si infirmi sunt
aliquando, cum ne id quidem adolescentes effugere possint? Resi-
stendum senectuti est, ejusque vitia diligentia compensanda sunt:
pugnandum tanquam contra morbum, sic contra senectutem. Habenda
ratio valetudinis; utendum exercitationibus modicis, tantum cibi, et
potionis adhibendum, ut reficiantur vires non opprimantur. Nec vero
corpori soli subveniendum est, sed ~~[struck]~~ animo multo magis.
Nam haec quoque, nisi tanquam lumini oleum instilles, extinguuntur

Cumque Deus homini nihil mente præstabilius dedisset, huic divino muneri, ac dono nihil esse tam inimicum quam voluptatem: Nec enim libidine dominante temperantiæ locum esse, nec omnino in voluptatis regno virtutem posse consistere: Quocirca nihil esse tam detestabile, tamque pestiferum quam voluptatem: Deinde si quis eâ diu gauderet, nihil agitare mente, nihil ratione, nihil cogitatione consequi posset. Non solum vituperatio nulla, sed etiam summa laus senectutis est, quod eas voluptates nullas magnopere desiderat: nihil autem molestum, quod non desideres, ergo eas non desiderare, jucundius est quam frui. Deus immortalis in corpora humana sparsit animos, ut essent, qui in terris sibi ipsi famularentur, ipsumque diligerent, atque caelestium ordinem contemplantes, imitarentur eum vitae modo, atque constantia; invisibilia quoque ipsius Dei, per ea quae facta sunt intellecta conspicerent, et leve hoc nostrae tribulationis, aeternum gloriae pondus operaretur in caelis. Jam vero videtis nihil morti tam esse simile, quam somnum: atqui dormientium animi maxime declarant divinitatem suam. Multa enim, cum remissi, et liberi sunt, futura prospiciunt. Ex quo intelligitis, quales futuri sint, cum se cujusque fragilitate solutos corporis vinculis relaxarint. Ne censetis eos viros, quos nunc divos colitis tantos labores diurnos, nocturnosque in proximorum utilitate suscepisse, si iisdem finiri praemium eorum, quibus vitam fuissent terminaturi? Sed animus erigens se, futurorum mercedem ita prospiciebat, quasi cum excessisset e vita, tum denique victurus esset. Habet quidem vita nostra et successum, et modum: quamobrem ita vivite, ut non frustra vos natos esse existimetis. O praeclarum diem cum ad illud divinorum animorum concilium, coetumque proficiscemur, cumque ex hac turba, et colluvione discedemus. per ciò capire, che tutto il merito nostro consiste nel operar la giustizia
Bisogna conservarsi senza macchia, ~~operar con giustizia, parlare con verità~~
e per conseguenza nel operare secondo queste virtù, che riguardano Iddio, ed il
prossimo. Ora questa giustizia presuppone la mondezza, e la purità, la quale
consiste solo in questo di declinare da ogni cosa che sia peccato. E
chi mai potrà operar la giustizia, se prima non è senza macchia, im-
perciocchè la perfetta giustizia del cristiano consiste nel allontanarsi dal
male, e far bene, perchè il far bene suppone il restarsi dal male; perciò
il primo merito della beatitudine consiste nel conservarsi mondo col astenersi
[illegible] dal peccato, indi seguita l'operare il bene; e per questo S. Gregor. avvertisce, che
non sufficit mala non agere, nisi etiam quisque studeat bonis operibus
insudare: et ideo oportet, quod prius sit munditia in corde, postea lumen
veritatis in operatione. Ecco quali virtù, e qual purità si ricerca per
starvi nel luogo dove abita Iddio. Bisogna conservarsi senza macchia,
operar con giustizia, parlare con verità, non ingannare il nostro prossimo,
non offenderlo col cuore pensando male di lui, non offenderlo colla lingua
ingiuriandolo, non colle [illegible], ne col sentire con orecchie di godimento
a parlar male di lui. Se dunque per abitare nel tempio si ricerca
tanta mondezza, l'abbigliamento di sante virtù, qual purità non dovrà
aver la nostra, quanto fervore nel acquistarle, nell'esercitarle, e nel perfezionarsi
in esse per ricevere degnamente nel nostro cuore Gesù. Probet autem, dice S. Paolo

racquistare la perduta innocenza, e per soddisfare alla giustizia di Dio.
Non s'accosti con peccato mortale al sacro altare, se prima colla salutar penitenza non ha mondata

~~ogni sforzo di ritenere la grazia nell'occhi di Dio~~. Avverta, chi
si accosta [illegible] perchè fatti sono figli di Dio Ma come figli di Dio? dirà
in che consiste la figliolanza di Dio. S. Giovanni così parla: quotquot autem

ejus, qui non ex sanguinibus, neque ex voluntate carnis, neque ex voluntate [illegible]

[illegible] di coscienza [illegible]

sed ex Deo nati sunt: ecco la fede: S. Paolo omnis qui diligit ex Deo natus est.
ecco la carità: Quicunque enim spiritu Dei aguntur, ii sunt filii Dei: ecco dunque
l'operazione secondo la grazia. Chiunque è animato dallo spirito santo chi
seguita li dettamenti della grazia, chi fedele si mostra alle soavissime di lui
inspirazioni, essi, sono veri figli di Dio. Si formano adunque figli di Dio
col seguire l'impulso di Dio, con la fede, e colla carità. Chi sarà dunque, che non
voglia abbracciare queste virtù? Dite quanto di maraviglioso quivi in voi la
carità. Ricevendo noi la carità, e la grazia, riceviamo insieme la stessa persona dello
Spirito santo, il quale spontaneamente si unisce alla carità, e alla grazia,
e per mezzo di esse abita in noi, ci ravviva, ci addotta, e ci fa quasi
Dei, e ci rende operosi ad ogni bene: Volete di più? Ecco. Lo Spirito S.
discendendo in persona nell'anima giusta adduce seco l'eterno Padre,
e il figlio per non potendosi separare dai loro. Tutta adunque la SS. Trinità
in persona, ed in sostanza all'anima, che è giustificata, e dotata, ed
in essa quasi in suo tempio si ferma, ed abita fin tanto che fra
giustizia si conserva: secondo quello di S. Giovanni: Qui manet in caritate, in Deo manet, et Deus in eo. 1 Jo: 4
Questa carità è singolare. Dall'eterno suo Padre
Christo Gesù prima di morire in quella divinissima orazione, chiedendo: ut omnes
unus sint, sicut tu Pater in me, et ego in te, ut et ipsi in nobis unum sint. Jo. 17
siccome le tre persone divine sono una cosa sola in una singolare, e individua
natura; così noi tutti ancora partecipando di uno stesso Spirito, siamo
in Dio una cosa sola. Oh somma dignazione di Dio, oh somma nostra dignità
ed esaltazione! Tralasciate ora, dunque, siete, se vi dà l'animo, di vestirvi
di questa ammirevolissima virtù, la quale consiste, che amare Iddio, e in contrassegno
di questo amore non offendere il prossimo, anzi sovvenirlo, soccorrerlo, amarlo.
Non vorrete ricevere nell'anima oltre l'SS. Trinità, non vorrete
rendervi forti nel fare il bene, non vorrete essere animati dallo spirito
Santo; di non voler portare scolpita con viva fede nel cuore la santa
vostra legge; a separare secondo la grazia, non seguire li dettamenti
di essa, non mostrarvi fedele alle soavissime di lui inspirazioni; in somma
non vorrete essere figli di Dio: imperciocchè quei solo sono veri figli, che
operano in tal maniera: Quicumque enim (S. Paolo) spiritu Dei aguntur ii sunt Rom:
filii Dei. Con qual coraggio adunque ardirete di chiamare Iddio Padre
vostro Iddio perchè vi soccorra nelle tentazioni, nelle tribolazioni, dicendo
Pater noster qui es in Coelis: se indegni vi mostrate siete di essere figli suoi? Math: 6.
con qual confidenza v'accosterete alla sacrosanta presenza di Cristo Gesù
che sugl'altari adorate, e regale di ricevere nell'anima vostra lo spirito
santo, che rende testimonianza interna di essere adottivi figli di Dio?
Ora si, che vi conosco qual il motivo, che fa star lontani da
questa presenza voi, che una o poche volte all'anno v'accostate a
Cristo per riceverlo nel cuor vostro. Volete in questo frattempo di darvi
in braccio a piaceri, di seguire le vostre malnate passioni, di
abbracciare mali esempli senza punto pensare di Dio. Veramente non
so qual purità, qual mondezza possa avere la vostra o peccatori lontani dal
servire di Dio, e discosti dalla legge santa di lui: non potete
già, che lasciarvi trasportare al peccato ad ogni occasione, cader vinti
ad ogni minimo crollo di tentazione perchè deboli, e fiacchi senza la
grazia

* grazia di Dio? Ma fin quando dovrete in questo stato restare? quando mai alzerete un puro riflesso a Dio, conoscendo, che egli ha viscere di misericordia infinita, e che voi stesso aspetta per sollevarvi colla sua grazia, e per ristorarvi col suo sacratissimo corpo? Avete già dimostrato d'intendere quelle parole pavete ad sanctuarium meum: d'aver concepito il necessario timore che merita questo santuario in ogn'uno, che vi s'accosta. Questa vostra lontananza serve a far constare la vostra giustificazione; Avete con questa abbastanza insegnato a quegl'uni, che assai rare volte si cibano di questa mensa, e Iddio lo sa con qual'odio al peccato, con quali ornamenti di sante virtù; e ancora anche, che Iddio nol permetta, che sia che non s'accostino spinti da umani rispetti, e da vanagloria, desiderando di comparire con buona fama ogl'occhi degl'uomini: e questo Iddio nol permetta mai. Non parlo tocco quell'anime, che spesse volte ricevono Gesù dritto nell'anima loro, non sapendo qual sia il profitto avanzamento loro nelle sante virtù, qual sia la santa rassegnazione nelle avversità, e tribolazioni, qual sia la loro umiltà nell'ricevere affronti, e ingiurie senza adirarsi, qual sia l'ardente loro carità amore nell'indigenze del prossimo: voglio credere che abbino acquistate più d'ogn'altra cosa queste virtù, perchè ho ragione di credere, che loro più di voi altri conoscano, e intendano il gran male, che sia l'accostarsi a Gesù, e riceverlo senza la dovuta giustificazione.

1 Reg. 4 Vennero un tempo i Filistei a battaglia contro Israello, e vinsero; e ritornato indietro l'esercito Israelita, resta sottoposto di quasi quattro mila uomini, non molto dopo presero consiglio di ritornare al campo, trasportando seco loro l'arca del testamento, acciochè la presenza di Dio in mezzo a loro li liberasse dalle mani de' suoi nemici. Ma non fu così, imperciocchè attaccata di nuovo la zuffa morirono trenta mila Israeliti, restarono estinti i due figli di Eli Ofni, e Finees, l'arca fu presa da Filistei, e questa la portarono essi vittoriosi, e trionfanti in Azoto, e la collocarono alla presenza dell'idolo Dagon nel di lui tempio, credendo così di rendersi gloriosi vittoriosi, e memorabili a tutte le genti. Ma Iddio, che non [illegible] lasciare impunita la temerità dei delinquenti, trovarono l'idolo la prima, e la seconda mattina caduto, e infranto, percosse con gran piaga

1 Reg. 5 di Azoto, fin tanto che dissero: non maneat arca Dei Israel apud nos quoniam dura est manus ejus super nos, et super Dagon Deum nostrum.

Intanto uniti a consiglio i Satrapi de Filistei stabilirono di condurla d'intorno a' confini suoi. Ed ecco nel giro che facevano ogni città manifestò il castigo colla morte de' uomini da piccolo infino al maggiore. Finalmente la fermarono in Accaron, ma in quel rastello alla prima vista dell'arca gridò ad alta voce, lasciatela, lasciatela, che l'arca ritorni nel luogo suo affinche non uccida noi ancora, ed il popolo tanto era il timor della morte, che ogni popolo aveva. Ne sette mesi

Aggiungo, che l'arca stette nella regione de Filistei, provavano continuamente il castigo ora con la morte del popolo, ora col guasto della [illegible] finchè rimessero

l'arca nel luogo suo, e vedendo ciò che doveano per il loro peccato.
[rimossa?] e passando ora per il paese de Betsamiti, alzarono gl'occhi que' popoli, e oh! meraviglia!
ardirono di rimirarla, rallegrandosi di tal vista. ~~ma seguone questo ordine~~ ne vaga a' quei popoli
~~aveste del suo castigo~~, imperciocchè fu percossi con morte settanta uomini
del popolo e cinquanta mila della plebe. Vedendo i Betsamiti questa gran perdita dimostrando
[illegible] esclamarono i Betsamiti questa
perdita, e dissero: Quis poterit stare in conspectu Domini Dei Sancti Huyus? et ad quem ascendet a nobis? 1 Reg. 6.
Restituita, che fu l'arca ~~al popolo~~
ad Israele, disse Samuele a tutto quel popolo: In toto corde vestro re-
vertimini ad Dominum auferte Deos alienos de medio vestri Baalim et
Astaroth, et preparate corda vestra Domino et servite ei soli, et [illegible]
eruet vos de manu Filistym.
Ora, che voglio io dire con questo racconto? tremenda per certo. Ecco percosso prima Israele uomo
accostossi all'arca temerariamente, ecco percosso il Filisteo perchè ardì di
toccarla, di vagheggiarla. Ma cos'altro era quell'arca, se non figura di non altro vagheggiamento che di Gesù Christo
di quello che sotto le specie del pane, e vino adoriamo noi sugl'altari è Gesù Christo
unigenito figliolo di Dio vivo, e vero: Se dunque di tante piaghe fu cagione, tanto
danno apportò a' Filistei il vagheggiamento dell'arca, che era solamente figura
di Gesù Cristo, che dovrò io dire di coloro, che senza porre forte
studio in togliere dalla coscienza loro le colpe s'accostano a sacrosanti
altari, ricevono nel tempio dell'anima loro Iddio vivo e vero, e lo
~~[illegible] del popolo~~ costituiscono avanti al Idolo delle loro passioni, chi d'odio, chi d'invidia
chi d'ambizione, chi di vanità, e che so io: e non purgano avanti affatto
il cuor loro nido di tante colpe delle quali nemicissimo è Iddio. Dal
un poco di quel riflesso, che fa conoscere ~~il [illegible]~~ la grandezza offesa che fa
al benignissimo sommo Iddio il peccato, farebbe ben porre ogni studio
nel procurare la mondezza della coscienza. Ora qui ascoltatemi voi gente permettetemi, che per
breve tempo con voi gente di basso ingegno, e di oscuro discernimento
più chiaramente io parli così. Se in casa vostra dovesse arrivare qualche gran
personaggio, verso cui aveste tutto il rispetto e tutto il timore, padrone
di voi, e delle vostre sostanze, da cui poteste sperare qualche gran benefizio, come non v'affatichereste in pulire in
adornare l'abitazione! ora vi dareste a togliere ogni cosa che esser potesse
disaggradevole agl'occhi suoi, ora a preparare, a disporre addobbi
per ogni parte, in somma tutto v'applichereste per rendere l'abitazione
degna della persona: Ma quando si tratta di ricevere nel cuor vostro quel
Dio Signore di tutti i Re, Padrone di tutto il Mondo, perchè creato
da Lui, che dona l'essere, la vita, e le sostanze agl'uomini tutti,
quello, che fa ad un cenno tremare la gran mole macchina di questo Mondo,
se vi avvicinano, che immonda, e negletta in
sarebbe negletta, e tardo in rendere pura, e monda l'abitazione?

Restituita, che fu l'arca del testamento da' Filistei al popolo
d'Israele, così parlò Samuele a tutta quella gente così: Si in toto
corde vestro revertimini ad Dominum auferte Deos alienos de 1 Reg. 7
medio vestri Baalim, et Astaroth, et preparate corda Domino, et
servite ei soli, et eruet vos de manu Filistym. Come bene mi vengono
in mente queste parole ora, che a me pare, il vostro volto mi
palesò il orrore, che concepite al peccato, e il ravvedimento, che provate
nel vostro cuore. Se dunque dirò con Samuele a voi, in toto corde
vestro revertimini ad Dominum, auferte Deos alienos de medio vestri Baalim

et Astaroth; toglete dal vostro quore l'Idolo di quella vanità, di quel amor proprio, di quella superbia, che non
vi lascia conoscere la bella virtù dell'umiltà; toglete l'idolo di
quell'interesse, che vi fa esercitar ingiustizie; toglete l'idolo di
quell'odio, di quella speciosa invidia, di quella carità ..., di quell'amor proprio al danno del prossimo,
che non dan luogo a quella carità, che dee essere vicendevole verso
1 Reg. 6. tutti: et preparate corda Domino, et servite ei soli, apparecchiate
l'anima vostra a Dio vestendola d'una viva fede, abbracciando
con tutto l'affetto la legge santa di lui: et eruet vos de manu
Filistijm: che il nostro buon Dio vi libererà dalle mani de'
nemici nostri infestissimi Mondo, carne, e Demonio: Allora camminerete
questo mondo sicuri dalle sue false lusinghe, senza essere spinti al peccato dai
moti della carnale concupiscenza, allora entrerete nelle tentazioni, negl'
assalti del Demonio sicuri di riportarne una gloriosa santa vittoria:
Su adunque, con un più alto riflesso alla giustissima indignazione dell'
Eccellentissimo eterno Iddio, che è il sommo de' mali, che si tira addosso il
peccato, per starvi da lui lontani, e rendere così l'anima vostra degna
stoppa di Dio dell'abitazione di Esso: Ma da chi mai potete voi sperare la grazia di questo
riflesso? Credetelo da Dio solo chiedetelo da Iddio. Sì: Voi eterno, ed onnipotente signore Padre
de' lumi vibrate nel cuore di tutti quelli, che ne abbisognano, un
raggio di quella luce, che illustra talmente l'intelletto nostro sicchè
conosca la strada della vostra legge perchè non si scosti da voi, sicchè
conosca l'enormità del peccato, perchè nol commetta, sicchè conosca voi
stesso infinita bontà, perchè non v'offenda. Allora allora vedremmo noi
più di coraggio nella fede, più di fervore nella carità, più d'avan-
zamento nell'umiltà, più di spirito nell'orazione, di quella orazione
colla quale si ottiene da voi questo bel lume. E così starebbono in maggior
numero d'intorno alla vostra mensa, e al carattere di figli
vostri, quasi olivelli d'intorno alla sua pianta: Filij tui sicut novellæ
Ps. 127. olivarum in circuitu mensæ tuæ. In questo grado di figli suoi gustate
il di lui sacratissimo corpo, e conoscerete quanto soave egli sarà nell'
illuminarvi della sua santa legge, nell'arricchirvi delle sue divine
Ps. 33. benedizioni. Gustate, et videte, quoniam suavis est Dominus.

Tale è di miserabile nella condizione dell'umana nostra
natura, che non possa ella incoraggirsi alle imprese di virtuose
azioni, se non veda presente qualche oggetto di bene apparente, o vero
Homil. 11 in Evang. che la rianimisca, la soletiti, la spinga: Ut ex his (sono parole di S. Gre-
gorio) quæ animus novit, surgat ad incognita quæ non novit quatenus
exemplo visibilium se ad invisibilia rapiat, et per ea quæ usu didicit
1 Reg. 7. quasi confricatus excalescat: ut per hoc quod scit notum diligere discat, et
incognita amare. Or bene: Non avete voi forse coraggio di abbandonare
quelle delicatezze, quelle passioni, e praticare le sante virtù perchè non
avete avanti agl'occhi oggetto di bene? Ma aprite gl'occhi della fede, e mirate
quante benedizioni non dona Iddio a chi vive illibato, e ricco di sante virtù: Innocens
manibus, et mundo corde, qui non accepit in vano animam suam, nec juravit in dolo
Ps. 23. proximo suo, hic accipiet benedictionem a Domino: e altrove: benedixit omnes qui

tement Domcamus e con cent'altri luoghi. Ma se ora, se avete coraggio, che non vedete alcun bene nel servire le virtù nel conservarle, a se è modo sicco, per far coraggio al bene, vi dirò cosa importi questo solatico di benedizione. Sono due sorti di venedizione, una, che dona il superiore all'inferiore, cioè Iddio alle creature, l'altra, che dà l'inferiore al superiore, cioè la creatura al creatore. Ogni creatura anche inanimata, e irragionevole nell'esser suo loda, e benedice Iddio, impercettibile, come parla Agostino, perchè in essa è un raggio delle divine perfezioni, della divina bontà, e con questo lume rischiarano la mente nostra perchè vedendo questo ad un superiore principio, si muovono e lodare e benedire Iddio, per quelle virtù, e proprietà che si è degnato creare in quelle per obbedienza, per utile, e per servizio dell'uomo ~~di noi~~: ~~[illegible]~~ le benedizioni, che dà l'uomo creatura ragionevole a Dio ed ricordarli tanti i benefizj, che li donò, ed ringraziarlo di essi, ed esaltare la sua divina misericordia, la sua divina giustizia, la sua sapienza, la sua Onnipotenza. In questo modo benedice Iddio il reale Profeta dicendo: Benedic anima mea Domino, et omnia quæ intra me sunt nomini sancto ejus. Benedic anima mea Domino, et noli oblivisci omnes retributiones ejus etc. Ma di queste benedizioni non parlo più, tirandomi con tutta forza quella benedizione, che Iddio ci dona, questa sola possono condurre a buon fine il mio discorso, che è di incoraggirvi al ben vostro, col mostrarvi l'affluenza de beni, che in che consistono apportano. Le benedizioni di Dio consistono o nel donarci qualche cosa, o nel conferir qualche grazia, o nel santificarci.* Ecco quali beni non acquisteremo! [illegible] benedizioni di prosperi avvenimenti, ma non ci lasciano operare dei beni benedizioni, che ci dispongono ad acquistare l'eterna vita. Dona la sua benedizione a costoro, che con una sofferenza, con una pace inalterabile sopportano le avversità, sostengono le tribolazioni: Quanto non era mai quel Giobbe così paziente abbattuto dalle disgrazie? Avea egli poco prima e buoi, e cameli, e pecore mille, e mille, avea abitazione, avea figli. Ma in pochi momenti ~~un sabato~~ si affacciarono a lui, corrieri chi raccontandoli che il ripamento de buoi dagl' Sabei, chi l'assalimento de Caldei per rubarsi tutti i cameli, chi il fuoco del Cielo a consumarli i fanciulli, e le pecore, chi il vento a rovinarli la casa, chi la morte de proprij figli: Si in tal caso di disgrazie come credete voi egli si disperasse; in faccia ancora a tante piaghe non cessava egli mai di lodare, di benedire Iddio: scidit vestimenta sua, et corruens in terram adoravit, et dixit Dominus dedit, Dominus abstulit: sicut Domino placuit ita factum est, sit nomen Domini benedictum. Vedendo il signore, che in mezzo a tante disgrazie si conservò giusto senza peccato lontano dall' odio, dallo sdegno, dal peccato lo benedisse in fine, ridonandogli duplicate le sue sostanze. Or vedete se priva Iddio della ricompensa quelli che vivono senza peccato? Che dirò io mai delle grazie, e benedizioni, che compartisce a chi con tal purità di coscienza riceve Cristo Gesù nel centro dell'anima loro? Giacobbe, il quale era uomo innocente alla presenza di Dio, andò in casa di Laban, e dissegli; poca cosa avesti pria che io a te venissi, ed ora sei fatto ricco: e nel entrar che io feci in casa tua sparse il signore sovra di te la sua benedizione: Modicum habuisti ante quam venirem ad te, et nunc dives effectus es; benedixitque tibi Dominus ad introitum meum. Se dunque Laban fu benedetto

Lodano Iddio le creature irrazionali, quando sopra la propria natura obbediscono a lui come diè lode a Dio il mar rosso, quando si divise alla presenza di Mosè colla verga, e il sasso di quella pietra che tramandò l'acqua nel deserto al popolo ebreo, lodò Iddio, vedendo quando visitò in Teatro il vento e il mare di Galilea, che s'acquetò, l'acqua convertita in vino e ~~[illegible]~~ pani moltiplicati nel deserto.

(Vedendo [illegible] nella [illegible] di [illegible] dell [illegible] lo Sposo [illegible] benedetto per aver ricevuto in casa sua un uomo giusto qual'era
Giacobbe: pensate voi quante e quali grazie, e benedizioni non egualmente voi
che ricevete non in casa, ma nel cuor vostro, non un uomo di questa
terra, ma un eterno Verbo fatto carne per toglier voi dalla schiavitù
del peccato. Quanto non invanirà i vani per nel conoscer la sua santa divina Legge, ed
abbracciarla, quanta la soavità nel esercitare le sante virtù. Vedrete
voi l'anima vostra vestita, e ricoperta d'una luce vera che scioglie
le tenebre dell'ignoranza di questo secolo, e abbracciare il timor di Dio, che è il principio
della sapienza, della spirituale dico che non consiste in altro
altro [illegible], secondo il parlare di Sant'
Ambroggio, il principio della sapienza, che nel rinunciare al secolo,
perchè il sapere le cose secolari, è una pazzia: Quid est autem initium
sapientiæ nisi sæculo renunciare? Quia sapere sæcularia stultitia est.
Vedrete voi in somma infiammati, senza saper come, d'un amor santo
di Dio, e del prossimo, infiammati dico di quella ardente carità, nella quale
consiste l'adempimento di tutta la legge. Or tutte queste grazie, che
riceverete da Dio in premio della vostra purità in riceverlo saranno
frutti della di lui benedizione. Ma ascendiamo un poco più alto col nostro pensiero
e diciamo, che ci donerà la sua santa pace, abbracciando questa intendendo per questo nome
gl'Ebrei l'unione il cumulo di tutti i beni: non dico la pace di
cose terrene, perchè sta scritto non veni pacem mittere sed gladium: in-
perocchè dovettero i santi martiri per ottenere l'eterna pace, dovettero, dico, guer-
ra e persecuzioni, e martirio: ma quella di cui è detto: in terra
pax hominibus bonæ voluntatis. Questa pace annunciarono gl'Angeli quando dal
seno purissimo di Maria sempre Vergine nacque incarnato l'eterno Verbo,
non però a tutti, ma solo agl'uomini di buon volere, hominibus bonæ voluntatis.
Ma quali si chiamano mai gl'uomini di buon volere? Ogni bene che ci
s'appresenta trae a se la nostra volontà, non potendo volere il male,
e non in quanto comparisce a lei sotto figura forma di bene. Abbraccia dunque
la nostra volontà quell'oggetto, che conosce la possa accontentare, et in certa
maniera beatificare costituendola in pace nel possesso dell'oggetto desiderato,
così ogni creatura rendesi nella sua maniera desiderabile, perciocchè
in ogn'una appare qualche perfezione partecipata dalla somma bontà del
Creatore. Ora perchè la volontà dell'uomo può ordinatamente, con ordine, o disor-
dinatamente amare, e desiderare la cosa buona; così da questo ordinato,
o disordinato appetito la nostra volontà buona, o cattiva s'appella.
secondo S. Agostino, il peccato, e la colpa non è altro, che una privazione
di maniera modo, e d'ordine circa il bene da amarsi: peccatum, et culpa nil
aliud est, nisi privatio modi et ordinis circa bonum diligendum. Così la nostra
volontà allora è buona, quando con moderazione, e con ordine ama il bene,
quando poi fuor di modo, e d'ordine è trasportata ad amarlo il bene allora
la volontà nostra si chiama cattiva. Tale è il modo, e l'ordine del amare
Iddio sopra ogni cosa: In fatti chi altro merita un amore supremo, se non
Iddio? Egli solo è un mare d'immensa, d'eterna, d'infinita bontà: Egli solo per

essenza buona senza relazione ad alcun altro bene. Egli solo fonte, ed origine d'ogni bene; e perciò merita ogni grado della nostra volontà in amarlo, in desiderarlo sopra ogni cosa: la maniera di amare il prossimo è di amarlo perchè è imagine di Dio, e partecipa della di lui bontà sopra tutte le altre creature inferiori, e così riconserva il modo, e l'ordine consiste in amare Iddio per se, ed il prossimo per Iddio, avendo Iddio creato l'uomo perchè lo conoscesse, lo amasse, e amando il godesse. E allora la volontà si chiama buona quando conserva il modo e l'ordine nell'amare Iddio, ed il prossimo; quando si rende conforme in ogni cosa al volere di Dio, e obbedisce alla di lui santa divina legge e quando doppo divina è [illegible] tutte le sue operazioni [illegible] e a [illegible] l'eterna felicità da Cristo a noi promessa come ultimo fine. Or come la nostra volontà può arrivare a questa bontà, e perfezione, se non per mezzo delle teologali virtù; Fede, speranza, e Carità! Colla fede solo il nostro intelletto a credere gl' articoli di nostra fede, ed a quelle cose, che sono sopra la naturale nostra capacità del sacrosanto misterio dell'incarnazione, della nostra redenzione, della futura gloria, che sarà in noi rivelata: la carità accende la volontà ad amare Iddio più che il padre, la madre, li figli, più in somma, che tutte le cose temporali; ad amare il prossimo come se stesso; questa ci fa talmente accostare alla Divina Legge, ai precetti del Santo Vangelo, e fa disprezzare tutte queste terrene cose per unico fine per amore di Dio; la speranza per fine di quella celeste eredità nostro eterno bene ci move a non far conto alcuno delle cose di quaggiù, anzi a bramare persecuzioni, e tormenti in questo secolo, a desiderare la morte, siccome fecero tanti Martiri, l'Apostoli, gli martiri, i Santi e giusti. [illegible] arrivare a [illegible] come la sola fede, speranza, e carità rendono buona la volontà dell'uomo in questa vita, e meritevole dell'eterna pace. Ecco quali sono gl' [illegible] [illegible] [illegible] dagl' Angeli in terra pace hominibus bonae voluntatis. Per nome di pace io intendo un'ordinata [illegible] come quelle piante che sono in questa terra, perciocchè fruttano, che anno le radici [illegible] crescono, germogliano, fruttificano: così le piante godono pace, e quiete quando [illegible] sono alla loro [illegible] la quale si chiama suo centro. Ora di altro è centro dell'anima nostra, e [illegible] Iddio? essa da Iddio è creata, da lui è conservata, e [illegible] pace non [illegible] [illegible] lui, perciocchè lui solo può donarli la pace, non essendo atte le cose di quaggiù [illegible] a render questo l'uomo, conciossiacchè tutte siano vanità. Da Iddio adunque [illegible] troveremo questa pace [illegible] [illegible] [illegible] che nel [illegible] [illegible] Venendo Christo in questo mondo [illegible] [illegible] [illegible] volere la pace: [illegible] Cristo [illegible] noi apportava una nuova pace; [illegible] [illegible] [illegible] quelli solo che abbracciarono, ed esercitarono le sante virtù, e quelli in somma, che sono di buon volere e coraggio. Adunque, chiunque [illegible] mandare la coscienza dai peccati, che abbiamo [illegible] Gesù Christo, [illegible] [illegible] [illegible] [illegible] peccati, e di [illegible] il modo accostarsi [illegible] la pace [illegible] [illegible] pace: Mora per confine che [illegible] [illegible] sarà la pace; per confine alle tentazioni del Demonio sarà la pace, per confine ai vostri travagli con pazienza sofferti sarà la pace; di quella pace io parlo, che si ricerca solo da Dio, che si trova solo in Dio, che si ottiene solo da Dio. Per ottenere da Iddio questa pace è [illegible] [illegible] [illegible] esercitare in tutti incontri quelle

De Partibus Anni Pars 1a
Liber I
De Minutis et Hora.
Cap. pm. de Minutis Horæ

Sæculum dividere in partes insigniores, necessariumque fuit negotii est: dividere horam quæ minimula sæculi pars est usque in sexagesimas sui partem est aliquid mirabilius. Ea propter commendabiliores erant qui [illegible] Republica qui [illegible] temporis in tot partes minutas secuerunt, quam qui sæculum per Olympiades, Olympiades per annos distribuerunt. Nisi major hominum pars [illegible] majores et ingentiores temporis portiones non satis [illegible] de minimis sibi curam non esse. Profundant tamen menses, et annos deplorabili [illegible] insanientia homines, neque de minutis curam gerant; Verum [illegible] sapientes divini laudibus efferendi qui pretiosissimam temporis [illegible] in minutias diviserunt gemmas ut eo [illegible] [illegible] quo subtilius distribuerentur [illegible] numeri [illegible] horas in quadrantes [illegible] minuta secuerunt. [illegible] (quod [illegible] semper erit) Non est [illegible] partitio mentalis tantummodo apud Eruditos, et a re [illegible] [illegible] horas in minuta [illegible] et [illegible] horam distinctam usque ad sexagesimam sui partem.

Minutum ergo, sive Scrupulum sexagesima horæ pars est, et sexaginta minuta horam integram in communi præsenti temporis usu constituunt. Quanta autem temporis mora sit minutum quantumque intervallum importet, ut clarius appareat, ad motum recurrendum est, cuius tempus est numerus, et mensura. Aiunt [a] minutum eam temporis esse partem, quæ consumitur á processu igniti globuli á bellico tormento, vulgo Colubrina, explosi ad tria milliaria peragenda. Asserunt enim deprehensum experimento esse pilam militarem, ignitam vi pulveris pyrij tria milliaria consumere unius minuti decursu, ut ad solidum cadat. Huius rei experientia, [illegible] supposita, cognoscere oportet [illegible] quantum spatij per horam idem globus transiret, si [illegible] ab æquali virtute ignis pulveris commotaretur. Etenim, si memineris, hora sexaginta continet minuta, Multiplica ergo 60. per 3. habebis in minutis 60. sive unius horæ decursu confecisse milliaria 180. Et sic ex hac alias temporis, et spatij comparationes fieri poterunt.

[a] [illegible]

Minutorum usus non mediocris commodi est eis, qui tempus terere nolunt. Cognoscuntur [illegible] temporis partes adeo distincte, ut possis nedum eadem hora, verum, ausim dicere, eodem momento actionem eandem quotidie repetere. Huius rei beneficio mediæ noctis, atque meridiei puncta, in nostris etiam Italiæ horologijs facile, et exacte deprehendis: quod non parum faciendum est, cum sic ingressus, egressusque [illegible] præceptorum pateat, quantum durent quandoque [illegible] est. Astronomis præterea inserviunt, qui gradus cœli ad nostras mensuras accommodantes ortum scilicet, [illegible], vel tardiorem, [illegible] in signa Zodiaci, Lunationum etiam, et Planetarum varios motus, aspectusque notabis usque ad minuta significant. Non me latet horam adhuc [illegible] diuidi, et minuta in minutiores partes secari: Ut sunt ½, ¼ minuti. Sed hæc Astronomis omitto, Quæ proprio nomine signantur accepisse contentus.

Cap. II

Cap. II De Horarum ratione

Si Horae Aethymologiam, nominisque radicem si requirimus de-
tegere ad Egyptios confugiendum est, Qui caeteris nationibus in na-
turalibus, humanisque disciplinis, aliis nationibus multa scitu digna
transmiserunt. Hi Solem qui horarum temporum divisionem est Pater Horum
vocant a cuius nomine tamquam a parente vocabulo Horae creduntur
appellatae. Huic rei fidem astruit Macrobius Saturnal. lib. 1. cap. 21.
Apud eosdem (Egyptios) Apollo qui est sol Horus vocatur [illegible]
A Sole ergo producti horae vocantur. Quarum quaelibet [illegible] conti-
net estque ipsa non nisi vicesima quarta pars integri naturalisque
diei, correspondens vicesimae quartae parti spatii caeli quod Sol uno
die decurrit. Peracta enim a Sole vicesima quarta parte sui cursus di-
urni horam intelligimus decursisse. Ex hac naturali et necessaria
dependentia, quam habent horae a Sole [illegible] cuius semper res
nostras humanasque omnia placuit, dummodo nostra sunare

Verum de Horarum inventione et origine parum admo-
dum certi est. Multa enim feruntur quae fabulam sapiunt. Verum fuit
nonnullis satis probabile quod refert Polidorus Virgilius quodque
in aliis auctoribus notavi de Horarum primo adinvento. Ipse enim Polido-
rus in suo tract. de Inventoribus rerum lib. 2 cap. 5 haec habet de hora-
rum inventione. Quodam tempore Hermes Trismegistus cum in Egypto
sacrum quoddam animal Serapidi dicatum in tota die duodecies urinam
facere pari semper temporis intervallo observasset per duodecim horas diem
dividi debere coniecit. Eunde hic horarum numerus longo tempore
custoditus postea in viginti quatuor horas divisus est dies. Haec ille.
Quae certe aliquid fabulosi redolent. Quaecumque tamen illa sint hoc
satis rationabili coniectura deducere possumus Egyptios divisionem hora-

rum inventores fuisse; in quorum regionibus Matheseos et Astronomiae ceteris Academiis antiquius floruerunt.

Romam tandem vero horae pervenerunt. Quod mirum quidem semper erit Rempublicam omnium celeberrimam, populum commoditatibus illectum tamdiu durasse sine horarum ullo beneficio, ne neque notitia. In legibus duodecim Tabularum quae antiquissimae Reip. Rom. fuerunt nulla mentio horarum est. Sed primi illi Patres solis ortum occasumque cognoscere contenti res suas familiares publicasque quomodolibet distribuebant. Verum seriem diei partitio introducta est. Nam post aliqua tempora meridiem quoque notare coeperunt, sed ut nova consuetudo quae vix videtur fuerit totius populi commodo, ministrum Consules statuerunt Accensum vocatum qui voce elata meridiem nunciaret ubi umbra solis notum quoddam signum attingeret. Ex Plinij testimonio lib. 7 cap. 60 naturalis historiae: Duodecim [illegible] tabulis ortus tantum et occasus nominantur, post aliquot annos adiectus est et meridies, Accenso Consulis id pronunciante, cum a Curia inter Rostra et Graecostasin prospexisset solem. A columna Maenia ad carcerem inclinato sydere supremam pronunciabat. Sed hoc serenis tantum diebus usque ad Punicum primum bellum. Tamdiu ergo res suas sine horis Romani dispensaverunt donec horologiorum usus illatus Romam fuisset, quod quomodo et quando factum fuerit sequenti capite dicetur.

Illud autem temporis spatium quod communiter sub horae nomine comprehenditur non comprehendunt Graeci, sed horae nomen in ampliorem sensum accipientes illas quas anni vocamus tempestates Horas denominant. Has puto Homerus Deas, aliique caeteri, ut ipse eas vocat, custodes quae quatuor anni tempestatibus praesunt. Immo sub horae nomine scio quamcumque temporis portionem comprehendi sive annum, sive diurnum, sive nocturnum spatium significet. Ex quo

Cap. III

De Horologiorum compositione, et usu

Diem in horas vigintiquatuor maiores divisere, quam communiter divisionem omnes fere amplexati sunt quamvis horas numerandi ratio non omnibus sit communis. Alij n. horas numerare incipiunt à meridie, alij à solis ortu, alij aliter ut de suo loco dicetur infra. Verum tamen semper omnium cura fuit tempus suum ita distribuere ut actiones quę in tempore fiunt, suo quęque ordine facta cęteris consonaret, concordarentque tam in foro, quam in domo, tam inter publica quam inter privata nostra quantum fieri potuisset optima dispositio, et harmonia. Huius rei causa factum est ut Horologia conficerent tam sciothenica, hoc est solaria per eam, quam gnomonicen vocant, quam Hydraulica, sive Clepsydras, sive arenaria sive rotalia ex ęre argento auroque, potius nullo in modo tempus sibi distribuunt. Solaria ad nihil inserviunt si sol occidat, vel nubibus tegatur. Etenim cum totum eorum artificium ab umbra pendeat styli, sole remoto ipsa suum munus exequi haud possunt. Cęterum non unius artificij omnia sunt et praeter ea quę vel in tabulis vel in parietibus directo lumini exponuntur sunt, quę lumine reflexo horas in tecto mobili demonstrant alia, quę beneficio [illegible] speculorum, lumine allato inter remotiora domus penetralia, sol vel nobis ipsum cogunt sibi horas designare. Sunt quoque alia ferme in nobis à natura descripta quibus tempus dignoscere possumus. Ut si manum extendas ad solem uno digito elato qui gnomonis vicem gerat horam deprehendes in manus lineis, digitisque [illegible]

Cuiusmodi etiam est illud: Si tuus ad solem statuatur nasus hianti
Ore; tuis dices dentibus hora quota est.

Verum

Verum horum ratio, et artificium sit penes Gnomonices peritos. Nobis n sufficiat naturam ipsorum tetigisse.

Sed cum nihil pertinet publico commodo Horologia Sciotherica si sol occidat vel nube incubatione radij, ideo aliud tempus in horas diurnas demonstrandi subtilissima hominum industria invenit. Ex rotarijs machinis vi elastica donatis vel pendulo pondere instructis indice lance, tintinnabuloque admonente tempus horarium currat et dige rit. Atque vel a summum communitate, vel in aedibus privatorum, et usque ad la nobilium usque in anulis magnatum ante oculos etiam sibi noctuque diuque, sereno caelo, vel nubilo fidelissime demonstrat, et proclamat. Nostris temporibus horologiorum usus frequens satis est in quibus transalpinorum nedum sententia sed patientia deprehen ditur in secandis minutissimis rotis, in colligandis subtilissimis cate nis in recludendis elaterijs, quibus miranda automata instrumen ti propria animant. Sed eo modernorum artificum praestan Anglorum seu ipsorum communi opinione praeferuntur studium devenit ut in machina non ore majori tibi in oculis ponant quota mensis dies sit, quota lunae, horas quoque et horae minuta. Insuper soli continuant motum illum artificio ut ad praestitutum tuum horas no cturno tempore sua notas, et tandem qua hora evigilare cupis certissime expergefaciat. Veteres tali beneficio caruerunt, Hydrau licis tantum, et arenarijs horologijs tempus metiri consue vere.

Hydraulica horologia vetera illa quorum artificium ab aqua pendet qua cum ibi movetur, de quibus Vitruvius disserit lib 9 c 9 quae veteres clepsydras Vitruvii nominatas erant, id normam nostrorum arenariorum, sed pulveris loco aqua guttatim destilla horae tempus per sui diminutio nem praesignabat. Sic ea describit Apuleius in principio 3 lib Asini aurei: Sic rursum praeco amplo vocatu citavit accusator quidam senior a b. genom inveni vasculo 1 2

Senior exurgit, et addicendi spatium vasculo quodam ~~[illegible]~~ [illegible] vitro graciliter fistulato, ac per quod guttatim defluo ingesta aqua populum se adorat [illegible], quem tangit Apuleius metiendi orationis tempus ad comprehendam libidinem dicendi nostrorum Causidicorum etiam nunc in Tribunalibus servatur arenarii Clepsydrae antiquorum suffecti, pro quibus dicebat Plinius iunior ad Pompeium Falconem

Plinius Epist. scribens lib. 2 epist. 14 [illegible] causis agendis, quod Romae adhibebat, et qui eundem possit facere quemcumque [hanc] indentum clepsydra indicit et lib. 6 in epistola 2 ad Arrianum: Quia pauciores Clepsydras praecipitamus causas. Est hac in re Martialis facetum Epigramma quo subsannat Caecilianum quendam qui exposcebat a Iudice plures Clepsydras, ut amplius spatium remanerent causam suam dicendi, interim nimia sitiens proclamatione atque prolixioris ~~[illegible]~~ orationemque, potitabat ~~[illegible]~~ audiendum tedio, et nauseam. Sic igitur lib. 6 Epig. ~~33~~ 35 pulsabat.

Plinius in naturali sua Historia lib. 7 cap. 60 mentionem facit ~~[illegible]~~ Hydraulicorum horologiorum dum ait a Scipione Nasica primum aqua divisas horas fuisse. Etenim ut supra dictum est Romanis tamen sero cognitum horologiorum genus sunt et post Papirium annum [illegible] tantummodo aliquod horologii certiorem agnoverunt [illegible] a [illegible] bello [illegible] Valerium positum fuit in quo tamen male congruebant horis lineae. Sed quidnam olim ~~[illegible]~~ fuerat etiam incompositum, pro iucundo, inutile pro summo erat beneficio. Eodem loco ait

[illegible] Epigram. [illegible]

Sicut ait Plinius. Nec congruebant ad horas eius lineae: paruerunt tamen ei undecentum annis, donec Q. Marcius Philippus, qui cum L. Paulo fuit Censor, diligentius ordinatum iuxta posuit. Idque munus inter Censoria opera gratissime acceptum est. Nonaginta igitur et novem annos horologio ~~[illegible]~~ [illegible] infideli paruerunt Romani usque ad Censorem Q. Marcium Philippum, qui exactius alterum instruxit. Sed nubilo tempore nusquam horae distingui non poterant. Scipio Nasica communi beneficio consulens habuit aquarium instituere horologium, quod dies pariter nocturnis per gradus signatos in horas dijudicavit. Etiam tum tamen nubilo, prosequitur Plinius, incertae fuere horae. Tunc Scipio Nasica collega Lenati primus aqua divisit horas aeque noctium ac dierum, idque horologium sub tecto dicavit anno urbis quingentesimo nonagesimo quinto. Deinde rationabili epiphonemate concludit Plinius: Tamdiu populo Romano indiscreta lux fuit.

Cap. IIII

De Horologiorum origine.

Quamvis cap. superiori ex Plinii testimonio visum sit quando Romae primo horologiorum usus inventus fuerit, non est tamen existimandum illud omnium annum fuisse. Nam in hoc numerandum magis apparet quod cum fuerint iam horologia primis [illegible] exposita, Roma adeo sero ea acceperit. Idem Plinius lib. 2 cap. 76 Lacedemonios omnium primos facit qui haec commoda sibi sint usque subministrasse. Anaximenem Milesium quem facit [illegible] horologiorum inventorem [illegible] Vitruvium quia de horis [illegible] originem nominum in dubium vertente certiora his esse ostendunt. Umbrarum rationem ait Plinius et quam vocant Gnomonicam invenit Anaximenes Milesius, Anaximandri Thaletis discipulus, primusque horologium quod

Cap. V.

De Achaz Regis Judæ Horologio

Quæstionem, quam cap. superiori de Achaz horologio promiseram, integro hunc capite exequam ut pro more diffusius tractaretur. Primum in eo dubium id est. Num tales quas illud horologium indicabat essent horæ, sive lineæ illæ [illegible] tempo: ris intersectione [illegible] quantum una ex nostris horis. Ratio et fundamentum præsentis dubitationis habentur ex sacra scriptura. Postulanti n. [illegible] Regi Ezechiæ in testimonium recuperandæ sanitatis ab Isaia ~~[illegible]~~ aliquod signum, a propheta ~~[illegible]~~ responsum 4 Reg. 20. 9. Hoc erit signum a Domino, quod facturus sit Dominus sermonem quem locutus est: Vis ut ascendat umbra decem lineis an ut revertatur totidem gradibus? Et ait Ezechias: Facile est umbram crescere decem lineis, nec hoc volo ut fiat, sed ut revertatur retrorsum decem gradibus. Invocavit itaque Isaias Propheta

lib. 4 Regum

Propheta Dominum et reduxit umbram per lineas quibus iam de-
scenderat in horologio Achaz retrorsum decem gradibus. Hebraei pro
horis lineas habent. Nam fabulantur de die quo mortuus est
impius Rex Achaz decem horas detractas fuisse, ne iniquo homi-
ni tempus exequiarum suppeteret. Tunc autem ad planctum pijs-
simi Ezechiae [illegible]. Alij ne temporum confusio oriretur decem alias
horas restitutas fuisse. Semper humore nugis detinentur Hebraei.

Dissentiunt ut fieri solet, hac in quaestione eruditi seu
interpretes, et in duas classes dividuntur. Alij horas integras volunt
alij dimidiatas. Pro primis est S. Dyonisius, S. Augustinus vel quicumque
sit autor [illegible] Sacrae Scripturae, Chaldeus, Beda, Angelomus
Eucherius apud A Lapide [illegible]. Pro secundis est Caietanus [illegible]
[illegible], A Lapide ~~[illegible]~~ Pro utrique sententiae ex-
ponit figuras horologiorum Zyranus in Comment. 4. Reg. cap. 20
ubi mentem suam non aperit, alias opiniones exposuisse contentus.
Qui horas integras fuisse sustinent, ea ratione moventur quod commu-
niter in horologijs linea horam significet, nec credendum est tunc
[illegible] quam quae in communi conversatione tunc
[illegible] horas denique vocatum fuisse. Verum Caietani opinio proba-
bilior [illegible] nititur fundamentis. Etenim datum fuit planius
[illegible], quod in arbitrium [illegible] sibi eligeret umbrae ascensum in ho-
rologio per decem lineas vel descensum. Ex quo manifeste gra-
vet horologium illud saltem viginti lineis instructum fuisse ut optio Regi
data ~~[illegible]~~ adimpleri sine contradictione posset. [illegible] minus viginti li-
neis horologium describeretur non potuisset Rex postulare decem ascen-
sus vel decem descensus pro arbitrio. Si ni postulasset decem gradus
ascensus non remansissent ex altera parte decem descensus. Dicendum
est igitur viginti saltem lineis illud horologium signatum esse. Dico au-
tem, quia si umbra tunc temporis non esset in puncto medio, a quo
ascendere

ascendat, et descendat, puta quando est brevissima, vel in meridie, plures quam viginti horae requirerentur, ut patet consideranti. Ergo si quaelibet linea horam integram importat, viginti horas illud horologium continebat. Quas quidem nec nostris horizontibus dies possunt tribui, qui ad summum sexdecim continent, multo minus horologii Palestinorum, qui sub 33° aut circiter gradu elevationis Poli constituti brevissimos dies paulo minus decem horis habent, longissimos paulo amplius quatuordecim. Exponit rationem hanc paucis verbis P. A Lapide in cap. 38 Prophetiae Isaiae vers. 8 [illegible] 2 dum ait: Quia si decem gradus decem essent horae, non potuisset umbra progredi decem horis, et etiam regredi decem horis, uti proponit Isaias. Alterutro enim facto subiret vel in progressu, vel in regressu umbrae ad decem horas fuisset profunda nox, ubi nulla est umbra.

Sed primae sententiae auctores conantur respondere Caetano et volunt non horas viginti horologium illud continere sed tantummodo quot opus erant. Solem autem tunc occasui non distare quando Isaias miraculum Ezechiae proponit. Umbram autem retrograde accipientes pro ipso Sole dicunt propositum Prophetae esse ut rogaret ne Solem iam ad occasum vergentem adeo accelerato cursu praecipitem ferri ut statim spatio decem horarum transacto fieret nox profundissima puta si ab occasu [illegible] horas distaret tantum properans ut nonam noctis horam attingeret. Vel potius retrocedendo repeteret gradus decem iam elapsos, et ad horam rediret matutinam, a qua iam per decem horas discesserat.

At huiusmodi explanatio difficultatem non tollit, videturque denuo scripturae magis conformis Caietani sententia. Quia in supra allatis verbis sacri textus totum planum cadit sub umbra, non [illegible]. Qui quamvis motum accelerasset usque ad nonam noctis, non appareret tamen in horologio Achaz talis accelerationes vestigium quas in nocte

nocte nulla umbra per solem videtur. Signum autem huius sanitatis debebat esse Regi postulanti, et eligenti in quamcunque partem voluisset sive ascensus sive descensus omnino obvium, et visibile. Restat ergo ex Caietani dicendum sententia non horas signatas fuisse, sed horologium in gnomone, et dimidiatas distributum esse ita ut sol vel retrocedendo vel anticipando per decem lineas horas tantum quinque accurreret vel expediret. Ex eo autem haec opinio roboratur, quod in

lib. Iosue — Iosue lib. cap. 10 14 scriptum est: Stetit itaque sol in medio caeli et non festinavit occumbere spatio unius diei, non fuit antea nec postea tam longa dies. Quod quidem falsum esset si lineae per quas sol in horologio regressus est decem horas importarent, quia ad summum dies illa Iosue importabat 28 horas, quantum important duae e longioribus diebus. Verum haec Ezechiae dies plures importasset, nempe quinquaginta triginta. Nam primo importasset illas decem per quas ordinarie descenderat in suo naturali motu, deinde alias decem retrocedendo, quia dictum est, et reversus est sol, hoc est per ambulationem decem lineis per gradus quos descenderat scilicet in horologio. Tandem decem alias ut rediret ad idem punctum a quo retrocedendo discessit. Quae sunt ter decem, hoc est triginta, et post has, illas omnes quae confici remanebant in horologio per naturalem motum quando retrocessit, puta si 1 vel duo remansissent, horas 31 vel 32 haec dies importasset et sic Iosue die fuisset diuturnior. Atque videtur sic Dionysii intentio, quam re-

Dionysius apud Lyranum — fert Lyranus in 4 Reg. cap. 20 sic scribens: Haec videtur opinio Dionysii in epistola ad Polycarpum, ubi loquens de ista retrocessione solis dicit: sol vel decima hora erat, Deo praecipiente recedavit ad orientem aliis decem non designatis, deinde rursus decem horas aliis ad occidentem, ... sed et reddidit diei duas horas

cogitatam. Putat hic, Auctor non solem retrocessisse sed umbram tantum
Aid si quod hoc tantummodo proponit Isaias ubi dicit. Sicut ascendit
umbra etc., et Ezechias. Facile est umbram crescere et verti
de Gaia diei redire umbram per lineas. Poterat si Deus ceteros
solis radijs in suo motu relictis una cum, solo eos tantum inverti
teri qui stylum horologij dirigebant, hoc autem Ezechiae proti-
[illegible] sufficiebat, immo aliud in solis superfluum erat quia hoc illud
de horologio e sua loco spectare poterat Rex moribundus. Et
sic Burgensis absolvit questionem de diuturnitate huius diei, dum
ait. Quae quidem retrocessio et reversio non amplius duraverunt quam
per duas horas ut sic simul terminaretur dies artificialis cum re-
trocessione et reversione radij solaris, et umbrae. et sic illa dies in
toto orbe nec fuit maior, nec minor solito nec etiam in horo-
logio Achaz. retrocessio tamen radiorum Solarium seu retrocessio si-
militer et earum reversio fuerunt tantummodo in horologio A-
chaz supernaturaliter factae. Vide in additionibus citatis ad Liranum

in cuius descriptione, et expositione conatur sententiam suam pro
certa persuadere, absque ulla, ut ipse ait, temeraria assertio-

Cap. VI

Quid videtur sentiendum in praesenti quaestione et de multiplici horologiorum usu.

Postquam aliorum mentem vidimus postulabit fortasse ali-
quis, ut propriam statuam sententiam, quidem ~~[illegible]~~ hac in re proba-
bilius [illegible]. Quamvis in hac controversia se iudicem constituere [illegible]
varium sit, cum tot hinc inde et rationum, et auctoritatum fulciatur praesi-
diis, ut unicuique magis pateat, quo magis quisque sibi credit in se liberum pro-
esse. Verum si dicere liceret, salva semper Patrum reverentia et authori-
tate, dicerem ex his, quae dicta usque modo sunt, probabilius ~~[illegible]~~ vi-
deri Caietani opinionem, quamvis altera tot fortiorum protegatur, laudis ob
rationes cap. superiori expositas. Quas validissimas, et pene insolubiles puto,
stando in quaestione [illegible] nempe num lineae illae horologii Achaz in-
ferrent horas integras, vel semisses. Nam Burg. opinio communiter [illegible].

Verum cum vero posset quis non sine plusquam tenui pro-
babilitate ab huiusmodi [illegible] se expedire dicendo li-
neas illas non importare absolute horas nec integras, nec medias, nec qua-
drantes ~~[illegible]~~, sed insigniri [illegible] aliquas distantias a quodam [illegible]
fixo recti meridiani, ut cuiuntque dignoscere possent tempus quantum
a meridie distaret per accessum, vel distaret per recessum, hoc est mane
et vespere. Posset autem haec opinio suaderi hisce fundamentis. Primo, quia
in sacro textu nunquam de horis fit mentio cum loquitur de horologio Achaz
sed semper sermo est de gradibus et lineis. Mirum sane quod cum plurimum
contulisset ad magnificationem huius miraculi divini quantis horis sol retrocessisset,
scriptura non dixerit, cum etiam de horologiis horarijs communiter dicatur
Umbra v.g. distat tribus horis a meridie, et non tribus lineis. Secundo quia
[illegible] cum horis inaequalibus, et artificialibus, insuper et maio-
ribus,

ubus ut ~~[illegible]~~ [Juna, scala] etc. de quibus dicetur infra [illegible]. Pro nunc dicere sufficiat hu-
iusmodi generis instabiles esse confirmantes se dici, cum vel modo brevior, modo
sit longior, fiunt ~~[illegible]~~ non plures, vel minores ut fit de horis qua-
libus naturalibus, sed modo maiores modo minores. Cum in artificialium
natura sit in duodecim partes quamcumque diem secare, ipsae duodecim
partes, quae horae artificiales dicuntur fiunt modo breves modo longae.
Non posse autem huiusmodi horas in horologiis describi manifestum est,
saltem si sermo est de horologiis quorum usus integro anno inserviat,
ut fiunt universaliter ista solaria, cuiusque etiam naturae erat illud Achaz.
Ad summum poterunt describi in horologio quod uno vel duobus tan-

dunt. Quia vero illud horologium primum fuerit, sustinuit ~~[illegible]~~

titiae sphaerae [illegible] quas in initio vel ut initio talis adinventionis
non est credibile ad perfectionem illius temporis [illegible] et
prima horologia quae extitebant, horas adamussim divisissent usque

studio elaborata et post tot industrias inventa nihil desiderandum relinquat.

Neque sic loquendi obstaret dicere, quod scriptura utatur nomine horologii ad illud instrumentum indicandum, ergo signum est quod horae, vel eius partes in eo fuissent descriptae. Quia respondeo posset nomen horae non esse proprium nomen eius partis temporis, quod nos sub horae nomine comprehendimus, sed nomen horae convenit cuicumque parti temporis, ut supra suo loco dictum est. Dixit autem interpres noster horologium, quia illud instrumentum quod demonstrat aliquas portiones temporis, quae horae appellari possunt, non alio nomine quam horologii donari poterat. Confirmari aliqualiter potest sic sentiendo auctoritate [illegible] Alphonsi Tostati Episcopi Abulensis, qui super 4 Lib. Reg. lib. 4 in cap. 20 quaest. 24 videtur non se resolvere ad determinationem partis temporis quod umbra quaelibet importabat. Ait: Dicendum autem videtur quod isti umbrae, vel gradus erant mediae horae vel quartae ... et tunc poterat fieri hoc modo quod horologium quaerebatur [illegible] in meridie vel quasi. Hac indifferentia mentem suam aperuit Abulensis. Si hoc quod usque dictum est sua probabilitate fulcitur, libentius [illegible] Tostatus Abulensis

Ad complementum eorum quae de horologiis diximus, non erit prorsus inutile subdere aliqua de multiplici usu huius instrumenti. Sicut enim dies maiores nostri in horas vigintiquatuor diviserunt noctem, diemque amplectentes ita haec instrumenta adaptantur ad tot horas praesignandas, in quot dies dividitur. At quia non omnium nationum fert consuetudo ab eodem puncto diem incipere, ideo non omnium gentium usus horologiorum est communis, sed ea accommodant patrio mori, et propriae regionis praxi. Itali nostri communiter diem ab occasu incipiunt, et in sequentis diei occasum terminant. Et propria horologia tali partitioni accommodant, ut sol in gnomone vel stylum in rotaeque indicent quota sit hora, numerando horas ab occasu solis diei praecedentis, quamvis nox media intercedat. Illam ergo horam, quae immediate occasum solis subsequitur, primam vocant, alteram secundam et sic de reliquis cum hoc ordine per singulas, usque dum veniat alius solis occasus

occasus, qui horam, qua euenit, uigesimam quartam denominat. Igitur p.º mane inuenies in horologijs indicium, quantum longa nox fuit. Si n. ad solis ortum uel nouem, uel duodecim, uel quindecim presignatum reperies, nouem, uel duodecim, uel quindecim horas intelliges à solis occasu transijsse, quod est tempus nocturnum. Quę autem ab illa hora prima matutina supersunt ad uigintiquatuor, dant diei longitudinem; ut si ad nonam, uel duodecimam dies fiat, quindecim uel duodecim supersunt ad uigesimam quartam. Quindecim ergo, uel duodecim horis longa tunc erit dies.

Huic nostrę consuetudini directe opponitur Babiloniorum usus, qui ab ortu solis incipientes diem, horam quoque primam ostendere faciunt in horologijs, quę ortum solis immediate subsequitur, et uigesimam quartam in ultimam noctis quę diem immediate antecit, reponunt. Horum horologijs ad occasum solis demonstratur quanta fuerit longa dies, quantaque erit postera nox. Verum Italorum usus, qui tempus premonstrat quantum erit futurum, ut actiones diei recte distribuant, praeferendus est huic Babiloniorum, qui prope inutiliter tempus iam elapsum indicit. Nihil n. confert ad oeconomiam operationum nostrarum scire quantum tempus fuerit, si bene, uel male actum sit; scire autem quantum erit, nimium confert ne male, sed bene agatur.

Mediant Italos inter, et Babilonios Transalpini nostrę Europę tam Hispani, quam Galli, et Alemanni cum cęteris Septentrionalibus Regnis; Qui diem naturalem non in uigintiquatuor horas, sed in bis duodecim diuidunt. Hoc est ita numerum horarum distribuunt ut spatio unius naturalis diei bis incipiant, bisque terminant. Duodecimam igitur ad meridiem statuunt, deinde prima post meridiem est prima duodenarij usque ad mediam noctem, in qua semper duodecima incidit et prima post mediam noctem est prima duodenarij usque ad meridiem diei sequentis, in quo semper pariter duodecima cadit. Ab horum horologijs non habes quanta sit dies, nec quanta nox, sed

solum

solum horologiorum commodum praestat, mane scire posse quantum meridies distat. Sed hoc beneficium tam ingens non est, ut, meo videri, Italis nostris praeferatur. Sic quaelibet natio propriam morum consuetudinem nobis commodare visus noster videtur, Alemannis, et caeteris propriis. Interrogatus in eruditorum consessu Eminentissimus* quidam quaenam consuetudo in horologiis esset anteferenda num Italorum, seu Transalpinorum? Faceti respondit me aliorum sensus. Fas est praeferre morem Transalpinorum quia in hoc uno conveniunt animi, et ingenia nationum, quae de caetero in omnibus dissident. Et haec pro horologiis quibus horae notantur, sufficiant.

Cap. VII

De horis aequalibus, et inaequalibus.

(Clavius

Quaecumque modo dicta sunt de horis, deque horologiis, quibus horae numerantur, intelligenda sunt de horis aequalibus non vero de inaequalibus. Quae autem, ut horae aequales, vel inaequales nunc explicare aggredior.

Divisio diei, qui implet noctem, et diem, sive aequaliter, sive inaequaliter facta fit in horas viginti quatuor. Sed in hoc modus diversus est, quod divisio aequalis respicit totum spatium complectens noctem, et diem et de eo spatio extrahit partes viginti quatuor, ibi omnes aequales, quae sunt horae aequales viginti quatuor. Divisio autem inaequalis de toto spatio noctis et diei duo spatia particularia considerat, diei unum, alterum noctis, a quolibet tamen eorum horas duodecim partes extrahere. Quae cum sint duodecim sunt hoc est 12 noctis, 12 diei faciunt quidem numerum horarum 24. Sed inter se sunt inaequales, si n. dies longior sit nocte maiores erunt diei, quam noctis, et vice versa.

|Dean. de

Horae aequales etiam aequinoctiales dicuntur. Cuius nominis origo ab eo nascitur quod horae correspondeant vigesimae quartae parti aequatoris, qui est mensura naturalis diei ex integra huius circuli revolutione diurna naturali,

turales absoluitur. Cum autem in Æquatore 360 grad. ponantur, quibus tota dies naturalis absoluitur, si per 24 hi 360 grad. diuidantur, unicuique horæ 15 grad. dabuntur, et ex ascensione 15 grad. Æquatoris hora integra constituetur. Cum igitur uniformes partibus motibusque Æquatoris quæ semper eædem sunt, ideo æquinoctiales dicuntur. Eo autem nomen æqualium etiam merentur, uidelicet ex constanti mensura, quam toto anni spatio seruant. Fiunt quidem plures, uel pauciores crescente, uel decrescente die uel nocte, nunquam tamen fiunt maiores uel minores, sed semper eædem sunt. His communiter utimur quia stabili modo tempus nostrarum actionum dimetimur.

[illegible]ardinal [illegible]

Inæqualium duo genera distinguit P. Christophorus Clauius in Comment. cap. 3 sphæræ Joan. de Sacro Bosco. Quædam [illegible] ait, est spatium temporis quo medietas signi [illegible] de qua auctor noster dicit [illegible] Quo [illegible] [illegible] quam in nocte artificiali continentur 12 horæ et inter se inæquales et [illegible] alterius horæ naturæ, quia non omnes medietates [illegible] quo [illegible] æqualiter ascendunt. [illegible] autem est ad horam [illegible] ex 12 [illegible] 24 [illegible] fieri per [illegible] medietates, quarum ascensus 24 horas describit. Cum igitur non omnium harum medietatum sit idem spatium temporis ascendendi, sed alicui plus, alteri minus, hinc fit quod horæ quæ [illegible] inæquali temporis spatio [illegible] inæquales eueniant, aliquæ scilicet maiores aliæ minores. Istarum autem 24 inæqualium horarum 12 sunt cuilibet diei, 12 cuilibet nocti, quia de 12 zodiaci signis 6 die, 6 nocte oriuntur, et ascendunt. Hoc in textu eiusdem de Bosco, quem Clauius [illegible] exponere manifeste asseritur, ubi dicitur: Ex quo colligitur [illegible] naturalis est spatium temporis, in quo medietas signi [illegible] in qualibet die artificiali, similiter et in nocte sunt duodecim horæ naturales. Vocat has horas naturales, quia natura [illegible] ait Clauius ibidem homines [illegible] [illegible] horas [illegible] Planetarum sunt horæ planetariæ, de quibus infra.

Jean de Sacro Bosco

Quædam

Quidam vero inequales sunt nulla facta relatione ad inaequalitatem ascensus signorum Zodiaci, sed ad comparationem alterius diei. Huiusmodi horae inter se non sunt inequales, quia dies quilibet in 12 partes aequas dividitur, in 12 pariter, et nox, adeoque tam in nocte qualibet, quam in quolibet die horae 12 aequales erunt ad invicem. Verum ut dies, ita et nox modo sit brevior, modo longior, hinc fit, quod partes in quibus dividitur sint non plures, vel pauciores, quia semper sunt eaedem, sed maiores, vel minores, et sic pariter horae nunc maioris nunc minoris sunt spatij. semper tamen sibi ipsis aequales quamvis ab unaquaque aliquid quotidie vel subtrahatur, vel addatur. Immo ob hanc ipsam rationem remanent aequales inter se iuxta secundam, et tertiam Communem Notionem sive Pronunciata Euclidis lib. 1. Et si ab aequalibus aequalia adiecta sint tota sunt Euclides aequalia. Et si ab aequalibus aequalia ablata sint, quae relinquuntur, sunt aequalia. Inaequales tamen sunt, si ad horas alterius diei ipsas conferas, quia altera dies non est paris spatij ut prima; adeoque eius partes duodecim erunt primis maiores, vel minores, et sic pariter horae maiores erunt, vel minores comparatae, prout maior, vel minor est dies, cuius horis comparantur. Duo autem tantummodo dies sunt, qui toto anni spatio in eandem magnitudinem conveniunt, quorum horae ad invicem comparatae nec excedunt nec exceduntur. Etenim ut Sol gradu suo motu ad metam suam pervenerit altitudinis, quod est ad punctum extremum in Tropico Cancri absolvit, incipit descendendo eos circulos, quibus nobis signabat olim dies, usque dum ad Tropicum Capricorni pervenerit, a quo descendendo iterum circulos eosdem percurrere incipit usque ad Tropicum Cancri. Quanto igitur alterutri ex his Tropicis accedit, vel recedit, tanto nobis diem producit Clavius vel minuit. Ut si accedit ad Tropicum Cancri dies facit longiores, sin ad Capricornum minores. Verum ut discedendo ab utroque horum Tropicorum eos circulos repetit quos signavit antea ut dictum est restat ut bis per eundem circulum decurrat, semel scilicet per accessum, semel per discessum.

Igitur

Igitur dies, quæ tali circulo correspondent sunt inter se æquales, adeoque horæ quibus constant erunt æquales. Ex eo autem hæ dies æquales sunt, quia repetendo sol eundem circulum accessus, et recessus, se sistit in ea distantia à linea Tropici in recessu, ac erat in accessu. Tam ex distat à Tropico parti Cancri dies proxima ante ingressum, quam dies proxima post ingressum ab eodem Tropico Cancri ~~et circa quantum sed Capricorno~~. Sic u. g. si dies ingressus sit 24 Junij, tanta erit 23, ac 25; tanta 22, ac 26, et sic de reliquis. Hoc idem dic de Capricorno.

Alia etiam convenientia reperitur in horis inæqualibus, non quidem cum alijs eiusdem naturæ sed cum nostris æqualibus, quibus utimur. Bis autem in anno hæc concordantia iteratur. Quando scilicet sol circulum diurnum excurrens transit per æquatorem facitque diem, noctemque paris esse mensuræ. In æquinoctio autem Verno et Autumnali duodecim sunt horæ diei æquales, duodecim noctis. Quia ~~[illegible]~~ etiam seu horas inæquales in duodecim dividatur dies sicut et nox, paris tunc temporis sunt horæ æquales et inæquales quia eodem spatio utræque et ~~singulæ~~ altera comprehenduntur. Verum huiusmodi consonantia omnino Ephimera est, nam recedendo ab æquinoctio iam disconveniunt. Quia hic dies ab æquinoctio recedens iam cum æquinoctij die non amplius convenit sed factus est brevior, vel longior ob accessum, vel recessum solis ab altero ex Tropicis, unde horæ ipsius non sequuntur magnitudinem elapsæ diei, adeoque non possunt cum eiusdem horis amplius convenire. Hinc Temporales etiam horæ hæ inæquales dicuntur, quia Temporum, et demum vicissitudines sequuntur. Hæc omnia nam videbis Clavius in Commentarijs supra cit. ubi dicit Quædam autem est duodecima pars cuiuslibet diei artificialis, vel noctis. Qua ratione horæ unius diei erunt inter se æquales inæquales tamen horis alterius diei, nisi hæc dies illi sit æqualis. Idem dicit de horis 12 nocturnis, Dum in æquinoctio congruunt hæ horæ æquinoctialibus horis tam in die, quam in nocte, quia tunc etiam dies artificialis continet 12 horas æquinoctiales, totidemque nox. Ex his perspicuum est &c.

istæ horæ dicuntur inæquales. Vocantur quoque temporales, quia secundum variationem temporum, nempe dierum et noctium istæ quoque variantur.

Cap. VIII

De Horis Planetarijs

Inter alia nomina, quibus horæ inæquales, præsertim priuegenere donantur, Planetariæ etiam dicuntur. Quarum nomen, naturam, et ordinem hic pergimus exponere.

Jam ex ipso nomine ~~[illegible]~~ satis superque innotescit, quod à Planetis Planetariæ dicantur. Planetæ autem nomen à Græca dictione venit, quæ erraticum, siue errorem significat. Quamobrem etiam vulgari nomine Planetæ vocantur sydera erratica. Non quod erratica à sua natura sint, et vagi; ~~[illegible]~~ nam de ipsis habetur scientia, quæ haberi non posset, si eorum natura omnino instabilis foret; sed respectu aliarum stellarum, quæ fixæ sunt, nunc unum, nunc aliud habent situm; nunc inter se coniunguntur, nunc opponuntur, modo accedunt alicui astro, modo recedunt, ut merito ab Astronomis Planetæ, seu erratica sydera dicantur. Planetæ septem sunt, qui, ut dicunt, septem proprijs orbibus circumferuntur, independentes unus ab alio. Itaut sphæra includatur in sua superiore, et hæc in superiore sibi, omnes autem [illegible] tanquam continens, et contentum, includens et inclusum. Incipiendo igitur ab inferioribus, et ad superiora ascendendo Planeta nobis vicinior et ceterorum infimus Luna est; supra ipsam immediate Mercurius, et supra hunc Venus, deinde Sol, post quem Mars, et supra quem Jupiter, tandem supra omnes ceteros sublimior Saturnus. Medium locum Sol tenet, qui temperatior [illegible] inferioribus. Si n. Sol collocatus fuisset proximior, nimis calefaceret terras, si remotior non ad sufficientiam. Hinc illud Ovidij 2. Metamorph. fab. Phaeton, quo inducitur Phœbus commonens Phaetontem ~~[illegible]~~ quo tenore gradiendum agat, ne terras lædat, nec signa sibi superiora:

Altius egressus cælestia ~~tecta~~ cremabis.
Inferius terras; medio tutissimus ibis.

Ovid Metam

Lunæ

Locus hic regie dignitatis est. Quamobrem Solem Regem, Principemque Planetarum vulgari Periphrasi dictitamus. Ex hinc vocantur nonnulli constituentes quodammodo Rempublicam ex septem planetis. Nam dicunt Sol Rex est, Saturnus autem ob senectutem annosamque prudentiam Regis Consiliarius. Juppiter vero ob animi magnanimitatem, equitatemque iudicij, arbiter, et Iudex omnium. Dux, et imperator copiarum militarium Mars. Oeconomicas autem partes Venus agit, et instar optimae Matris familias omnium bonorum dispensatrix est. Mercurius gaudet honore Regij Scribe, magnique Cancellarij. Luna tandem obit munus cursoris, et nuntij, quae omnium in suo giro est velocissima. Principatum huius syderis Polybius d refert Clavius in Comment. in i. cap. sphere Ioan. de Sacro Bosco. Nunc autem Planetarum ordine perspecto ad propositum nostrum redeamus.

Clavius

Qui sine iudicio iudiciariam Astrologiam somniarunt, ex dominio Planetarum, et concurrentia eorum orbium caelestium, si credimus Alexandro Piccolomini in lib. de sphaera mundi lib. 4 cap. 16 putarunt se deprehendisse in Astris hunc creaturis influxum maiorem aliquibus horis, et potentius dominium in haec inferiora quae movere et fovere nata sunt. Notarunt insuper illum Planetam prae ceteris influere efficacius in illum diem, cuius prima hora sibi obtigisset imperij, nomenque proprium ei tribuere tamquam in ~~[illegible]~~ iurisdictionis argumentum. Ferias namque dicunt ex hac observatione vocabulum illius Planetae sortitas esse, qui illius diei primam horam gubernasset. Sic quia primae feriae quam nos religionis mysterio Dominicam vocamus, hora prima solis dominantis est diem Solis appellant. Feriam autem secundam ob eamdem rationem diem Lunae, tertiam diem Martis, quartam diem Mercurij, quintam diem Jovis sextam diem Veneris, septimam quam nos divina scriptura edocti sabbatum dicimus, diem Saturni pronunciant. Qui mos ad haec usque tempora, gentilitiae nostrae originis monumentum omnium in ore, et scriptis pervenerat. Praeter

quam quod a sacris Chronologis Ecclesia de Iudaica superstitione triumphans exuerint, et Dominicam ob victricem Domini resurrectionem sabbatum ob requietionem eius vel ab operibus creationis, vel emortui in tumulo recubantis; caeteros dies feriam secundam, tertiam etc. appellari voluerint.

Horae, de quibus loquimur, inaequales sunt, duodecim componentes diei, duodecim nocti ordine cap. superiori explicato. Quia vero Planetae non duodecim sed tantum septem sunt, hinc oritur quod non idem qui primae horae diei dominatur, dominetur et primae noctis sequentis, sed ab ipso inclusive sextus [illegible]. Nam si prima diei est saturni prima noctis erit [illegible]. Bis septem enim 14 sunt. Planetae autem [illegible] dant locum 13 Mercurio qui post 12 primam noctis intrat vel 13. Eadem ratione diei sequentis est prima hora non Mercurii sed ab ipso sextus [illegible] est solis. et a saturno inclusive prima hora diei antecedentis quartus [illegible]. multiplica 7 per 3. habebis 21, desunt autem ad 24 quot horae inaequales tam diei quam noctis sunt 3. Repete ergo a capite numerum planetarum, per saturnum scilicet [illegible] 22, dein per Jovem 23, et ultra concludes 24 vel Marte quae erit ultima noctis. [illegible] igitur a saturno inclusive erit Sol qui ingreditur numerum 25, hoc est horae primae sequentis diei. Ut vero exemplo fiat clarior horarum Planetarum successio, utque vix cognoscere possis horam ad quemcumque attinentem, accipe diem aliquam puta sabbati vel dic, saturni qui primus in ordine est per descensum. Prima igitur hora illius diei erit saturni dominantis, secunda vero Jovis [illegible] ita sunt in orbibus qui sibi vicini saturno est sic in distributione horarum debet ei esse proximus, tertia vero ob eamdem rationem martis 4 solis 5 Veneris, 6 Mercurii, 7 Lunae [illegible]. Verum quia Planetae ultra septem non sunt iterum incipiendum erit procedendo a capite saturni, et 8 hora erit ipsius saturni, 9 Jovis 10 Martis, 11 Solis, 12 quae est ultima diei Veneris.

Prima

Prima autem noctis erit Mercurij principatus, seu illa[?] dominium primæ horæ, 2 Lunæ, 3 Saturni, 4 Iovis, 5 Martis, 6 Solis, 7 Veneris 8 Mercurij, 9 Lunæ, 10 Saturni 11 Iovis, 12 Martis, et sic cum Marte noctis horæ finiuntur. Die autem altero, qui sequitur, eue[nit] qd prima hora ipsius ingreditur Sol ad dominium illius diei, et inca[?] serviens post Sabbatum, quod est dies Saturni, advenit Dominica, sive pri-ma feria, quæ est dies Solis, et eadem [illegible] cuicunque diei immo et cuicunque nocti, quia par amborum est ratio. Hanc suc-cessionem et ordinem comprehendunt duo carmina in quibus etiam videre est locum, quem sortitus quisque fuit Planetarum:

Cynthia, Mercurius, Venus, et Sol, Mavs, Iove, Satur
Ordine retrogrado sibi quisque vendicat horam.

Christophorus Clavius l. supra cit. ait Joanne Xiphilinum ex lib 30 Dionis in Pompeio sentire hunc ordinem dierum institutum esse ab Ægyptiis, quod dixit prædictum ordinem in Planetis constitutum [illegible] deinde ~~ab~~ alia ratione, [illegible] Clavius hanc denomi-nationem dierum à consonantia fluxisse, quæ διατεσσάρων dicitur, quæ communi veterum totius musices fundamentum credebatur. Propter hanc n. consonantiam atque harmoniam ut dies musica ratione quo-damodo cum cæli ornatu convenirent postquam dies unus ab uno Planeta fuit appellatus, dixerunt sequentem diem a quarto Pla-neta post illum ordine tamen retrogrado, ut post Saturnum sequitur quar-to loco Sol deinde Luna deinde Mars &c. Hæc ex Clavio.

De Horis Hebræorum ~~[illegible]~~ ex [illegible]

~~[illegible]~~

Hebræorum vitus satis obscuri sunt, præcipue quo tempora diurnabant. Haud dubium n. est tamen per partes proprias habuisse distributas et ex horis etiam diem suum computasse. ~~[illegible]~~ Illis autem

Cuius autem naturae erant, quantumque temporis importarent ex sacrae scripturae testimonijs conabor docere.

Antequam Iudaei sub Romanorum uenissent imperio nihil certi e textu traditur ordine uidetur quibus horis tempus suum metirentur. Immo nomine horae non aliter scriptura ad innuendam aliquam terminatam certisque terminis clausam temporis partem ante Tobiae Historiam sed indeterminatae significationis fuisse manifeste admodum ex multis locis, in quibus loco horae eius commode uerti potuisset Tempus. Ut alia omittam est illud Deuteron. 28. 57. liberis qui eadem hora nati sunt. et Josue 11. 6. Cras in hac eadem hora tradam omnes istos. et Ruth 2. 14. Quando hora uescendi fuerit, ueni huc et 1. Reg. 9. 16 Hac ipsa hora quae nunc est cras mittam uirum ad te de terra Beniamin, et alia, quae omitto, in quibus uideri potest potuisse sine textus uiolentia alio uti termino, et ibi non nisi innui in eadem temporis differentia aliquid esse faciendum, aut factum fuisse. In libro autem Tobiae cap. 11 dicitur quod sedit uelut ... : sed in oculis sustinuit quasi dimidiam fere horam, et cap. 12 post discessum Angeli Raphaelis dicitur Tunc prostrati per horas tres in faciem benedixerunt Deum. Quibus locis innuitur horis determinatis tunc eos usos fuisse. Hoc est primum testimonium, quod de hora sub determinata mensura a scriptura habemus, quod tamen est non parui temporis post instructum Achaz Horologium. Nam Tobias in strage Israel captus est a Salmanasar rege Assiriorum, ut dicitur in cap. 1. 2. eius historiae; Haec autem depraedatio facta fuit anno sexto Regni Ezechiae filij Achaz regis Iuda ut dicitur 4. Reg. 18. 10 Ipse enim Achaz pater Ezechiae Horologium construxerat. Tempore autem quo dicitur sustinuisse per dimidium horae, sub finem iam mortuus erat, Salmanasar immo et filius eius Sennacherib a filijs suis occisus fuerat. Quae notanter uoluit ut ab Achaz horologio horae nomen ... potuerit. Quibus horis autem Tobiae temporibus in captiuitate uterentur non facile sciri potest. Quapropter ad caetera argumenta accedamus.

In libro prophetiae Danielis cap. 6. 10. mentio fit trium temporum, quibus Vir Desideriorum solebat quotidie adorare Dominum Deum suum, his verbis: Quod cum Daniel comperisset, idest constitutam legem, ingressus est domum suam et fenestris apertis in coenaculo suo contra Jerusalem tribus temporibus in die flectebat genua sua, et adorabat confitebaturque coram Deo suo, sicut et ante facere consueverat. Tria haec tempora originem nobis dedisse trium temporum orationis ex ecclesiastica traditione dicit Divus Hieronymus apud A Lapide in hunc locum, nempe horae tertiae, sextae et nonae. Et quod Judaeis hinc esset orta consuetudo orandi ter in die liberi dimitto. Verum ut ex Pinto refert A Lapide ibidem hora tertia, sexta et nona. Tertia quia tunc data est lex in Sina. Sexta, quia tunc cibus fuit servatus in deserto. Nona quia tunc deducta fuit aqua de petra in Cades. Vel ut addit Lorino, sexta orasse, quia tunc lapsus est Adam, quod arguit ex deambulatione Dei in paradiso post meridiem sive ut adjunt Hebraei quia tunc ambulat daemonium meridianum quapropter eo tempore recitant Psalmum 90. Qui habitat. ut liberentur ab incursu et daemonio meridiano. Verum si in his temporibus intelligimus tempus correspondens ad illud, quod postea horarum nomine vocarunt tertiam, sextam et nonam quando scilicet cum ii tempus distribuendi coeperunt, ita ut sensus sit quod circa medium mane, ad meridiem et circa medium a meridie ad [illegible] orasset, difficultatem nullam invenio. Si autem invenire velit his tribus temporibus has horas, idest tertiam, sextam et nonam quod videlicet tempore Danielis in usu nomen, et mensura harum horarum esset, [illegible] difficilius admittendum videtur. Cum nusquam in veteri testamento nomen, et quantitatem harum horarum sciam reperiri. Immo primo ante cap. 20 Matthaei ubi in Parabola Patris-familias fit mentio exitus illius circa tertiam, sextam, nonam et undecimam in scriptura [illegible] harum horarum neque

horarum [illegible]

neque vocabulum ex usitatis determinatae ipsorum quantitatis apparet. Ex quo videtur probabilissime concludi posse ex sacra scriptura ante quam Romanorum subjicerentur imperio horas hasce non adhibuisse, et sua illa tempora orationis a circumstantia quidem diei dependentia fuisse, ut scilicet media mane, meridie &c. orationes funderentur, non fuisse tamen dependentia ab horarum aequinoctialium circumstantia, quarum usum tam sero acceperunt.

Quantum autem difficile est horarum Hebraeorum rationem haurire ex veteri Testamento priusquam per Pompeium Romanorum dominium recipere cogerentur, tantum planius est post regimen translatum in alienos principes ex novo desumere. In 12 horis semper dividebant diem, in 12 pariter noctem. Quapropter quamvis illae ipsis invicem qualibet die, et qualibet nocte congruerent, erant tamen alterius diei, vel noctis horis comparatae inaequales. Ex loco cit. Matthaei colligitur ubi sermo est non solum de tertia, sexta, et nona verum etiam de undecima. De decima autem dicitur Joan. 1. 39. Hora erat quasi decima. De septima vero in cap. 4 eiusdem Joan. 52. Quia heri hora septima reliquit eum febris. Verum omnia alia testimonia uno verbo amplectitur illud Joan. 11. 9 Nonne duodecim sunt horae diei? Quod exponens Cardinalis Toletus in Comment. in hunc locum ait: Duodecim autem horas diem habere dicit more Hebraeorum, qui diem semper in aequales duodecim partes, et in totidem noctem dividebant.

Ex his in horis, quae de genere inaequalium dictum est, quatuor maiores horas faciebant Hebraei, et in 4 dividentes unicuique ex principalioribus horis 3 minores horas assignabant. Verum quia minores horae modo prolixae erant, modo longae, modo parum prolixae erant et maiores. Has nobiliores diei partes ex nomine horae minoris, tamquam unamquamque antonomastico nomine vocabant, scilicet, tertiam, sextam, et nonam.

Horas quoque duodecim noctis in quatuor pariter partes dividebant, quas vigilias vocabant. est illud notissimum Luc. 12. 38: Et si venerit in secunda vigilia, et si in tertia vigilia venerit. et illud Matthæi 14. 25. Quarta autem vigilia noctis venit ad eos ambulans super mare. Distributionem autem harum vigiliarum innuit Marc. 13. 35 Nescitis enim quando Dominus domus veniat, sero, an media nocte, an galli cantu an mane. Has vigilias secundum horas disponit A Lapide in Com. in Threnos Jeremiæ cap. 2. 19 Prima vigilia incipit hora prima, secunda incipit hora tertia, tertia incipit hora sexta, quarta incipit hora nona. Verum vigilias secundum horas distributas non prius habuerunt Judæi quam habuerint maiores horas [illegible] secundum minores dispositas, hoc est per Romanorum dominium. Noctem tamen in [illegible] vigilias etiam antea divisam probabilissimum est, præcipue in castris. Nam Exodi c. 14. 24 dicitur Jamque advenerat vigilia matutina et ecce respiciens Dominus super castra Ægyptiorum et Judicum 7. 19. Ingressus est Gedeon in partem castrorum incipientibus vigiliis noctis mediæ. Fallimur ergo qui dicunt Judæos [illegible] a Romanis accepisse primam, secundam, tertiam, quartam noctis vigiliam; Verius fuit dicere habuisse quidem vigilias in nocte distributas, sed non eo numero, quem sub Romanorum schola, et imperio didicerunt, ut in veteri testamento numerus vigiliarum Hebræorum non appareat. De Horis Canonicis.

Ne quid desit, quod desideretur ad Horarum notitiam, [illegible] Horis, quas Canonicas vocamus, [illegible] [illegible] [illegible] tantum quæ [illegible] instituto proposito [illegible] non [illegible] [illegible], quæ [illegible] moraliter exigunt [illegible] [illegible] Theologorumque [illegible] expendenda relinquimus.

Horas Canonicas dicimus preces quas ex Ecclesiastica institutione quotidie statutis horis recitant qui clericali militiæ nomen dede runt. Hinc [illegible], qui sacras hasce [illegible] [illegible] ab orando horas dixit | [illegible]

dici putet, cum non oras, sed horas, praemissa aspiratione et scriben
et pronunciari oportet. Officium igitur divinum (quo nomine etiam vocantur) in septem, vel ut aliis placet in octo horas Canonicas divisum est. Etenim Ecclesiastica traditio, insuper Concilia, et Pontifices in [illegible] [illegible] certis [illegible] in quibus natura [illegible] die scilicet unius diei, uniusque noctis, ratio Conditorem omnium Laudis cultu venerari, et precaria religiositate recognoscere. Ex eo autem Canonicae dictae sunt, quae regulari periodo per certas diei horas distribuuntur. Canon n. graece, Latine regula verti potest. Et quamvis Catholica Ecclesia ob expeditiorem officiorum usum, ad stylum, quo in [illegible] [illegible] magna [illegible] [illegible], retinet tamen adhuc nomen, quod a primaeva institutione impositum, a statutis suis et horarum intervallis; et quae nocti promebantur, nocturnas, quae diei, diurnas preces appellat.

Quae nocturno fundebantur tempore, sunt quas nos matutinum et Laudes vocamus. Matutinum tribus constat nocturnis quae unicam tantum officii ~~partem~~ integrant. Qui septem tantum horas in officio cognoscunt Laudes a Matutino non distinguunt. Qui autem [illegible] distinguunt, et partem peculiarem officii ex laudibus faciunt. Diurnae autem preces sunt Prima, Tertia, Sexta, Nona, [illegible] et Completorium. [illegible] est ~~nocturnae, diurnae~~ quod [illegible] [illegible] tantum nona continet diurnae vocamus, [illegible] [illegible] principio. Jam de singulis aliquid dicendum est.

Comparant aliquali modo aequi[illegible] nocturnis partes, quas vigilias vocabant Hebraei, et Romani [illegible] superioribus dictum est. [illegible] [illegible], [illegible] [illegible] et [illegible] inter matutinae Ecclesiae tempora non censeo. Igitur primis Ecclesiae nascentis, vel adolescentis temporibus ~~tamen~~ quater in nocte fideles convenisse ad preces Deo fundendas, a quibus postea tres nocturnos, et matutinas laudes provenisse, non inficior. Ordinem autem adeo concinnatum, quem tradit Durantus, insuper et hymnorum, et psalmorum circumstantias, illi tempori, quo in cryptis clam orabant, et in sepulchris Martyrum sacra ~~[illegible]~~ latenter perficiebant, non video admodum congruere. Verum pro nocturnorum nominis, originisque notitia sufficiat.

Aliquando Ecclesia sub uno tantum nocturno officium nocturnale absolvit ut in Feriis, et diebus Profestis. Discrimen autem [illegible] inter officium 3 nocturnorum et officium unius [illegible] et [illegible], [illegible] [illegible] [illegible]. Quod [illegible] dicendum [illegible] in diebus ante festa solebant convenire fideles ad excubandum in ecclesiis unde Vigiliae nomen, et originem traxerunt [illegible] [illegible] [illegible] antecedentes translatae sunt. In ea autem excubatione omnes [illegible] noctis horae [illegible] in singulis [illegible] hymnis, orationibus et Psalmis Deum [illegible] laudantes. Quorum numerus Psalmorum non communis omnibus erat, sed alii quinquaginta, alii plures, alii pauciores canebant, donec (ut ait Durantus, Cassianus) angelo revelante Patres convenerunt, ut duodecim dicerentur. Hic Psalmorum numerus in nocturnis Profestis servatus est, vel Vigiliae nocturnae etiam vocatae fuerint, et quia in qualibet noctis hora Deus tunc in Vigiliis laudabatur, duodecim Psalmi ad numerum horarum respectus est, vel humana infirmitas singulis horis surgere non patiebatur. In illis, ait Durantus lib. 5. cap. 3., dicimus duodecim Psalmos, ut nos Deo servire in 12 noctis horis ostendamus, [illegible] horae unum psalmum attribuentes, vel non possumus integre Deo servire. Liber II

De Die, et Nocte

Cap. I

De Notione Diei, eiusque primaria divisione

Diem in suas partes, immo potius partes diei horas inquam, in se ipsis Lib. superiori consideravimus. Nunc a partibus minutioribus ascendendo ad maiores fas est diem in sua substantia considerare. Ut qui pergimus scalam, seculo facere, ab extremis ad superiores gradus ascendimus et quibus certis diei innotuerunt innotescat ut tanquam in se, et ut alterius pars et ipse Dies.

Diei nomen si a communi acceptatione, et usu repetendum ex eo sin nulla determinatam temporis partem habet innotare. Quod satis indicat promiscuitas ipsius nominis, quod modo masculino, modo feminino genere sociatur. Hinc cautum est ~~ut~~ ad innuendum tempus certis terminis clausum masculino copuletur, incertis feminino. Hodie dicimus quasi hoc die, ad tempus hodiernum determinatum indicandum. Sanctus dies

Virgilius: vanisque labor etc. dixit Virgilius ad nullum tempus ostendendum. De hoc feminino est Dicula diminutivum diei quae parvum, et breve tempus importet. Verum admodum in determinatione hoc non habetur, et idem Virgilius: [illegible] in Psal. tanquam dies [illegible]

[illegible]: terra quae [illegible] non incelegantes [illegible] est. [illegible] ante diem, sub certis claustris contentum refertur [illegible]. In discernendi autem a [illegible], et usitata Diei acceptione, Dies est certi temporis determinata mensura

quæ Diei nomen vel á Dijs qui Planetæ septem hebdomadæ dies perpetuo denominantibus, proprium dederunt, vel á Græco Διὸς idest Jovis, qui eius putabatur rector, creditur mutuata. Quod temporis verò hæc mensura importet, quotve horis claudatur non prius definiri potest, quam diei primaria divisio instituatur.

Dies primariò bifariè dividitur in naturalem scilicet et artificialem. Naturalis ab uno ortu solis ad alium extendit adeoque omnes vigintiquatuor horas quibus tempus lucis temporisque tenebrarum complectuntur, concludit. Artificialis ab ortu solis ad occasum usque, [illegible] tempore tantum [illegible]. Nihil hic horarum modi habet, et ipsius mensura omnino in vago posita est. Accomodatur namque quotidiani solis circulis qui modo diuturnior, modo tempore excedit sibi emersus, equid orbem terramque nostram perlustrans, dies [illegible] noctis modo longiores, modo facit breviores. Hinc horarum inequalium partitio exorta est quæ ad semper in quolibet die sive brevi, sive longa duodecim desiderentur, in diebus longioribus longiores, in brevioribus et breviores manifestum est. Et hinc etiam petitur inequalium origo; si enim horas unius diei cum horis alterius conferas, erunt inequales, quia inequales sunt dies quorum sunt partes: neque umquam fieri potest ut [illegible] in duodecim equales partes dividatur, quæ divisio toti anno accommodetur, quia quilibet ex [illegible] [illegible] sexaginta quinque diebus anni non nisi cum altero convenit in paritate distantiæ á Tropicis Cancri vel Capricorni, quam sol habet in accessu, et in recessu ab altero ex Tropicorum circulis [illegible] jam hæc omnia patent ex dictis lib. superiori de horis equalibus et inequalibus. Ergo ne Crambem recoctam tibi [illegible] exponere videar ulterius, pro nunc naturam diei artificialis explicare consulto [illegible].

Naturalis dies integra circumlatione equatoris describitur, immo ipsius primi mobilis [illegible]

axem communem polorum mundi gyrans ad eundem punctum discessus uno die iterato revertatur. sed, ut nonnulli dicunt, revolutio diem facit; non n. dies est mensura circulationis primi mobilis, sed unica primi mobilis circumlatio diem describit, constituitque. differt naturalis ab artificiali et quod eo maior sit, aliquando cum duplo, et quod semper iisdem terminis, certisque mensuris clauditur. Quamvis enim solis ortus inconstans sit modo citius, modo serius, cursus tamen eius, quo nobis dies et nox clauduntur semper 24 horis absolvitur. Fac hodie ~~[illegible]~~ Kalendarum Decembrium solem oriri h. 15. m. 24. cras serius quidem orietur, puta h. 15. m. 25. Licet autem hic sumamus ab ortu solis mensuram huius revolutionis naturalis diei tamquam a puncto fixo, ex ~~[illegible]~~ tarditatione solis exortus non demitur ~~unum~~ minutum naturali diei, sed artificiali. Quia quamvis cras sit tempus lucis ~~[illegible]~~ minuto minus tempore hodierno, tempus tamen noctis ~~[illegible]~~ crastinae est ~~[illegible]~~ minuto longius tempore noctis ~~[illegible]~~ Kalendarum. Et ita quod amittere videtur in luce, acquirit in tenebris. Hac iustissima lance lux, et tenebrae toto anno in spatijs propriis durationis conveniunt, et quod lux amittit in mense Decembri, nox acquirit. Et sic iacturas, quas lux patitur Decembri restaurat. Sic factum est ut noctium hiemalium longitudo noctium aestivarum exiguitatem, et diurnae lucis aestivae longitudo hyemalium tenuitatem compenset. et toto anni curriculo sive in tenebris, sive in luce dies naturalis horas 24 nostras communes nec excedat, nec excedatur. Conveniunt tantum nox, et lux in duratione in utroque Equinoctijs sole subeunte signum Arietis ingredientis in Zodiaco, et Librae, quibus noctis, et lucis iacturas et profectus componens, et concordiae datum esse videtur, iuxta illud Vir

Virgilius — Libra dies, somnique pares ubi fecerit horas.

Dies naturalis est temporum mensura omnium certissima, quae

naturam

nullus [illegible] nobis navatur, [illegible] semper 24 horis eiusdem constantis mensurę contentus est. Et quamvis mensis, et annus semper ijsdem claudantur terminis, quia Luna, et Sol eodem temporis spatio, quo semel zodiacum percurrunt, [illegible] revertuntur, attamen sub certis, stabilibusque diebus comprehendi non possunt, quia praeter dies, horas quoque, et minuta aliqua in gyro suo insumunt, quę si constans diei naturalis [illegible] convenientia [illegible] [illegible] [illegible] speciandum est. Huius vero ęqualitatis à motu regularissimo primi mobilis petitur, qui cum idem semper sit, semper eundem esse diem facit. Hinc potuerunt maiores nostri dies in horas 24 semper ęquas dividere, quae metiebantur sphęrę qui eius tenor invariabilis erat. Et non secus ac [illegible] pro mensibus globum [illegible] sphęram tenerent ac naturalem [illegible] [illegible] habent, dies omnes gradus, lineas, et circulos, certissimas inde conclusiones deducentes. In [illegible] [illegible] [illegible] circulum [illegible] [illegible], qui per omnia sui partes ęqualiter distat à centro, quem ęquatorem [illegible] tribuunt diem describendi. Hunc in 360 partes, quas gradus vocant imaginaria divisione partiuntur [illegible] 15 gradibus partes 24, hoc est horas constituerunt. Deinde ijs, in ijs gradibus aliam divisionem adjungunt, quę horas 24 distincte disponit, 15 grad. ęquatoris unicuique assignatis, qui cum nec plus nec minus in qualibet parte ex 24 sint, horas ęqualibus spatijs inter se distare faciunt. Hinc illud Ovidij Metam. lib. 2. Fab. 1. Phaethon

Et positę spatijs ęqualibus horę. Ovid. Metam.

Ęquitatem huius divisionis optime cognosces si 360 in 24 dividis, unicuique parti 15 assignabis; vel si 15 per 24 multiplices. Tunc autem confici 360, quot sunt gradus ab Astronomis in Cosmica sphęra descripti. Verum quia horas [illegible] pergimus describere, subeat in minutis postulatis forsan concordantiam graduum ęquatoris cum diei minutis. En facio satis. Multiplica 60 per 24

per 24 habebis 1440. Tot autem minutis integer dies naturalis absolvitur. Accommoda deinde 1440 grad. 360 equatoris, dabis unicuique gradui minuta 4. Quater n. 360 numerum 1440 adamussim complent. Igitur unus equatoris gradus, 4 minuta horę postulat. Et sic habes intentum, quod petebas.

Cap. II

De Die civili eiusque auspicijs, et partibus.

Dies naturalis, de quo cap. superiori loquuti sumus, incipit á quocunque initio, nec de suo esse importat potius ab una quam ab alia hora exordiri, sed prout in suo conceptu spatium 24 horarum importat, hoc est tempus integrę revolutionis equatoris per primum mobile. Sicuti autem huiusmodi circuli nec principium, nec finem important et [illegible] [illegible] potius ex una parte quam ex alia [illegible] 360 gradus, in quibus secatur circus equinoctialis. Ita naturalis dies ad normam eiusdem circuli se habens, et in gyro partes suas revolvens non habet horam primam, nec ultimam ex sua substantia, sed quam pro libito primum pergis numerare prima erit et altera secunda usque dum ad illam, cui prima numerata immediate antecedit, veniens, que erit extrema. Verum enim vero cum hominum usui, humanęque commoditati [illegible] nisi eis [illegible] cognoscerentur [illegible] vicia, quęque non aliis [illegible] subessent. Postquam autem caput dici finem est non amplius naturalis, sed civilis dies appellatur, qui civicis, urbanisque rebus disponendis accommodatus fuit, et digestus.

[illegible] ergo dies est ipse naturalis, sed á determinato puncto ad idem [illegible] 24 horarum [illegible] [illegible] Verum quia naturalis dies

quatuor aliis cardinibus circumscribitur, ab uno horum initium diei ducere ho-
mines consueverunt. Sunt autem ortus [illegible], et eius oppositum nempe oc-
casus. Insuper, meridies et media nox. Conformantur hi diei cardi-
nes quatuor primarijs sedibus, quibus Sol respectu cuiusque regionis
quotidie tenet. Finge locum, in quo te constitue, et sic [illegible]. Sit

orienti; neque ullus alius locus in caelo est, cui respectu emisphaerij praesen-
tis regionis magis opponatur, quam opponantur ad invicem oriens, et occidens.
Tu autem in loco fixo stando medium tenes locum, et fere locum centri
(quamquam hic [illegible] omisso semidiametro terrae, quod
esset considerandum, sed ad intentum haec minutiae non conferunt, nec

[illegible]

Ab his igitur principalibus diei cardinibus, et nobilioribus Solis sedibus auspicandi diem suam rationem nationes variæ habuerunt, eam diei primam esse ratione volentes quæ [illegible] regionibus commodior videbatur. Ut à Solis ortu exordiar, Babilonij à Sole oriente initium diei statuere, producentes hinc per horas 24 usque ad proximum eiusdem sydenis ortum. Quod autem hoc tempore, scilicet inter duos ortus Solis, facti contigisset, uno die factum dicebatur. In meridie autem caput diei sui fixerunt olim plerique in Umbria et ad alium meridiem producebant. Auderem his Transalpinos nostros veteratores adiungere qui primas horas immediate a meridie summas vocant. Verum cum si horas duodecim numerare incipiant à meridie scilicet et à media nocte, me latet quamnam horam primam ex 24 statuant, cum utraque prima esse possit tam scilicet mediæ noctis, quam meridiana. Videtur tamen à nocte olim incepisse saltem Germani, de quibus Tacitus de [illegible] [illegible] Germanorum sic ait, [illegible] [illegible] numerum [illegible] [illegible] noctium computant [illegible] [illegible] [illegible] nox ducere diem videtur [illegible] non a media nocte, sed ab occasu Solis ex Taciti testimonio olim diem exorsi esse videantur ut nos nunc facimus, qua noctes numerant [illegible] suo diebus, par est dicere integros fuisse non medias. Quidquid sit de Germanis [illegible] Athenienses ab occasu solis ad alium occasum diem ducebant et spatium inter duos occasus unius diei erat periodus. [illegible] quoque hunc morem Atheniensium sequimur, immediatam horam à Solis occasu primam ex 24 constituentes, et ultimam diei, quæ cum [illegible] [illegible] [illegible] [illegible] [illegible] nam [illegible], Attamen [illegible] horologia nostra [illegible] [illegible] ut à Solis occasu horas nobis numerandas præmonstrent et veram quartam, quintam &c. horam dicemus, quæ à [illegible] puncto hora quarta vel quinta sit, hoc ad communem commoditatem nihil conducit, à media nocte cum antiquis Romanis diem propriè exordientibus. Ita ut duplici [illegible] dierum [illegible] [illegible] [illegible] [illegible] ab occasu Solis, [illegible] à qua inveterata [illegible]

consuetudo ..... exortu ... nati aut dici ..... horas metimur. Alteram à media nocte à qua verè dies auspicamur, ita ut quod ante mediam noctem factum est, die praecedenti factum dicatur: quod post, die sequenti. Non aliter ac Romani; qui quamvis horis uterentur inaequalibus et à solis exortu ad occasum duodecim succedentes quarum periodos actiones proprias distribuebant, lib. [illegible] similiter etiam in nocte. ab ipsa tamen nocte media vera diem suum auspicabantur. Haec omnia suis verbis concludit Censorinus in lib. de die Natali cap. 23. Babylonii quidem à solis exortu ad exortum eiusdem astri diem statuerunt. at in Umbria plerique à meridie ad meridiem. Athenienses autem ab occasu solis ad occasum. Ceterum Romani à media nocte ad mediam noctem diem esse existimaverunt. Indicio sunt sacra publica, et auspicia etiam magistratuum, quorum si quid ante mediam noctem est actum, diei, qui praeteriit adscribitur; quod autem post mediam noctem, et ante lucem factum est, eo die gestum dicitur, qui eam sequitur noctem. Idem significat, quod qui a media nocte ad proximam mediam noctem, in his horis quatuor et viginti nascuntur, eundem diem habent natalem. Quod etiam ex M. Varrone expresse docet A. Gellius Noct. Attic. lib. 3 c. 2 ubi ait: M. Varro in lib. rerum humanarum, quem de diebus scripsit, homines, inquit, qui media nocte ad proximam mediam noctem in his horis 24 nati sunt una die nati dicuntur. Quibus verbis (prosequitur Gellius) ita videtur dierum observationem divisisse, ut qui post solem occasum ante mediam noctem natus sit, is ei dies natalis sit, à quo die ea nox coeperit. contra vero qui in sex horis posterioribus nascatur, eo die videri natum, qui post eam noctem diluxerit. Et post pauca eodem cap. ad rem nostram affert Tribunorum plebis exemplum, qui integro die prohibebantur abesse Roma, si vero à media nocte discessissent, et post ante mediam noctem sequentem redirent intra urbem, uno die abfuisse non censebantur. De Die Sacro, et primo Hebræorum

Diei sacri nomine illum intelligo, quem religio viti bus suis sacrare convenit. Verum cum omni tempore multiplicitas religionum increverit, et nil magis comprobet non nisi unam veram esse, quam plures contrariæ, singulæ dies aliquos in observationem habebant, quibus eam, quam colebant divinitatem peculiari ceremonia venerarentur. Indignum tamen semper erit eas sectas religionis sacrorum nomine quæ vel fabulis delinquere bruta vel sordidi vel sanguine mixta vel magis, glorientur, ut doctrinis teneantur suas istas exercitationes appellare quid est. Adeoque nec sacri nomine dies ille erit signandus, qui lucrosæ emolutationis ridiculisque ritibus destinabatur. Concludo igitur ad hoc caput dies, quos illa unquam natio tribu verum et unum non agnoscens festos, sacrosque vocavit. Illos tantum enumerabo, quos olim Synagoga pro sacris habebat.

Plures et à Deo inditos, et pro devotione arbitraria institutos habuere Hebræi solemnitates. Quas non omnes uni cultu sed pro dignitate mysterij, et representationis beneficij maioris minorive religiositate colebant. Quamvis omnes, quos peculiari ritu consecraverant dies pro sacris haberi possent, eos tantummodo sacros festosque censendos esse non dubito, quibus usus, et exercitium servilium operum prohibebatur. Festum igitur sacrum horum ultra a vespera in vesperam producebatur et qui vel pridiano sole occiduo inceperat, alio sole pariter occidente desinebat. *A vespera usque ad vesperam* celebrabitis sabbata vestra ait Deus in Levit. c. 23 v. 32. Nomine sabbati hebraice utitur pro quocumque festo, ex eo quia sabbatum videtur festum festorum, ad cuius normam, et exemplum cæteros dies sacros colendos præceperat, tum et quamvis peculiaribus ritibus et ceremonijs unusquisque decoraretur, quæ alij non erant communes; quoad substantiam tamen vacationis sibi

vel et à servilibus more sabbati dugebantur. Sic factum est ut nomen Sabbati cum aliis festis communicaretur, omniaque vocarentur Sabbata; ait P. Cornelius à Lapide in c. 5 Deuteron. Primus igitur dies sacer

et festus erat Sabbatum, secundus Phase quod erat Pascha, Tertius Pentecoste, Quartus festum tubarum, Quintus festum expiationis, Sextus Tabernaculorum, Septimus festum coetus et collectae, quod à festo Tabernaculorum seiungere liceat. Etenim septem diebus festum erat Tabernaculorum, octavus autem erat collectae. Septem diebus ut dicitur Levit. 23.36 de festo Tabernaculorum offeretis holocausta Domino, dies quoque octavus erit celeberrimus atque sanctissimus et offeretis holocaustum Domino, est enim coetus atque collectae. Haec septem praecipua festa sunt quae Iudaeis observanda Deus dedit. Addiderunt tamen ipsi nonnulla alia quidem sibiipsis, quae sunt primum Phurim, idest sortium, secundum encaeniorum, seu purgationis Templi, tertium festum ignis sacri è coelo recepti, Quartum pro caeso Nicanore. Iam aliqua de singulis tangere liceat.

Levit.

Sabbatum quietem necdum hominibus tam dominis quam servitio mancipatis, sed et iumentis [illegible], immo et arboribus afferebat. In eo nefas erat per se ipsum, vel per famulos, et animalia facere quae servilitatem quoquo modo sapuisset. Ex eo autem sabbatum à Deo institutum fuit tali vacatione à servilibus ut in memoriam veniret mortalium creationis beneficium, nec ab eorum mente decideret ut ita dicam, labor ipsius Dei, qui sex diebus in mundiali machina occupatus, septimo, idest sabbato ab opere cessando requievit. Hinc pau[illegible] nonnulla interdicta a Deo fuere quae alioquin licita ne[illegible] deventur, et de quibus iam à severiori Lege ad filiorum adoptionem translati non nobis servandum facimus ut sunt cibos lavare [illegible] lavare, immo ignem ad hoc accendere, ferre pondera, ultra mille ire, vel plus minusve prout varia fert Doctorum opinio, iter habere. Sed Hebraei in suis observationibus ad superstitionem usque religiosi.

Sextum erat Festum Tabernaculorum, quod Graeco nomine Scenopegia etiam dicitur. Huius festivitatis praeceptum describitur Levit. 23. 34

Levit. A quinto decimo die mensis huius septimi erunt feriae Tabernaculorum septem diebus Domino. Dies primus erit celeberrimus atque sanctissimus omne opus servile non facietis in eo. Institutionis huius festi ratio fuit, ut esset memoriale perpetuum protectionis divinae, qua gubernati fuerunt in deserto, cum in papilionibus, et tabernaculis per 40 annos vixissent. Atque ideo his septem diebus Ierusalem, et templum festum celebraturi convenientes ex omni tribu, immo ex omni cuiusque tribus familia in tentoriis morabantur. Et verisimile est Ierosolymitanos in domibus et hortis [illegible] autem in areis urbis, [illegible] tabernacula pro [illegible] familias, et tribus disposuisse. Non enim hi peregrini, qui ex omni parte confluebant in urbe [illegible] erant. Adde, quod in agris morantes [illegible] veterum [illegible] [illegible] repraesentabant. Fiebant autem tentoria nimirum [illegible], linteis et pellibus postea ornamentis insuper [illegible] arborum ramis, et frondibus. Describitur tabernaculorum constructio in lib. Nehemiae, hoc est in 2. Esdrae c. 8. 14.

lib. 2. Esdrae Invenerunt [illegible] in Lege praecepisse Dominum in manu Moysi ut habitent filii Israel in tabernaculis in die solemni mense septimo et ut praedicent et divulgent vocem in universis urbibus suis et in Ierusalem dicentes: Egredimini in montem et afferte frondes [olivae et frondes] ligni pulcherrimi frondes myrti et ramos palmarum et frondes ligni nemorosi [illegible] sicut scriptum est. Et egressus est populus et attulerunt feceruntque sibi tabernacula unusquisque in domate suo, et in atriis suis, et in atriis domus Dei, et in platea portae aquarum, et in platea portae Ephraim. Verum igitur ramos quibus construere tabernacula [illegible] sanctio erat, ut [illegible] frondes [illegible] convenire hanc celebrant festivitatem sumetisque vobis, ait Deus Levit. 23

Levit 40 die primo fructus arboris pulcherrimae, spatulasque palmarum et ramos ligni densarum frondium, et salices de torrente, et laetabimini coram Domino Deo vestro. ligno pulcherrimo Chaldeus habet citrum quod in Iosepho [illegible]

tius, nam auctore Hieronymo mala citria vocantur mala Persica, et Medica, quia teste Hieronymo ex Persia, et Media in Italiam sunt advecta. Spatulas autem longos ramos palmae, *Joan.* ...

et [illegible]. Tandem, [illegible] de torrente [illegible] [illegible] ramos et, ut vivunt aliqui
propriis onusti fructibus in manibus gestantes, recordarentur Hebraei, se à terra
deserta, inhospita, inculta, et sterili, ad feracem, optimis, semper virentibus,
perennibus et fructiferis arboribus consitam Dei ope translatos fuisse. Et
nota quod festum hoc circa finem anni non sacri, qui à Martio, sed civilis qui *ex à Lap. in Levit*
a Septembri, sive Tisri incipiebat, ut suo loco dicetur, institutum fuit quando
scilicet fructus [illegible] terrae collecti sunt ut esse augere divinae bene-
dictiones de iis gratias in hoc festo Datori optimo rependerent. Hoc unum
ex ~~[illegible]~~ iis tribus festis erat, quibus omnes masculi apparere debebant
non vacui coram Domino, ut praecipitur Exod. 23. septimo tandem die, quo *Exod.*
solemnioribus [illegible] [illegible], ramos gestantes septies altare circuibant
in memoriam [illegible] civitatis septeno circuitu à Josue expugnatae. Vide
à Lapide in c. 23. Levitici
Tandem septimum inter dies festos lege à Deo lata celebrandos
reponendum est Festum coetus et collectae, quod à primo Tabernaculorum die erat
octavus [illegible] octavo gerebat. Praecipitur Levit 23 36 his verbis. Dies
quoque octavus erit celeberrimus atque sanctissimus, et offeretis holocaustum Levit
Domino. est enim coetus atque collectae omne opus servile non facietis
in eo. Putant nonnulli institutum fuisse hoc festum ad colligendas populariter
eleemosynas. Verum vox coetus interpretationem hanc non patitur, quia pro
congregatione hominum sonat. Igitur verisimilius dicendum est mandatum
fuisse hoc festum ut populus conveniret ad Tabernaculum, et suo tempore *1.6 ...*

sacrificiis, et ceremoniis pro pacifico [illegible] terrae [illegible], ad quam post

venerunt. Non nego tamen hunc diem qui est ille, quem Joannes cap. 7 37 vocat

Cornel. à Lap. institutum non fuit tale festum. Ita à Lapide in c. 23. Levit. Haec sunt festa, quae Dei praecepto observare tenebantur Judaei. Quorum sacrificia ritus, et caeremonias sparsim in libris Pentateuchi Moses exposuit. [illegible] si ea scire cupis, praeter loca citata Lege cap. 28, et 29. Num.

Praeter ista autem festos sacrosque dies, quos ex positiva Dei Lege sanctificare tenebantur Hebraei, [illegible] etiam alios habebant pro sibito devotionis instituti ad [illegible] memoriam commemoranda divina beneficia, quae illis diebus perceperunt. [illegible] singula exponam.

Primus festivus dies erat quem Phurim sive sortium vocabant. [illegible] anni [illegible] statuerunt [illegible] negotiis [illegible] ob beneficium divinum, opemque sibi à Deo latam, ne quod paraverat malum in Judaeos Aman, ipsis eveniret, sed [illegible] in caput inimicorum converteretur. Quod Esther suffragii atque industria adeo plene factum fuit ut Judaei de septuaginta quinque millibus eorum mortem [illegible] minatam stragem strage inimicorum vindicaverint. Quia vero optimi exitus res deprecerat ut futuris saeculis haberetur memoriae Mardochaeus mandavit omnibus Judaeis qui in [illegible] Regis, [illegible] provincias dispergebantur ut dies 14, et 15 mensis [illegible] [illegible] haberent [illegible] dies [illegible] tabescebant [illegible] minata in festos conversa fuerit. tionem.

templi, de quo loquitur Joan. 10. 22. Facta sunt Encaenia in Jerosolymis Joan. Encaenia
et hyems erat. Super quem locum Augustinus tract. 48 in Joan. scribens sic
explicat: Encaenia festivitas erat dedicationis templi. Graece enim καινόν Aug. tract. 48 Jo.
dicitur novum. Quandocumque aliquid fuerit dedicatum, encaenia [illegible]
vocantur. Jam et usus habet hoc verbum, si quis nova tunica induatur
encaeniare dicitur. Illum enim diem quo templum dedicatum est, Judaei so-
lemniter celebrabant. Ipse dies festus agebatur cum ea quae lecta
sunt loquutus est Dominus. Haec omnia S. Augustinus [illegible]
[illegible]. Adde id: hyems erat, ut notat Evangelista, nam encaenia
continuabant die 25 mensis Casleu, qui est Novembris. Initium hujus
solemnitatis servandae Judas Machabaeus, quando expugnato Lysia exercitu venit
in montem Sion, inveniensque templum profanatum, pastophoria (quae erant cu-
biculi sacerdotum [illegible] annexa templo in quibus vestes
ministrorum aliaque ad ornatum templi spectantia servabantur, unde et ga-
zophylacia quoque dicta sunt) diruta, altare pollutum, et in atriis virgul-
ta nata sicut in saltu, incidit ei consilium bonum destruendi altare vetus, et
novum juxta legem aedificandi, cujus dedicationis deinde anniversaria solemnitate
celebrandum mandavit. Et statuit Judas et fratres ejus, ut dicitur 1 Machab. 4.

[illegible] ignis qui datus est quando Nehemias ædificato templo, et altari obtulit
sacrificia. Quomodo autem Nehemiæ datus fuerit hic ignis, [illegible]
Nam cum in Persidem ducerentur Patres nostri, sacerdotes, qui tunc cultores
Dei erant, acceptum ignem de altari occulte absconderunt in valle ubi erat
puteus altus et siccus, et in eo contutati sunt eum ita ut omnibus ignotus
esset locus. Cum autem præterissent anni multi, et placuit Deo ut mitte-
retur Nehemias a rege Persidis, nepotes sacerdotum illorum qui absconderant
misit ad requirendum ignem et sicut narraverunt nobis non invenerunt
ignem sed aquam crassam et iussit eos haurire et afferre sibi et sacrificia
quæ imposita erant iussit sacerdos Nehemias aspergi ipsa aqua, et ligna et
quæ erant superposita. Utque hoc factum est, et tempus affuit quo sol
refulsit qui prius erat in nubilo, accensus est ignis magnus, ita ut omnes
mirarentur. Sed quia bis missus fuit Nehemias a Rege Persidis in Judæa
non satis liquet, sub qua missione, et quando ignis cælestis datus fuerit.
P. Cornelius a Lapide probabilius putat asserere datum a Deo fuisse igne
paulo post primam missionem factam a Cyro, nimirum anno sexto Darij

Bifariam dividendi sunt dies festivi, quibus vita Christi Do-
mini per mysteria repraesentatur. Quidam enim immobiles et fixi sunt, quidam
vero mobiles et vagi. Inter mobiles est ipsa dies Dominica [illegible] quotannis
diem anticipat et bissextili duobus anticipat ~~[illegible]~~ Qui cum dies 365 diebus an-
nus metiatur hunc numerum non ~~[illegible]~~ aequantur hebdomadae 52 quarum
caput est ipsa Dominica; sed solummodo 364. Hinc fit ut, in quolibet anno diem
anticipent et differant. Alij autem festa dies mobilitatem [illegible] non a [illegible] sed
a Luna sortiuntur. Quaeque quae a Paschate pendent aequali semper de-
[illegible]. Pascha autem Lunae conformatur cursui, quae in anno So-
lari [illegible] sedem non habet. [illegible] sunt ~~[illegible]~~ Dominicae Septuagesimae, Sexagesimae,
Quinquagesimae et ipsa Quadragesima cum sex suis Dominicis. Deinde post
Pascha, Dominica in Albis, quae est eadem [illegible] cum quinque aliis Domi-
nicis post Pascha. [illegible] post 40 dies est Ascensio Domini. Deinde decimo
[illegible] et a Paschate quinquagesimo est Pentecoste. In octava [illegible]
festum Trinitatis ~~[illegible]~~ deinde [illegible] Christi [illegible] Trinitatis autem [illegible] tamquam a summa post Pentecosten
Dominicae 24 numerantur usque ad Dominicam proximiorem festo S. Andreae
incidenti 30 Novembris, quae est prima adventus Domini. Et post eam tres
aliae usque ad Nativitatem computantur. Inter Natale autem Salvatoris et
[illegible]; quae festa immobilia sunt duae Dominicae intercedunt [illegible]
~~[illegible]~~ [illegible] immobilibus [illegible]
~~[illegible]~~. Post Epiphaniam autem Dominicas sex computamus. Quarum ultimas
Pascha, et in consequentia Septuagesimae adventus cum a Luna accelleratur
[illegible]. Reponuntur autem post 23. a Pentecoste, cuius anticipatio et
[illegible] a Paschate descendens [illegible] ~~[illegible]~~ [illegible] quae [illegible]
Dat [illegible] mobilia, festa [illegible]. Immobilia autem sunt ipsius Do-
mini, et Verbi Dei incarnatio [illegible], Annunciatione [illegible] 24 Martij
ipsius Nativitas, Circumcisio, Manifestatio sive Epiphania, et in templo [illegible]
tatio sub Purificatione Virginis Matris. Libabo aliqua ab insignioribus quae a [illegible]
[illegible] nostro non [illegible]; Quae mystica sunt Ritualiter omnino consideranda. Charle.

Chatholica Ecclesia annualem novum officiorum ordinem à Dominica prima Adventus incipere solet. Quae, vigiliis [illegible] et [illegible] exordium [illegible] [illegible] numquam esse potest ante quinto Kal. Decemb. nec post 3. Non. Decemb. hoc est nec ante 27 Novemb. nec post 3. Decembris, sed quae dies inter has erit Dominica, prima erit adventus. Sive adventus minor diebus 22 esse non potest, nec maior 27, omissa vigilia Nativitatis, quae, ut dicunt, sub nomine adventus non venit. Sic dedere ~~quatuor~~ Dominicas tres hebdomadis ~~[illegible]~~ completas dicent. Quinimo [illegible] inter [illegible] et Nativitatem [illegible]. Quare prima erit 3 Decemb. quarta erit Pridie Nativitatis, videlicet in ipsa vigilia. Si prima erit 27 Novembris, quarta erit 18 Decemb. et in sabbato post [illegible] erit [illegible], et in consequens Nativitas in ~~[illegible]~~ Dominicam incidet.

Nativitas Domini Nostri Jesu Christi secundum carnem à Chatholica Ecclesia traditione veterum Patrum tenaciter conservari [illegible] octavo Kal. Januarii celebrari solita est, quo dum medium silentium tenerent omnia, et nox in suo cursu medium iter haberet, omnipotens sermo Dei, qui est eius Verbum ante tempora generatione eterna à [illegible] Patre, [illegible] in tempore novi factus homo [illegible] natus est. [illegible] Dei testimonium Augustini in Psal. 132, ubi quadam comparatione facta inter Nativitatem Domini et eius Praecursoris

August. in Psal. dicit, [illegible] natus est, [illegible] Joannes sicut tradit [illegible], octavo Kalendas, [illegible] cum iam incipiunt minui dies; Dominus autem natus est octavo Kalendas Januarias quando iam dies incipiunt crescere. Verum a [illegible] universali sententia [illegible] nonnulli qui [illegible] et [illegible] [illegible] [illegible] [illegible] Dominum [illegible] Nativitatem [illegible] et [illegible] [illegible] [illegible] sententiae [illegible] [illegible] ut natus erat [illegible] [illegible] [illegible] [illegible] [illegible] ipse est apud nos dies [illegible] ~~[illegible]~~

Hierony. in Ezechiel. [illegible] [illegible] Hieronymus [illegible] in Ezechiele [illegible] [illegible]

Baronius in Annot. Baronius in annotat. [illegible] ad 25 decemb. [illegible] ubi etiam docet quod die

die hebdomadis Dominus natus fuerit, dum ait: In quam autem Hebdomadis diem in ciderit Natalis Domini docet sexta Synodus. Quae prima die quam nos Dominicam appellamus natum Dominum [illegible] cap. 8. Festum hoc immobile est sicut et Circumcisio, Epiphania, et Purificatio quae ab hoc pendent per [illegible] dierum distantiam, cuius immobilitatis discrimen a Paschali et mobilium festorum varietate hinc sumitur, quod Nativitatis festum tantum memoriale est, adeoque sufficit ut tempori quo mysterium actum fuit stabilitate recolatur. Pascha autem nostrum memoriale est tempori et circumstantiarum sacramentum, quod scilicet ad Phase et Azyma Judaeorum relatum fuit. Ergo sicut Pascha Hebraeum lunae sequitur varietatem, ita nostrum Pascha et exinde Resurrectionis [illegible] Lunae augmenta [illegible]. Ita Durantus et Lavantus de die Nativitatis Domini ex S. Augustino. idem ibidem; Durant. Durantus

Die post Nativitatem octavo, qui est Kal. Januar. anni exordium, Circumcisio Domini est. Circumcisio autem primo Abrahae mandata deinde [illegible] octavo die recolat iuxta illud Levit. cap. 12. 3. Et die octavo circumcidetur infantulus. Circumcidebatur autem ex mandato Domini praeputium carnis [illegible] et [illegible] non ab aliis quam a Parentibus filii [illegible] scilicet [illegible]. Nam habemus de filio Moysis quod a Matre circumcisus fuerit. Exodi cap. 4. 24 sic legitur: Cumque esset in itinere in diversorio occurrit ei Dominus et volebat occidere eum. Tulit illico Sephora acutissimam petram et circumcidit praeputium filii sui tetigitque pedes eius et ait: Sponsus sanguinum tu mihi es. Et dimisit eum postquam dixerat Sponsus sanguinum [illegible]. Unde [illegible] nonnulli Circumcisionem factam fuisse lapideis cultellis. Hac pena, et proprii cruoris prima [illegible] dem hunc [illegible] nostri [illegible] vocat [illegible] [illegible] Quadragesima [illegible] dem hunc [illegible] hunc [illegible] aliqui [illegible] quod [illegible] Levit; Exod

Et tribus miraculis ornatum diem sanctum colimus Hodie stella Magos duxit ad praesepium; hodie vinum ex aqua factum est ad nuptias Canae Galilaeae, quod fuit initium signorum Jesu; Hodie in Jordane a Joanne Christus baptizari voluit; adde ex S. Salve festa dies, quae vulnera nostra coerces;
Angelus est missus, et est passus in cruce Christus.
Est Adam factus, et eodem tempore lapsus.
Ob meritum decimae cadit Abel fratris ab ense.
Offert Melchisedech, Isaac supponitur aris.
Est decollatus Christi Baptista Joannes.
Est Petrus ereptus, Jacobus sub Herode peremptus.
Corpora Sanctorum cum Christo multa resurgunt.
Latro dulce tamen per Christum suscipit Amen.

cedamus. qui Luna 14a. celebrant; Nos vero in memoriam Dominicæ resurrectionis Dom.a prima post ipsam 14am Lunam proximiorem Æquinoctio Verno.
Quæ Luna æquinoctio Verno proximior fuerit primum mensem Hebræorum, quidem Nisan, nostro Martio partim, et partim nostro Aprili respondens, ut de mensis [illegible] loco diximus. Hoc autem non solummodo in Ecclesia factum est, est Nicænum Concilium, quod decrevit Dominica die post Lunam 14am, non vero ipsa Luna 14a, Pascha celebrandum. Sed et Apostolorum tempore servatum est. Immo Ecclesia errorem Quartadecimanorum tanquam Hæresim damnavit qui quartadecima Luna, unde nomen sortiti sunt, celebrandum Pascha docebant. Et Sanctus Ignatius Martyr, qui Apostolorum contemporaneus et discipulus fuit scribens ad Magnesianos ex Smyrna Epistolam, quæ de undecim in ordine [illegible] ait. Pro sabbatizatione diem festum celebret omnis Christianus Dominicam resurrectionem reginam et eminentissimam omnium dierum, [illegible] [illegible] exponit hoc ad Philippenses [illegible] [illegible]. imperator in huius diei venerationem, unde merito est gratiis insignitus dies iste, [illegible] perpetuo carendus est dignus quoque qui octava sua nobis laetos reddat faciat, et jubilaei septimo die recoluntur. Dominica namque nobis festiva est ob mysterium Dominicae Resurrectionis. Tribus festivis diebus Pascha nostrum complectitur sed prior, qui est Dom.ca celeberrimus est, licet, [illegible] ludum [illegible] die [illegible] ~~[illegible]~~ [illegible] plaudere et convivari licere fuit ipsis quoque Praeconibus Verbi Dei die sancto Paschae tantisper a gravitate, et severitate ministerii deflectere. Quae quidem diebus nostris Dei gratia penitus ablata sunt. Magis quidem indecorum erat quod narrat Durant. in Rational. lib. 6 cap. 86. In quibusdam quoque locis hac die, in aliis in Natali, Praelati cum suis clericis ludunt, vel in claustris, vel in domibus Episcopalibus ita ut etiam descendant ad ludum pilae vel etiam ad choreas et cantus, quod vocatur libertas Decembrica quia antiquitus consuetudo fuit apud Gentiles quod hoc mense servi, pastores et ancillae quadam libertate fruerentur, et cum dominis suis convenirent, et cum eis facerent festa et convivia post collectas messes. Alludit hic Durantus saturnalibus Gentilium. Deinde addit: in quibusque etiam regionibus mulieres secunda die post Pascha verberant maritos suos, die vero tertia mariti uxores suas. Nostrae quoque regionis et civitatis mos est secunda, et tertia die post Pascha ad quaedam campestria templa [illegible] causa (o Vanas) convenire, et reliquias ciborum in sancto die Paschae per manus sacerdotis, ut laudabilis fert consuetudo benedictorum ibi tamen consumere. Verum quod Patrum dudum [illegible] et ante introductum fuerit non [illegible] desideramus. Durantus

Dominica sequens in octava Paschae, quae est prima ex sex quae Pascham consequuntur usque ad Pentecosten, vocatur Dom.ca in albis, cuius nomini natura communis quoque est, [illegible] sabbato, qui pariter in albis nominatur, ex eo quod Catechumeni in sabbato sancto pridie Paschatis baptizati [illegible] [illegible] hoc sabbato deponebant albas vestes. [illegible] in albis, Angeli in resurrectione mulieribus apparuerunt [illegible], [illegible] et [illegible] [illegible] resurrectionis mysteria [illegible] in albis [illegible].

A Paschate die quadragesima celebratur festum Ascensionis Domini nostri et Salvatoris Christi Jesu. Die enim quadragesima postquam victor ab inferis resurrexit, ascendit in cœlum. Et quia Pascha semper die Dominico celebratur, Ascensio in consequens semper celebranda est feria quinta post Dominicam quintam a Paschate, quia ea die quadragesimus dies e Resurrectione venerunt. Solent hoc die aliquibus in locis processiones fieri, quæ repræsentant iter Salvatoris cum discipulis ad montem Oliveti, è quo a ad cœlum ascendit.

Decimo ab Ascensione die, qui est à Paschate Quinquagesimus est nostra Pentecoste; quando Spiritus Sanctus [illegible] in discipulos Domini descendit. Sicuti enim nostrum Pascha cum Paschate Hebræorum non convenit, neque convenit Pentecoste. Et attamen [illegible] habent [illegible] convenientia quæ intercedit inter typum et antitypum. [illegible] [illegible] [illegible] et [illegible] temporibus [illegible] [illegible] [illegible] nostræ quæ à lege [illegible] et [illegible] in cordibus discipulorum hoc die per Spiritus Sancti adventum tanquam [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]. De hoc Spiritus Sancti adventu scribens Sanctus Lucas sic ait Act. Apostol. [illegible] [illegible] [illegible] Pentecostes [illegible] [illegible] [illegible] [illegible] Pentecoste [illegible] et quod eo anno quo [illegible] est [illegible] [illegible], qui immediate a [illegible] celebrandus erat, hoc est Sabbato post Parasceve, ab illo die, qui erat 15 cum Luna, et [illegible] in 16 [illegible] translatum [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] anno [illegible] Pentecoste Hebræorum accidebat in nostra Pentecoste. tracte aliqua omittendo excerpsi: Numa ut in menses annum, ita in dies mensem quemque distribuit, diesque omnes aut festos aut profestos aut intercisos vocavit. Festi Dys dicati sunt. Profesti hominibus ob administrandam rem privatam, publicamque concessi. Intercisi, deorum hominumque communes sunt. Festis insunt sacrificia epulae, ludi feriae. Profestis fasti, comitiales comperendini stati proeliares. Intercisi in se non in alia dividuntur. illorum enim dierum quibusdam horis fas est quibusdam fas non est ius dicere. Nam cum hostia caeditur fari nefas est. inter caesa et porrecta fari licet. rursum cum adoletur non licet. Quae autem de inter festos vel profestos enumerantur sic possumus ostendere. Sacra celebritas est vel cum sacrificia Dys offeruntur vel cum dies divinis epulationibus celebratur vel cum ludi in honorem aguntur Deorum vel cum feriae observantur. Feriarum autem publicarum genera sunt quatuor. Aut enim stativae sunt, aut conceptivae, aut imperativae aut Nundinae et sunt stativae universi populi communes certis et constitutis diebus ac mensibus et in fastis statis observationibus annotatae in quibus praecipue servantur Agonalia Carmentalia Lupercalia. (Quae hic sunt ex Varrone intelligi [illegible] videbunt) Conceptivae sunt quae quotannis a Magistratibus vel sacerdotibus concipiuntur, in dies vel certos vel etiam incertos ut sunt Latinae Paganalia, Sementinae, Compitalia. Imperativae sunt quas consules vel praetores pro arbitrio potestatis indicunt. Nundinae sunt Paganorum, id est rusticorum, quibus conveniunt negotys propriis vel mercibus provisuri. Sunt [illegible] Tarquinium (Cum exemplar mensibus [illegible] particulariis [illegible] [illegible] etiam sibi familiarum [illegible] nos [illegible] et propria [illegible] eorum dies feriando transtulit in nostras [illegible] [illegible] et [illegible] Claudiae aut [illegible] Aemiliae [illegible] Corneliae et si quas ferias proprias quaeque familia ex usu domesticae celebritatis observat. Varro igitur lib 5 de Lingua Latina congerit dies qui vel Deorum causa, vel hominum instituti sunt. Et primi sunt, quos festos Macrobius appellat, secundi quos profestos. Inter festos autem, sequendo anni Romani emendationem, incipiendo scilicet à Januario primum ponit Macrobius Agonalia, quæ quando celebrabantur asserit Ovid. lib. 1 Fast. his vers. Verum quanta Romanorum superstitio in observatione dierum invenerit satis liquet ex nefastorum dierum numero et appellatione. Originem causamque huius appellationis ex Verrio Flacco detegit Gellius lib. 5 cap. 17. Urbe inquit Flaccus a Gallis Senonibus recuperata L. Atilius in senatu verba fecit Q. Sulpicium Trib. militum ad Aliam adversus Gallos pugnaturum rem divinam dimicandi gratia postridie Idus fecisse. Tum exercitum populi Ro. occidione occisum et post diem tertium eius diei urbem praeter Capitolium captam esse. Compluresque alios senatores recordari se dixerunt quoties belli gerendi gratia res divina postridie Kalendas, Nonas, Idus a magistratu populi Rom. facta esset eius belli proximo deinceps proelio rem male gestam esse. Tum senatus eam rem ad Pontifices reiecit, ut ipsi quod videretur statuerent. Pontifices decreverunt nullum his diebus sacrificium recte futurum. Ab hac cede Romanorum ad Aliam flumen nomen duxit dies Aliensis de quo Varro lib. 5 de ling. lat. Aliensis dies ab Alia fluvio dictus. Nam ibi exercitu nostro fugato Galli obsederunt Romam. Sed inerat nostris quoque temporibus consuetudo diem aliquem celebris cladis antonomastico nomine a loco unde parata res appellandi, cuius dies Viennae luctus infausta fuisse, hoc est conflictus in Vienna obsidione a Turcis instructa. De primo Die Mundi

Creator omnium Deus, qui in sua semper aeternitate sibi ipsi aequalis sibique ipsi sufficiens nihil de novo in sua admittens substantia, nihil de veteri unquam dependens, nullius indigebat creaturae administiculo quo fieret beatior, quia nullius expectabat opem qua fieret potior. Volens tamen omnipotentiae suae virtutem in palam deducere et bonitatis thesauros in creaturas communicare, sibi complacuit mundum hunc in tempore condere et creare. Omnia igitur fecit, quae prius non erant, et absolutam nihili ad novitatem essendi admiranda [illegible] traxit providentia. Sed quia divinum omnino erat opus, quod molliebatur, eo ordine, ea harmonia cuncta disposuit, quae par erat tanto opifici. Attributa sua, velut quosdam dotes tamquam divinitatis suae characteres in operibus suis perpetuavit, ut effectum in eorum noscerentur, quod divino studio nasceretur [illegible] sum. Alias namque creaturas omnino spirituales fecit, alias corporeas, alias quae de utrisque participarent. Congruus omnia [illegible] periodis nonnullas ad aeternitatem condidit, caeteras [illegible] temporaneas constituit. Angelos et homines aeterna duratione donavit, [illegible] hoc tamen discrimine, quod illi, quia nullius materiae contagione permixti erant, numquam corruptionis noxam senserunt. Hi, quia et spiritu et corpore [above the line: erant] constantes, cum morte aliquando [illegible] exerciendum [illegible] anima remanente immortali [illegible] qua tandem ad vitam olim revocatae, erunt sine fine victuri. Ergo spiritus toti, qui aeterna nata sunt, interierunt, et quae noverant suae durationis exordium, terminum quoque recognoscunt. Nos, qui tempora examinare statuimus, et dies expendere, tamquam nobiliores mundi huius dies colligimus ortus ipsius et interitus. Sed ne nostrae caducitatis oblivio subrepat, omnibus aliarum creaturarum durationibus, hos dies in vita nostra insigniores explicandos aggredimur, nativitatis scilicet, et mortis et [illegible] [illegible] [illegible] primus universae naturae mundi [illegible] [above the line: deinde] humanae

mane speciei primordia in natali die reparationis in die nuptiarum,
et tandem [illegible] in supremo omnium die interitus
terminus in die [illegible] ~~[illegible]~~ á proposito nostro non
recedentes considerabimus et expendemus. Jam á primis.

In principio creavit Deus cælum et terram. Terra autem
Genesis erat inanis et vacua et tenebræ erant super faciem abyssi, et spiritus
Dei ferebatur super aquas. Dixitque Deus: Fiat lux; et facta est lux
et vidit Deus lucem quod esset bona, et divisit lucem a tenebris.
Appellavitque lucem diem, et tenebras noctem factumque est vespere
et mane dies unus. Hæc est diei omnium primi descriptio quam
Genes. cap. 1. in fronte totius sacræ scripturæ Moyses exstruit. In quo
sermo Dei obscure creaturarum instructionem [illegible] nonnullæ
[illegible] oriuntur difficultates, quæ [illegible] dici [illegible]

Quæstio 1.a An omnia quæ Moyses sub primo die narrat eodem
sint facta. Fundamentum dubitandi est quod [illegible] [illegible]
dicas infra, ut hæc facta dicantur post creationem cæli, et terræ, et aquarum,
et lationem spiritus Dei super aquas, videntur hæc omnia ante primum diem
[illegible] facta dicantur [illegible]. Præterea dicit [illegible] [illegible] ergo

August. lib. Confess. An vero [illegible] erant ubi lumina et [illegible] [illegible] non [illegible] tempori

una ut sine mundus erat conditus, hic ingenuam hanc sententiam atque [illegible]
[illegible] Severi et nonnullorum aliorum ex doctoribus, ut pro sua sententia Pererius
affert in comment. in cap. 1 Gen. lib. 1° cap. 1° [illegible]

Sed contra est fundamentum oppositum dubitandi quod tempus prodit
decerminus, non ergo tempus fuit ante diem. Sed [illegible] eius creationis in sex
diebus facta dicitur unde hexamæron a Patribus vocatur. Si ergo tempus fuit ante
diem, creatio ante ex Deo extitit fuisset existere. [illegible] quia post creationem
cœli empyrei, qui antonomastice nomine cœli dicitur et terræ, quam [illegible]
et alii putant materiam primam, sed [illegible] alii ipsam terram elementum, ut et ma-
teria cum [illegible] et aerem, cætera non creata sed facta dicuntur; Thomas
quia ex illa massa indigesta elementorum, quæ sub cœlo [illegible] erat et [illegible]
omnium ad producendum invitabat et [illegible] cœli inferiorem luminaria
vegetabilia animalia et quæ ad ornatum mundi exercitantur sunt educta
et extracta. Confirmatur ex Scriptura, quia Genes. cap. 2. dicitur: In die quo fecit Genesis
Dominus Deus cœlum et terram. Ergo cœlum et terra non ante diem primum
sed ipso die primo creata sunt et hoc idem repetitur Genes. 2. et [illegible] Genes.
[illegible] fecit Dominus cœlum et terram. Restat ergo dicendum non primo ante sed po-
primo de omnia quæ narravit Moyses esse facta. in ~~[illegible]~~
quomodo facta fuerint, et quomodo salvantur, quæ Pererius opponit ex modo
[illegible] relabitur.

Quæstio 2da Quæ fuerit causa effectiva primi diei. Fundamentum du-
bitandi est, quia tunc sol non erat [illegible] [illegible] die. Deinde si nomi-
ne cœli cœlum empyreum intelligitur, ipsum quia immobile non circumferebatur in gy-
rum ad diei descriptionem, ut per 24 horas nunc primum mobile gyrando describit
diem.

Sed contra est quod dicit Divus Dionysius de divin. Nomin. cap. 4
mensura quoque et numerus est horarum dierum [illegible] labentis temporis lux Dionysius
ipsa est enim ea lux (et si tunc erat informis, quod dicimus Moyses ait) quæ Divin. Nomin.
primam definivit, et definivit dierum nostrorum Trinitatem. [illegible] quibus [illegible]
[illegible]

primò causâ effectivam primo die fuisse lucem a Deo illo die creatam esse.
secundo ipsam fuisse totius labentis temporis mensuram et numerum non ergo ante
diem fuit tempus.

Quaestio 3ª in qua fuerit subiectata haec lux? Supponimus
Scholasticis et ceteris veteris philosophiae [illegible] lucem esse qualitatem
non corpus, ergo est accidens in qua substantia primo lux subiecta
fuit. Deinde quo abijt haec lux, cum in caelo sit collocata et determina-
[illegible] describere incepit.

Ad haec respondet Divus Thomas 1. p. q. 67 a. 4 ad 2. quidam dicunt
lucem illam fuisse quandam nubem lucidam, quae postmodum facto sole in
materiam praeiacentem redijt. Sed istud non est conveniens. Quia Scriptura
in principio Genesis commemorat institutionem naturae, quae postmodum perseve-
rat. Unde non debet dici quod aliquid tunc factum fuerit quod postmodum
esse desierit. Et ideo alij dicunt quod illa nubes lucida adhuc remanet
et est coniuncta soli, ut ab eo discerni non possit. Sed secundum hoc illa
nubes superflua remaneret. Nihil autem est vanum in operibus Dei. Et
ideo alij dicunt quod ex illa nube formatum est corpus solis. Sed hoc etiam dici
non potest si ponatur corpus solis non esse de natura quatuor
elementorum sed esse incorruptibile per naturam. Quia secundum
hoc materia eius non potest esse sub alia forma. Et ideo est dicendum
quod ut Dionysius dicit 4. c. de Div. Nom. quod illa lux fuit lux solis,
sed adhuc informis quantum ad hoc quod iam erat substantia solis et ha-
bebat virtutem illuminativam in communi, sed postmodum data est ei spe-
cialis et determinata virtus ad particulares effectus. Sed audi in hac quaestione à La-
pide in cap. 1 Genesis. Catharinus putat fuisse item lucidissimam; non
enim lux haec sola sed in subiecto et cum subiecto creata est. Verum sol
non primo die uti lux, sed quarto demum die est productus, secundo, Ba-
silius hom. 2 in Hexam. Beda et Nazianz. orat. in nova Dominica

Quaestio 4ta in quo caeli situ haec lux creata fuerit? Et a qua hora sumpserit dies exordium? Dixerunt communiter, et a nemine uno excepto Gerardo Mercatore qui mundum mense Julio mediante conditum, de quo infra suo loco, in dubium revocatur diem primum esse aequinoctialem, adeoque aequales duodecim horas pro luce, duodecim pro nocte fuerant assignandas. Supposito secundo quod praetermissum a Catharino, qui solem in Antipodum emisphaerio et lucem mundi constitutam, a nemine negatur lucem in emisphaerio nostro sive in eo quo primus homo tenere debuerat sedem mane fuisse productam. Siquidem ad regiones varias, variantur emisphaeria, et ortus occasusque siderum, ita ut quod uni facit mane alteri meridiem constituat. Hic ergo

Sententiae tres sunt. Prima asserit lucem factam primo mane. Sed in ordine naturalis diei computandas esse ante eius ortum duodecim horas quae nocti tribuantur in quibus tenebris caelum, et terra fuerunt condita, et spiritus Dei super aquas ferebatur. Ita ut post duodecim horas noctis, a quibus primo creatum est caelum, facta sit lux, quae postea 12 aliis horis existens integrum diei 24 horarum [illegible]. Sic inter haec [illegible] factum est vespere, et mane dies unus. Ubi nota quod primo ponit vesperam pro nocte cuius est initium et [illegible] mane pro die a quo pariter dies initium sumit. Huius sententiae sunt Augustinus Abulensis, et alij quos citat, et sequitur Jamenius? de Pratha? in exord. Psal. 103 vers. 20. Expositi. litter. parag. 2. n. 3. ubi affert verba Abulensis quae haec

Pamelius? de ... natha

sunt [illegible] quod veneranter ponitur ... tempus tenebrarum fuit ante tempus lucis. Ita quod postquam Deus creavit primordialem materiam cum alijs coaequis, incepit esse tempus quod mensurabat durationem rerum corporearum creaturarum, et a creatione ista usque ad lucis creationem transierunt duodecim horae ipsae tantae durationis quanta est in mensibus ... tempore aequinoctiali Veris

Verum vesperæ nomine videtur, ait Pererius, Abulensis ad totam noctis insinuandam; nam etiam litera, et vox hebræa conveniat ibidem in scriptura vesperæ nomen poni ad idem met significandum, quod etiam nunc vesperæ nomine accipimus, scilicet diminutionem diei et tenebrarum accretionem. *Pererius*

Secunda sententia est Pererij, Mendozæ, et aliorum inter modernos, inter veteres autem Basilij, Ambrosij, Chrysost. Augustini, et aliorum, quos pro se citat Pererius qui affert verba Basilij. Ut in ordine creationis prærogativam defert diei ipsius diei finem primo commemorat, qui est vespera, deinde subnectit finem noctis, quod est mane, itaut constet priorem esse diem antiquiorem quam noctem. [illegible] mundi statum, nimirum ante primigeniam lucem creatam non nox dicatur sed tenebræ. Nox enim ea temporis spatio dicta est quæ distinctum se habet, et opposita ad diem quæ quidem diei præcedanea nondum hanc appellationem adepta est. Hæc ex Basilio Pererius. Igitur docent hi Doctores Lucem a summo mane exordium duxisse a qua luce dies primus etiam suum exordium duxit, et tempus quod ante Lucem dicitur præcessisse in creatione cæli, et terræ nulli diei dicunt esse assignandum. Rationem huius asserti affert Mendoza quia de [illegible] statim [illegible] Augustinus [illegible] Basilius et [illegible] concedunt antequam in mundo dies lux nulla esset esse aut intelligi nox, alioquin [illegible] nox [illegible] occupavit [illegible]. Quo enim pacto dicunt [illegible] in animali [illegible] non dari verum somnum et ante [illegible] non dari propriam cæcitatem. *Basilius apud Pererium*

de Mattha

Sed contra hanc sententiam est, quod dicta etiam est supra quod non est dicendum ante primum diem aliquid a Deo esse creatum cum omnia intra sex dies creaverit, et distinxerit, ut docet scriptura.

Tertia sententia mediat inter duas relatas, nec a nocte absoluta incipit diem, nec a luce matutina. Sed ponit circa meridiem primi diei [illegible] esse lucem in [illegible] [illegible] nocte primis, quibus creatum cælum, et terra fuerunt, quibus etiam spiritus super aquas fer-

generatur, dandas esse huic primo diei in quo [illegible] tenebrarum ante lucem quia admittatur nox [illegible]. [illegible] autem horas sequentes [illegible] illum diem artificialem, inclinando scilicet ad vesperam, ad quod primo lux vergebat; ideoque ponitur in scriptura prius vespere quam mane. Deinde noctem sequentem suis duodecim horis redijsse usque mane ad idem punctum quo primum cœlum creatum fuit, quodque fuit initium primi diei, et sic horas 24 absoluisse. Et quamvis primæ horæ sex huius diei cum luce non fuerint, pro ipso tamen sunt computandæ. Primo quia tunc [illegible] tempus quod et dicendum est [illegible] ex sex diebus assignandum esse et non [illegible]. Secundo sicuti si [illegible] duas horas [illegible] pateretur in puncto sui ortus, ita ut videret non duabus horis prolixa [illegible], commutarentur tamen hæ [illegible] quamvis tenebrosæ diei sequenti [illegible] sex horæ primi mundi dandæ sunt potiori parti lucis quæ in his viginti quatuor horis [illegible] teneret. Stant pro hac sententia [illegible] etiam favent Magister [illegible] apud [illegible] qui dicunt primum diem non habuisse mane et auroram. [illegible] lucem, [illegible] tanquam venus cœlum et terram non ante, eo primo die esse creata, de quo superius dixi. Nunc dico verius est primo quasi mane creatum fuisse mundum, tumque fuisse tenebras in orbe et aere quo tempore spiritus Dei ferebatur super aquas ut pat. vers. 2. Deinde paulo post vers. 3. post sex horas ad meridiem (tenebræ enim quæ ac lux occupaverunt et diviserunt primum diem) creatam fuisse lucem in medio cœli [illegible] totius abyssi, [illegible] a medio cœli ad oceanum declinavit effecit vesperam, [illegible] ita ut tam tenebræ quam lux simul iuncta non amplius quam 12 horas durarunt. creata est enim lux perfecta in meridie ut dixi; inde secuta est nox [illegible] 12 horarum cuius terminus est mane. [illegible] enim hic diem et noctem [illegible] vesperi, et mane [illegible] dicat [illegible] diei [illegible] (quod fuit 12 hora

verum) per succedentem vesperam et paruo quoque noctis spatio (quod pariter in tenebris est) per succedens illi mane, completus est dies primus vigintiquatuor horarum. Ita Aegidius Rom. in suo Hexam. cap. 6. Hanc sententiam prae caeteris amplector, quia mihi videtur minoris pauciorisque patere difficultatis, et plures rationes maioraque vitare, et quia sacrae scripturae sensui videtur conformior et verisimilior. Aegid. Rom. quod 2 Sap.

Ex dictis nunc in hac sententia restat colligere quomodo fiat satis ad ea, quae in prima quaestione opponit Pererius. Et primo, quod quamvis haec omnia, scilicet caelum, terra, Spiritus super aquas, dicantur ante lucem facta, non est dicendum facta ante primum diem, quia tempus illud ante lucis eductionem erat pars eius diei, quem postea lux erat deinde perfectura. Secundo quod optime salvatur textus Apostoli, ex invisibilibus visibilia facta asserens; invisibilia n., sive non illuminata, erant primis sex horis, quae postea cuncta sunt visibilia facta sunt, et producto lumine luminoso apparuit opus Dei et sic tempore praecesserunt invisibilia visibilia, et sic etiam tenebrae sine contradictione textus poterant esse super faciem abyssi ante lucem. Sed Divus Augustinus, qui nomine caeli, et terrae materiam primam informem putavit S. August. designatam, pro opinatus fuisse hanc materiam lucem praecessisse non tempore, sed ordine, et natura. Verum contrarium [illegible] videtur textus scripturae, qui tenebras [illegible] esse ante lucem ~~[illegible]~~ tempore, non ordine, et natura ponit.

En igitur totius capitis Corollarium. In principio mundi temporis, dierum, immo ipso primo mane diei omnium primi (qui fulgidum, et potius [illegible]) creavit et ex nihilo produxit Deus caelum, scilicet Empyreum, sedem Beatorum, cum Angelis, et terram in medio centro infimo sitam et cum ipsa caetera ~~[illegible]~~ elementa, et nominatim aquam, quae abyssus dicta est ob immensam profunditatem. Abyssus n. dicitur ad cuius fundum non facile penetrari potest, docente [illegible]. Circa autem mundi [illegible] ex aquis abyssi corpus ~~[illegible]~~ luminosum eduxit quod angelis assistentia occasum versus procedens signavit primo vesperam in nostro Emisphaerio deinde per alium excurrens ad punctum ortus ordiens signavit mane. Et sic factum est vespere, et mane dies unus, [illegible]. Sic

sic nos de operibus Dei ductu quidem Patrum, et Doctorum, sentimus sed qualis illa sit Lux, et unde nobis, Augustini de Civit. Dei lib. 11 cap. 7. et quo alternante motu qualemcumque vesperam, et mane fecerit remotum est à sensibus nostris nec ita ut est, intelligi à nobis potest, quod tamen sine ulla hesitatione credendum est. Heu! fortassis plura, quàm par sit, audet mens nostra ut in Divinitatis thesauros, quos ut lumine regit inaccessibili, ut tenebris obnubit densissimis ultro se immergat, et de ipsis sententiam proferat. Hinc coarguendi nos ipsi sumus illo Augustini tract. 36. in Joan. Et tamen etiam nos homunculi, reptantes infirmi et vix nullius momenti inter homines, audemus tractare ista, et ista exponere et putamus nos aut capere posse quod cogitamus, aut capi quod dicimus.

De secunda die mundi.

Infantiam mundi, et temporum vicissitudines primas illi sex dies quibus creatus distinctus et ornatus est mundus nobis demonstrant atque statuimus mundi prima momenta perpendere, intentum non assequemur nisi totius creationis [illegible]. Primo omnia [illegible] [illegible] nostram. Merito igitur à nobis peculiarem considerationem primi naturæ [illegible] [illegible] singularis [illegible] secernuntur. firmamento cæli sed tamen in aere volare perhibentur. Tandem superiora nomine cæli aeris tantum regionem mediam intelligit ut supra dictum est cum Diuo Augustino. Hæc sunt Pererij præcipua fundamenta. Contra quæ videtur mihi dicendum probabilius primo die factum fuisse non nisi cœlum empireum, et massam elementorum cæteros autem cœlos hoc die factos fuisse, ut patebit in tertia sententia, ubi quomodo intelligenda [illegible] vox hebræa Rakiah et Samaim docetur. Deinde quod etiam contra nimis debile est Luminaria dicuntur posita in firmamento, quæ quidem in nulla aeris regione locata sunt. Quod autem de avibus dicit, quamquam ex aliis versionibus sic legi possit quod volent in firmamento, vel in faciem firmamenti, nostra tamen vulgata ait sub firmamento cæli, sub quo et aues volare et nos quo que videre dicimus. Tandem dicimus aliquando superiora cæli nomine regiones aeris intelligi [illegible] illis locis [illegible] non esse [illegible] sicut pride faciem stare [illegible] aliquid [illegible] firmamentum facit quamadmodum extendere. Insuper aer [illegible] cœlum dicitur, non proprie.

Tertia igitur sententia, quæ nobis verisimilior videtur, et amplectenda, asserit firmamenti nomine cœlos omnes intelligendos esse scilicet cœlum sidereum cum reliquis orbibus cœlestibus tam ipsi propinquis tam inferioribus quam superioribus, usque ad cœlum empyreum quod [illegible] factum creditur prima die, et antonomastice cœlum vocatur, unde etiam [illegible] nomine, ut cum dicitur: Cœlum cœli Domino. Cœli autem vocabulo non negatur venire etiam propter quandam concomitantiam et situs connexionem etiam aer à cœlo in terram expansus, et [illegible] quasi firmamentum [illegible] sicuti sphæra ignis elementaris, si tamen talis ignis datur quod multi negant. Deus [illegible] ex [illegible] quæ supra terram et [illegible] aque [illegible] tanquam ex materia [illegible] [illegible] transmutationem (aqua [illegible] nec [illegible] dura est [illegible] ra, ut ad quamcumque figuram accommodetur) cœlos omnes compaginauit, dixerit [illegible] et tamquam ex [illegible] materia [illegible] ipsos in orbes [illegible] et distendit et ornavit. Tertio quia luminaria dicuntur locata in firmamento cæli, ut supra etiam dictum est; Daniel.
Neque enim in aere, sed in ipso cælo sunt posita.

Quæstio secunda: quæ aquæ sint positæ supra firmamentum. Fundamentum
mentum [illegible] nihil aliud est quam quod supra authores primæ et secundæ sen-
tentiæ attulerunt; primi dicentes firmamentum esse octavam sphæram, per aquas super-
posuerunt nonam, scilicet cælum cristallinum; secundi per firmamentum intelligentes aerem,
aquas superas nubes fecerunt. Sed iam corruunt secundæ [illegible] [illegible]

adeoque nec aquæ [illegible] sunt cælum cristallinum nec vapores aquæ [illegible].

Nunc enim quemadmodum Deus instituerit naturas rerum, secundum scripturas eius nos convenit quærere, non quid in eis, vel ex eis ad miraculum suæ potentiæ velit operari. Ad oppositionem igitur dicendum est

est quod et naturales aquae, et naturaliter sint supra firmamentum. Neque enim uarius Deus per machinam et diuinae omnipotentiae suae tribuere locationem aquarum supra caelos. ~~[illegible]~~ Nonne corpora caelestia secundum meliorem philosophiam sunt solida et sol ignea et tamen non labuntur. Poterat ergo aquas superiores tali induere natura, ut sicut aquae nostrales circa nos sunt naturaliter, ita illae circa caelos naturaliter essent; quae quidem at tenuatae sunt; et subtiles, et secundum aliquos alterius speciei quam nostrae. Si dicas aquas ~~[illegible]~~ corpora caelestia non ~~[illegible]~~ ferri quamuis solida, quia a Deo talem naturam sortiuntur ut ~~[illegible]~~ corpora caeli, sed in caelo tamquam in naturali loco quiescant; hoc idem dico ego de aquis supra firmamentum et caelos. Sic enim ait Augustinus lib 26 contra Faustum cap 3. unicuique rei est naturale quod ille fecerit a quo est omnis modus, numerus et ordo naturae. Sed audi alio loco nempe lib 11 de ciuit Dei cap 24 eundem Augustinum contra istos ut ipse uocat elementorum trutinatores disserentem qui quomodo in caelo aquae locentur admirantur, et negant pondera aquarum attendentes uel spirituales aquas ibi exponunt. Sed hi quia nomine aquarum quae super caelos sunt angelos intelligi uolunt, ponderibus elementorum mouentur, et ideo non putant aquarum fluidam grauemque naturam in superioribus mundi locis potuisse constitui; qui secundum rationes suas si ipsi hominem facere possent non ei, utique quod graece φλέγμα dicitur, et tanquam in elementis corporis aquarum uicem obtinet, in capite ponerent. Ibi enim sedes est phlegmatis secundum Dei opus utique aptissime, secundum istorum autem coniecturas tam absurde ut si hoc nesciremus et in hoc libro similiter conscriptum esset quod Deus humorem humidum et frigidum ac per hoc grauem in superiore omnibus ceteris humani corporis parte posuerit, isti trutinatores elementorum nequaquam cre-

Quaestio tertia Ad quid aquae supra firmamentum positae fuerunt
Non possum in hac quaestione felicius, et uberius tibi satisfacere, quam utendo
verbis P. Cornelij a Lapide viri eruditionis copiam, et brevitatem in unum mirabili-
ter componentis. Sic igitur ait: Respond. primo Procop. et Theodor. has aquas

Neque alias prohibet, ut de aquis factum esse credatur, qui enim cristallini lapidis quanta firmitas, cuius sit perspicuitas ac puritas, novimus quem de aquarum concretione factum est procreatum, quid obstat, cur quos idem dispositor naturarum in firmamentum cæli substantia solidaret aquarum? Hanc quoque confirmat Beda (ut Pererius) verbis B. Petri commemoratis à B. Clemente li. 2 Recognitionum, quibus docet totum interius mundi spatium intra ipsius cœli ambitum reclusum, fuisse ab initio plenum aquis, aqua vero quæ erat in medio illo spatio quasi gelu conglaciata, et concreta et modo cristalli solidata, fecit Firmamentum quod Deus cœlum appellavit. ii Beda. Cap VIIII

D. Sexta die mundi

Dicet chronista Moses tribus quibus opus huius mundi conditorem distinguit, scilicet in gradu creationis, distinctionis, et ornatus. In primo creationis quicquid creandum erat absoluit; non enim Deus post cælum, et elementorum massam indigestam, sex recte nomine [illegible] aliquid à nihilo traxit, sed ex illa materia cætera posteriora produxit, ac efformavit. In secundo autem gradu distinctionis rem à re distinguit, ac [illegible] sedibus, quod [illegible] tribus diebus fuit [illegible]. Tum [illegible] die primum dividit lucem à tenebris dividit aquas superiores ab inferioribus medio firmamento et [illegible] aquas [illegible] et [illegible] superiorem adunat hoc tertia die, quam Moses ita perpetuo describit [illegible]

D. Thomas

Deus

Dixit vero Deus: Congregentur aquæ quæ sub cœlo sunt in locum unum et appa-
reat arida. Et factum est ita. Et vocavit Deus aridam terram, congregationesque aqua-
rum appellavit maria. Et vidit Deus quod esset bonum. Et ait: germinet terra her-
bam virentem, et facientem semen, et lignum pomiferum faciens fructum iuxta ge-
nus suum, cuius semen in semetipso sit super terram. Et factum est ita. Et protulit
terra herbam virentem et facientem semen iuxta genus suum et habens
[illegible] secundum speciem suam, et vidit [illegible]
Et factum est vespere et mane dies tertius. Duo in his verbis distinguenda
sunt: congregatio aquarum ab arida, hoc est terra, et productio plantarum, her-
barum &c. Et circa primum duplex oritur quæstio. 1a quomodo aqua, quæ undique
terram operiebat, potuerit ita in unum locum redigi, ut tantum terræ spatium ap-
pareret. 2a Quomodo intelligendum sit aquas in unum locum congregatas esse,
quæ tot in maribus, fluviis, lacubus, paludibus &c. continentur.

Quæstio 1a Quomodo aqua in unum locum redacta sit, ut terra
appareret. Imprimis dubitandum est si aqua terram totam operiebat, ita
ut propter aquarum circumoperimentum diceretur inanis, et invisibilis, ut
supra dictum est, maior terra erat. Semper enim continens maius est suo con-
tento. Si autem maior erat, quomodo adeo contracta est, ut aridæ et terræ tan-
tum spatium daret.

[illegible] Thomas [illegible] amplectentur tres
responsiones ad quæstionem propositam secundum tres nobiliores hac in re senten-
tias. Sic ait: Uno modo ut aquæ in maiorem altitudinem sint elevatæ in
[illegible]
[illegible] secundo ut dicatur quod rarum aquæ ve-
lut nebula [illegible] Tertio modo ut dicatur
[illegible] concavas [illegible] aquæ re-
ciperentur. Inter quas prima videtur probabilior. Hæc Divus Thomas, quas re-
sponsiones ex S. Augustino de Genes. ad lit. lib. 1 cap. 12 excerpsit. Verum
quæ Angelico visa est probabilior, non est visa Augustino, qui ibidem [illegible]

Numquid nam in altum congregatae sunt, sicut fit cum [illegible] ventilantur in area messis terra [illegible] et congesta in aggerem nudat locum quem desuper contegerat? Quis hoc dixerit cum videat amplos maris aequaliter fluctus, qui etiam cum aquae fluctuantes quasi veluti montes eriguntur, [illegible] tranquillitatibus complanantur. Sed perpendendae sunt enucleatius opiniones à Divo Thoma relatae et praecipuè prima. August. de Gen. ad lit.

Opinantur igitur aquam multo esse terra altiorem, ideoque Dei praecepto teneri, ne terras humiliores loci obrueret. Pro qua assertione congerunt aliquos scripturae textus. Ut illud Psal. 103 Super montes stabunt aquae et Psal. 32 Congregans sicut in utre aquas maris [illegible] ut legit [illegible] Congregans sicut tumulum sive acervum aquas maris. Et Psal. 58 [illegible] in [illegible] turbines maris. Et Ecclesiastici 39. In verbo eius stetit aqua sicut congeries. Et super omnibus illud Job 38, quo ostenditur Dei praeceptum compescens mare, et intra littora continens. Quis conclusit ostiis mare quando erumpebat quasi de vulva procedens? Circumdedi illud terminis meis, et posui vectem et ostia, et dixi Usque huc venies et non procedes amplius et hic confringes tumentes fluctus tuos. Deinde afferunt ex [illegible] [illegible] [illegible] [illegible] in Aegypto tentatum [illegible] mari rubro [illegible] Aegypti, et Darius Persarum Rex coniungere ad mari Aegyptiaco conati sunt. [illegible] inquit [illegible] non tentarunt nisi [illegible] altius esse terra [illegible] [illegible]. [illegible] Nilum [illegible] mari rubro coniungere volentes ab incepto destiterunt mari rubro altiore terra invento ut scribit Plinius lib. 6 c. 29 et causam affert [illegible] [illegible] [illegible] [illegible] non [illegible] [illegible] omnino mari sed [illegible] timorem. Strabo docet quod [illegible] [illegible] Ptolomaei opus [illegible] à [illegible] primo [illegible] [illegible] ut [illegible] in [illegible] mare navigarent, ac [illegible] [illegible] [illegible] lib. 17. Ex quibus manifestum [illegible] [illegible] [illegible] [illegible]. Ad authoritates ante

autem scripturæ sic respondere potest. Ad 1um quod [illegible] montes stabant aquæ, stabant, vel steterunt legendum erat, sed sequendo phrasim hebræam, quæ aliquando utitur futuro pro præterito, ut notant interpretes, translatum est in futuro stabunt. Sic in [illegible] status terræ et aquarum in primo hebdo creationis, quia tunc terra tota [illegible] et circumdabatur aquis, et per consequens stabant super loca montium.

Manifeste autem ex his quæ præcedunt, et his quæ sequuntur in Psal. colligitur loqui de operibus creationis. Nam dicitur de terra: Abyssus sicut vestimentum amictus ejus, super montes stabunt aquæ, ab increpatione tua fugient. Quasi diceret: Aquæ quæ terram undique tegunt et cælum [illegible] ab [illegible] [illegible] [illegible] [illegible] Domini dicentis congregentur aquæ &c. [illegible] fugient et ad loca statuta descendent. Hæc [illegible] [illegible] scripturæ [illegible] interpretatio [illegible] aliter non [illegible].

Ad illud vero [illegible] 32 congregans sicut in utre aquas maris, nobis admodum favet nostra versio latina, quidquid pro se afferant lectionem hebræam adversarii, nam innuit Psaltes Deum aquarum molem in unum locum congregasse, non secus ac aliquis in parvo utre [illegible] [illegible] [illegible]. et voluit [illegible] utre aquam ut similitudinem [illegible] [illegible] aquis [illegible] [illegible] [illegible] [illegible] [illegible] in [illegible] [illegible] [illegible] non [illegible] [illegible] aquæ. Ponens in thesauris, scilicat in cavernis et [illegible] terræ quæ sunt [illegible] aquarum [illegible] [illegible] [illegible] thesauri abyssos. Ad illud autem Psal. 68 [illegible] in altitudinem maris dicendum est ibi [illegible] maris profunditatem [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] me de profundis aquarum non me demergat tempestas aquæ, neque absorbeat me profundum. [illegible] [illegible] [illegible] In medio [illegible] [illegible] [illegible] vel congeries [illegible] [illegible] est [illegible] [illegible] omnem aquam sicut stat congeries quæ non cadit non [illegible] ad instar et ad figuram congeriei [illegible], ut innuit [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] in [illegible] [illegible] vel [illegible] [illegible] [illegible] steterunt [illegible] hinc inde aquæ. Ad illud tandem Job [illegible] [illegible] [illegible] dicendum est ibi nullo modo innui aquas altiores terra esse [illegible] [illegible] Deus [illegible] mare, et aquas in humilioribus locis ad quorum [illegible] [illegible] arenas vel [illegible] vel montes locavit ut essent maris terminus. Et hoc est præceptum quod [illegible] [illegible] enim [illegible]
eius.

servet statuit ac universæ naturæ regimen servandum, legis, et præcepti nomine in scriptura solet appellari.

Sed propter evacuationem argumentorum oppositorum videndum est quid positive suadeat asserere mare, et aquas non esse terra altiores, ut Caietanus, et communiter Cosmographi, Astronomi docent. 1º quia in hac dubitatione nil satius facit quam ipse sensus. Omnia flumina intrant in mare, ait Ecclesiastes, ergo terra est propius. si a terra per quam excurrunt flumina, esset humilius mare, cum ipsa aqua sit gravis et fluida in humiliori loco consisteret et ibi se aperiret. 2do quia nautæ a terra discedentes maiorem resistentiam in accedendo experirentur, nam contra gravitatem naturalem in altum, et sublime efferri deberent. 3tio non obscure favet scriptura. Psal. 23 loquendo de terra dicit: Quia ipse super maria fundavit eam. Et Psal. 106 Qui descendunt mare in navibus et Psal. 135 Qui firmavit terram super aquas. ita Pererius, et a Lapide

Jacobus Burgensis singularem sententiam excogitavit omnibus tamen improbabiliorem. Asserit autem a principio aquam ita terram circumsedisse ut cum ea ipsa terra centrum haberet commune, essetque terræ sicuti cætera elementa et sphæras concentrica. centrum enim terræ centrum universi est. Sed hac die a terra segregata obtinuisse novum centrum a terra seiunctum et diversum, factaque fuisse a terra eccentrica Lunæ autem concentrica, ut idem sit centrum globi aquæ sit centrum quoque ipsius Lunæ Planetæ, a qua provenit [illegible] a [illegible] habent [illegible] propriis [illegible] et in cuiusque aqua centro. Sinu aquæ globus maioris ambitus fuit quam terræ. Hanc suam sententiam Burgensis, et fundamenta eius omnium late explicat in additionibus ad Postillam Lyrani in cap. 1 Geneseos, ubi figuris et ratiocinationibus mathematicis conatur aspectui eam ostendere et probare, quæ per otium, si libet, videri possunt.

Burgensis

Verum quantum a veritate discedat ex his quæ admissa mea sententia suppetebant et ex nunc dicendis patebit. Matthias Thoringus acerrimus Burgensis insectator in replicis ad additiones Burg. hæc urget, quæ

que sequerentur ex sententia (ingallata Brunu, sunt verba Thoringi) quia
Thoringus secundum illa aer et ignis perverent necessario elementa eccentrica. Ver-
gentem enim aque necesse est aerem egredi, cui non haceat in sua sphe-
ra soliditatem resistendi et idem arguit de sphera ignis. secundo, quia in
ordo elementorum a prima creatione institutus, et inclinatio naturalis ad
centrum universi omnibus elementis indita, secundum B. Augustinum, et ipse-
met Burg. ubi cessavent, quod est contra Burg. et suum magistrum san-
ctum Thomam qui ideo reputat inconveniens lucem prima die factam
ille facto quarto die redysse in preiacentem materiam, quasi in prima
rerum productione aliquid fuerit productum satis ubi e incompendia, ut pa-
tet 1. p. q. 67. a. art. 4. ad 2. Tertio quia sic invertetur natura aque corrupta.
Proprijs enim carentibus et naturalibus inclinationibus immutatis necesse est
naturam immutari. cessante enim inclinatione ordine... ad centrum universi
iam cessaret esse gravis, cessante gravitate cessaret esse frigida, et humida,
et per consequens cessaret esse aqua. Propterea nec et alia multa imaginatio
sua non videtur recte stare. sed et mirum est, quod nullus philosophorum qui
de natura rerum et earum connexione multa conscripserunt huiusmodi eccen-
tricitatem videre non potuerunt quia de huiusmodi nihil scripto reliquer-
unt. Hec et alia multa omnino Thoringus.

Sed dicendum est unum esse tantum globum aque et terre, quem
terraqueum dicimus. et aquam longe esse terra minorem. Primum pro-
batur primo quia unicum esse centrum aque et terre patet in eo quod tam
aque gutta quam terre particula decursu cadentes ad eundem tendunt locum
et centrum quod ambobus sit commune. secundo patet in eclipsibus lune
qui umbra terre in cuspide se terminans fiunt. si n duo essent globi aque
scilicet et terre quamvis per mediam terre partem excurreret aqua, ut
vult Burgensis, adhuc tanta remaneret omnino a globo terre separata ut
propriam umbram faceret, esset non secus ac dicimus facere terram, ea cum
quam umbra illius glob. aque dispartita sit in eclipsi lunari non ergo datur
Tertio

Tertio, quia cernimus hinc inde per mare insulas, et tractus ingentes terre extentos, qui simul iuvant unum cum ipsa terra aqua globum facere. Quod autem aqua sit minor et humilior terra docent, probarunt Julius Scaliger in opere ex Africano exercitatione citato a Severino, et Lapide, exercitatione 38 contra Cardanum et Alexander Piccolomineus in lib de magnitudine terre et aque. et praeter ea que in hoc lib. scripsit tetigit etiam aliqua in lib 2 de sphera cap 15 que sunt huiusmodi. Sciendum est aquam a sua gravitate ferri ad humilia que petit, et quia iam probatum est supra non distingui centrum aque a centro terre, quod est centrum universi, dicendum est aquam quoque illuc tendere pro sua gravitatem. Cum autem aqua fluida sit et mollis, facile se sinibus quibuscunque accommodat, servans semper planitiem in superficie, ut patet considerantibus scopulum sub aqua supra quem aqua non se extollit, sed se scopulo accommodando, sed undique orientis in plano supernatat. Cum igitur terra multis inequalitatibus et concavitatibus plena sit (non n est globus omnino perfecte sphericus, quia ascendunt montes et descendunt campi) aqua hisce inequalitatibus se accommodans, eas replendo aliorum terre partes animalibus habitandas relinquit. Hinc vides aquam propinquiorem esse centro universi quam terre superficies, si n est communis, imaginare a centro communi tres ducas lineas unam ad superficiem terre aquis tectae, alteram ad aquarum superficiem, tertiam ad superficiem terre ariae et aquis non circumdatae, ultima ipse quidem omnibus maior esset. Attamen inequalitatis universitas aliam non adeo excedunt, ut comparata terre semidiametro ullius notabilis appareret. Nam experimento Bolidis, vulgo lo scandaglio, et rationibus compertum est maris profunditatem vix unam ex viginti mille partibus semidiametri terre importare. Ergo ex his omnibus et humiliorem esse terra aquam, quia ei universi centro esse eius superficies et minorem esse, quia vix vigesimam millesimam partem semidiametri terre in maiori sua altitudine importat. et quamvis in superficie sit amplior non tamen est maior, nec altior

Ad propositam ergo quaestionem redeundo quomodo scilicet aquae, quae totam terram tegebant potuerint ita subtrahi ut tantam relinquerent terrae nudae superficiem, dicendum est primo terram iussu Dei in montes, colles aliosque eminentiores locos hac die surrexisse, et hinc in convallibus, et planis locis sedes aquarum esse factas, quippe ingentes sinus et cavernas in sinu suo quaesivit, intra quas aquae veluti in receptaculo conderentur. absorpti fluvii. Accidit autem hoc in multis locis terrae, ut Peloponnesi plurima talia circa Arcadiam sunt. Hinc errant, qui post diluvium huiusmodi meatus apertos, et voragines extractas fuisse opinantur. Siccandum est secundo habuisse quidem aquam suam [illegible] [illegible] [illegible]. Maiorem autem hoc die [illegible] fuisse [illegible] aquae [illegible], quae mare vocatur. Aqua [illegible] fluminum, fontium, quam dulcem dicimus, in sua naturali [illegible] consistit. Maris vero densior est facta ut minori loco se [illegible]. Patet [illegible] aqua maris crassior esse, quam in [illegible] [illegible] [illegible] [illegible] exhalationes [illegible] et adustae quibus etiam ma-
re fit salsum. Hoc conveniebat ne aqua computresceret, ut pisces commodius ale-
rent, et naves [illegible] veherent. Non audiendi sunt, qui salsedinem maris non
ab huiusmodi exhalationibus, sed a radiis solis provenire dicunt, quibus fundus
maris [illegible], quia salsedinem a [illegible] [illegible] observandum est. Quomodo in

radios solis in mare non [illegible]. Mare autem multis in locis quingentis imo
et mille cubitis est profundum. Ita a Lapide. Dici etiam potest tertio, quod
ex [illegible] [illegible] [illegible], aquam maiorem quidem terra in ampli- [illegible]
tudine fuisse, non tamen in profunditate. [illegible] enim est Deum tantam
aquae copiam produxisse, ut [illegible] creaturis, quae ex aqua facienda erant, et [illegible]

gregatis quot sibi videtur supra celos que remanerent commode locari possent in sinus terrae quos hunc negotio disponebat. Commentariam hanc ait Pererius capere licet ex aere, qui eodem modo mansit ac fuit creatus, cuius tamen altitudo a terra ad extremum tertiae regionis non implet sexaginta milliaria, ut probant mathematici, tum ex ratione crepusculorum, tum ex altitudine apparentium in suprema regione aeris, cum tamen altitudo terrae a centro ad circumferentiam, qui est semidiameter eius, continet 3500 milliaria. Nullo enim aqua tantum descendit, sed incomparabiliter minus. Igitur ex cavitatibus terrae, ex aquarum maiori densatione et ex sparsu minori copia quam terrae, habitque modo quamvis totam terram iam tegerent, in unum locum aquae potuerint reduci.

Pererius

Questio 2a. Quomodo intelligendum sit aquas in unum locum esse congregatas. Fundamentum dubitandi est quia non in uno loco aquae congregantur, aliae enim in lacubus, aliae in paludibus, aliae in mari. Et mare quidem non unum est, sed plura, et quidem seiuncta, ut Caspium.

Ad questionem propositam facilis, et multiplex patet responsio. In unum locum non unitate positionis, sed unitate distinctionis, scilicet quod aquae sint in locis ab aiia distinctis, neque sint communes aquae, et terrae, sumptae secundum totam suam amplitudinem. In unum locum scilicet quoad maiorem sui partem sit aqua in unum locum, quod est mare, quod est propria aquarum congregatio, nam dicitur congregationes aquarum appellata esse maria. Ex quibus verbis vides maris non innui singulariter unitatem loci, sed pluraliter loca, sed quia de elemento in suis partibus homogeneo loquendum erat, ideo dicitur in locum unum scilicet in sedem propriam. Sicut aer esse in suo loco dicitur, et quidem uno quamvis a suis regionibus separatus aliquando secundum aliquas partem vel in antris terrae delitescat, vel in hominum animantiumque habitationibus versatur. In unum locum scilicet in mari, ad quod tandem omnes aquae tendunt. Omnia flumina ait Ecclesiastes cap. 1. 7 intrant in mare et mare non redundat, ad locum unde exeunt flumina revertuntur, ut iterum fluant. Quamvis autem multa maria dicantur, hoc factum est populorum commodo, et usu; ceterum unum aliis adhaeret

Quæstio 1.a An terra receperit tantū uirtutem germinandi uel actu germinauerit, et hoc actiuè ne, an passiuè. Fundamentū pro prima parte quæstionis dubitandi est illud Genesis 2. 5. fecit Dominus &c. omne uirgul[tum] Sanct.

Quem locū asserens Diuus Augustinus lib. 5. de Genesi ad litt. cap. 4., asserit [illegible] ex hoc [illegible] [illegible] tantū uirtutem ut [illegible] [illegible] germinaret. Sic in cap. 5. Verum communiter opinio Diui Augustini non recipitur. Videtur enim [illegible] clare innuere textus actualem productionem herbarū &c. hac tertia die per uerbum illud, quod statim imperio Dei iubentis productio=nem sequitur: Et produxit terra &c. Quod autem affertur de 2 cap. Genesis in eo sensu intelligendum est, facta esse uirgulta et herbas ante=

quam oriantur in terra modo speciali. Nam DD. communiter docent si-
cuti hominem et cetera animantia, ita etiam et plantas in suo exordio
in statu perfecto esse factas, et hoc est prius quam naturali et commu-
ni modo, et viam scilicet propagationis et seminis oriantur in terra.
[illegible] 1. p. q. 69. a. 2. in c. Antequam germinarent, id est
antequam ex [illegible] multa procederent, sicut nunc naturaliter fieri

producte perfecte species plantarum, ex quibus semina aliarum oriuntur,
nec refert ubicumque habeant vim seminativam, utrum scilicet in radice

S. Thomas

Caiet. apud Serenium

Nota autem quod dicitur de plantarum productione idem proportio naliter dici de ceteris animantibus, quae de aliquo elemento [illegible] [illegible] Prima n. productio admodum a ceteris posterioribus [illegible] speciei differebat, quod quidem [illegible] [illegible] sententia Angelici. Idem quoque dicendum est de [illegible] mineralibus metallis &c quae intra terram generata [illegible] cum dic [illegible] esse [illegible], sicut et marmora lapides imo et ventos qui a cavernis terrae [illegible]. Hodie quoque Paradisus [illegible] factus est. — Augustin. apud Pererium

Quaestio 2a. Utrum terra tunc produxerit spinas et herbas noxias, ut cicuta &c. Fundamentum dubitandi est, quia haec [illegible] videntur ad maledictionem quae per peccatum Adami contracta est. Unde dicitur ad Adam de terra Genes. 3. 18. spinas et tribulos germinabit tibi. Fuerunt quidem Doctores nonnulli inter [illegible] huius sententiae ut Beda, Rabanus, Alcuinus, negantes ante hominis lapsum nihil noxii produxisse terram, et spinas quoque non ad [illegible] primo, sed post peccatum orta esse voluit Basilius et Ambros.

Verum opposita vera est, quam omnes tenent. Et sicut Thomas 1. p. q. [illegible] a. 2. ad 2. expresse docet, et fundamento dubitandi respondet, cum ait: ante illam maledictionem spinae et tribuli producti erant [illegible] non erant producti homini in poenam. Quam doctrinam hausit ab Augustino l. 3. cap. 18 de Genes. ad lit. qui ait: Prius tamen non homini, post autem homini, ut hoc [illegible] quod dictum est tibi, quia non est dictum spinas et tribulos pariet, sed pariet tibi, [illegible] ut tibi iam ista nasci incipiant ad laborem, quae ad pastum tantummodo alijs animalibus antea nascebantur. Ex cuius ultimis verbis habes quid sentiendum sit de venenatis herbis et plantis. Quae enim homini nociva sunt, post peccatum sunt [illegible] quae tamen [illegible] alijs animantibus sunt in salutem [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] singularem [illegible] cicuta [illegible] [illegible] homini [illegible] venenum

Adde haec condita esse ad ornatum, et perfectionem universi: sunt enim, teste Aristotele [illegible], [illegible] [illegible] sunt [illegible] [illegible] sine [illegible] [illegible] [illegible]. Pererius — Thomas — August. de Genes. ad lit.

contextus erat admodum corruptus, et intercisus.

Quaestio 3tia Quare multiplicatio plantarum non benedicatur sicut animalium, quibus dixit: crescite et multiplicamini.

Rupertus apud Pererium

Rupertus lib. 1 de Trinit. et operib. eius cap. 37 relatus a Pererio quaestionem hanc enucleatius resolvit. Herbas, inquit, virentes sive lignum pomiferum eadem terra, quae germinat vel protulit, multiplicat et semen illis ipsa comportat et cadentia recipit etiamsi serentis manus forte desit, et ideo multiplicandi potentiam solum, in quo sunt ipsa, suffecit. Verum reptilibus sive volatilibus si nullus fuisset appetitus, non crescerent aut multiplicarentur et non stetisset eorum genus. Ut ergo instinctum existendi acciperent, ornavit eum omnem creaturam in genere naturaliter ipsis medullitus insitum amorem vel appetitum, ut masculus ardens ad semen ingerendum, femina nihilominus avida foret ad recipiendum. Hoc illis benedictio contulit et ob hoc necessaria fuit. Nam inde reptilia creverunt et multiplicata sunt, et repleverunt aquas maris avesque multiplicatae sunt super terram. Ac hoc inter haec animantia vinculo amoris magna huius benedictionis vis est. Hactenus ex Ruperto.

Collige igitur in tertio capiti et huius tertiae diei Corollarium: Terra per suas inaequalitates et voragines dedit locum aquae, quae cum minus terra sit per maiorem densitatem facta sit, ... et aqua quia fluida humiliori se accomodat, et in locum unum, quod est mare tamquam aquae propria sede se sistit. Terra autem sic ab aqua distincta ~~…~~ acta germinavit et ... plantas herbas arbores metallaque in statu ... unde videtur hac prima productione tantum passive se habuisse tamquam materialem causam, ceterum in futuris productionibus etiam active producta. Dedit autem etiam ante hoc tempus spinas, et tribulos, et herbas venenatas, quae non evaserunt homini noxiae nisi post culpam. Benedictionem vero multiplicationis plantae non requirunt, quia terra ipsas multiplicat ... quoquo modo semine. Animalia autem non indigerent nisi ... multiplicatio

Nunc autem sub hoc die sic scribit: Deus hoc die quarto [illegible] [illegible] [illegible] [illegible] et condensaret aliam sub et lucidam illam quæ primo die creata est, et dicta est lux, [illegible], in eam ita condensatam expulsa [illegible] forma novam formam solis, lunæ et stellarum induxit. [illegible] modo ex [illegible] [illegible] [illegible] fuit formatus. Errant ergo veteres [illegible] stellas [illegible] ex igne productas esse easque igneas; unde Poeta

Errant et illi qui astra secundum substantiam producta esse censent primo die, hoc vero die quarto tantum accidentibus [illegible] lucis [illegible] [illegible] virtute influendi in hæc inferiora dotata esse. [illegible] [illegible] sententiæ, quas [illegible] [illegible] [illegible] libere subscribo. Quapropter alias [illegible] [illegible], et quæstioni propositæ existimo iam factum satis.

Quæstio secunda. An Luminaria cæli sint animata. Efferbuit [illegible] inter antiquos [illegible] [illegible] de animabus solis et stellarum, quæ etiam inter catholicos Doctores acta est. Anaxagoras qui ad inspiciendos cælos, solem, et lunam se natum dicebat, teste Augustino lib. [illegible] de civit. Dei [illegible] [illegible] est [illegible] [illegible] solem esse dixit lapidem ardentem, unde Atheniensium indignationem incurrit. [illegible] et nullam animam [illegible] quorundam offendit. [illegible] scilicet cœlos et astra animata esse versabant Pythagorici Platonici quorum princeps Plato in ~~[illegible]~~ Epinomide iubet ut Deos colere. Aristoteles etiam lib. 2 de cœlo. text. 13 ait Cœlum autem animatum est, et habet motus principium. Aristoteles lib. de cœlo
Hoc idem sensit Philo et Avicenna, qui teste Pererio putavit cœlos donatos esse sensu interiori seu anima sentiente, et phantasia; quæ opinio non videtur displicuisse Simplicio non modo interiorum sensuum sed aliquorum etiam sensuum exteriorum cœlo assignanti. Hic enim in comment. super text. 50 lib. 1 de cœlo præter gustum et olfactum alios [illegible] sensus addidit, et tactum in cœlo esse a [illegible]. Hæc verba recitat Pererius in Comment. super Genes. lib. 2. de cœlis et astris quæst. 7 n° num. 26. Fuisse propterea mentis videtur fuisse Simplicius apud Pererium

Lucentemque globum Lunæ, Titaniaque astra

Mens agitat molem et magno se corpore miscet.

Nec defuerunt inter Ecclesiasticos scriptores qui sententiam hanc sustinerent. Origenes stellas putavit esse animatas et [illegible] [illegible] et [illegible] capaces. Job enim c. 25 5 dicitur [illegible] [illegible] non sunt munda in conspectu eius. Quanto magis homo putredo et [illegible] [illegible] Christum non tantum pro hominibus sed et pro astris [illegible] [illegible] mortuum esse. [illegible] Origenes apud Pererium lib.
Hoc est [illegible] [illegible] [illegible] S. Augustinus teste Cajetano apud Pererium astra [illegible] animata. [illegible] lib. 2 [illegible] [illegible] [illegible] si astra [illegible], non sunt animata id credimus [illegible] potius quam demonstrabile. Cajetanus [illegible] [illegible] [illegible]. Qui [illegible] [illegible] [illegible] intelligentias [illegible] [illegible] [illegible] [illegible] [illegible] cœlos [illegible] [illegible]. Ubi [illegible] [illegible] cœlorum [illegible] [illegible] intelligit. Si [illegible] [illegible] Angeli moverent cœlos [illegible] [illegible] [illegible], sed addendo [illegible] [illegible] Augustinus apud Pererium

aliud ab Angelis in ipsis coelis notatur. quod est anima [illegible] nomine significatum. Verum Caietani fundamenta, quod concludunt scriptura enim sic explicata, contrarium patet quia [illegible]. Nam [illegible] in intellectu est dicere [illegible], [illegible] ingenio [illegible] fuerit. Caeterum autem Virtutes per ministerium [illegible] et ab aliis caeteris [illegible] per ministerium distinguit [illegible] ab Archangelis [illegible], [illegible] nomen et officium non naturae [illegible] nec dignitate [illegible] et Thronos, et Dominationes. [illegible] omnes sunt administratorii spiritus.

Augustinus in hac quaestione in ambiguo manere [illegible] vult. In Enchirid. cap. 58 loquendo de Angelis et spiritibus, addit: Sed nec illud quidem certum habeo, utrum ad eandem societatem pertineant sol, luna et cuncta sidera, quamvis nonnullis lucida esse corpora non cum sensu vel intelligentia videantur. Et lib. 2 de Genesi ad litt. cap. 18 de hac re scribit: nihil temere de re obscura temere debemus.

August. in Enchirido.

Idem de Genesi ad litt.

Verum opposita sententia asserens coelos et coeli luminaria non esse animata longe probabilior est et scripturae divinae magis consona, quam multi Philosophi et Patres olim docuere et quam fere omnes moderni Doctores amplectuntur et nos [illegible] sic senserunt Basilius, Ambrosius, Cyrillus qui dogma Platonis [illegible] Christianus sed et philosophis [illegible] Damascenus, Lactantius, Divus Hieronymus qui inter errores [illegible] etiam hunc recenset in Epist. 59 ad Avitum. gelio sublatis inutiles ac vane invenirent angelis sensus de ratione non esse perspicuum est. Sed placet quaestionem hanc solvere ex Angelica doctrina Sancti Thomae 1 p. q. 70 a. 3 in c. ubi postquam ostendit animam a[d]venire et uniri [corpori] propter animam et non e contra, quia anima indiget corpore ad operationes suas exequendas sive nutritivas ~~[illegible]~~ cantando conservando sive sensitivas agendo per organa corporea sive rationalis agendo mediis phantasmatibus dependentibus quorum ab organis corporeis deducit naturam istarum animarum [illegible] venire coelestis corpori, quia inter ~~[illegible]~~ operationes animarum nulla competere potest nisi intelligere et movere. Intelligere autem ut fiat mediis phantasmatibus non habet anima [illegible] ut dictum est in corporibus coelestibus non convenit. Unde neque propter intellectum anima intellectiva ~~[illegible]~~ indiget. Relinquitur ergo sicut dicta D. Thomae quod propter solam motionem. Ad hoc autem quod moveat S. Thomas non oportet quod uniatur ei ut forma sed per contactum virtutis sicut motor unitur mobili. Deinde prosequitur explanando et componendo doctrinam Platonicam et Aristotelicam necessitatem intelligentiae motricis in coelis ponentem. Platonici etiam animas corporibus unitas non ponebant nisi per contactum virtutis sicut motor mobili. Et sic per hoc quod Plato posuit corpora coelestia animata nihil aliud dat intelligi quam substantias intellectuales unitas esse eis ut motores mobilibus. Quod autem corpora coelestia moveantur ab aliqua substantia apprehendente et non solum a natura sicut gravia et levia, patet ex hoc quod natura non movet nisi ad unum, quo habito quiescit. Quod in motu corporum coelestium non apparet. Unde relinquitur quod mo-

movent ab aliqua substantia apprehendente. August. enim dicit 3. de Trinit. Corpora omnia administrari a Deo per spiritum vitae. Sic igitur patet quod corpora caelestia non sunt animata eo modo quo plantae et animalia, sed aequivoce. Unde inter ponentes ea esse animata et ponentes ea inanimata parva vel nulla differentia invenitur in re, sed in voce tantum. Haec Divus Thomas in solutionem quaestionis.

Quaestio 3.a

Quia luminaria dicuntur facta in signa et tempora et dies, et annos. Astrologi qui Judiciarij a cavendo iudicij per Antiphrasim vocantur non dubitaverunt asserere hic in signa poni in scriptura ad innuendum astra caeli signa esse, ex quibus haec inferiora noscuntur et praevidentur. Unde signa dicunt esse prognostica. Supervacaneum autem est immorari in contentione cum vanissimis Astrologis, quorum doctrinam damnat Ecclesia et per Jeremiam cap. 10. *Jeremias*
dicit: A signis caeli nolite metuere quae timent gentes. Contra quos etiam ardent Sancti Patres et Doctores. Et Joannes Picus Mirandulanus duodecim libros adversus iudiciarios astrologos dedit. Pere- *Joannes Picus Mirandulanus Pererius* *S. Thomas*

Quaestio 4ta Quare Sol, et Luna dicantur Luminaria magna

Propositae quaestioni [illegible] Solem [illegible] dicuntur magna ra tione influxus quem prae ceteris sideribus maiorem praestant in haec infe riora vel magna quia ipsis datum est diei et noctis dominium unde alterum luminare maius ut praeesset diei, luminare minus ut praeesset nocti. Verisimilius tamen nobis videtur prima die mundi æquinoctio correspondisse ipsa enim die facta est lux quæ, ut dictum est, erat ipsa lux solis. Magna insuper luminaria dicuntur quæ non quia sunt [ceteris maiora] præsertim Luna quæ fere omnium est minima, sed quia apparent. Apparent inquam nam de magnitudine astrorum magna docentur ab Astronomis quæ breviter [illegible].

Opposita tamen sententia probabilior censetur, volatilia scilicet non esse facta ex terra, ut aliqui doctores censuerunt, sed ex aqua non secus ac pisces. Ita S. seminationem tum de utrisque. Ingentes enim pisces Dracones in scriptura vocan-
tur juxta illud: Dracones et omnes abyssi. Et Ezech 32.2 De Pharaone dicitur Assimi-
latus es Draconi qui est in mari et antea idem cap. 29.3 dicitur ei erat: Ecce ego Ezechiel
ad te Pharao rex Egypti Draco magne, qui cubas in medio fluminum tuorum,
extraham te de medio fluminum &c.

Verum censeo nomine ingentes aquaticos animantes hic esse
intelligendos. Animalia enim terrestria omnia facta sunt sexto die. In
lib 4 Esdræ cap. 6 [illegible] recensentur dies creationis et ubi hic quinto die post nar-
rata piscium et volatilium productione ex aquis sic dicitur Et tunc conservasti lib. 4. Esdr

viathan, et separasti ea ab alterutro. Non enim poterat septima pars ubi
erat aqua congregata capere ea et dedisti Henoch unam partem, quæ sicca-
ta est tertio die ut habitet in ea ubi sunt montes mille. Leviathan au-
tem dedisti septimam partem humidam, et servasti eam ut fiat in devo-
rationem quibus vis et quando vis. Quomodo hæc scriptura intelligenda sit,
quid sint hæ duæ animæ Henoch et Leviathan et ad quid reserventur, hic non vacat
investigare. Sciendum tamen est lib 3. et 4 Esdræ inter Canonicos à Tridentina Syno- Concil. Trident
do non recenseri [illegible] textus explicatione dignus est quod dicit aquam septimam tan-
tum partem in terra obtinere. Igitur quomodo hæc intelligenda sint, parum re-
fert, unum est quod Hebræi ab hoc loco fabulas ex suis conceptis deduxerunt.
Dicunt enim sanctum Balenas duas masculum et fœminam Deum hac die primo creas-

Cap. XII

De sexta die mundi

Divinus rerum omnium Conditor, qui naturis inferioribus legem indidit, ut ab imperfectioribus ad perfectiora in agendo ascenderent in suma rerum productione ab hoc negotio se ipso quoque praebuit exemplum, [illegible] in creaturis disponendis optima ratione [illegible] discreta, quae tantis [illegible] operis et authoritate prius videntur comprobata. Creatis autem, et suo ordine distinctis ceteris vel dignitate, vel forma imperfectioribus nunc ad eam [illegible]ducenda se confert quae perfectiora ratione vitae, et intelligentiae existunt. Quare creatis aliorum generum animalibus tanquam divinae Cosmopoeiae corona [illegible] hominem [illegible] [illegible]. Sextae autem huius diei opera [illegible] nobis exponit. Dixit quoque Deus Producat terra animam viventem [illegible] [illegible] et reptilia et bestias terrae [illegible] [illegible] [illegible] ita. Et fecit Deus bestias terrae iuxta species suas et iumenta et omne reptile terrae [illegible] et [illegible] [illegible] Faciamus hominem ad imaginem et similitudinem nostram et praesit piscibus maris, et volatilibus caeli et bestiis universaeque terrae omnique reptili quod movetur in terra. Et creavit Deus hominem ad [illegible] [illegible] imaginem Dei creavit illum masculum et feminam creavit eos. Benedixitque illis Deus et ait [illegible] et multiplicamini et replete terram et [illegible] eam et dominamini piscibus maris, et volatilibus caeli, et universis animantibus quae moventur super terram. Dixitque Deus [illegible] dedi vobis omnem herbam [illegible] semen [illegible] et universa [illegible] quae habent [illegible] [illegible] [illegible] vobis in escam, et cunctis animantibus terrae omnique volucri [illegible] [illegible] quae moventur in terra, et in quibus [illegible] anima vivens [illegible] ad vescendum. Et factum est ita. Vidit [illegible] [illegible] [illegible] et erant valde bona; et factum est vespere, et mane dies sextus. [illegible] [illegible] singularia opera sacer [illegible] hoc die [illegible] describit; Productionem scilicet animalium; et productionem hominis: quas et nos distinguere debemus cum

mentorum in quibus terra primas tenet partes ~~[illegible]~~ (homine excepto) produceret; unde dicitur terra iussa producere animam viventem. Sed probabilius dico ibi dici animam viventem, et non quadrupedia animae viventis, sicut de piscibus dictum erat reptile animae viventis ob imperfectionem animae quam habent tendentia prae piscibus. Audi divum Thomam 1. p. q. 72. ad primum, quo nemo melius:

Ad primum dicendum, quod sicut Basilius dicit diversus gradus vitae qui in diversis viventibus invenitur ex modo loquendi scripturae colligi potest. Plantae enim habent imperfectissimam vitam et occultam: unde in earum productione nulla mentio fit de vita sed solum de generatione quia secundum hanc tantum invenitur gradus vitae in eis; nutritiva enim, et augmentativa generativae deserviunt. Inter alia vero animalia sunt communiter loquendo perfectiora terrestria avibus et piscibus; non quod pisces memoria careant ut Basilius dicit, et Aug. improbat sed propter distinctionem membrorum et perfectionem generationis. Quantum autem ad aliquas sagacitates etiam aliqua animalia imperfecta magis vigent, ut apes, et formicae. Et ideo pisces vocat non animam viventem sed reptile animae viventis. Terrena animalia vocat animam viventem propter perfectionem vitae in eis, ac si pisces sint corpora habentia aliquid animae; terrestria vero animalia propter perfectionem vitae sint quasi animae dominantes corporibus. Perfectissimus autem gradus vitae est in homine. Et ideo vitam hominis non dicit produci a terra, vel aqua sicut ceterorum animalium sed a Deo. Ex quibus ad dubitationem factum satis. *S. Thomas*

Quaestio 2. Verum hoc die fuerint producta animalia nociva et venenata. Fundamentum dubitandi est quia si Lupus ovibus nocuisset, peccatum necdum a Lupo in famis suae pabulum factum, unde animalium species [illegible] producta interiret. Et homine nondum peccante superfluae videntur [illegible] et [illegible] animalia.

Verum dicendum est hoc omnia animalia hoc die esse facta. Ad fundamentum dubitationis dicendum est primo vel ovibus non adeo nocivos esse

esse factas, et aliquibus capax à Lupis speciei conservetur, sed aliqua proximè esse à Deo [illegible] petitione donec omnes et singulis animalibus in quæ Lupus naturali feritate ~~[illegible]~~ [illegible] speciei [illegible] multiplicatæ erant, ut factum est in arca Noe. Quod dictum de Lupo, et [illegible] dicendum est de quolibet alio animali alteri altero inimico, ut Accipiter, [illegible] [illegible]. Ad id vero, quod de homine dicitur respondendum est sicut supra dictum est de spinis et tribulis. hæc enim ad decorem, et complementum universi facta sunt. et multas præsefferunt utilitates et medicinas [illegible] [illegible] [illegible] [illegible] a [illegible] Adde [illegible] optime novit Adam qualitates bestiarum et in eis dominium habens [illegible] sibi datum à Deo, non erat unde ipsi nocivas et repugnantes ~~[illegible]~~ [illegible] putaret futuras si in innocentiæ statu constitisset.

Quæstio 3. Utrum Hybridæ, et quæ ex congressu dissparium specierum gignuntur, hodie sint facta. [illegible] [illegible] nihil novi in specie molitus est Deus. Et quantum apparet huiusmodi animalia [illegible] [illegible] [illegible] nuntur. Ut ex Equa, et Asino Mulus ex [illegible] [illegible]

Deinde accepit Evam ex costa productam, et ex ea genuit homines. Quis non videt ad ludicra haec omnia? Alii ex verbis illis: Ad imaginem Dei fecit illum, masculum et feminam creavit eos, et deinde cap. 2. formationem Evae, adhuc ante ~~[illegible]~~ asseruerunt Adam creatum esse Hermaphroditum. Sic sensit Sectator quidam nuper in Francia, qui Adam utriusque sexus virilis et feminei participem fuisse docuit. et Plato in Symposio [illegible] Androgynos fuisse. [illegible] ex hoc sexu Eva creata fuit. Et quamvis Evae formatio altero capite describatur, hoc factum est, ut distinctius eius productio describatur cum multis notabilibus erat referenda. Et hoc expresse docet Scriptura illis verbis masculum et feminam creavit eos. Unde [illegible] Adam Hermaphroditum, cum non dicat [illegible] esse. Quantum autem ad Evam, dico creatam esse in Paradiso voluptatis. Nam postquam Deus creavit Adam, et sive per se ipsum, sive per Angelum sicut Abacuch, transtulit eum in Paradisum voluptatis, dixit non est bonum hominem esse solum. Inde [illegible] ab Adamo, et singulatim nominatis animalibus, inter quae omnia non inveniebatur adiutor similis eius, immisit Deus soporem, sive ut alii legunt extasim, non tantum ut detrahente se costa ad formationem mulieris non sentiret, sed ut in ea extasi mira divinitus cognosceret, unde praedixit [illegible] multa futura [illegible]. Quaeritur 4. Quid sit Evam ex costa Adae esse formatam. Quidam se iactant aliqui sectae Adam, et Evam ita a Deo creatos esse, ut sibi invicem lateribus cohaererent. Quaestio 5. Quod Adam, et Eva fuerit dominium in paradiso an-
te peccatum. Sanctus Thomas 1 p. q. 96 a. 2 in c. docet omnibus creaturis, si S. Thomas
Angelos demas, in statu innocentiae hominem dominari, et hoc intelli-
gendum est, quia [illegible] de omnibus creaturis habet homo. Habet [illegible]
rationem, quae cum Angelis convenit, vires sensitivas quibus convenit cum anima-
libus, vires naturales, quibus convenit cum plantis, habet ipsum corpus, secundum
quod convenit cum inanimatis. Hoc idem prius etiam docuit [illegible]

commune esse cum lapidibus, [illegible] cum arboribus, sentire cum animalibus, intelligere cum Angelis
Ex hac

ex hinc docet Angelicus, [illegible], quo dominatur his, quæ in nobis sunt ita dicendum est aliis dominari. Ratio autem in homine, ait, Doctor habet locum dominantis et non subjecti dominio. Unde homo Angelis non dominabatur in primo statu et [illegible] omni creaturæ (intellige dominari) intelligit quæ non est ad imaginem Dei. Viribus autem sensitivis sicut irascibili, et concupiscibili, quæ aliqualiter obediunt rationi dominatur [illegible] imperando. Unde in statu innocentiæ animalibus aliis per imperium dominabatur. Plantis autem [illegible], et ipsi corpori homo dominabatur, non quidem imperando sed utendo. [illegible] homo in statu innocentiæ dominabatur plantis et rebus inanimatis non per imperium nec immutationem, sed absque impedimento utendo eorum auxilio. [illegible] S. Thomas. Exercitium autem hujus dominii præcipue circa animalia, quæ regebantur imperio, pendebat ex scientia et prudentia naturali primi hominis [illegible] sciebat quomodo domanda, alenda, et tractanda [illegible] partim etiam pendebat ex peculiari Dei providentia quæ [illegible] animalium omnium phantasiam, et corpus flectebat ad nutum primi hominis. Siculi [illegible] Augustino lib. 9 de Genesi ad litt. cap. 14 [illegible] Angelica ministeria, et non per unionem intellectualem [illegible] omnia animalia adduxit ad Adam nomina recipere. Hoc dignitatis hominis grande est argumentum. Ut quamvis Adam [illegible] [illegible] hoc dominium, et per ignorantiam ac [illegible] contracta [illegible] providentiæ ministerio cessante [illegible] immanitas, remaneat adhuc [illegible] maiestatis quæ et domamus feras, et quæ [illegible] refugiunt [illegible] faciunt. Adde quod si perseverasset [illegible] primorum hominum felicissima innocentiæ [illegible] homo homini quoque dominaretur. Non dominio quo dominamur in servos quod onerosum et grave esse solet ac per hoc indignum primo statui, quia non sibi sed heris cedunt quæ servi faciunt, et [illegible] [illegible] sed dominio civili, quo superior publico bono inferiorum consulit prudentia [illegible] Non enim tunc omnes homines æquales in perfectionibus [illegible] et quidem [illegible] imperfectiores

chiores viris, iuvenes senibus robustiores, senes tamen iuvenibus prudentiores. Hinc mulier subdita esset viro, filius patri. Ita Divus Thomas. Nec hoc contra rationem recti ordinis factum fuisset. Et inter Angelos alius alii praefertur, alius alium excellit. Hinc inter ipsos a dignitatis praelationis nomen quidam sortiti sunt. Unde alii dicuntur Throni, alii Principatus, alii Dominationes, alii Potestates &c. Sic hierarchia coelestis postulat, sic postulasset et terrena. Videtur tamen oppositum sentire P. Jacobus Alvarez de Paz Tom. 2. lib. 4. part 3. cap. 13. qui ex S. Gregorio lib. 22 Moral. cap. 10 innuit natura homines aequales esse, nec unum alteri praeferri; Quod attendant, qui in dignitatibus constituti, humilitatis virtuti incumbere student. Ait namque Sanctus Pater Gregorius: Omnes homines natura aequales genuit, sed variante meritorum ordine alios aliis dispensatio occulta postponit; ipsa autem diversitas, quae accessit ex vitio, recte est divinis iudiciis ordinata ut quia omnis homo iter vitae aeque non graditur, alter ab altero regatur. Deinde ex illo vult illud Noe dictum a Domino: Terror vester, ac tremor sit super cuncta animalia terrae; Non enim ait sit super homines, qui futuri erant, sed sit super cuncta animalia terrae. Homo quippe animalibus irrationalibus, non autem ceteris hominibus natura praelatus est, et ideirco ei dicitur, ut ab animalibus et non ab homine timeatur, quia contra naturam superbire est ab aequali velle timeri. Verum si intime verba Magni Pontificis penetrentur non de Dominio civili, sed de servili loqui manifestum est. Timor enim et terror servilitatem subditorum satis ostendunt. Nos vero hoc tamen propter statum innocentiae statui repugnare, aliud autem admittimus, de quo non loquitur hic Gregorius, quia ordinem praesefert, et harmoniam

[illegible] solutionem.

Patrum pręcipuę Strabo, Hugo de S. Victore, Severus et omnes [illegible] auctores [illegible] est ratio. nam si virtus hęc supernaturalis fuisset, peccatum non [illegible] potuit [illegible]tura. Neque enim sacramenta quę supernaturaliter in nobis operantur [illegible] [illegible] efficiunt, si peccatores ea sumpserimus. sed hanc arboris fructum [illegible] quamvis peccatori [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] Quę historia [illegible] [illegible] [illegible] fuerit [illegible] [illegible] [illegible] [illegible] [illegible] peccator [illegible]. cunt ipsi Seth ramum accepisse ramum et inditum ori Adae sepulti, ex
quo succreverit arbor ex qua postea crux Christi confecta est, ut inde fieret
peccati remissio, ex illo met ligno unde nostra culpa contracta est. Haec
sunt Rabbinorum fabulae. Et quod dicit Ecclesia, ut unde mors oriebatur inde vita resurgeret,
longe aliud sensum habet, nimirum quod ex quo
culpa hominem advenit statim misereri Deus remedium destinavit per crucem
et mortem filii, ut sub variis symbolis figurari dicuntur. Quod hactenus
inter Patres pro traditione est, Adam sepultum esse in Golgotha. Tradit
Jacobus Edessenus apud A Lap. in c. 5. Genes. quod Noe ossa Adami in arca
secum suscepit et post diluvium inter filios distribuit. Iudaeorum
sem caluariam Adae, et Jerusalem in portionem obtinuit. Unde a calua-
rio Adae mons nomen Calvariae sortitus est, in quo creditur sepulta, ut
sanguine Redemptoris proprius rigaretur. Et haec est ratio ad crucis pedes
cranium locandi, ut fert pia consuetudo fidelium. In eamdem sententiam Tertullianus

Golgotha locus est capitis calvaria quondam
Lingua paterna prior sic illum nomine dixit.
Hic medium terrae est, hic est victoria signum.
Os magnum hic veteres nostri docuere repertum,
Hic hominem primum suscepimus esse sepultum.
Hic patitur Christus, pio sanguine terra madescit,

Quæstio 9. An omnia quæ supra hic dicuntur facta fuerint hac sexta die. Nam est in dubium vertere animalium terrestrium, hominis [illegible] productionem hodie esse factam. Nec est quærendum an eo die quo Adam peccavit eiectus sit è Paradiso. Verosimilius enim est id quod peccavit Adam statim illi esse statim ejectum esse a Deo. Quandoquidem non [illegible] [illegible] illa [illegible] per duas horas [illegible]. Quod quærendum hic est, utrum scilicet eo die quo creatus fuit Adam peccaverit. Hoc enim completa [illegible] quæstio [illegible] est.

Multiplex est Doctorum sententia. Abulensis putat altero die à creatione Adam peccasse et ejectum esse à Paradiso, qui dies fuit sabbatum. Verum hoc non convenit ad [illegible] Dei [illegible] sanctificantis. Alij putant [illegible] [illegible] à creatione et [illegible] [illegible] [illegible] annos [illegible] [illegible] illum numerum [illegible] [illegible] [illegible] [illegible] [illegible] numerum annorum a [illegible] anni, [illegible] [illegible] [illegible] in tempus Christus Dominus [illegible], redemptor venerit. De Die Natalitio

[illegible] Compreens observationibus dierum ortus et infantie mundi ad actus eorundem homo ultimo creatus est [illegible] dies uti insignes in mundo status [illegible] tres [illegible] tribus tempo ribus natura et propagat et reparatur, et clauditur. De [illegible] autem infensis dictum [illegible] [illegible] aurum [illegible] adnexaque pariter observanda sunt. Hoc [illegible]

Hoc vero videtur paucis verbis comprehendisse Ezechiel cap. 16. 4 [illegible] [illegible] sub [illegible] [illegible] [illegible] figura sic eam [illegible] quando nata es in die ortus tui [illegible] non est praecisus umbilicus tuus et aqua non es lota in salutem, nec sale [illegible] [illegible] in [illegible] [illegible] in die qua nata es. Quatuor hic memorat Propheta officia, quae in recenter natis praestabant tunc temporis, quorum aliqua etiam nunc observantur. Praecidebatur ergo umbilicus, quo antea infantis [illegible] [illegible] [illegible], alimentumque trahebat et ut [illegible] [illegible] [illegible] Deinde quia [illegible] [illegible] sanguinolentus et sordidus egreditur aqua [illegible] lavatur. Quae [illegible] salutaris quidem est. Consolidantur enim infantis membra, quae admodum mollia, et delicata tunc sunt, ut nisi tepida illa

illa lotione sensim ad aspera consuescerent cujus manum ...
ignisque aeris contactum ferant. Hinc propheta appellat lotum in salute.
Quamobrem non nisi barbaræ gentes mos erat, potuit, infantes recenter
natos frigidæ mergere aquæ, et statim ab ortu ad flumina ferre pe-

men ferre, ibique quod Germani facere dicunt, velut ferrum
candens in frigidam humorem mergere, quo et periculum naturæ fiat
et eorum ipsi roborentur. Verum Germanorum consuetudo, cujus me-

in flumen ferebant præcipue qui circa Rhenum, indeque undis suppo-

censebant. Mentionem hujus experimenti facit Divus Gregorius Nazi-

Quod factum esse credendum est vel ad firmandum umbilicum [illegible] vel ad exsiccandam humoris abundantiam vel ad cutem consolidandam carnemque [illegible]. Involvitur ergo infans pannis, vittis, fasciisque mollis stringuntur, ne sic soluta imbecillitatem aliquam contrahant, et ossa propria vitii periculo, vel difficile excoqui possint. Convenit enim ut ita circumligentur ut rectæ figuræ se accomodent, alioquin eiusmodi tenera quæ tunc sunt, facile ei formæ adhærebunt, quæ vel manum et lecti, vel corporis ambientis puerum inæqualitas prosefendit. Hanc naturæ facilitatem optime norunt obstetrices. Etenim ait P. Stephanus Menochius in sua Œconom. Christ. lib. 2. c. 2. n. 1. in quadam regione Italiæ non multo temporis ante, quo hæc scribebat, tam cum quod mulieres videbantur summitate capitis acutiori quam par erat. Ex hoc credebatur industria obstetricis factum ubi infans ab utero matris exibat, ut sic possent capillos, mitrasque mulierum disponere commodius ad consuetudinem, utrumque illius temporis. Mirum equidem est quod apud eundem Menochium l. c. n. 2. de Brasiliensibus narrat Georgius Margravius lib. 8. c. 5. Indigenæ ait Brasilienses, qui inter nos degunt statura sunt mediocri, robusti, latis humeris bene compositi, nec rarò est inter illos invenire distortum, vel lusum, aut claudum. Quod mirum videri reddit ut infantes recens natos numquam fasciis involvant aut ligent. Ligant tantum Brasilienses recens natos in infantia crura certis fasciis quas vocant Tapacura ea de causa ut robustiora fiant. His ergo attentis miseriis ad quas nascimur immo a primis natalibus exercemur, quam verè scribit noster Plinius in proœmio lib. 7. natural. histor. et merito dicere potuit: Non est satis æstimare, parens melior homini an tristior noverca fuerit natura. Ante omnia unum animantium cunctorum alienis velat opibus, ceteris variè tegumenta tribuit testas, cortices, coria, spinas, villos, setas, pilos, plumas, pennas, squamas, vellera. Truncos etiam arboresque cortice interdum gemino a frigoribus, et calore tutata est. Hominem tantum nudum et in nuda humo natali die abjicit ad vagitus statim, et ploratum, nullumque tot animalium aliud ad lacrymas, et has protinus vitæ annexo. At haud non

Solebant olim veteres nomen filijs imponere ab aliquo eventu vel in partu, vel in familia desumptum. Sic Rachel Beniamin vocat Benoni idest filium dolorum sui angoris, et mortiferos partus cruciatus inter quos ipsa mater interijt. Sed melius intelligi est ex invectiva in huiusmodi superstitiones S. Joannis Chrysostomi hom. 8 in cap. 3 Epist. ad Coloss. sic enim ait. Quid vero et alia ridicula commemorem? cinerem, fuliginem, et salem, et vetulas rursus in medio adductas? Sed ultra provexit superstitiosa credulitas potentiae fascini, et putaverunt sibi ipsis posse quamquam fascinationem inferre. In hac re est illud Plutarchi lib. 5. Plutarch ius, et sine tutore vel curatore liberum rerum suarum arbitrium, ut quibus tres sunt liberi. Prodeuntibus in publicum lictores apparent. Si cui sorte occurrerant ad supplicium rapto, is morte poenae eximitur. Iusiurandum autem exigitur a Virgine fortuitum fuisse, et inconsultum, nec praemeditatum occursum. Is, qui sellam curulem earum subit dum vehuntur necatur. Quid ergo mirum si ab antiquis Virginitas exaltatur quae taliter ab ethnicis commendari potuit? Hae sunt felicissimae illae nuptiae, quibus Regi Virginum Domino castae animae copulantur non unitate carnis, ut fit in carnalibus matrimoniis, de quibus dictum est: erunt duo in carne una, sed unitate, et conformitate spiritus, qua mens creata a Sponso caelesti irradiatur, elevaturque ad divinorum intelligentiam. Hoc non fugit Naumachium veterum Graecorum poetam qui apud Iacobum Alvarez de Paz To. 2. lib. 2. p. 2. cap. 1. de Graeco in latinum translatus sic ait:

Naumachius apud Alvarez

Pulchrum sane est, corpus castum habere intactumque manere
Virginem, et puris semper cogitationibus delectari,
Nec onus circa laboriosa ilia gestantem,
Nec dolores tormentum superioris Lunae;
Sed permanere quasi virginum imbecillumque mulierum
Oculum animae splendidum ad eam vitam erigendo,
In qua gloriosae utrinque sunt nuptiae ubi comitata
Divinis rebus Lumine plenas meditationes sunt.

Iure igitur optimo, cum Ecclesia Virginem aliquam Iesu Christo offert ut eam spiritale instituerit connubium solemnem oblationem castarum nuptiarum caeremoniis prosequitur et Angelicis comitatur Epithalamiis. Sed iam utroque statu Virginali scilicet et coniugali exaltato quantum, recenti opere non deficere credendum fuit, ad propositum nostrum deveniamus. Et quia uterque status per nuptias instituitur, alter per sensuales et carnales alter, quae nos de uno diximus alteri poterunt convenire, si spiritualiter dicis.

Dissident Doctores Physici, et Politici circa aetatem conve-

temporis statuit suis Lacedaemoniis, sed tunc voluit celebranda coniugia
ubi vir, et femina tali vigore aetatis, viribusque florerent, ut inde filii
qui nascerentur, integri, sani, fortesque futuri essent qui ad labores Rei-

De generantibus autem aetate nimium acerba esse id testimonium quod scribit S. Hieronymus in epistola ad Vitalem hic reddis. Dominum testor non mentior. Quaedam muliercula cum expositum nutriret infantem, et instillaret cibos ac nutricis officio fungeretur, cubaretque cum ea parvulus qui usque ad decimum iam pervenerat annum, accidit ut plusquam pudicitia patitur se mero ingurgitaret, accensaque libidine obscenis motibus ad coitum duceret infantem. Prima ebrietas alterius noctis, et caeterarum deinceps fecit consuetudinem, necdum duo fuerant menses et ecce feminae uterus intumuit. Haec tamen quia rara sunt, in observationem communem non veniunt. Et quidem Lactantius divin. instit. lib. 1. cap. 16. quod circumfertur etiam in fragmentis Senecae in fronte operum eiusdem appositis, legis cuiusdam Romanorum meminit, qua post sexagesimum annum connubia vetita fuisse videntur. Non idem ait, Seneca in libris moralis philosophiae. Quid ergo est, inquit, quare apud Poetas salacissimus Jupiter desierit liberos tollere? Utrum sexagenarius factus est et illi lex Papia fibulam imposuit? Praeterquam quod etiam in senio uxoratis nonnulla incommoda timentur, ut sunt quod Pater decedat [illegible] vita, ubi magis educatio filiorum forte postularat ipsius praesentiam. factum Callimachus in epigrammatis venustissime scribit: epigramma Græcum est, Latine tamen hoc est.

Dixerat. ille brevi elato, senis arma, bacillo.
Ecce, ait, hi totam rem, mihi crede, docent.
Illi autem celeres scuticis lævibus rotabant
Gyrabant latis in triviis pueri.
I sequere illorum vestigia, dixit, et ille
Accedit; pueri: Tu tibi sume parem
Hæc ubi deprehendit, quamvis æquis lusibus hospes
Commonitus magnis ædibus abstinuit.
Ac tenuem modicam uxorem duxit in ædes:
Ergo Dion perge: tu tibi sume parem.

Simonemque itidem admonet facere, parem ut eligat. Videtur autem ex affectu ita dixisse. Nam nobiliorem ipse duxerat Draconis filij Penthili sororem quæ illi immodice superba erat. Huius mentis fuit quoque Cleobulus Lindius teste eodem Laertio. Dicebat enim ut in eius vita idem refert: Vxorem sibi parem eligendam. Nam si clariorem te duxeris, inquit, affines dominos habebis. Et Ovidius in Epistola quam missam fuisse Herculi a Deianira, quæ est Heroidum 9. hoc idem innuebat dicendo.

ffis omnibus addendum est studium orationis. In re enim tanti ponderis à Deo lumen, et auxilium petendum est. Nam quamuis laudabiliter se gerat, qui in arduissimo negotio tot examina instituerit, à Domino tamen euentus felicitas expectanda est, quia uerissimum est illud Prouerb. c. 19. 13. Tecta iugiter perstillantia litigiosa mulier. et subdit statim: Domus, Prouerb. et diuitiæ dantur à parentibus; à Domino autem proprie uxor bona. Ratio autem tantæ sollicitudinis, et inquisitionis subministratur à Theophrasto in lib. de Nuptijs relato à S. Hieronymo lib. i. contra Iouinianum. Quoniam nulla est uxoris electio, sed qualiscumque obuenerit habenda, si iracunda, si fatua, si deformis, si superba, quodcumque uitij est post nuptias discimus. Equus, bos, asinus, canis, et uilissima mancipia, uestes quoque, et lebetes probantur prius, et sic emuntur. sola uxor non ostenditur, ne ante displiceat, quàm ducatur. Theophrastus + apud Hieron.

Dixit autem nullam esse uxoris electionem, quia tot adhibitis diligentijs adhuc homines coguntur, ut eam hanc feliciter conduxisse sit, potius fortunæ, seu ut uerius dicam Dei totum opus, quàm electionis, et humanæ prudentiæ. Sed maioribus in tenebris ipsæ puellæ sunt, quarum Virginalis honestas nullo modo patitur, ut sibi eligant sponsum, sed Parentibus eam omnino relinquere debent. Non est uirginalis pudoris eligere maritum, ait S. Ambrosius lib. i. de Abraham cap. ultimo. Et liquet hoc idem in Carmine Nuptiali Catulli. Quod perpere nisi perpe[...] Parentes et infra sponsum alloquens. At tu ne pugna cum tali coniuge uirgo. S. Ambrosius

Nec defuerunt inter Doctores morales, qui peccati mortalis reum facerent qui consilium de ducenda uxore à Parentibus non petijssent. Ita Sanchez lib. 4. de Matrimonio apud Tamburinum Explicat. Tanta fuit corruptella Gentilium, ut Theodoretus quæst. 24 in c. 18 Levit. et in hoc cap. ma ratione probantis nemini ullo tempore polygamiam sine dispen-

archas illos aliquos sanctissimos contra Monogamiam fuisse, hoc est
plures uxores simul tantum uno tempore habuisse, dicendum est ut à Lapide, et alij
in hunc locum sive ut supra factum esse dispensatione divina. Deus enim potest dispen- Cornelius à Lapide
sare in lege naturæ, præsertim si ea sit secundaria, qualis est ea quæ
vetat polygamiam. Sed quia in scriptura multis in locis legimus illos
Patres concubinas habuisse, quod vocabulum inhonestatem sapit, et in malum
sensum posset interpretari, opere pretium est honestissimos viros ab impostura, et
à falsorum scriptorum calumnia vindicare dicendo quas scriptura aliquando concubinas appellat veras
fuisse uxores sed non primarias. Una enim erat mater primaria uxor, penes
quam erat dominium, et moderamen familiæ, cuius quoque filij Patris fa-
miliam legitimi, et naturales hæredes futuri erant. Cæteræ autem uxores
secundariæ erant, nec ad dominium familiæ destinabantur, neque earum filij
ad hæreditatem vocabantur. Hæ autem modo in scriptura vocantur uxores
modo concubinæ. Primaria autem uxor nunquam dicitur concubina, sed
semper uxor tantum. Ita Pererius l. sup. cit. n. 23. qui postquam a Pererius
huius nominis appellationis exempla ex scriptura attulit, subdit nonnulla
quæ omittere haud possum. Eruditionem enim nobilissimam præferunt.

Ergo sentiendum est morem fuisse tam apud Hebræos, quam apud alias gentes, ut si quis multas haberet uxores, una tamen earum primaria ac principalis esset, quæ mater familias ipsa dicebatur, sociaque viri

Peren. erat in gubernatione familiæ, atque eius unius liberi bonorum viri hæredes censebantur. De qua re non est hic tacendum quod à Gellio ad

Gellius notatum legimus. Gell. lib. 10 c. 6. Matronam esse dictam proprie, quæ in matrimonium cum viro convenisset, quoad in eo matrimonio maneret, etiamsi sibi liberi nondum nati forent, dictamque esse ita à matris nomine, non adepto iam, sed cum spe, et omine mox adipiscendo, unde ipsum quoque matrimonium dicitur. Matrem autem familias appellatam esse eam solam, quæ esset in mariti manu, mancipioque, aut in eius, in cuius maritus manu mancipioque esset, quoniam non in matrimonium tantum, sed in familiam quoque mariti, et in sui hæredis locum venisset. Sic illæ Concubinam porro appellabant eam, quæ licet quantum ad veritatem et substantiam matrimonii legitima esset uxor, non tamen admittebatur ad æqualem cum viro societatem in victu, et administratione domus, nec ad eius filios viri hæreditas pertinebat, sed assumebatur tantum ad concubitum generandæ prolis gratia, et iccirco ad differentiam primariæ uxoris, et matris familias, fuit non uxor sed Concubina nominabatur. Huc usque Pererius.

Sed iam aliquid de dote subdendum est. Fere omnium nationum mos fuit, ut nunc inter nos observatur, quod mulier viro dotem offerat. Congruum est enim, ut quæ in viri ædes introducitur, secum unde vivat, ferat et onera [Dom?] mole expensas quibus inde maritus obligatur ferre commodius possit. Insuper ut proles futura aliud à matre sustentetur. Ea propter communiter dicitur dos esse prolis alimentum. ~~[illegible]~~ Hunc fuisse morem Persarum videtur non obscure posse colligi ex cap. 1.

2 Machab. lib. 2 Machabæorum ubi dicitur quod, Antiochus templum Deæ Nanæ ingressus proposuit sacerdotibus Nanæ Deam, quam alii Dianam, alii Venerem putant (teste Cornel. à Lap. in hunc locum) velle sibi in matrimonio coniungere, ut dotis nomine

Hic mos fuit et Atheniensium. Quod liquet ex lib. Suasoriarum M. An-

Dotem

Cornelius Tac. — Dotem non uxor marito sed uxori maritus offert. Intersunt parentes et propinqui, ac munera probant, munera non ad delicias muliebres quaesita, nec quibus nova nupta comatur, sed boves, et frenatum equum, et scutum cum framea gladioque. In haec munera uxor accipitur, atque invicem ipsa armorum aliquid viro affert. hoc maximum vinculum, haec arcana sacra, hos conjugales Deos arbitrantur. Haec munera data invicem, et accepta sunt quas Arrhas dicimus, hoc est pignora amoris conjugalis et externa monumenta matrimonii complendi. Dant autem et nunc inter nostros sponsae offerri, cum inter Parentes tractatus matrimonii ad perfectionem conducitur, et cum sponsi primo vinciuntur. Hinc talia dona a Graecis Anacalypterıa dicebant. hoc est a sponso oblata, cum primum coram se futura sponsa velum capitis amoveret. Nam ritus illius nationis ferebat, et aliquando etiam nostrae, sed heu non amplius modo, ut puellae donec viro traderentur, velum ante faciem modestiae gratia gestarent. Barbarum est quod faciunt habitatores Promontorii Bonae Spei ut ostendit in suis tabulis Geographicis N. de Fer. Hi enim in pignus amoris futurae suae uxori gratiosius omnino haud facere posse se credunt quam si [illegible] venerate magnae, et pulchrae ferae ipsi praesentent. [illegible] Sed haec de muneribus causa conjugii, et dote sufficiant. Haec enim apud cultiores nationes ab uxore viro dari consuetum fuisse ostendimus. Si quae autem uxor ultra dotem convenientem bona secum ferret, haec Graeco nomine Parapherna, seu Paraphernalia bona dicuntur, de quibus Civilistae, et Legistae fuse agunt. Ergo ad ipsum diem nuptiarum propius accedamus.

Et quia nomine matrimonij Tobiæ cum Sara initi non est cur differam formam, utrumque illius contractus ex eadem historia exponam. Ibi cap. 7. ita legitur de Raguele patre Saræ: Et apprehendens dexteram filiæ suæ dexteræ Tobiæ tradidit dicens Deus Abraham, et Deus Isaac, et Deus Iacob vobiscum sit, et ipse coniungat vos, impleatque benedictionem suam in vobis. et accepta charta fecerunt conscriptionem coniugij. Hoc videtur factum ad exemplar primi matrimonij Adam, et Evæ, in quo a Domino adducta est Eva ad
Genesis Adam, traditaque ei in uxorem ut dicitur Genes. 2. 22. Non absimili ritu nuptiæ Christianorum conservantur. Benedictio enim super contrahentes a sacerdote imploratur, et annulus, qui a sponso in digitum annularem, ab anulo ferendo dictum, qui est prope minimum sinistræ manus sponsæ imponitur, benedicitur.
Annulorum usum teste Pierio Valeriano lib. 41. inventum est ad aliquid [illegible] gerendum, tanquam signum ne quod notatum est, memoria excidat. Inde ad ornamentum manuum transijt. Ponitur autem in eo digito, in quo, ut notavit Macrobius, notatum fuit venam, sive nervum, qui corresponderet cordi. Igitur annulus traditur sponsæ, ad innuendum ipsi numquam debere oblivisci fidei ei traditæ, quia cordis, et amoris factus fuit dominus, eumque tanquam signaculo, annulo insignivit. Annulo suo, aiebat Beata Agnes loquens de castissimis nuptijs cum Dei Filio suo subarrhavit me Dominus meus Iesus Christus, et tanquam sponsam decoravit me corona. In nuptialibus musica, quae in magnatum nuptiis et nunc fiunt, solebant veteres celebrare, et magnificare novos sponsos, et huiusmodi carmina Epithalamia vocabant, cuius exempla in Poetis passim occurrunt. Sic Claudianus in nuptiis Honorii, et Mariae. Sic Ausonius in Centone nuptiali sponso, et sponsae Epithalamium facit, sic quod Catullus inscribit Carmen nuptiale, Achilles Statius Lusitanus eius commentator putat Epithalamium in nuptias Tor. Iuliae et Mallii, quarum et alio carmine [illegible] quod hoc praecedit, celebrat nuptias. In Psal. 77, 63 legitur: et virgines eorum non sunt lamentatae; quod Pagninus ex Hebraeo vertit: Non fuerunt nuptiis traditae, Arias autem magis ad rem activa: Non sunt laudatae, scilicet Epithalamio; quod etiam in sua Paraphrasi Chaldaeus exponit: Non sunt laudatae Epithalamiis et hymnis [illegible] sponsi. Hos concentus nuptiales significatos a Jeremia illis verbis [illegible] cap. 25. 10. Perdamque ex eis vocem gaudii, et vocem laetitiae, vocem sponsi, et vocem sponsae. sine reparatione erat luenda, ut Antiphanes in Ganymede fabula ostendit. Et quidem nuptiale convivium talibus quaestionibus fuisse perstrepitum apud Hebraeos est in exemplo illud aenigma quod proposuit sodalibus suis Samson occasione suarum nuptiarum. Iudic. 14, cuius solutionis praemium, vel ignorantiae poena erat solutio respective, et acceptio triginta sindonum, totidemque tunicarum. Erat autem problema huiusmodi: De comedente exivit cibus, et de forti egressa est dulcedo, alludens sic, quod Samson leoni in via a se enecato in cuius faucibus postridie examen apum et mel factum invenit. De quo problemate sic scribit S. Ambrosius Epist. 70. Forte quodam de nuptiarum erat celebratione convivium, lecta in quibus iuvenibus multis se ad ludum invitabat sermonibus, ut alius alium salsiore dicacitate perstringeret. Siquidem se huiusmodi usus habet, certamen laetitiae accendebatur. Is tum quaestionem huiusmodi proposuit Samson iuvenibus convivantibus: De manducante exivit esca, et de forti processit dulce. Absolventibus pollicens praemium, quasi mercedem sapientiae triginta sindones et totidem stolas secundum numerum virorum convivantium, aut multam ignorantibus.

Quantum autem ad vestimentum, et ornatum, eiusdem fuisse in nuptiis ceteris diebus non ambigo. Et peculiaris quidem erat tam sponsi, quam sponsae, et convivarum. Et quod ad sponsum attinet, corona redimitum interfuisse nuptiis suis patet ex illo Cant. Sic nuptiarum sui temporis capitis ornatus Tertullianus corrigere voluit. Tempora autem redimita corona rosarum ad nuptias gestabant, ut (Claudianus) apparet in Claudiano de laud. Seren. De hac loquitur Jeremias cap. (Jeremias) 2.32. Numquid obliviscetur virgo ornamenti sui, aut sponsa fasciae pectoralis suae? Haec fascia, et zona ab aliis baltheum dicitur, ab aliis ceston, originemque eius a fabula deducunt. Hoc erat quo Venus tam venusta et gratiosa mariti apparebat, quod puellae afectant nubendi causa. A Venere Juno petiit sibi Ceston commodari, ut amabilis Jovi appareret. Martialis laudans Juliam pro gratia balthei sui lib. 6. epig. 13 dicit fore ut ab ea ~~potest~~ importunum baltheum Juno, et Venus ipsa commodatum petant.

Breviar. Roman. in Officio S. Agnetis multa munera ornamentorum metaphorice recensentur ad
innuendas uirtutes, dotesque animae illius castissimae Virginis. Lege etiam
Ezechiel. cap. 16 a n.o 10 usque ad 13 Ezechielis. Tandem quod ad Convivarum attinet uesti-
mentum erat vestibus et nitore quodammodo [illegible]. Unde in Evang. Matthæi
c. 22. arguitur, et punitur a Rege homo ingressus convivium quia non uestitus
Virgilius ueste nuptiali, sive nuptiarum ut legit [illegible]. [illegible] vestes nam uestes
[illegible] albae fuisse; talis enim color festivitati [illegible]. Et in Apocalypsi [illegible] albi
uestiuntur qui sequuntur Agnum, et viginti quatuor seniores circumamicti
Lucanus [illegible] uestimentis albis, ut dicitur cap. 4. et hi item sunt qui memorantur cap. 19 quando fa-
cta est illa uox: Gaudeamus, et exultemus et demus gloriam ei, quia venerunt nuptiae
Agni.

Quod spectat autem ad tempus nuptialium conviviorum, in scriptu-
ra modo coenam, modo prandium nuptiarum invenio. In Apocalipsi cap 19. Beati
qui ad coenam nuptiarum agni uocati sunt. In cap 22 S. Matthæi nominatur prandium;
Matth. Ecce prandium meum paravi ... uenite ad nuptias. Ego tamen censeo apud ue-
teres communiter non prandium, sed coenam fuisse convivium nuptiale. Quod autem di-
citur a S. Matthæo Aug. Prandium nos putant nonnulli esse illud idem convivium quod Lucas cap
Gregor. hom. 14 coenam vocat. Vel si mavis dicere cum S. Gregorio hom. 38 prandium coenam uocari
[illegible] quod antiquis hora nona, quae ad uesperam et coenam vergit, prandium fiebat.
Prandium igitur vel coenam uoces, parum refert, dummodo tempore inclinante die, vel
adveniente nocte fieri consueuisse. Praeter quae dicta sunt de coena, hoc idem in-
Ausonius nuit Ausonius in Centone Nuptiali describens nuptialem coenam. [illegible] hoc
eo quia completo convivio traducebatur sponsa in domum sponsi, quod non nisi
nocte factum uidebimus paulo infra. Idem Ausonius ibidem [illegible] cunctis [illegible]

Denique tanta erat pompa [illegible] luxuria horum nuptialium conviviorum ut Plato in lib. 6. de legibus [illegible] optimum duxerit statuere numerum convivarum, qui adhiberi possent, ne nimium civium fortunae similibus expensis gravarentur. Amicos, ait, et amicas non plures quinque ex utraque parte convocare liceat. Consanguineorum vero, et domesticorum totidem ex utraque parte accersere. Sumptus vero quam cuiusque fortuna, maior non erit. Sed nunc expleto convivio, quae sequuntur prosequamur. Plato de legg.

Exacta igitur convivii [illegible], choreis, ludis, et quae similia sequi solent pro regionum multiplici usu. Quibus completis sponsus ad domum ducit sponsam suam, quod noctu fieri solebat. Egrediebatur igitur sponsus comitatus a domesticis, et amicis [illegible] numero, [illegible] maior minorve erat prout casus ferebat, Samsoni in lib. Iudicum pro suis nuptiis dati triginta sodales. Hi vero, Iudicum qui in Evangelio filii sponsi vocantur, qui lugere non possunt quamdiu cum eis est sponsus. Inter hos unus aliquis erat nobiliorum, [illegible] sponsus qui se comitaret, quem Graeci Paranymphum dicebant, Auspicem vero Latini ab auspicando. Solebant enim in nuptiis auspicium quaerere, ab avium volatu inspectione, unde auspicium dictum sicuti augurium ab avium garritu. [illegible] a Vincentio Cartario in Imag. Deor. antiq. [illegible] Castoris et Pollucis [illegible] sponsam ad sponsi [illegible] in lectica delata a [illegible], sive [illegible], hoc ordine ut in medio sederet sponsa, ab uno latere sponsus, ab alio Auspex seu Paranymphus. Sicuti autem a parte viri Paranymphus [illegible] ita a parte sponsae [illegible] [illegible] una quam [illegible] Pronubam [illegible] erat sponsam [illegible] comitare. [illegible] apud [illegible] Imag. Deor.

Nocte [illegible] ut [illegible] honestatis, et verecundiae gratia, ut Pererius in comment. [illegible] de Lia substituta nocte a Laban Iacob loco Rachelis, ubi ex Plutarcho dicit ob eandem rationem sponsam nullo [illegible] et non nisi ab aliis delatam viri domum ingredi, [illegible] indicantes quasi non sponte ingredi, ubi mox erat virginitatem amissura. Praecedebant autem quinque puerorum [illegible] faces [illegible] una [illegible] [illegible] Taeda quae est arbor [illegible] generis, vocabant enim has faces Nuptiales Tedas. [illegible] Genes. in hym...

in hunc usque diem vox nuptialis facta, ut Hymenaeus Graecis. Nam proprie nomine Thalasio hoc matrimonium aiunt. Sextius Sylla Carthaginiensis vir nobiscum doctus, et festivus, eam vocem pro signo dedisse Romulum ad raptum. Itaque qui virgines adducebant, conclamabant omnes Thalasio, atque hinc obtinuit hunc morem nuptiis. Plerique, inter quos est Iuba, adhortationem, et incitationem ad laboris sedulitatem, et lanificium, quod Graeci ταλασίαν dicunt, censent nondum id temporis Italicas voces cum Graecis confusas. Quod si hoc placet et Romani tum Thalasii vocabulum nobiscum usurpabant, alia conjectura magis probabilem rationem. nam in foedere, quod Sabini post bellum pepigerunt cum Romanis, convenit ne aliud operae viris quam circa lanificium praestarent uxores. qui mox secutis nuptiis remansit, ut qui elocarent puellas, vel deducerent, vel praesentes essent omnino Thalasio acclamarent per lusum testantes eo nullum aliud, quam lanificium munus sponsae adduci. servatur hinc etiam hodie ne limen sponsa ipsa transcendat in domum, sed sublata inferatur quia tunc illatae non ingressae erant. Addunt quidam, quando coniugibus hastae discriminent capillum sponsae, nuptias dandas ut et hostiliter contractas, de quibus fusius in Quaestionibus diximus etc. omnia Plutarchus. Inter istius erat pompa, apparatus, clamor, et strepitus huius traductionis, habemus in hac materia exemplum in libr. 1 Machab. cap. 9 his verbis expressum. Renunciatum est Ionathae et Simoni fratri eius, quia filii Iambri faciunt nuptias magnas, et ducunt sponsam ex Madaba filiam unius de magnis principibus Chanaan cum ambitione magna.... et ecce tumultus, et apparatus multus, et sponsus processit, et amici eius, et fratres eius obviam illis cum tympanis et musicis et armis multis. Porro quod ait Plutarchus limen sponsam non debere tangere, super ratione mirum est quod ita tangit, siquidem ex veterum alia afferunt. Servius in ecloga 8 Virgilii cui nomen Pharmaceutria sic scribit. Quas (sponsas) etiam ideo limen ait sacro, non tangere, ne a sacrilegio inchoarent si depositurae virginitatem calcarent rem Vestae, idest numini castissimo consecratam. ventilantur quoque ne cardinem postium et ostia quae in limine tenderent [illegible]

in malum omen futurum foret sponsis. Ideoque linibant suino, et caprino adipe fores, et inunctiones cardinum, et postium. Ornabant quoque portas fasciis, et et tabulis ex lana confectis ad malum omen fugiendum. Vide Cartarium ad Imag. Deorum. Antiq. Achilles Statius Lusitanus commentans illud Catulli in nuptiis Juliae, et Manlij: Transfer omine cum bono Limen aureolos pedes affert quosdam versus Lucani in 2° de nuptijs Catonis, et Marciae, qui hos ritus gentilium sic exponunt: Festa coronato nunc pendent limine serta,

Cartarius in Imag. Deor.

Lucanus apud Achillem Statium in Catullum

Infulaque in geminos discurrit candida postes,
Legitimaeque faces, gradibusque acclinis eburnis
Stat torus, et picto vestes discriminat auro,
Turritaque premens frontem matrona corona
Translata vetuit contingere limina planta,
Non timidum nuptae leviter tectura pudorem
Lutea demissos velarunt flammea vultus.
Balteus haud fluxos gemmis astrinxit amictus.

Tanta igitur pompa, et superstitione sponsa deducta recipiebat a conuenientibus aliquod munus. Ausonius in Centone nuptiali sic munerum oblationem describit. Incedunt pueri pariterque ante ora parentum

Ausonius

Dona ferunt, pallam signis, auroque rigentem
Munera portantes aurique, eborisque talenta,
Et sellam, et pictum croceo velamen acantho
Ingens argentum mensis colloque monile.
Baccatum, et duplicem gemmis auroque coronam
Olli serva datur, geminique sub ubere nati.
Quatuor hic iuvenes, totidem innuptaeque puellae
Omnibus in morem tonsa coma, pectore summo
Flexilis obtorti per collum circulus auri.

Huic mos offerendorum munerum alludit quoque Claudianus in Epist. ad Serenam, ubi in nuptijs Orphei fauces ferarum ab ipso symphonia [illegible], et manufactas munera

illi

ille offert, unamquamque cum proportione ad naturam suam. sic lynces ferunt crystalla, Gryphes aurum, Columbae rosas, Cygnus electrum, Pisces corallia, Phoenix cinnamomum, tandem concludit: Nulla avis, pecudumque fuit, quae fingere posset Claudianus.

Vectigal mirtae connubiale lyrae.

Solebant pueri haec munera proferre, ut ex Ausonio nunc vidimus, qui in hac occasione quosdam versus dicebant, quos Fescenninos vocabant, vel a Fascino arcendo vel a Fescennio, quod est Campaniae oppidum, quod ibi inventi sint. Versus erant procaces, et obsceni. Ovidius de his agens 4. Fast. obscenos vocat:

Nunc mihi, nunc cantent, superest, obscena puellae

Dicere nec coeant [illegible], verba canunt — Ovid. Fast.

et infra: [illegible] inde Jovi veteri, obscenaque verba canuntur. &

Catullus, procacem locutionem appellat in nuptiis Juliae, et Manlii: Neu diu taceat procax Fescennina locutio. Neu nuces pueris neget. Ad intelligentiam huius ultimi versus sciendum est a sponso pueris sic clamantibus nuces spargi. Servius in illud Vergilii Mopse novas incide faces, tibi ducitur uxor, sparge marite nuces &c quod est Ecloga 8. sic scribit ex Varrone: Idem Varro spargendarum nucum hanc dicit esse rationem, ut Jovis omine matrimonium celebretur, ut nupta matrona sit, sicut Juno. Nam nuces in tutela sunt Jovis, unde et Juglandes vocantur, quasi Jovis glandes. Nam illud vulgare est, ideo spargi nuces, ut a rapientibus pueris fiat strepitus, ne puellae vox virginitatem deponentis [illegible] audiri vel spargebant nuces, id est ludum pueritiae, ut significarent se puerilia cuncta spernere.

Catullus — Virgilius Eclog. — Varro apud Servium

Post haec cubile ingrediebantur sponsi in quo varia numina deponebant infami religione, consequenda videlicet Deam Virginensem, [illegible] [illegible], Subigum, Priamum Deum et Deam Pertundam. Quorum officia quamvis praesens materia exposcat, fateor non auderem exponere nec quivi-isse minimum modestia et verecundia commonentibus (Proh pudor quo devenit [illegible] gentis petulantissima, et execranda religio) nisi possem uti verbis Sanctissimi Patris Augustini lib 6 de civit. Dei cap 9. Loquatur ergo ipse ciuis nostri

nobilissima pietas more eius nostra sanctificat: Itane est innocentia Deorum ista concordia? Cum mas et femina coniunguntur adhibetur Deus Iugatinus. Sit hoc ferendum. Sed Domum est ducenda quae nubit, adhibetur Deus Domiducus. Ut in domo sit, adhibetur Deus Domitius, ut maneat cum viro, adhibetur Dea Manturna. Quid ultra quaeritur? Parcatur humanae verecundiae. Quid impletur cubiculum turba numinum quando et Paranymphi inde discedunt? Et ad hoc impletur, non ut Deorum praesentia cogitata maior sit cura pudicitiae, sed ut feminae sexu infirmae novitate pavidae, illis cooperantibus sine ulla difficultate virginitas auferatur. Adest enim Dea Virginensis, et Deus pater Subigus, et Dea mater Prema et Dea Pertunda, et Venus, et Priapus. Quid est hoc? Et certe si adest Virginensis Dea, ut Virgini zona solvatur, si adest Deus Subigus, ut viro subigatur, si adest Dea Prema ut subacta ne se commoveat, comprimatur, Dea Pertunda ibi quid facit? Erubescat et eat foras. Sed forte ideo toleratur, quia Dea dicitur esse non Deus. Sed quid hoc dicam, cum ibi sit et Priapus nimius masculus, super cuius immanissimum, et turpissimum fascinum sedere nova nupta iubebatur more honestissimo, et religiosissimo matronarum. Haec aliquibus omissis S. Augustinus

Augustin. de Civit. Dei

Verum enim vero non possum hic nefandis Romanorum caeremoniis opponere quae de Lacedemoniis Plutarchus scriptum reliquit in Lycurgum. Uxores autem ducebant raptas, non pusillas, aut impuberes, sed adultas, et maturas. Raptas excipiebat Pronuba, capillosque eius cute tenus circumtondebat, inde tunica virili et calceamentis indutam, in toro sine lumine solam locabat. Sponsus non vino gravis, nec deliciis confectus, sed sobrius, ut in convivio solito cenatus erat, latenter ingressus solvebat zonam eius, eamque in lecto collocabat. Nec longo ibi spatio commoratus, abibat modeste, consuetoque se cubitum, quo ante fuerat cum ceteris iuvenibus, quem morem deinceps servabat ac transigebat ad coetaneis dies et noctes, ad suam interim commeabat cum pudore, et metu ne quis ex familia persentiret una machinante illa et opportunitates suppeditante, quo in tempore invisi convenirentur. Neque vero ad modicum temporis ita agebant, sed aliqui etiam iam et liberos susceperant quam viderent uxores suas interdiu. Huiusque Plutarchus

Plutarchus

Sic igitur nuptiarum dies terminatur, sed invenio quod tempore s. Gregorii Nazianzeni dies nuptiarum anniversaria lætitia ab uxoratis celebrabatur. Et quidem non miror hoc fuisse, qui matrimonium suum quiete, pace, prosperitate viderent cumulatum, hoc enim ingens donum est, dignum ut festivo ritu prosequatur. Verum quorum matrimonium tot gemitibus, discordiis, dissensionibus, velitationibus refertum est, ut pœniteat ipsos unquam contraxisse, quorum [illegible] exempla sunt passim obvia, et practica nemo ne tali causa diem nuptiarum quotannis transegerint. Refert morem hunc ex authoritate s. Gregorii Nazianzeni s. Franciscus de Sales in suo vere mellifluo et aureo libello introduct. ad vitam devot. part. 3. cap. 38. suadetque uxoratis et catholicis viris, ut sic tenendum scilicet spirituali lætitia diem anniversarium matrimonii sui, commendant Deo se, prolemque suam orationibus commendent, et ~~[illegible]~~ sacramentis pœnitentiæ, et Eucharistiæ se communicent. Ea eius verba, quamvis Gallica lingua, in die tamen satis nota, quia vere aurea sunt, et quæ coronam huic longo capiti sanctiorem imponant: Saint Gregoire Nazianzene tesmoigne, que de son temps les mariez faisoient feste au iour anniversaire de leurs mariages: certes ie approuverois que ceste coustume s'introduisit, pourveu que ce ne fust point avec des appareils de recreations mondaines et sensuelles mais, que les maris, et femmes confessez et communiez en ce iour là recommandassent à Dieu plus fervemment que l'ordinaire le progrez de leur mariage, renouvellans les bons propos de la sanctifier de plus en plus par une reciproque amitié, et fidelité, et reprenans haleine en nostre Seigneur pour le support des charges de leur vocation. Ita s. Franciscus de Sales, cuius optimum documentum omnibus uxoratis semel et iterum esset repetendum. Aliud enim habent gravius, quod ordinat igitur, ut concludam cum Apostolo 1. Cor. 7. 38. qui matrimonio iungit virginem suam bene facit, et qui non iungit melius facit.

De Die Mortis

Cogitanti mihi quid sub hac extrema vitæ nostræ die ex
antiquorum, modernorumque ritibus scitu dignum exponerem, et cum eam ex
varijs scriptorum monumentis nonnulla hinc inde colligerem, occurrit liber quidam
Johannis Kirchmanni Lubecensis, qui longe lateque hanc materiam complexus
est et multiplici eruditione posteritati titulo apposito et ornato de Fu
neribus Romanorum. Illuc Lectorem meum censueram remittendum et à mea tra
ctatione, quam is adeò feliciter expleuerat, supersedendum. Verum enim vero
ne opusculum nostrum qualecunque sit truncum, mutilumque appareat, neue
quod hic dandum promiseram, aliò petere necesse sit, nonnulla ex eodem
Kirchmanno, qui laborem nostrum præueniens à macro exemit, et ex aliorum
scriptorum notis, extracta passim quidam, et contracta apponenda duxi. Quæ
quatenus rituum humanarumque fuerint non nos tanquam de furtiua compilatione
criminabitur, sed rerum fortunas nostras gratulabundus excipiet. Hoc tamen
sciat velim, autoritatis quando testimonijs hic, sicut et alibi, usus fui, et quasque
nos alios non dixerim perlegisse, è proprijs fontibus hausisse me credat.

Igitur qui nascimur morimur, estque immutabile naturæ
vestigium sensus quidem vel alius ocultum, sed tamen certum mori. Hoc tam
stricto terminum adaequauit, Aristoteles, hoc ij qui vitæ futuræ non no
verunt vel corporum resurrectione non expectarunt, supremum malorum esse
est. Neque enim viuentibus nequius auditu potest, quam non viuere, ut

prosequebantur. Nos autem qui cælitus edocti credimus quod corrupti
bile hoc induet incorruptionem, et mortale hoc induet immortalitatem non con
tristamur sicut et cæteri qui spem non habent. Non contristamur, inquam
sicut et cæteri. Nam quamquam semper in Ecclesia catholica visum est charos
nostros amores doloris testimonio prosequi, ... tamen nunquam con
tristari sicut et cæteri. Viros sanctissimos laudabiliter amicos, vel parentes nos fle

In martyrol. Roman. ad diem 17 recensetur memoria S. Juliani Cappadocis

Martyrol. Rom. qui exosculabatur necatorum martyrum corpora. In quem locum annotavit Baron. in not. Baronius consuevisse Christianos osculari sacra martyrum vulnera. Afferunt quoque Constantini Magni Imperatoris exemplum lacera cicatricibus sanctorum Martyrum admoventis.

Solebant insuper morientibus annulos e digito detrahere. Plinius lib. 33 cap. 1. Gravatis somno aut morientibus annuli detrahuntur. De

Plinius usu annulorum origo, et qui eos ferebant et quomodo in usu apud legere Plinium

[illegible] Sueton. [illegible] quod apud Suetonium legitur in vita Tiberii cap.

Suetonius 73 extractum sibi deficienti annulum mox resumere requisivit. Hoc in more fuit

fundatum est omen mortis, quod Ælius Spartianus in vita Hadriani circa finem subit defectionem huius imperatoris portendisse. Annulus, ait, in quo imago ipsi- us sculpta erat, sponte de digito delapsus est. — Ælius Spartianus

Sed ut a morientibus ad mortuos veniamus, prima circa ipsos offi- cia a charioribus quidem praestari solita meminimus fuisse oculos defuncti clau- sere. Inde ut lib. 3. Trist. Eleg. 3 dolet quod si in egritudine qua ad vxori ibidem pergit, decumbere, desijsset, non fuisset qui sibi oculos clauderet. Nec ait clamore supremo: Languentes oculos claudet amica manus. Et idem vates in Heroidum epistola Penelopes ad Ulyssem de Telemacho, quam lo- quentem sic facit: Di precor hoc iubeant ut euntibus ordine fatis — Ovid Trist. — Ovid Heroid.

Ille meos oculos comprimat, ille tuos.

Et quidem huic usui allusit Bion Borysthenites qui ut refert Laertius lib. 4. in Bione, dicebat facilem esse ad inferos viam: clausis enim oculis illuc iri. Mater quoque Euriali apud Virgilium Æneid. 9. lamentatur in nece filij — Laertius

nec te tua funera mater

Produxi, pressive oculos, aut vulnera lavi. — Æneid. lib. 9

Dolens hæc mater non lavisse vulnera ostendit aliud officium cir- ca mortuos praestitum, lotionis scilicet cadaveris. Habemus exemplum in scriptu- ra Act. 9. ubi de Tabitha dicitur: Quam cum lavissent, posuerunt eam in cenaculo. Ludebat in Gentiles circa morem hunc Tertullianus ubi dicebat in Apologet. cap. 42. Rigeo, et pallore, ut lavacrum mortuus patiar. Hoc lo- tionis officium mulierum videtur fuisse praestitum apud Athenienses. Socrates enim in Platonis Phædone venenum bibiturus sic loquitur. Nam melius puto post- quam bibero, lavari quam ut mortuum mulieribus negotium facessere, ut mortuum lavent. Ennius etiam lib. 6 de cadaveri [illegible] Tarquinij corpus bona femina lavit et unxit. Et paulo supra idem Ennius — Act. Apost. — Tertullian. — Plato in Phæd. — Ennius lib. 6 — Servius — Ennius — Plinius

[illegible] admonuit Plinium in naturali historia [illegible] hanc esse causam ut mortui et- iam

calida abluantur, et per intervalla conclamentur, quod solet plerumque vitalis spiritus exclusus putari, et homines fallere. Una igitur poterat esse huius lotionis causa, non tamen sola. Puto enim lavisse cadavera ut sanie taboque mundarent, nunquam ea horrescerent aspicientes, vel qui ad spectandum mortuum veniebant. Hoc videntur sibi voluisse moderni Turci nam non contenti lavisse cadaver, faciem eius coloribus pingunt ut vindicata naturae deformitate, quantum liceat viventis quandam speciem repraesentet ut narrat Schweiggerus in Itinerario lib. 2 c. 64 apud Kornmannum in [illegible] lib. 2 cap. 3 2. Accedit et alia lotionis causa nempe ut sit dispositio ad unctionem. nam ut dictum est de Miseno, corpusque lavant frigentis, et unguunt.

Schweiggerus apud Kornmannum

Innumera usquequaque sunt unctionis cadaverum testimonia. Hoc Aegyptii a quibus ad caeteras nationes ritus transiit, hoc Hebraei, hoc Romani hoc Christiani in usum habuere, exemplis ostendere non est multum immorari. Hodieque quod in demortuis familiae Magnatorum sic unguentis cadavera condiant, praescribitur in Ceremoniali Episcoporum unctio et exenteratio cadaveris Episcopi. Hic primitivae Ecclesiae nostrae mos fuit. In actis enim SS. Martyrum saepissime eorum cadavera a piis matronis unguentis delibuta, aromatibus condita leguntur. Tertullianus hoc idem nedum circa solos martyres verum indiscriminatim factum insinuat in Apologetico cap. 42 his verbis: Thura plane non emimus. Si Arabiae queruntur, scient Sabaei pluris et carioris suas merces Christianis sepeliendis profligari, quam Diis fumigandis. Apud Romanos unctio cadaverum in usu fuisse testis est Plinius lib. 13 cap. 1. Honos iis (unguentorum) et ad defunctos pertinere coepit. Et Martialis huic non alludit lib. 3 epig. 12 in Fabullum qui parcam coenam praebuerat, sed unguentis copiosam:

draginta dies, ita quippe mos erat cadaverum condituram[?] fleritque eum Ægyptus septuaginta diebus. Herodotus lib. 2. apud Perer. ut condituram hanc usque ad septuaginta dies producat, distinguit ipse fortasse unctionem a salitione, quæ sic diu producebatur. Audiamus eius verba, quæ ritum hunc Ægyptiacum clare exponunt. Ante omnia, inquit, incurvo ferro cerebrum per nares educunt, et quamque partem educentes, ita loco eius medicamentis explentes. Deinde acutissimo Lapide Æthiopico circa ilia concidunt, atque illac omne alvum extrahunt. Quam ubi repurgaverunt, ac vino Phœnicio explenderunt, rursus odoribus contusis reficiunt. tum omenta complentes contusa myrrha pura, casia, et ceteris, excepto thure, odoribus iterum consuunt. Ubi hæc fecerunt, saliunt intra additum septuaginta dies nam salire diutius non licet exactis septuaginta diebus, cadaver ubi abluerunt sindone byssina totum incisis loris involvunt gummi illinientes quo et ipsi glutinis loco plerumque utuntur. Eo deinde recepto propinqui ligneam hominis effigiem faciunt, in quam mox inferunt mortuum inclusumque thesaurizant. Hoc ibi reponunt. Quæ autem essent huius unctionis ministri videamus ex Diodoro Siculo lib. 2. cap. 5. apud eundem Perer. l. c. Eorum vero qui corpus mortuorum curabant alii erant scissores, qui Lapide quodam Æthiopico latus corporis mortui incidebant quo alvum exinaniebant, et purgabant. Hi non solum contempti verum etiam exosi, et execrati erant apud Ægyptios, quapropter facta scissura, inde celeri fuga evadebant valide insequentibus qui ardebant lapidibus cum execratione in eos iacentibus, scilicet existimantibus amici corpus violare, illato

Lege Perinum in cap. 5 o Dent. qui addit Romanos Libitinarios appellasse eos qui habebant, aut vendebant quae ad pompas funebres erant necessaria vel qui curam habebant sepeliendorum funerum tracto nomine à Libitina Dea, in cuius aede asservabantur, quae ad instructionem funebrium comparanda erant necessaria. Addit autem habuisse Libitinarios domi servos quorum opera utebantur ad pollinciendum, hoc est ad abluenda, ungenda, et curanda cadavera qui Pollinctores nominabantur à polliendis cadaveribus. Designatores autem dicebantur, qui ordinabant pompam funebrem, cuique locum, et modum incedendi praescribentes. Haecusque ex Perinio. Nuda [illegible] cadavera et nuda terrae committere nulla natio quae inter cultas recenseatur passa est. Hebraeos quidem mortuos indumentis [illegible] operuisse et linteis colligasse habemus ex Joanne cap. 19. ubi corpus Salvatoris ligatum linteis sicut mos est Judaeis sepelire et sindone munda involutum fuisse testantur Matth. 27. et Marc. 15. Ipse etiam Joann. cap. 20 testatur ingressum sepulchrum se vidisse linteamina posita, et sudarium quod fuerat super caput eius. Lazarus quoque fasciis manibus, et pedibus, et vultu sudario alligatus. Et statim prodiit, ait idem Joan. cap. 11, qui fuerat mortuus ligatus manus et pedes institis et facies eius sudario erat ligata. Tempore Job, qui antiquior 170 [illegible] fuit, [illegible] quae ante legem scriptam vixerunt cadavera neque ad nuditatem [illegible] [illegible] sindone aliove [illegible] [illegible] verum propriis vestibus videntur fuisse induta, si credimus Origeni qui sensit in illud Job cap. 1. 20. Tunc surrexit Job, et scidit vestimenta sua [illegible] [illegible] morem veterum vestes cadaverum [illegible] ne [illegible] ad eas rapiendas alliceret. Sunt eius verba apud [illegible] Œconom. cap. 4. lib. 2. Scidit vestimenta sua [illegible] dicens ad ipsos adversarios [illegible] malignus, atque improbissimus adversarius mortuum me existimatis, et in terram me sepelire paratis. Si ergo me mortuum existimatis [illegible] in [illegible] [illegible] meam sepulturam [illegible] [illegible] atque [illegible] meas vestes, ut nec [illegible] mortem gaudeatis eas possidentes. Puto quod ex illo convenerunt homines, ut [illegible] vestem ad sepulturam [illegible] morienti [illegible] eam, ne aliqui videntes, et ipsum corpus proiiciant et ipsam [illegible] vestem [illegible] possideant. Verum haec forte per anticipationem dixit Origenes et sui temporis morem potius, quam Jobi exposuit. [illegible] dem non hanc conditionem [illegible] [illegible] Job [illegible] videtur ex eo quod numero sequenti statim addit: Nudus egressus sum de utero matris meae et nudus revertar illuc.

In magna parte Italiae admittimus factum, ut non nisi mortui togam induerent; non
tamen Romae. Romanorum enim communis vestis toga erat unde Romanos gentem

Narravit nobis [illegible], non multis ab hinc annis mulierculam quandam
cum audisset in morbo, quo gravabatur fore ut cito moreretur, statim a lectulo
surrexisse (non enim omnibus viribus destituta erat) ad arcam, ut perrexisse inde
induisse vestem, aliaque ornamenta extraxisse, quibus mortua indueretur tan-
ta animi indifferentia, ut non mortem, sed forme nuptias, vel quid simile [illegible].
Verum

Verum parum est vestem sibi parare, cum et ipsa induti mortem quam a manu violenta expectabant, occurrisse, exempla habeamus. Sufficit alterius sexus unicum in medium ferre. Inter foeminas Olympias (sic scribit Justinus lib. 14. in fine) ubi obstinatos venire ad se armatos vidit, veste regali, duabus ancillis innixa, ultro obviam procedit. *[margin: Justinus]*

et paulo infra: Insuper expirans capillis et veste crura contexisse fertur, ne quid posset in corpore eius indecorum videri. Inter viros autem sit Socrates de quo sic scribit Laertius lib. 2 in eius vita. Sic qua cicutam bibiturus erat, Apollodorus ei pallium pretiosum obtulit ut in illo moreretur, et ille, Quid, inquit, num pallium meum vivendi conveniet, et vita functo non conveniet? his verbis innuens se ita ad mortem indutum esse, et quidem propria veste, neque indigus expectasse alienam. Colorem autem togae in ~~[illegible]~~ ~~[illegible]~~ iis, qui ab officio, vel dignitati non aliter cogerent, album fuisse puto. Hoc innuit Artemidorus lib. 2. cap. 3 apud Kirchmannum lib. 1. cap. 10 dum ait: Aegrotanti albas habere vestes mortem denotat. Propterea quod mortui in albis vestibus efferuntur. Et Homerus in 18 Iliad. de Patrocli funere loquens paucis his verbis hoc factum indicat. Poetae verba ibidem recitat in Latinum versa Kirchmannus *[margin: Laertius; Artemidorus apud Kirchm.; Homerus apud eundem Kirchm.]*

In lecto autem imponentes linteo subtili texerunt

Sed a vestitu discedentes reliquum mortui cultum expediamus. Inter caetera cadaveris ornamenta erat et corona. Non est hoc vestrum in dubium praecipue circa eos, qui in vita aliquando corona donati fuerant, ut constet ex Lege duodecim Tabularum a Plinio lib. 21 cap. 3 relata hoc sancitum fuisse. Joannes Kirchmannus quem in hac re ducem sequimur, in lib. de Funeribus Romanorum lib. 1. cap. 11 affert verba huius legis iuxta emendationem Ursini, et ea explicat. *[margin: Plinius hist.]*

mortuis coronas datas fuisse videtur non obscure posse colligi ex Tertullia-

Sic cadaver conditum et ornatum in Lecto [illegible] collocabant, omniumque oculis exponebant, ut quicumque vellet cernere posset non vi illatam mortem obiisse. A domesticis, consanguineis, vel haeredibus, in quos suspicio illatae violentae cadere posset, factum videtur.

Nec deerant in ipsa domo funeris insignia. Romani Piceam et Cupressum ad fores ponebant ad luctum, moeroremque pro mortuo indicandum. De Picea scribit Plinius lib. 16 cap. 10 Picea feralis arbor, et funebri

Quod haec è Græcis authoribus depromptum exponit Kirchmannus lib. 1 cap. 14. Additque in confirmationem utriusque ritus versus quosdam apud Euripidem in Alceste, latino datos sic: <u>Non video ante portas, ut lex est, fontana lavacra pro mortuis in porta. Nulla coma præcisa est in vestibulo, quæ accidunt in luctu mortuorum.</u> Kirchmannus / Euripides apud Kirchmannum

Ægyptii alia signa luctus dabant non in domibus exposita, sed in se ipsis. Audiamus Herodotum, et Diodorum utrosque lib. 2., quorum verba vertit Pererius in Daniel cap. 50. disput. 2. Defuncto aliquo domestico et necessario, præsertim alicuius momenti, omnis muliebris sexus familiae caput sibi, et vultum obliniunt luto. Deinde relicto domi cadavere, quæ per urbem vagantes se plangunt, succinctæ, nudatisque mammillis. Alterum ex parte viri, et ipsi expectorati se verberant, lugentque vociferantes, quoad mortuus sepeliatur, circumeunt, interim neque lavantur, neque vinum, aut cibum, nisi vilem sumunt, neque vestibus utuntur splendidis. Herodotus et Diodorus apud Pennum

Hoc ultimum mihi suggerit observantiam quorundam nostrorum rusticorum, qui in signum luctus præsertim coniugii, per annum barbam non radunt. Radenti autem eundem ante annum completum, cæteri illius pagi multis verbis pariter defunctum dilexisse hunc ominantes impatientiam radendi non semel exprobrarunt. Communiter apud nos Catholicos signum funestæ domus inter privatos est ad ostium (quod si ~~[illegible]~~ non plebeium est claudi solet ut tumultus arceatur) opertorium area, in qua ipsum cadaver locatur, ponere. Magnatorum autem domus vestibulum, et limen ostii communiter nigris tegitur. Aulæ autem, cubiculorum, et totius domus ~~[illegible]~~ ornamenta vel tolluntur, vel ad parietem convertuntur, ut aulææ pictæ, strata ~~[illegible]~~ tapetia, stragula aut picta, vel aurata pelles, et si quæ huiusmodi sunt, quibus domorum parietes vestiuntur. In morte Episcopi in ipsius domo hæc fieri præscribitur in eod. Ceremoniale Episcoporum. Ceremoniale Episcoporum

Jam expletis, quæ funus præcedunt, ea, quæ funus comitantur, danda sunt. Quæ in re ut ordo servetur distincte notanda sunt duo, nempe ipsa elatio cadaveris, et sepultura. Et quoad elationem non nulla quoque sigillatim sunt perpendenda. Quæ ut clarius intelligantur videndæ prius sunt ipsarum funerum diversitates. Duo primaria erant apud veteres funerum genera, Indictivum scilicet funeris et Taciti. Indictiva ab eo, quod indicebantur publice, et cum pompa facienda, Tacita vero quæ sine apparatu et rumore fiebant. Indictivorum meminit inter alios Suetonius in Julio Cæsare cap. 84 funere indicto ~~[illegible]~~ rogus extructus est in campo martio. et Varro lib. 4 de lingua latina. Ex ædibus efferri indictivo funere præco etiam eos dicit qui a tabernis efferuntur ubi dicta a præcone funus indici. Huc pertinet funus publicum, quod aliquando unum est indictivo aliquando si non indicebatur non absimili tamen pompa factum autumo. Hoc magnatorum erat, et divitum, [illegible] publicum funus Syphaci datum a senatu ait Valerius Maximus lib. 5 c. 1 n. 1. Syphacem quondam opulentissimum Numidiæ Regem captivum in custodia Tiburi mortuum publico funere senatus censuit efferendum, ut vitæ dono ~~[illegible]~~ honorem sepulturæ adjiceret. Et Suetonius in Vitellio cap. 3 de eius Patre Defunctum, ait, senatus publico funere honoravit [illegible] et hoc ob[illegible] servatum colligitur ex Laertio lib. 9 in Democrito dum ait [illegible] functum publice sepultum esse. ~~[illegible]~~ Publica autem funera non unius ordinis erant, sed varia pro defunctorum conditione et dignitate ut Prætoria, Consularia, Censoria, Triumphalia, ut ex Polybio supra relato non obscure colligi potest. Funere Censorio tanquam omnium dignissimo [illegible] prosequebantur. Tacitus lib. 4 Annal. de funere Lucilii Longi scribit. Ita quamquam novo homini Censorium funus effigiem apud forum Augusti publica pecunia Patres decrevere. Et idem lib. 6 de funere Ælii Lamiæ ait. Hec quoque vulgaria funera dicuntur à Iulio Capitolino in Antoninum Philosophum. De quo ita sic scribit: Tanta clementia fuit ut et sumptu publico vulgaria funera iuberet ex eo fieri. Sunt etiam huiusmodi quae translatitia dixit Suetonius in vita Neronis cap. 33. loquens de morte Britannici: Postero die, ait, raptim inter maximos imbres translatitio extulit funere. Erant haec communia, et plebeia dicta, quippe quae non nisi humilis fortunae genti fiebant. Inter tacita funera acerba, et immatura recensentur. Utraque recenset Iuvenalis sat. 11. His de diversitate funerum notatis clarius quae dicenda sunt intelligantur. Unde etiam ludi, qui in honorem mortuorum celebrabantur, novendiales dicuntur. Si igitur domi septem diebus cadaver iacet, non nisi octavo ad incensionem effertur. Tantundem autem spatium temporis usque ad elationem datum credo, ut pompa funeris posset rite disponi. Quamobrem tempus huius septem dierum non nisi in funeribus indictivis, et publicis intercessisse autumo. Quandoquidem apparatus et pompam funera tacita non poscebant. Qui rectius locuti sunt sicinnistas littera n gemina dixerunt. Sicinnium enim genus veteris saltationis fuit saltabundi autem canebant quae nunc stantes canunt. Dixi fœminatim cantasse ad distinctionem Praeficarum, quae ista voce neniam dicebant. Nam praefica erat mulier pretio conducta ad mortuum lugendum. eratque ea, quae cantui funebri praeerat, et cantum dirigebat aliaeque ab eius ore et voce pendebant. Unde istam prius ceteris ac ceterorum direptionem canere oportebat. Festus apud Kirchmannum lib 2 cap 6 ait. Praeficae dicuntur mulieres ad lamentandum mortuum conductae, quae dant ceteris plangendi modum. Earum autem carmen Nenia dicebatur. Idem Festus apud eundem Kirch. ibidem Nenia est carmen, quod in funere laudandi gratia cantatur ad tibiam. Praeficae autem distinguebantur a Funeris. hae enim consanguinitate habebant ad mortuo, atque cadaveris curam gerebant. Unde Servius in illud Virgilii Æneid. lib 9. Nec te tua Funera mater produxi. Funera idest funerea. Nam apud maiores funereas dicebant eas, ad quas funus pertinet, ut sororem, matrem: Nam Praeficae sunt planctus principes, non dolores. Ad hoc etiam statuit vocandos quinquaginta partim cantores, partim variorum instrumentorum pulsatores. Et quia de Lugentium coloribus sermo est, non possum ommittere quod de Herode sophista narrat Philostratus in principio lib. 2. de vitis sophistarum, relatus a Menochio in Œconomica lib. 8 cap. 2 n. 2. Mortua huic Regilla uxore accusatur in iudicio a Cognato partem in morte eius habuisse eo quod cum esset octo mensium pregnans iussit Liberto Alcimedonti nomine eam verberari, quod ultra modum faciens, moritur. Herodes ne crederetur necis particeps omnia doloris, amorisque erga coniugem conatus signa dare, Luctumque nedum ultra morem, sed prope ridiculum instituit. Nam atratus domi degit. Parietes atratos fecit nigroque illinit colore. Postes, et ianuas et quicquid domi habebat pullo vestiri [candida et puellarum ornamenta et nigra reddidit] degit. Conabantur amici a dyro luctu removere, sed frustra. Cum quadam die a domo eius recessisset Lucius, qui eum consolatum venerat, sed inaniter, videretque prope fontem Libertos Herodis Raphanos albos lavantes. Cuinam parantur inquit. Respondentibus Herodi. Non albos Raphanos, inquit ei qui in sic atro degit Luctu, sed nigri quicquid sunt, sic vanitatem migrorum eius insultans. Hoc dictum sit ad qualitatem coloris luctus confirmationem. Nostri quoque mos fert, ut per annum in propinquorum et consanguineorum funeribus, per annum autem dimidium plus, minusve prout vicinitas consanguinitatis, affinitatisve petitur, similem colorem in vestibus proferamus.

Sed iam ad alias, et nostri luctus veniamus. Mulieres demittere comas per collum incomptis solutas, quae alioquin vitta colligant. Liquet ex illa sorore Horatiorum apud Livium Decad. 1. lib 1. quae cum esset desponsata uni ex Curiatijs visis in humeris fratris paludamento sponsi, quod ipsa confecerat, per hoc sponsum mortuum intelligens, soluit crines et flebiliter nomine sponsum mortuum appellat. Et Ovid. Heroid. 10. quae est Ariadne Theseo: Aspice demissos lugentis more capillos. Verum parum est demittere; Lacerabant comas. Ovid. lib 6 Metam. fab. 8 Passos laniata capillos Lugenti similis. Ad mortem Alexandri dolorem significaturi Persae comis suo more detonsis in lugubri veste cum coniugibus, ac liberis, non ut victorem et modo hostem, sed ut gentis suae iustissimum regem vero desiderio lugebant, ut scribit Q. Aliquando tamen contrarium factum constat ex Servio in illud Aeneid. 11 ductores tollunt in agros urbique remittunt qui sic ait: Hominum antiquae consuetudinis nam ante etiam homines in civitate sepeliebantur. Quod postea Duillio Consule senatus prohibuit, et legavit, ne quis in urbe sepeliretur. Inter Imperatores autem et Antoninus Pius intra urbes sepeliri mortuos vetuit, ut scribit Julius Capitolinus in eius vita paulo ante finem.* Sed non nimis ab urbe dissita esse sepulchra liquet ex Ovid. 3 Trist. 3, qui ad uxorem scribens sic ait:

Ossa tamen facito parva referantur in urna:
Sic ego non etiam mortuus exul ero.
Atque ea cum foliis, et amomi pulvere misce,
Inque suburbano condita pone loco.

Immo et aliquando intra ipsam urbem praecipue insignibus viris et bene meritis sepulchra data sunt. Servius loco paulo ante laudato sic addit: Unde Imperatores, et Virgines Vestae quia legibus non tenentur, in civitate habent sepulchra. Denique etiam noxiae Virgines Vestae licet vivae, tamen intra urbem in campo Scelerato obruebantur. Quod nos quoque docet Plutarchus in Numa: Stupro vero corrupta viva ad portam quae Collina dicitur defoditur. Tumulus ibi intra muros terrae est in longum porrectus, Agger Latino sermone vocatur. Verum a Romanis ad alias gentes descendo. Athenienses sepulchra habuisse extra urbem liquet ex Epistola Servii Sulpitii ad Ciceronem missa, quæ est Epistol. famil. libr. 4. epistol. 12. ubi scribit Marcellum Pugione a P. Magio necatum se procurasse, ut intra urbem Athenienses permitterent se sepeliendum quod non obtinuit. Locum sepulturæ (sunt eius verba) intra urbem ut impetrarem non potui, quod religione se impediri dicerent, neque tamen id antea cuiquam concesserant. Hoc et Sicyonios observasse liquet ex Plutarcho in Arato, cuius cadaver, Sicyonii tumulandum curabant. cum fato functus esset, contendereque, Achæi illic ut iusta ei monumentaque ex dignitate fierent, calamitosum duxerunt Sicyonii, nisi condendum corpus apud ipsos foret, flexeruntque Achæos ut id permitterent. Quia vero vetus lex humari quemquam intra muros suos vetabat, et gravis adiuncta legi erat religio, Delphos miserunt de consulendo super ea re vatem. Apud Syracusanos extra urbem posita sepulchra colligimus ex Cicerone lib. 5 Tuscul. quæst. paulo post medium, ubi Archimedis sepulchrum quæsisse profitetur. Cuius ego quæstor (sunt eius verba) ignoratum a Syracusanis cum esse omnino negarent, septum undique, et vestitum vepribus et dumetis indagavi sepulchrum. Ego autem cum omnia collustrarem oculis (est enim ad portas Agragianas magna frequentia sepulchrorum) animadverti columellam non multum e dumis eminentem &c. Ad Judæos porro venio. Non est autem ambigendum eos extra urbes sepulchra habuisse. Colligitur ex cap. 19. Numeri. Si quis in agro tetigerit

Numer. cadaver occisi, aut sepulchrum immundus erit septem diebus. In quem locum scribens [illegible] a Lapide, sic ait: Summa apud Judæos immunditia erat cadaverum, adeo ut tangentes sepulchra essent immundi septem diebus. Hinc ipsi sepulchra habebant non certo tempore, nec in urbibus ne in ea incurrendo pollueren[tur], sed extra eas in agris et locis separatis. Præcessit in exemplum magnus ille Patriarcha Abraham qui ut legitur Gen. c. 23 ad sepeliendam Saram uxorem suam emit ab Ephron speluncam duplicem ~~[illegible]~~ quam habebat in extrema parte agri sui, quæ respiciebat Mambre, hæc est Hebron in terra Chanaan quæ [illegible] [illegible] [illegible] in [illegible] ibi, et filii, nepotesque eius. Ibi sepelierunt eum, et Saram uxorem eius. Ibi sepultus est Isaac cum Rebecca coniuge sua. Ibi et Lia condita iacet. Ex Evangelio autem hoc manifestissime colligitur. Luc. 7. 12. cum Jesus appropinquaret portæ civitatis, Naim, ecce defunctus efferebatur. Marc. 5. 5. de [dæ]moniaco ille semper in monumentis et montibus erat in regione Gerasenorum. Joan. 11. sepulchrum Lazari erat extra Bethaniam. Et idem 19. sepulchrum Domini Jesu, quod erat Joseph ab Arimathæa, erat in loco ubi crucifixus fuit nempe in horto non dissito. Matth. 27. Quia [illegible] annis 1681 antiquam urbe, in qua initio degebant, inde expellerentur, locus ille extra urbem erat. Factum est autem ut crescente eorum numero, area locum illud quod coluerunt, et prajunxit cuiusdam familiæ [illegible] cognomine Agricola murus hunc inde urbis remansit. Hæc ita fuisse de sepulchro Hebræorum, [illegible] satis probabiliter censeo hoc est primo extra deinde intra fuisse, servatumque postea Hebræis ius mortuos suos sepeliendi, ubi maiorum ossa reposuerant. Hæc ultima verba. Romani intra urbem habuere communia sepulchra ex dictis legibus. At tamen ex nova urbis structione sepulchra extima, intima facta sunt. Hoc igitur ex eadem ratione Urbis Hebræis evenisse credibile est.

Nunc ad eos qui intra urbes mortuos sepeliunt, venio. Et quo veteres Romanos olim id factum liquet ex dictis supra, quod confirmat Severus in cap. 50. Memorabile eorum dicta veniret Cicero inquit quaest. Tusc. I. Theodorus Cyrenaeus cui Lysimachus rex crucem minaretur, istis quaeso inquit ista horribilia minitare purpuratis tuis; Theodori quidem nihil interest humine an sublime putescat. Socrates cum de immortalitate animorum disputavisset et iam moriendi tempus urgeret, rogatus a Critone quemadmodum sepeliri vellet, multam vero inquit operam amici frustra consumpsi; Critoni enim nostro non persuasi me hinc avolaturum neque quicquam mei relicturum. Verum tamen si me assequi potueris, aut sicubi nactus eris, ut tibi videbitur sepelito. Durior Diogenes et id quidem sentiens, sed ut Cynicus, proiici se iussit inhumatum. Tum amici: Volucribus et feris? Minime vero inquit, sed bacillum propter me, quo abigam, ponitote. Qui poteris, illi? non enim senties. Quid igitur mihi ferarum laniatus oberit nihil sentienti? Praeclare Anaxagoras, qui cum Lampsaci moreretur, quaerentibus amicis velletne Clazomenas in patriam, si quid accidisset, afferri; Nihil necesse est, inquit, undique enim ad inferos ~~tant~~ tantundem viae est. Haec contracte ex Tullio. Sed notum est singulari hominis, quod hac in re philosophia de-

Sed efferatos mores perstringamus. Videamus tantummodo cur Persæ, et Ægyptij defunctorum corpora non cremaverint, quod ab ethnicis barbaris passim factum hic infra indicabimus. Herodotus lib. 3. apud Persarum [illegible] rationem affert his verbis: Neque apud Persas, neque Ægyptios mos est ut cremari cadavera. apud Persas quidem quoniam illi arbitrantur ignem esse Deum; nefas ducebant cadaveribus pasci Deum, apud hos vero quod persuasum illi habebant ignem animatam esse bestiam et omnia quæ nascuntur devorare, et postquam devoratis fuerit expleta una cum rebus devoratis ipsam quoque emori. Herodotus apud Persas [1]Reges [2]Persarum

Inspiciamus Græci, Romani, et Judæi, apud quos veteris ritus fuisse invenio et humationem et combustionem. Et quantum ad Græcos in testimonium unum dictum ex [illegible] Platonis Phædone: Ut Crito facilius ferat et videns corpus meum aut ~~humo mandari~~ comburi, aut humo mandari [illegible] minime indignetur [illegible] acerba [illegible] eodem [illegible] affirmat hoc Græcorum philosophorum [illegible] de ritu [illegible] quos narravit, [illegible] in [illegible] quid. More tulere patrum &c. his verbis: Nam Heraclytus, qui omnia vult ex igne constare dicit debere corpora in ignem resolvi. Thales vero, qui confirmat omnia ex humore procreari, dicit obruenda corpora, ut possint humore resolvi. De Romanis Plinius lib. 7. cap. 54 docet utrumque et humationem et cremationem apud ipsos locum obtinuisse. Ipsum cremare apud Romanos, ait, non fuit veteris instituti: terra condebantur. At postquam longinquis bellis obrutos erui cognovere, tunc institutum. Et tamen multæ familiæ priscos servavere ritus, sicut in Cornelia nemo ante Syllam dictatorem traditur crematus, idque eum voluisse veritum talionem eruto C. Marii cadavere. Sepultus intelligitur quoquo modo conditus, humatus vero humo contectus, [illegible] neque unquam [illegible] habuisse [illegible] scriptum, colligo, quamquam [illegible] in c. 50 [illegible] dicat: In populo [illegible] morem cremandi mortuorum corpora nunquam fuisse legimus et quam Plato Phæd. quantum ad humationem cadaveris Lazari in monumento, et ipsius salvatoris hoc manifeste evincunt, praeter innumera alia, quae consulto omitto. Combustos quoque mortuos exemplis declaro 1 Reg. 31. habitatores Iabes Galaad tulerunt cadaver Saul et cadavera filiorum eius de muro Bethsan, veneruntque Iabes Galaad, et combusserunt ea ibi. 2 Paralip 21. 19. Ioram mortuus est in infirmitate pessima, et non fecit ei populus secundum morem combustionis. Ierem 34. 5. In pace morieris, sed et secundum combustiones patrum tuorum regum priorum qui fuerunt ante te sic comburent te. Hic igitur nationis utrumque fuisse usum est, et cremasse scilicet, et incineratos humasse. Verum sicut apud Hebraeos certe communem sepulturam humatione factam, et non nisi raro, ut pro [illegible] Regibus, combustione; Ita apud Graecos, Romanosque aliquando communiter combustione et non nisi raro humatione mortuos suos [illegible] dedisse sepulturae. ut infantibus et fulgure tactis qui non comburebantur. Plinius lib. 7 cap. 16 Hominem priusquam genito dente cremari mos gentium non est. Idem de Fulguratis lib. 2 c. 56 Hominem ita exanimatum cremari fas non est. Condi terra religio tradidit. Combustionis usus apud Romanos iam Macrobii tempore exoleverat. Nam ipse lib. 7 c. 7 Licet urendi corpora defunctorum usus nostro saeculo nullus sit, lectio tamen docet &c. Catholici vero cadavera incombusta damus. Hispanique ubi censetur combustio ea propter non nisi in haereticos et flagitiosos homines exhibetur a Iudicibus.

Quonam autem modo combustio ista, et qua causa a veteribus fieret, generatim ex propria eandem antiquitatis monumentis in plane deducimus. Causa erat, quia putabant igne spiritum si quis in cadavere vellet impeditus detinebatur, eundem liberari posse, et a detentione vindicari. Hac ex mente Heracliti supra vidimus. Hoc quoque exposuit Ovidius in Eleg. 4 lib. 1 Trist. Spiritus hic vacuas prius extenuandus in auras

ibit, et in tepido deserit ossa rogo; &c

Ritus autem combustionis paulo altius perstringamus.

[illegible] litteris initialibus [illegible] factum H R I P [illegible] quod Kirch-manus lib. 3. c. 9. sic interpretatur Hic Requiescit In Pace. ~~[illegible]~~ [Valerius Probus apud Kirchman.]

Sed quid quaero? nonne haec quae modo dicta sunt maximam analogiam habent cum ea, quae Ecclesia catholica cum suis defunctis facit. Et enim aspergit aqua tumulos, [illegible] incendit thura, et discedendo a funeratione Requiem aeternam precatur defuncto, aut Requiescat in pace. Vides quantum pia mater, et prudens, fuerit sollicita non omnino tollere ea, quae a Gentilibus [illegible] evellere [illegible] sine [illegible] animarum iactura [illegible] commode poterat, sed [illegible] ea sanctificare, et quae prius superstitione [illegible] religione suggerente, et pietate sanctiore essent [illegible]. Sed notandum, quod hoc votum in pace requiescendi non expectatur tantum a sacerdotibus. Quidam [illegible] hoc [illegible] et inter [illegible] Ulmensi sacerdoti P. [illegible] a [illegible] frater iubebat aspergi aqua benedicta [illegible] Requiem aeternam. Alii hoc votum in sepulcrali lapide [illegible] inscriptionem ponentes: Requiem aeternam dona ei Domine et Lux perpetua [illegible] requiescat in pace. Horum exempla passim videntur [illegible]. In vita S. Angilberti, quam ex Anselmo [illegible]

Monaco sub die 18 Februarii in suis Ephemeridibus recitat P. Hieronymus à Basilica Petri; dicitur quod in detectione cadaveris huius sancti inventa fuit in capite haec inscriptio quatuor ~~titulis~~ monosyllabis: Rex, Lex, Lux, Pax. Alludebant haec Britannico quondam olim facto quod erat huiusmodi: Rex Regum Angliberto da Pater atque suus Rex

P. à Basilica Petri

Lex Legum vitam aeternam illi da; quia tu Lex.
Lux Lucem semper concede illi, quia tu Lux
Pax pacem illi perpetuam dona quia tu Pax.

Sed quia sensim in inscriptionibus sepulcralibus impressimus veterum instituta examini subiceremus. Innumeris propemodum modis inscriptiones ad tumulos, quos monumenta ex eo, quod caracteribus aliquid monerent et suggererent memoriae, unde et antonomastice Memorias, et titulos dicebant, inveniuntur. Nolo me meumque Lectorem exempla congerendo defatigare. Quod faciendum breviter mihi propono est ex iis quae eruditissimus Kirchmannus et quatuor libris, et Appendice de funeribus Romanorum sparsim ex veteribus lapidibus relegit ad intentum suum prout res ferebat corroborandum, interpretationem sepulcralium caracterum exponere. non omnium quidem, quae quis sibi depponderet? sed communium, et magis obviorum. Igitur fere in omnibus huiuscemodi titulis in fronte reperies D. M. vel D.M.S. vel D.I.M. quae sic legas Diis Manibus, Diis Manibus sacrum. vel Sacris. Diis Inferis Manibus. His enim Diis sacrabantur sepulcra. Deinde solet nomen inscribi defuncti. Quod si ipse sibi tumulum paravit in casu recto, si heredes vel filii, vel amici in Dativo legitur. Sed quia nomina non unius ordinis sunt in interpretandis his caracteribus C. M. L. et cet. veritatem edicere est omnino divinare. Quare rectius Caium, quam Cuthum, Marcum, quam Marcum, Lucium, quam Lucius etc. Hoc unum coniicere potes Caium, Marcum, Lucium, et ... inter praenomina consuetudine poni; Nomina vero ubérioribus literis ex... invenies.

Quia sestertius continebat duas libras et semissem. Quae autem librae et dimidia continebant mille sestertios, siue mille nummos. [illegible] agit Fortunius Liceti [illegible] ampullis autem lacrymarum nuper [illegible] [illegible] examinatae mentionem faceri. Docuit me Patruus meus Nicolaus Pradiscius [illegible] me non tam sanguinis [illegible] quam [illegible] ejus eruditione magnopere [illegible], ut [illegible] equidem sibi vidissent ampullas vitreas in urnis sepulcralibus in pago Pradisiano [illegible] ut [illegible] [illegible] absconditas [illegible] ampullas vitreas, cum quibusdam ferreis instrumentis inventas sunt, quas omnia [illegible] suo non [illegible] me docuit, in qua consuevisse veteres lacrimas [illegible] interveniente superstitiosa diligentia colligere et in [illegible] argumentum [illegible] [illegible] in vitreis asservatas reponere. Sed a sepulcris [illegible] tantisper discedamus, nam [illegible] [illegible] est interim ad [illegible] catholicos ritus divertamus.

Anno [illegible] catholicus noster officia [illegible] in exequiis [illegible] [illegible] unus alter dies habent ad suffragia eiusdem animae destinata. [illegible] 34 [illegible] dies [illegible] in quibus [illegible] [illegible] sunt [illegible] [illegible] Quadragesimus [illegible] [illegible] et Anniversarium. Horum multiplicia mysteria quid eundem [illegible] est. Verum in praesenti consuetudine [illegible] [illegible] Septimum [illegible] Trigesimum et Anniversarium [illegible]. In his enim solemnis spiritualia mysteria continentur. [illegible] enim [illegible] suffragia [illegible] [illegible] [illegible] die [illegible] [illegible] [illegible] mediantibus [illegible] animae [illegible] ad [illegible] aeternitatis [illegible]. [illegible] dies [illegible] [illegible] [illegible] requietionis et sabbati Domini [illegible]. Ad quam requiem aeternam pervenire defunctus optatur. Trigesimus dies sicut [illegible] [illegible] [illegible] [illegible] [illegible] observatur quia [illegible] [illegible] diebus [illegible] Luna [illegible] et [illegible] [illegible] [illegible] [illegible] non [illegible] Luna [illegible] [illegible]

ad sedem immortalitatis [illegible] credidit ad [illegible] anima [illegible]. Hoc idem explica per anniversarium. Sol enim in anno toto [illegible] absolvit, sicut luna in mensem. Per tempora vero [illegible] in vestitu, in conviviis, in supellectilibus inter familias [illegible] [illegible], videlicet atro, [illegible] amictu incedentes, ut pro ut fa[illegible] mos tolerat. Durant autem luctus indicia pro qualitate defuncti. Quanto enim sanguine proximior est tanto magis luctus protrahitur. Quanto vero distat eo magis contrahitur. [illegible] etiam ratio est, quod si ante septennium desiit nullum signum communiter a consanguineis ostenditur. Sed enim stola innocentiae non foedata per baptismum in caelo [illegible] elatus creditur, inde non luctus sed gaudia conveniunt. Mediocriter autem in [illegible] morte luctus intervenit, minusque durat quam in morte Parentum, qui per annum extenditur, atque omnium observatissimus. In morte Principum, Regumque atrati apparent Proceres, Palatini [illegible] ceterique aulae ministri per annum, ultra [illegible] protrahi non solet. Sed haec ulteriori commentario non indigent, quae in dies videntur etiam a nolentibus.

Igitur ad veteres revertamur [illegible] ceremonias [illegible], et Christiana religio addiscat. [illegible] [illegible] [illegible] [illegible] [illegible]. Flebant enim dies, quibus [illegible] cineres defunctorum [illegible]. Principes autem novus a morte erat, qui communiter ipsius sepelitionis dies erat. solemnitatem hanc (loquitur de festo Cathedrae S. del loro esercito; s'abusasse della sua autorità in oppressione de' sudditi a tal

segno che men male per essi sarebbe stato il continuare sotto il giogo de'

barbari, che non aver a soffrire un tal governo da' Greci. L'Imperadore di

[illegible] invenzione si commosse [illegible] alle doglianze de' Latini e comunicato

l'affare a Sofia sua consorte, [illegible] femmi:

nile [illegible] maggiormente il fuoco contro Narsete, [illegible]

femminile mestiere, il suo vizio naturale poiché era Eunuco. [illegible]

[illegible] questo procedere, e da questo [illegible], e massimamente [illegible]

[illegible], rispose non aver [illegible] co' Romani

[illegible] meritarsi tal pena; e quanto alla vanità di Sofia, soggiunse

eam sibi telam orsurum, quam neque ipsa neque maritus ejus dum

viverent, retexere possent, insinuando con ciò la chiamata de' Lon-

gobardi in Italia che poi effettuò. Non istimando bene di andarsi

della Corte contro se sì mal intenzionata [illegible]

avendo

avendo provato e conosciuto [illegible] valore de' Longobardi [illegible]
[illegible], venuti già chiamati in aiuto nella guerra contro de' Goti;
[illegible] della loro opera per venire a capo de' suoi disegni, e [illegible] all'Imperio [illegible] Italia, [illegible] loro [illegible] opportunità, che si presentava d'impadronirsi di sì [illegible] e ferace paese del quale, per [illegible] maggiormente, mandò loro de' frutti, e de' vini. [illegible] istoria però della chiamata de' Longobardi in Italia attribuita a Narsete, che pure avanti del Sigonio fu scritta da Paolo Diacono [illegible] viene ritrovata dal nostro Baronio [illegible] in vita Justiniani lib. 3. et 4. col quale mostra che già Narsete prima di quest'anno, in cui vien creduto esser stati chiamati in Italia i Longobardi, [illegible] era già stato mandato [illegible] il governo d'Italia Longino. Vedasi lo stesso all'anno di Cristo [illegible] e 568. n.º X. et seq. Ma o invitati da Narsete o non invitati, [illegible] fu, che vennero i Longobardi a' danni d'Italia.

Segnali orribili avvenuti della venuta de' Longobardi in Italia

[illegible] la loro venuta tutto [illegible] dell'[illegible] [illegible], che non pochi si persuasero essere [illegible] dell'estremo giudizio, e della fine del mondo. [illegible] in questa persuasione vedevo [illegible] le timide femmine: [illegible] [illegible] in Cristian[illegible] [illegible] tirano [illegible] [illegible]

Luca: Erunt signa in sole luna et stellis, et in terris pressura gentium &c. applica queste predizioni [illegible] rato del Giudizio alle miserie de' tempi suoi e vedendone molte d'esse omai verificate dall'evento, non metteva più in dubbio la [illegible] degli altri. Cum multa pronunciata jam completa sint, dubium non est [illegible] [illegible] [illegible]. Ed in vero pare che quando [illegible] [illegible] [illegible] mandare alcun [illegible], ed esemplare [illegible] correre certi portenti nella natura, onde gli uomini da' que' segni ed effetti che non possono attribuirsi ad altri che al braccio divino, conoscano che non è da porsi in dubbio ciò che [illegible] vien dietro [illegible] [illegible] [illegible] poste in progetto, che colla venuta de' Longobardi soffrì l'Italia si può arguire da quanto fecero allor che vennero come amici al [illegible] soccorso. Procopio lib. 3. de bel. [illegible] dopo avere narrato la vittoria ch'ebbe [illegible] de' Goti colla morte di [illegible] Re, dice che [illegible] liberarsi [illegible] [illegible] spedizione seguito, per le gravi ribalderie che commettevano, onde dati loro de' danari rimandolli tantosto alle loro terre [illegible] tati dalle bande di soldati di Valeriano e Damiano. §. IV.

Discesa de' Longobardi in Italia, e prime loro conquiste.

[illegible] aggravato dunque di questi portenti, e colla vanguardia di
[illegible] orrore sotto la condotta d'Alboino vennero i Longobardi in Italia,
lasciata la Pannonia, in cui secondo Paolo Diacono [illegible] per qua-
ranta [illegible] anni avevano [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] dell'anno 568. [illegible] a' confini d'essa, [illegible] [illegible] [illegible]

Ferrari in Lexic. Geog. coll'autorità di Lazio, è posto nelle nostre Alpi
Giulie. Mons Regis [illegible] [illegible] teste Laz. [illegible] inter Carnos et Noricos

[illegible] dal Sigonio e da Paolo Diacono che la nostra Provincia del Friuli
[illegible] la prima a soffrire l'incursione de' barbari. Poiche [illegible]
nostri confini presero Aquileia, da cui già al romore della loro ve-
nuta e il Patriarca Paolino co' tesori e reliquie [illegible] [illegible] [illegible]

[illegible] l'anno seguente Alboino
[illegible] nella Venezia [illegible] Treviso cui mi
[illegible] Vescovo della Città
[illegible] si mostrò
[illegible] Paolo Diacono [illegible]
[illegible] concessit et per suum Pragmaticum ro-
borata firmavit. Guadagnato Treviso passò alla conquista di Vicen-
za, di Verona, e dell'altre Città della Venezia sino all'Adda, lascian-
[illegible] Mantova e Cremona, quod aut remotio-
[illegible] aut maiore presidio defensa, dice il Sigonio [illegible]
[illegible] seguente 570 di Cristo passato l'Adda entrò nella [illegible]
[illegible] grande [illegible] le Città di Brescia, Bergamo, Como, ed
altre di questa Provincia, giunse sino alla Metropoli di Milano;
[illegible] atterrita [illegible] minacciose [illegible] Arcivescovo, che per meglio
arrendersi. Quivi Alboino fu salutato Re da' suoi, dice il Sigo-
[illegible] regium convenerunt. Al questo fu il
Princ

principio del Regno de' Longobardi in Italia. Era la somma delle im-
prese d'Alboino l'avere espugnato con l'assedio la Città di Pavia, [illegible]
in altro de' tempi in cui distrutto da Attila Milano aveva in essa Teodo-
rico piantata la sua Reggia. La Città come principale essendo ben mu-
nita pensò Alboino espugnarla con l'assedio, che di fatti per tre anni
sostenne. In questo mentre lasciata buona parte della sua armata intor-
no d'essa, coll'altra passò alla conquista dell'Emilia, in cui prese
Tortona, Piacenza, Parma, e Brescello; dell'Umbria, in cui prese Spole-
to; e della Toscana, che quasi tutta soggiogò. Un tale avvanzamento del-
l'armi de' Longobardi non potè essere contrastato da potenza di sorta; at-
teso che sì per la peste antecedentemente sofferta sì per la carestia presente
l'Italia da se non valeva a resistere; ed anche perchè ne Longino
che presiedeva per gl'Imperadori d'Oriente, non aveva gente da opporre;
ne gl'Imperadori a lui somministravano il modo di difenderla e ripa-
rarla.

§. V.

Alboino primo Re de' Longobardi in Pavia. Sua morte, e quella de' suoi successori.

[illegible] dopo queste conquiste ricondusse i soldati vincitori al-
l'assedio della Città di Pavia, quale alla fine doppo tre anni
d'assedio, colle per fame si arrendette. Aperte dunque le porte al
Trionfante, avvenne un caso maraviglioso. Cadde [illegible]
porta di S. Giovanni per cui entrava Alboino il cavallo sul quale se-
deva; ne per incitamento o battiture non mai voleva levarsi. Uno
de suoi disse al Re che ritrattasse [illegible]

[illegible] annoiato della
[illegible] residenza aveva [illegible] e fermato [illegible] fatto [illegible]
il cavallo rizzossi ed il Re potè proseguire il suo camino sino
alla Reggia che fu già di [illegible]: ed ivi accolse il popolo, che
venne a prestargli ubbidienza. Questo fu l'ingresso e lo stabili:
mento de' Longobardi in Italia sotto la condotta d'Alboino, quale dopo
tre anni e mezzo di reggenza fu tolto dal mondo. La cagione di ques
ta: aveva ucciso in guerra Alboino già Cunimondo suo suocero e pa=
dre di Rosimunda sua moglie; e del cranio dell'ucciso aveva fatto
una tazza [illegible] veduta già da Paolo Diacono che scrive il fatto
[illegible] 568. In [illegible] trovandosi in Verona, per torre la bevanda
[illegible] motteggiandola che con suo padre dovesse [illegible]:
[illegible] la Regina per questo motteggio, disegnò [illegible] su la vi:

restò morto per man di Peredeo [illegible] una certa scala, e compiangendo altamente da' Longobardi [illegible] che aspettando il regno aveva diviso a Rosimunda e se l'avea presa dopo la morte del Re in moglie venne in tant'odio [illegible] consorte presso de' Longobardi, che di ciò entrambi [illegible] meglio ricorrere a Longino che stava in Ravenna [illegible] un navigio opportuno, su cui si salvassero [illegible] notte tempo Rosimunda ed Elmige in Ravenna [illegible] seco Albsuinda figlia di Alboino [illegible] eva presso il Re. [illegible] alcuni [illegible] vedeo, quale poi con Rosimunda fusse da Longino mandato a Costantinopoli, e colà finisse i suoi giorni acciecato. La donna superba e sanguinaria credendo migliorar di condizione col nuovo maritaggio ad Elmige un dì [illegible] una tazza di veleno col pretesto di [illegible] con una salutar bevanda. Egli, bevutane buona parte, ed accorgendosi del tradimento, fu tosto col pugnale addosso alla scelerata costringendola a bevere il rimanente. Così entrambi in un'ora stessa morirono. Tale fu il fine d'Alboino primo Re de' Longobardi in Italia, e de' suoi uccisori. Vediamo ora il fine di questo Regno.

Clefone, Autari, Agilulfo, Aistulfo Re. Esarcato tolto a' Lombardi da Pipino, e donato alla Chiesa.

[illegible] ciascheduno nella sua Città dominava, e sotto cui ebbe
a soffrire [illegible] maggiori calamità l'Italia. Dopo que' dieci
anni fu creato Flavio Autari Re sotto cui secondo il Sigonio, i Lon-
gobardi conobbero il Cristianesimo; ma essendo allora lo scisma d'Elia
Patriarca Aquileiese in piedi (per la qual sede avevano della
parzialità i [illegible] onde da essi venne sostentato il titolo di Patriarca
a questa [illegible]) seguivono l'opinione e la credenza Ariana. Ma
il successore di questi, che fu Agilulfo, ebbe in consorte Teodelin-
da, [illegible] come buona Cattolica ebbe corrispondenza col magno S.

ghi [illegible], che secondo Paolo Diacono Lib. 4. c. 6. colla
sua [illegible] e buone insinuazioni introdusse il marito alla
credenza Cattolica. Huius salubri supplicatione Rex permotus,

gobardi si portava d'una simil maniera, che avendo occupato l'Esar-

Petro se et successoribus ejus traditurum jurasse. Desiderio ultimo Re de' Longobardi: sconvolgimenti in Roma ed in Ravenna a sua sommossa: Carlo Magno prende, ma presto ripudia Berta figliuola di Desiderio.

Ad Astolfo [illegible] succedè Desiderio non per eredità, ma quasi dissi, per invasione. Mentre essendo egli Duca del Ducato di Toscana, radunate [illegible] milizie, colla opportunità della vacanza della corona si fece dichiarare Re da' suoi, e successore del Regno d'Astolfo, di cui era già stato Contestabile. Ciò inteso da Rachis fratello d'Astolfo, che s'era fatto monaco, non [illegible] [illegible] monistero non cercasse entrar in possesso del Regno. Favoriva le sue pretensioni il disgusto che avevano dell'esaltazione di Desiderio i principali de' Longobardi [illegible] radunate le loro genti dalla Venezia [illegible] [illegible] [illegible] s'apparecchiavano colla [illegible] a resistere al nuovo Re. In questo frangente ricorse egli al Papa, promettendogli la restituzione di Faenza, Ferrara ed altre città non [illegible] [illegible] restituite [illegible] [illegible] [illegible] sua protezione, o colla sua autorità lo conservasse [illegible] [illegible] dal Papa quanto chiedeva [illegible] Rachis [illegible] [illegible] [illegible] [illegible] monachismo. I Longobardi, vedendo assistito [illegible] [illegible] [illegible] armi de' Romani non solo, ma de' Franzesi [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] Re [illegible] [illegible] [illegible] [illegible] in [illegible] si mai colla Chiesa, nè co' Ponte[illegible] [illegible] [illegible] [illegible] volentieri contro. con più di rabbia e di violenza. Presero già [illegible] nuo-
ve novità che sempre mai sono ne' governi pericolose nella Città di
Roma dal male, di cui anche morì Paolo Pontefice. Commossa dunque
di Desiderio Totone Duca di Nepi nella Toscana entrò in Roma [illegible]
armata, e colla violenza costrinse Giorgio Vescovo [illegible]
crear Costantino suo fratello in Pontefice [illegible]
disordine, poiche [illegible] con [illegible] di
Costantino, rimosso con gravi inconvenienza [illegible]

invettive, e fatta una [illegible] convocazione degli elettori, fece crea-
re Pontefice Stefano Terzo [illegible] questi
mandò oratori a Pipino Re di Francia [illegible] trova-
ronlo morto. Desiderio poi come aveva tentato colla Chiesa di Roma,
[illegible] fece con quella di Ravenna, nella quale per la morte di Sergio
cercò col mezzo di Maurizio Duca di Rimini introdurre Michele
ancor laico in quella chiesa. Ma non gli andò fatta, poichè minac-
ciato colle censure dal Pontefice [illegible]
[illegible]
[illegible] trovava [illegible] il Doge
di Venezia mandò col Patriarca di quella sede i suoi Legati
a Stefano Papa per [illegible], quale morto trovarono il
[illegible] Pontefice che conosciuta la perfidia de' Longobardi
[illegible] fece ogni sforzo, perchè non seguisse il matrimonio fra Berta
figlia di Desiderio, e Carlo Magno figlio di Pipino per [illegible]

[illegible] Bertrada, [illegible] Carlo s'era già sposata [illegible].
Il Card. Baronio recita la lettera che loro scrisse all'anno di Cristo
770. n.° IX. Eccone alcune parole d'essa lettera indiritta a Carlomanno
e Carlo Magno figliuoli di Pipino. *Quæ est enim, præcellentissimi*
filii, magni Reges, talis desipientia, ut penitus vel dici liceat,

luatur, quæ in numero gentium nequaquam computatur, de cujus
natione et leprosorum genus oriri certum est. [illegible] ad [illegible]

cos esse et de inimicis inimicos: sicut et nos in eadem sponsione fir-
miter dignoscimur permanere: Et quomodo nunc contra animas ves-
tras agere contenditis, et cum nostris inimicis conjunctionem fa-
cere vultis; dum ipsa perjura Longobardorum gens semper Ec-
clesiam Dei expugnantes, et hanc nostram Romanorum provinciam
invadentes nostri esse comprobantur inimici? E conchiudendo ac-

Dalla quale esortazione e dalle quasi minaccie Carlo però avvertito nel proseguimento delle nozze, poichè non ci avverte alcuno, se l'impegno preso dalla Madre non ve l'avesse fatto acconsentire. Riconob[illegible] si però con animo si crede, che potessi nel terrore della scomunica del Pontefice, [illegible] [illegible] al Padre Desiderio come mal sana ed inetta alla Proc. e Bar. [illegible] n. III.

§. VIII

Desiderio in vendetta del rifiuto della Figliola invade l'Esarcato: minaccia Roma, cui con frode si accosta: ma atterrito dalla minacciata scomunica sen ritorna.

Sdegnato per questo rifiuto Desiderio non lasciava passar occasione di vendicarsi. E morto Carlomanno Fratello di Carlo [illegible] valendosi in tutela [illegible] lui veneva co' figli [illegible] Esso dopo Stefano, Adriano Pontefice, tentò di far [illegible] i Re i figlioli di Carlomanno, e ognora [illegible] Che però volle prima procurare di ristabilire l'antica alleanza colla Chiesa, e sotto questo colore introdussi nell'animo del Papa [illegible] Adriano che era [illegible] [illegible] la favola di cui aveva rotta già a S. Pietro stesso [illegible] cui aveva giurato ed ingannato Stefano suo predecessore. Vedendo egli che il suo disegno non era per questa via secondato, si voltò

[illegible] e [illegible] ser-
vava, Comacchio, e Faenza, minacciando stringere in capo di ciò Ra-
venna. I Ravennati nel medesimo tempo vedendosi di queste inva-
sioni, e manifestando le loro angustie al Papa mandò legazioni a
Desiderio per farli conoscere i suoi doveri, ma senza pro; anzi che
[illegible] varij [illegible] che tutto col ridurre a terra [illegible]
Legazione agli occhi lo supplicavano, finalmente rispose, che anche la
Città stessa di Roma, [illegible]

[illegible] vedova di Carloman
[illegible] venne a Roma per motivo di religione e per
[illegible] dicono [illegible]
[illegible] induceva a credere tutt'altro che divo-
zione [illegible] un certo Andrea Referendario con
[illegible] sua venuta a Roma [illegible]
[illegible] gli rispose, che vedesse bene con che animo
[illegible] anda [illegible]; poiche egli era risoluto di non conce[illegible]
[illegible], se prima non restituiva il mal tolto alla Chiesa. Fece frattanto
[illegible] e munire le torri di Roma con buone guardie e fè serrar bene
[illegible] di SS. Pietro e Paolo che eran fuori di Roma, [illegible]
entro le mura, e chiuse le porte [illegible] se volesse in esse en-
trare non potesse farlo che colla violenza. Frattando conce[illegible]

[illegible] attesa la scomunica [illegible] nomina [illegible] [illegible] [illegible] Francia [illegible] [illegible] [illegible] [illegible] [illegible] quello di Tivoli, che il Sigonio lib. 3. de Regno Ital. chiama il primo Eustazio, il secondo Andrea, ed il terzo Teodosio; concordando così anche con Anastasio presso il Baronio an. 773. nº V. che tali pure li nomina. Discorda però il Sigonio da Anastasio nell'affermare [illegible] in cui [illegible] la scomunica [illegible] [illegible] [illegible] Anastasio [illegible] [illegible] [illegible] Paolo Emilio lib. 2. de gestis Francor. in Carolo [illegible] dicendo che in [illegible] in qualunque modo ciò seguisse, il vero si è, [illegible] da tutti questi Storici che questa minaccia [illegible] [illegible] Longobardo dalla sua intrapresa. [illegible] dice qui il Cardinal Baronio: grande miraculum, [illegible] excommunicationis [illegible] continere juvenem regem, ejusque atque suorum impetum coercere, [illegible] [illegible] verbere. Tanta erat etiam apud [illegible] in [illegible] excommunicationis sententia timor, &c.

Legazioni del Papa a Carlo Magno, di Carlo e del Papa a Desiderio.

Venuta di Carlo Magno in Italia

Non aveva però il Pontefice, come prudentissimo, lasciato di ricorrere in questo mentre a' mezzi umani; già aveva mandata una Legazione a Carlo Magno Re di Francia per trarre non promettendo di [illegible] a' [illegible] Longobardi

Alcuni dicono che senz'altra battaglia intimorito Desiderio si ritirasse in Pavia, ed a questi inclina il Sigonio; altri che seguisse una campale giornata e con tale mortalità che desse il nome a Mortara, luogo dov'ella successe, così il Belleforest, e Paolo Emilio, quale aggiunge, che le madri e mogli de' morti in questo scompiglio, avventatesi contra Desiderio, che aveva rotta la pace co' Francesi, colle pietre alla mano lo lapidassero.

§. X

Carlo assedia Desiderio in Pavia: ricupera altre Città d'Italia: è accolto con giubilo in Roma dal Pontefice: Torna all'assedio di Pavia, che si rende. Desiderio preso.

Ritiratosi dunque Desiderio in Pavia, Carlo vi si pose sotto col suo esercito. Ma sapendo, che Adelgiso figlio di Desiderio s'era ritirato con Berta vedova di Carlomanno e suoi figli in Verona, lasciato il comando [illegible] a Bernardo, egli colà portossi con parte delle sue genti. Temendo il peggior Adelgiso scappò [illegible] dalla Città, e salvossi in Grecia. I Veronesi [illegible] renderono [illegible] venuta Berta co' Nipoti in potere di Carlo, [illegible] essi altra vendetta, che di mandarli in Francia ove continuò a trattarli da' suoi pari. Proseguì poi colle stesse milizie il corso della sua prospera fortuna, ricuperando altre città prima di rimettersi di nuovo sotto Pavia. Finalmente colà ritornato dopo sei mesi d'assedio s'invogliò di celebrare la Pasqua, che non era lontana, in Roma, ove giunto il Sabbato Santo fu accolto da Papa Adriano con tutte le dimostrazioni di stima e d'affetto, e dal popolo tutto con quelle

Quanto sia potente la forza della propria Religione su gli animi degli uomini. Lezione XII.

§. I.

Religione è tutto propria dell'uomo

I sentimenti di Religione sono così propri dell'uomo che da [illegible] ne chiama [illegible] [illegible] generis humani [illegible] [illegible], insitam innatam secum [illegible] naturam [illegible] mortali[illegible] [illegible] initiatore [illegible] [illegible] sapient. cap. 10. [illegible] non ha temuto di dire che la principale e [illegible] [illegible] sola differenza di esso da' [illegible] è la Religione [illegible] hominis, atque mutorum vel precipua, vel sola distantia. Nam ceteraque videntur homini esse propria, dice egli nel secondo de luoghi citati, et si non sint talia in mutis, tamen similia videri possunt; e più sotto: Quod si horum omnium, que diximus homini [illegible] in mutis quoque [illegible] similitudines [illegible] esse Religionem, cuius in mutis nec vestigium [illegible] nec [illegible] suspicio inveniri potest. E altrove mostra che il riconoscere la [...]

Divinità sia come una necessaria condizione della nostra nascita e [illegible] essere nostro. Hac conditione gignimur dice [illegible] lib. 4. Divinarum Institut. cap. 28. ut generanti nos Deo, justa et debita obsequia præbeamus; hunc solum novimus, hunc sequamur. Hoc vinculo pietatis [illegible] religati sumus, unde ipsa Religio nomen accepit. (Ed la Religione, dice Desiderio Eraldo animad. ad lib. 4. Arnobii, in sacro errore onde siam compresi e come stretti coll' opinione delle cose divine [illegible] Religio proprie novero [illegible] significat, quum res divinæ, et vim humanam superantes nobis [illegible] [illegible] quasi constricti teneamur, ac animi mentem [illegible] convertens [illegible] Virgil. VIII. Æneid.

Jam tum Religio [illegible] [illegible]

[illegible]

[illegible] [illegible] [illegible] [illegible] [illegible]

[illegible] signo coercet nos, et quasi religatos tenet. Da questi vincoli non può spicciarsi l'animo umano. Onde Aristotele [illegible] de Cœlo cap. [illegible] tex. [illegible] diceva che tutti gli uomini convengono [illegible] [illegible] [illegible] qualunque Divinità e non meno i Greci [illegible] Barbari [illegible] il Cielo per luogo [illegible] omnes homines de diis opinionem existimationem, et omnes eum qui [illegible] est locum Deo tribuunt et Barbari et Græci. Se pertanto si contano alcuni passar per Atei, ed aver negata ogni Divinità, [illegible] loro errore è stato più di volontà depravata, che di [illegible], ed avrebbero voluto che non vi fosse ma non che essi [illegible]

fossero persuasi che non vi sia. Davide ha detto nel Salmo 13. v. 1., che solo un uomo senza cervello può lasciarsi entrar in cuore questa empietà, che non sia Dio. Dixit insipiens in corde suo: non est Deus.

§. II

Cagioni d'error in materia di Religione. Religione d'maggiori massima di Politica

Prevenuti gli uomini da questo chiarissimo lume di ragione, che vi sia Dio, si sentono tantosto e di conseguenza stretti, e [illegible] ad un particolare riconoscimento della divinità appresa, che è la Religione. La varietà poi delle Religioni è un convincentissimo testimonio dell'error preso nel riconoscimento della divinità. Questo errore nasce (dice Lattanzio lib. 4. Divin. Instit. cap. 3.) dal vedersi diviso [illegible] gli uomini il studio della Religione con quello della sapienza, Hoc fallimur quod aut Religionem suscipiunt omissa sapientia, aut sapientiae soli student omissa Religione, cum alterum sine altero esse non possit verum. Vediamo ora le cagioni più particolari della varietà delle Religioni, e d'un sì grande avvertimento del loro errore nella Religione [illegible] di Luca [illegible] lo stato [illegible] contro i [illegible] Causa item ad [illegible] (cioè in materia di Religione) vel illiciens vel compellens, nisi fallor alia nulla existit, nisi aut auctoritas, aut ratio, aut miracula, aut vis, aut voluntas, vel simul omnia, vel horum aliqua. Ma perchè gli uomini non veggono facilmente avere errato, è una verità che sieno persuasi di loro Religione, ma rimanere ne'

errore.

[illegible] che essi non sentito i loro maggiori, attac-
cato essi pertinacemente al culto intrapreso, che non s'induco-
no a lasciarlo [illegible] se non colla vita. In quin-
di è stata la sì grande difficoltà nel disseminare la Legge Evan-
gelica e le [illegible] contradizioni, che ha incontrate, che l'avere
[illegible], è uno de' maggiori argomenti di sua credibilità. Ogni
novità in materia di Religione fa orrore, ed [illegible]

Cristiana, la novità del loro instituto intrapreso, come una vera
impietà per l'antica Religione abbandonata. Quis [illegible] summe

rità [illegible] fore qui cum ab eorum cultu defecerint quos ab omnis

bibus quam in agris, omni sacrorum religionum, ac mysteriorum
genere, communique Regum omnium, Legum-latorum ac Philosopho-
rum approbatione Deos coluerunt, tum vero quid qui inter ho-
mines omnium a Diis invisum erat [illegible] vindi? Quis item

amicorum necessariorumque mores atque ritus, inconsiderate atque
temere abjicere? Questa tenacità della religione de' suoi maggiori
[illegible] per buona massima di governo. Perciò [illegible]

accurate observabant ne a patribus acceptum quidquam vel abrogarent, vel ultra consueta adderent. Hoc enim [illegible] maxime [illegible] [illegible] metiebantur: sed eorum rituum observatione, quae eis majores tradiderant. E i Romani ancora n'erano imbevuti di questo principio sin dal tempo di Numa Pompilio, di cui scrive Livio lib. 1. c. 20. Omnia publica privataque sacra Pontificis scitis subjecit, ut esset quo consultum plebs veniret, ne quid divini juris negligendo patrios ritus, peregrinosque asciscendo, turbaretur. Quindi ne' tempi più vicini di Roma si scusa Evandro di non aver prese in [illegible] [illegible] forestieri [illegible] tà, che faceva la superstizione [illegible] [illegible] lib. 8. v. 187

Dei nuovi, o peregrini numi [illegible], e scacciati da' Greci, e da' Romani

Cotta presso lo stesso Cicerone nel principio del terzo libro de Na-

Deorum immortalium, ullius unquam oratio aut docti aut indocti mo-

i Romani, come scacciarono alcune nove Deità, e ne vietarono il loro
culto. [illegible] Serapidem et Isidem et Arpocratem cum

Incostanza de' Romani: non volevan le novelle osservanze, poscia volendo tutti.

Ma come la [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] tante [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] nuove [illegible] [illegible] altro giovane [illegible] [illegible] [illegible] [illegible] tutti. Quindi a' Romani rinfacciò [illegible] [illegible] mutazione in proposito di Religione, scrivendo adversus Gentes, che rimproveravano [illegible] l'haver abbracciata la Religione Cristiana come novella cosa. Si mutare sententiam culpa est [illegible] [illegible] crimen est a veteribus institutis in alias res novas demutare [illegible] migrare, [illegible] [illegible] ista eo vos [illegible] [illegible] [illegible]. Tertulliano poc'anzi citato fa pur loro la stessa rampogna; che avendo ricusato i loro antichi Padri il culto di Serapide e d'Iside [illegible] [illegible] [illegible] eorum [illegible], [illegible] [illegible] [illegible] summam majestatem [illegible] [illegible] [illegible]? ubi veneratio majoribus debita à vobis? Evocazione rito e formola di chiamare gli Dei tutelari delle Città assediate. Cautele dei Romani, e d'altre Nazioni per non restar abbandonati da' loro Dei.

Oltre questa universale ricettazione degli Dei delle Genti straniere aggiunto da' Romani dall'avere stesa la loro dominazione, come dice San Leone, su quasi tutte le genti; erano soliti praticare ~~i Romani~~ in ciascuna Città o Nazione una delle prime loro premure si era il chiamare a se gli Dei del luogo o Provincia, con quel rito che chiamavano Evocazione. Ella è descritta da Macrobio lib. 3. Saturn. cap. 9. così: Constat omnes urbes in alicujus Dei esse tutela: moremque Romanorum arcanum et multis ignotum fuisse, ut cum obsiderent urbem hostium, eamque jam capi posse confiderent, certo carmine evocarent tutelares Deos, quod aut aliter urbem capi posse non crederent, aut etiam si posset, nefas existimarent Deos habere captivos. La formola dell'evocazione era concepita in questi termini ch'egli dice [illegible] aver trovati in Sammonico Sereno lib. 5. rerum reconditarum [illegible] in [illegible] antichissimo libro [illegible] Furio [illegible] Sammonico [illegible] ve trovati aveva. Si Deus, si Dea est, cui populus, civitasque Carthaginiensis est in tutela, teque maxime ille, qui urbis hujus populique tutelam recepisti, precor venerorque, veniamque a vobis peto ut vos populum civitatemque Carthaginiensem deseratis:

Si ita feceritis, voveo vobis templa ludosque facturum. Propterea [illegible] Romani, dice Macrobio [illegible] et Deum in cujus tutela urbs Roma est, et ipsius urbis Latinum nomen ignotum esse voluerunt [illegible] Romanis, ne quod [illegible] adversus urbes hostium [illegible] [illegible] [illegible] [illegible] evocazione paterentur, [illegible] suo nomen [illegible]. Che però Valerio Sorano, come vien detto presso di Plutarco in quaest. Rom. q. 61, [illegible] malamente [illegible] enunciare tal nome. [illegible] siccome ([illegible] di Plutarco) [illegible] tenevano legati con catene i simulacri de' loro (dei [illegible] [illegible], ed altri per custodirsi [illegible] [illegible], [illegible] avveniva di [illegible] [illegible] [illegible] o [illegible] care per lavarli, o per altra lustrazione, non lo facevano senza [illegible] ricevere [illegible] [illegible] che [illegible] di ritorno [illegible]

così i Romani non meglio pensavano d'assicurarsi di non venir abbandonati da' loro Dei, che quando il loro nome non fosse saputo. *Tyrii vincula injicere simulacris dicunt; alii autem cum ea ad lavacrum aut lustrationem aliquam deducunt, fidejussores pro iis [illegible] Romani tacitissime ac constantissime asservari [illegible] devunt, qui [illegible] de nomine nobis aliis esset.* Sono parole di Plutarco.

§. I.

Cagione ed origine dei sogni difficile a rinvenirsi.

Non è così facile a mio parere, il rendere [illegible] causa de' sogni in particolare. Sono questi effetti [illegible] capricciosi che se per un verso pare che dipendano [illegible] [illegible]. Anzi la ragione stessa generale del perchè e del come [illegible] [illegible], non è uniformemente assegnata da' [illegible] secondo la varietà de loro principj. Diciamo però [illegible] ciò che ci sembra più probabile in generale; e [illegible] me, se possiamo giungere poi a rintracciare la causa [illegible] [illegible] d'alcun sogno: per cagion d'esempio, per qual [illegible] [illegible] d'esser punto da qualche biscia, e per [illegible] sogno subitamente [illegible] si svegli, e con timore [illegible]

§. V.

Passioni dell'animo, terza cagione de' sogni.

Ci siamo ora la terza cagione ed origine, onde avvenir possano in particolare i sogni. Questa si tiene dalla parte dell'anima; ma di quella parte che porzione inferiore si chiama [illegible] se le sue passioni. Perchè queste operano le disposizioni del nostro corpo, ne siegue che per la stessa via [illegible] gli stessi spiriti al cervello, cagionino rappresentazioni e sogni conformi alle passioni, onde siamo agitati. Non è dubbio alcuno che [illegible] ancora nel [illegible] la passione dello sdegno coll'infiammar[illegible] accender[illegible]: l'allegrezza col renderlo sereno ed armonico: e così delle altre. Onde se questi effetti materiali e palpabili si [illegible] nel nostro composto; e dunque operano così in noi le passioni dell'animo; non è punto maraviglia, che ancora al cervello [illegible] da questi umori che nella tale passione restano commossi, trasportati [illegible] o di [illegible]re, o d'allegrezza, o di sdegno, giusta la qualità delle passioni che gli commossero. Da quindi poi ne siegue che ascendendo al cervello gli spiriti affetti delle qualità degli umori agitati dalle passioni [illegible] loro natura. Da questa

[illegible]

[illegible] ragione, per cui uno, che viva in inimicizie si sogni facil[illegible] e risse, o' incontri di nemici: effetti o di furore o di timore seco [illegible] la passione che nella sua condotta predomina. Chi teme sogna [illegible]ti. Chi ama, sogna amori. Chi gode, sogna piaceri. Il che [illegible] accennato ne' versi poc'anzi riportati di Petronio, singolarmen[illegible]te in questi che dicono:

Etenim non ipsi displicet in operibus manuum suarum versari mens hominum, et rerum creatarum investigationem non vetat, suadet. Os homini sublime dedit, et in sublimitate originis sublimesque illius amorem cognitionis non tantum inferioris, rerum superiorum, sed, imo ipsius divinitatis perstrinxit.
